Evian, agua natural de manantial – Informe anual de la calidad del agua

En Evian, estamos orgullosos de la calidad de nuestros productos. El agua de manantial natural Evian se distribuye a nivel nacional y cumple con o supera todos los estándares de calidad y seguridad para el agua embotellada, tanto a nivel federal como estatal. *La Administración de Alimentos y Medicamentos de los Estados Unidos (FDA)* regula el agua embotellada como un alimento. Nuestros científicos y laboratorios certificados independientes realizan exhaustivas pruebas tanto en la fuente de agua como en el producto embotellado final, para garantizar que superamos o cumplimos con todos los requisitos federales y estatales aplicables al agua embotellada.

Nos enorgullece el hecho de que nuestra planta de producción de agua embotellada sea inspeccionada anualmente, sin previo aviso, por una organización de pruebas independiente: NSF International (NSF). NSF certifica que el agua de manantial natural Evian cumple con las normativas federales y estatales sobre agua embotellada. NSF tiene su sede en Ann Arbor, Michigan. Para obtener más información sobre NSF, visite su sitio web en http://www.nsf.org o llame a NSF al 1-800-673-6275.

Fuente de agua de manantial natural Evian
El agua de manantial natural Evian comienza su viaje en forma de lluvia y nieve en la cima de los Alpes franceses. Cada gota de Evian tarda al menos 15 años en filtrarse a través de las formaciones de arena glacial de los Alpes franceses. Es también durante este largo viaje que Evian adquiere su composición mineral única y equilibrada. La composición mineral del agua de manantial Evian ha permanecido inalterada desde que se registró por primera vez en 1807, lo cual constituye una prueba adicional de su calidad.

Embotellamiento de Evian, Agua Natural de Manantial
El agua mineral natural Evian se embotella exclusivamente en su manantial natural protegido (el Manantial Cachat), situado justo al pie de los Alpes franceses, lejos de cualquier desarrollo urbano o industrial. El nombre del manantial Cachat figura claramente en la etiqueta de Evian. La fuente de Evian ha sido aprobada por diversas agencias reguladoras tras una revisión detallada y exhaustiva.

La alta calidad de Evian, tanto en el manantial como después del embotellado, se controla mediante pruebas analíticas. Estas pruebas verifican que el agua cumpla o supere todos los estándares de calidad para el agua embotellada. Diariamente se realizan varios cientos de pruebas, tanto en el manantial —antes de que el agua sea embotellada— como en el producto terminado, para verificar la constancia de la composición mineral, la ausencia de contaminación y la calidad de las botellas de plástico. Las tuberías de acero inoxidable que conectan directamente el manantial con la planta, así como los equipos de llenado, están diseñados para proteger la calidad del agua de manantial Evian; a estos se suma el equipo de embotellado automatizado.

Datos sobre la calidad del agua
Se adjunta una copia de nuestros análisis exhaustivos más recientes sobre la calidad del agua, realizados por NSF. El informe de NSF detalla los resultados de las pruebas de calidad del agua para más de 175 sustancias, incluyendo compuestos inorgánicos (metales, minerales, etc.), compuestos orgánicos (pesticidas, herbicidas, etc.) y agentes microbianos, así como parámetros físicos. Este informe incluye las sustancias analizadas, el método de prueba aprobado utilizado, el resultado de la prueba, el límite mínimo de detección, la unidad de medida, la fecha del análisis y el estándar de calidad de la FDA para el agua embotellada, cuando corresponda. Los estándares de calidad de la FDA establecen los niveles máximos permitidos para más de 80 sustancias en el agua embotellada.

Evian, Agua Natural de manantial, se encuentra en pleno cumplimiento de todas leyes federal, estatales.

Notes:

1) Bottled water sold in the United States shall not contain Fluoride in excess of the levels published by the USFDA in 21 CFR Part 165.110. These levels are based on the annual average of maximum daily air temperatures at the location where the bottled water is sold at retail. Please refer to the most current edition of the regulation to determine the Fluoride maximum level that pertains to your product.
2) A blank on the FDA SOQ column indicates that no maximum level has been established by the FDA for that contaminant.
3) An ND result means that the contaminant was not detected at or above the reporting limit.

Notes:

1) Bottled water sold in the United States shall not contain Fluoride in excess of the levels published by the USFDA in 21 CFR Part 165.110. These levels are based on the annual average of maximum daily air temperatures at the location where the bottled water is sold at retail. Please refer to the most current edition of the regulation to determine the Fluoride maximum level that pertains to your product.
2) A blank on the FDA SOQ column indicates that no maximum level has been established by the FDA for that contaminant.
3) An ND result means that the contaminant was not detected at or above the reporting limit.
