

National 4-H Livestock Judging Contest

November 2021

Hampshire Rams

Scenario

[This scenario is similar to but not a direct copy of the scenario used at contest]

Rank these rams for a commercial market lamb operation. More than adequate labor resources are available to maintain the flock of commercial ewes and feed offspring to a desired weight.

Offspring is fed out and sent to harvest.

NSIP Estimated Breeding Values

Ram	BW	% Born	WW	% Weaned	Post Weaning Gain
1	0.38	-.014	4.25	-.004	6.54
2	0.12	-.023	0.09	-.005	0.66
3	0.17	-.014	2.79	-.004	4.31
4	0.21	-.015	1.05	-.005	1.35
