President Clinton
The White House
1600 Pennsylvania Avenue, N.W.
Washington, D.C. 20500

Dear President Clinton:

It is my pleasure, as Chairman of the Computer Systems Policy Project (CSPP), to present you with our report outlining CSPP's vision for a national information infrastructure for the 21st century and recommendations for action that will help to make our vision a reality.

As America looks toward the future, we need to take bold steps to put our strengths to work to rekindle economic growth, remain competitive abroad, and create the kinds of jobs that will enable Americans to raise their standard of living. We believe that a national commitment to creating a national information infrastructure is one of the bold steps we need to take.

The public and private sectors each have important roles in building an information infrastructure that will dramatically change the way Americans live, work, and educate themselves. While the development and deployment of the infrastructure must be led by the private sector, the federal government can accelerate its implementation by acting as a catalyst and coordinator.

We look forward to working with you and your Administration, the 103rd Congress, and a wide range of industries and academic institutions to accelerate the creation of an information infrastructure.

Sincerely,

John Sculley
CEO, Apple Computer, Inc.
and Chair, Computer Systems
Policy Project
