Performance Angus Heifers 1

Provided by CK Cattle Hope Hull, AL

Rank these heifers as they should be selected for use in an Angus seedstock operation in Central Alabama. This operation seeks to produce moderate, easy fleshing females with the ability to shed hair in the spring. This operation's bull customers primarily sell calves at weaning, and many retain replacement females.

Number	Tag	DOB	BW	WW	HS	Milk	\$W	\$M
1	M170	9/12/2024	1	86	0.25	25	86	86
2	M181	9/15/2024	0.9	87	0.19	26	88	88
3	M220	9/13/2024	1.1	73	0.35	27	74	75
4	M774	9/11/2024	1.2	74	0.34	26	75	75
Average			1.3	68	0.49	26	64	65

HS: Hair Shed (lower # = more shedding)
