

# 2026 Texas 4-H

June 2026

## Performance Brahman Bulls

Rank these bulls as they should be selected for use on both cows and heifers in Southeast Texas. Through the years, the ranch has developed a cow herd that is well adapted to this region of the U.S., where the weather is warm and humid, and parasites are abundant. The ranch owner is seeking a herd sire to add muscle and skeletal correctness to the herd. Primary income from this operation is generated through the sale of yearling bulls in the Annual Production Sale. Elite heifers will be marketed as Junior show projects, with the remaining top 10% of females kept as replacements.

Bull ID	BW	WW	YW	Milk	SC
1	1.0	15	29	8	0.05
2	2.2	23	36	7	0.15
3	1.5	21	36	7	0.16
4	2.8	17	31	6	0.03
Breed Avg.	1.7	18	29	6	-0.06
