*Caring for your future*

Dear Patient,

We have some great news!! We have added a natural treatment for Neuropathy to our practice and I'm honored to be able to offer this to my patients and their families. Over the past few years, I've been researching to effectively treat this debilitating condition using a new combination of therapies and supplements without having to resort to prescription drugs. Neuropathy is debilitating and 30+ million people struggle.

Neuropathy is numbness, burning, tingling, etc. most commonly in the feet but can also be in the hands, hips and thighs too. There are 4 Stages of Neuropathy (like cancer). Like any other disease, it only gets worse over time without treatment. Simple activities like walking, sleeping, wearing shoes become hard and eventually impossible. You know neuropathy is bad when your balance starts to be affected.

There are more than 100 known causes of neuropathy, but the common denominator is ischemia (lacking proper blood flow) and hypoxia (lacking proper oxygen). The symptoms are the result of your tissues and nerves literally dying. Gabapentin, Lyrica and antidepressants are the common approaches in medicine, however these do **NOTHING** to treat the underlying lack of blood and oxygen. Eventually, this is why MANY with neuropathy eventually get their toes, feet or legs **AMPUTATED**.

I've recently completed special training in addressing peripheral neuropathy by using the latest technology to not only **STOP** it, but **REVERSE** it as much as possible.

Our office is examining our current patients to see if you or someone you know is a candidate for this treatment program. What does this include? For \$49:

- An in-depth consultation where I listen...really listen...to the details of your situation.
- A 24 point neuropathy examination including high-tech comprehensive testing.
- A full written report of the exam and test results.
- If your tests show that you are a candidate for care, we will be up front with what treatment options and investments are available. And if you are too far gone, we are up front with that as well.

Neuropathy doesn't have to be the end of enjoying life. We hate to hear that someone is having difficulty walking or experienced amputation because they didn't seek viable treatments.

We are here to help and serve you. If you or someone you know is suffering with this awful condition, call our clinic to schedule a neuropathy evaluation ASAP, 605-256-2964.

Best Regards,
