**PRESIDENT WILLIAM J. CLINTON
RADIO ACTUALITY ON SALMON
THE WHITE HOUSE
July 27, 2000**

Today, my Administration is proposing a comprehensive strategy to bring back the wild salmon of the Pacific Northwest. We propose a practical course that will allow both the economy and the environment to flourish. Congress must also do its part by fully funding my salmon restoration budget. And the people of the region must be prepared to take the necessary steps. Only in partnership with state and tribal governments can we restore the salmon without resorting to harsher measures. I welcome the recommendations of the region's governors, and look forward to working together to ensure our success.
