

2022 Illinois State FFA Livestock CDE

Keep/Cull Hampshire Ewes

Select these ewes as replacements for a purebred Hampshire flock located in Central Illinois.

The ewes selected will be bred to a new stud buck whose codon 171 genotype is QR. Income from this operation comes from the following sources: the sale of scrapie-resistant stud bucks in national sales, the sale of bred ewes over 4 years of age through an online auction, and the sale of ewe lambs through consignment sales to junior exhibitors.

Please rank the ewes in the order they should be selected to maximize profit potential.

ID	Born	Reared	60d Wt	120d Wt	Codon 171
1	TW	TW	62	122	RR
2	S	S	70	131	QQ
3	TW	TW	65	133	RR
4	TR	TW	58	129	RR
