

Tarleton Invitational

March 2023

Keep/Cull Breeding Heifers

Rank these females as potential replacements for a progressive Hereford operation located in Central Texas that generates the majority of ranch revenue through two annual bull sales. Not only do bull buyers focus on calving ease, maternal growth, and carcass traits, but drought driven herd reductions have also led to a greater interest in retaining crossbred replacements.

The ranch also sells show prospects and registered breeding stock private treaty.

Number	BW	WW	YW	MM	\$CHB
