Percentage Simmental Heifers

Number	DOB	CED	BW	WW	YW	MILK	MARB	REA	API	TI
1	2/12	+8.4	+2.4	+78	+101	+23	+0.12	+0.41	109	74
2	3/2	+14.1	+1.0	+87	+129	+24	+0.44	+0.82	146	87
3	3/15	+16.1	+2.6	+77	+116	+27	+0.51	+0.64	145	80
4	3/20	+10.9	+1.6	+88	+128	+24	+0.30	+0.97	134	86
Breed Averages		+12.4	+0.3	+76	+117	+23	+0.32	+0.67	131	79

Rank these heifers as replacements in a high profile, Simmental outfit located in the Flint Hills region that features outstanding females in an intense embryo transfer program. Primary income is derived through two annual production sales.

The spring event targets commercial cattlemen in the region and includes approximately 100 purebred and percentage bulls. In the fall, select show heifer prospects, bred heifers, and young cows comprise the sale offering. This program has built a reputation for Simmental influenced cattle that blend growth and maternal traits. At the same time, management has taken great pride as a pioneer in selecting for improved carcass genetics.

**API stands for All-Purpose Index

**TI stand for Terminal Index
