

2022 Michigan 4H/FFA

Performance Wether Dams

Rank these ewes as replacements in a progressive club lamb flock in Michigan. Primary income from this operation is derived from marketing competitive show wethers and ewes to 4-H and FFA members to compete on the county, state, and national levels. In addition, this operation has made a genetic impact through artificial insemination and flushes select females each year.

Feed and labor resources are adequate.

Rams utilized for this upcoming breeding season bleed QRFF.
