

Name: _____ Date: _____

Complete the other half of this butterfly.

1. What did you use to help you place each matching point correctly?

2. Choose two different pairs of matching points. How many squares is each point from the middle line?

3. Why is the middle line important when you reflect a shape?

Answer Key

1. I counted squares on the grid to make sure each point was the same distance from the middle line.
2. The matching points are the same number of squares from the middle line.
3. The middle line shows where to reflect the shape. It helps both sides match.
