Indeed & IdealTraits Integrations

Indeed Apply

Indeed Apply is a feature that allows employers to increase job seeker applications by streamlining the application process, while also increasing candidate quality through screening questions. Indeed Apply also allows job seekers to apply quickly using an Indeed Resume.

When you post a job through IdealTraits, you are automatically opted-in to the Indeed Apply Integration. To opt-out of Indeed Apply, please send your request to product@idealtraits.com and we will disable Indeed Apply for your account.

Indeed Job Sync API

IdealTraits has integrated with **Indeed's Job Sync API** to streamline your hiring process. With this integration, your job postings are automatically submitted to Indeed, allowing candidates to apply directly through Indeed Apply and have their application data seamlessly delivered to your IdealTraits account. The **Job Sync API** provides real-time job posting updates, enables Indeed Apply for a smoother candidate experience, and delivers applicant data directly into the ATS without delays. All accounts are automatically opted into this integration, but if you prefer to opt out, you can send a request to product@idealtraits.com.

Indeed Sponsored Jobs Integration

Indeed Sponsored Jobs Integration allows you the opportunity to sponsor your job ads through Indeed, directly from your IdealTraits account. This is an *optional* integration for all IdealTraits clients. If you're interested in sponsoring your job with world's #1 job site,[1] check out this article.
