Donor Dams

This set of young ewes is from the nucleus of a donor program that is constantly retooling the lineup of females they program and put under the knife multiple times a year. This program has hung their hat on marketing their lamb crops at live sale events in the fall and spring.

New to their marketing plan is a bred ewe, open donor and frozen genetics live sale at the end of the month. With the intent to always accelerate the donor program forward, they know and understand they must sell some of their best while being in the prime of their generating life.

This string of donors is available at the end of the month; it is your job to line them up in the order in which you would purchase them, with the intention of maximizing your investment by marketing their progeny in the Customer Appreciation portion of this program's live sale events hosted on their farm.

#	DOB	DNA	Sire	Dam	Revenue Generated	Flush History
1	2023	RR FD	Macho	Drake x El Chapo	\$17,000	Flushed 4 times with an embryo average of 8
2	2023	RR FD	Wizard	County Line x Patron	\$33,000	Flushed 5 times with an embryo average of 5
3	2023	RR FD	Macho	Payoff x Mudcat	\$24,000	Flushed 5 times with an embryo average of 5.4
4	2023	QR FD	Wizard	County Line x Patron	\$17,000	Flushed 2 times with an embryo average of 6
