April 2026

## Hampshire Ewes

Evaluate this class of Hampshire ewes as potential replacements for a progressive operation specializing in producing wether sires and club lambs for 4-H and FFA exhibitors. This operation retains the top 20% of ewe lambs to strengthen the flock's maternal function, while the most promising ram prospects are developed into sires to be sold to breeders targeting the competitive club lamb sector. In your rankings, prioritize phenotypic quality and maternal traits, as these are key selection criteria for this program.

No	Birth Type	Rear Type	Maternal Milk	Codon 171	120 Day Wt.	Dwarf Gene
1	S	S	0.7	RR	89	FF
2	TW	S	1.6	RR	83	FF
3	TW	S	2.5	RR	100	FD
4	TW	TW	2.5	RR	97	FF
5	S	TW	1.2	QR	86	FD
6	TW	TW	2.9	RR	107	FF
7	S	S	2.0	RR	98	DD
8	TW	TW	3.1	RR	102	FF
