2026 North Carolina FFA

March 2026
Commercial Heifers

Rank these commercial heifers, as they should be selected for a diversified livestock operation in Eastern NC looking to add to the cowherd. Calves will be sold as feeder calves in video truckload sales. No heifer calves are retained. Calves that do not fit the truckloads are backgrounded and then finished in a small feedlot marketed through local freezer beef sales. The program utilizes high growth homozygous black bulls. The operation farms row crops and has hog houses that take up the majority of their time. Cattle are often viewed as a secondary priority and utilize as part of the waste management plan.

Lot	ID	DOB	BW	WW	YW	REA	IMF	PM	RTS
1	04N	1/2/25	68	675	1010	12.9	3.2	210	5
2	14N	1/29/25	72	600	994	8.9	2.8	190	4
3	16N	2/02/25	65	545	870	8.5	2.9	181	4
4	26N	1/10/25	73	478	792	8.1	3.0	162	5

- Weaning weights adjusted to 205 days of age
- Yearling weights adjusted to 365 days of age
- PM: Pelvic Measurement in centimeters
- RTS: Repro Tract Score

Heifers provided by NCSU E. Carroll Joyner Beef Education Unit, and will be sold in the Wolfpack Round Up sale April 18.
