

2025 National 4-H

November 2025

Yorkshire Gilts

Evaluate these Yorkshire gilts as prospective replacements for a national seedstock producer. The females will be bred to Yorkshire boars, with marketable offspring targeted toward competitive junior shows. Retained progeny will later be crossed with terminal boars to produce qualified purebred-influenced pigs for light crossbred classes. Structural integrity—especially feet—is essential, as all females are housed on a slatted concrete environment.
