

Class 9 Keep/Cull: Southdown Ewes

with Expected Breeding Values

Select these Southdown ewes to be placed in a show lamb producing operation. The owner is trying to increase their lambing percentage at birth and at weaning to have more lambs to market to exhibitors.

In addition, this operation is really trying to find the genetics that show more resistance to parasites to cut down on the amount of de-wormer they need to purchase. The ram battery consists of bucks that have bled RR, NN, EDF.

	Lambs Born	Labms Weaned	Fecal Egg	Scrapie
