

2021 Washington FFA State Livestock Contest

Red Angus Bulls

Rank these bulls as they should be used in a purebred operation in Northeastern Washington. This outfit has always prided themselves on selling maternally focused bulls that generate excellent replacement females for seedstock producers. However, they still have a strong, loyal customer base of commercial cattle raisers across the PNW area that typically retain all non-replacement quality females and steer progeny through a Southern Idaho feedlot with the opportunity to sell on a balanced grid.

	DOB	BW	WW	YW	Milk	STAY	GM
1	9/01/19	0.1	70	107	28	19	56
2	10/2/19	-1.9	59	88	35	10	36
3	9/15/19	0.8	71	104	25	19	54
4	9/12/19	-0.2	63	100	22	15	44
Breed Avg.		-1.7	59	95	25	15	37

STAY = Stayability: predicts the probability of a bull's daughters remaining productive until at least six years of age.

GM = GridMaster: Use the GridMaster Index if your operation's primary goal is maximizing profitability of feeders in the feedyard and on the rail.
