

2022 Michigan 4H/FFA

Performance Angus Heifers

Rank these heifers as replacement females for a purebred operation in northern Indiana. These females will be mated to Angus bulls to create purebred seedstock that are sold private treaty. The producer has developed a strong customer base due to their incredibly maternal daughters and commercially driven bulls that cater to the Midwest and southeast. All cull progeny will be retained through a local feedlot.

Feed and labor resources are adequate.
