

2022 North Texas Stockman's

Performance Red Angus Heifers

Rank these heifers as replacements in a purebred seed stock operation in southern Oklahoma. This operation's primary goal is to sell maternally driven replacement females and aged bulls to other purebred operations. The top 10% of heifers will be retained in the herd, and the rest will be sold in the annual production sale held every spring.

ID	BW	WW	YW	CEM	MILK	CED
1	-1.1	76	112	8.6	28	13.4
2	-0.6	68	108	8.0	28	13.0
