

Name: \_\_\_\_\_ Date: \_\_\_\_\_

Complete the other half of this butterfly. Use the red points as a reference for the mirror image. Connect the reflected points smoothly to complete the butterfly.

1. Look at your completed butterfly. How can you tell that both sides match? Describe what you notice.

---

2. Imagine folding the butterfly along the middle line. What would happen? Explain your thinking.

---

3. Use a ruler to measure from one point to the middle line. Then measure from its matching point to the middle line. What do you notice about the two measurements?

---

## Answer Key

1. Both sides are the same shape and size.
2. The two sides would line up exactly.
3. The measurements are the same. Matching points are the same distance from the line.
