MEMORANDUM TO THE PRESIDENT

CC: JOHN PODESTA

FROM: LORETTA UCELLI *LUC*
STEPHANIE STREET *SS*
MINYON MOORE *MM*

SUBJECT: LOCATION OF AUG. 15TH EVENT WITH VICE PRESIDENT

Based on extensive discussions with the Vice President's campaign, we have narrowed down travel options for your joint event on August 15th. The campaign had originally wanted to visit a site along the 1992 post-convention bus tour, but now would like to focus on a site in Michigan. They want to both highlight the enormous prosperity experienced in Michigan since 1992 and to position the Vice President as the candidate who can be counted on to continue that prosperity. An event in Michigan also would allow the campaign to reach a significant amount of persuadable voters as well as mobilize the traditional Democratic base.

Below are descriptions of three cities – Monroe, Wyandotte and Lansing – that provide good venues for the high-energy, large crowd event we are trying to create, and symbolizes the progress we've achieved as a nation over the last 8 years. If you approve of these sites, we would like to propose them to the Vice President's campaign for a final decision. Please note that you will have to depart your hotel at 6:00 AM in order to make press filing deadlines in Michigan.

MONROE, MI

Monroe, a medium-sized city of 21,000 people, is located in the southeastern corner of Michigan along the coast of Lake Erie and at the mouth of the River Raisin. It is about 35 miles from Detroit, 15 miles from Toledo, Ohio, and 35 miles from Ann Arbor. Monroe, the largest city of the "downriver" communities south of Detroit, is located in Rep. John Dingell's district. Monroe is being targeted by the Stabenow Senate campaign and the Michigan House Democratic Caucus.

Since 1993, Monroe has enjoyed significant economic growth, indicated by a drop in the unemployment rate for Monroe County from 8.8% to 2.2% as of May 2000. The median household income grew from \$39, 671 to \$49, 068 in Monroe County, well above the national average of \$40,525.

8-500
Copied
Ucelli
Street
Moore
Podesta
Heinreich

Monroe, Michigan's second oldest city, has the look of a typical American town with storefronts and a town square. It was named after President James Monroe, and was the site of a battle and massacre during the War of 1812 and is known for its rich history. Monroe is supported by a diverse economy, including the auto and steel industries, paper products and agriculture. It is the childhood home of General George Armstrong Custer. Given Monroe's proximity to major cities such as Detroit and Toledo, we would be able to draw a large, energetic crowd for the event.

WYANDOTTE, MI

Wyandotte, a medium-sized city of 31,000 people, is located in Wayne County just outside of Detroit. A city of 13 parks along the Detroit River, Wyandotte is represented by Congressman John Dingell. Mayor Lawrence Stec, a non-partisan, is very supportive of your Administration. In 1996, you attended a large rally at the Wyandotte town library and gained significant national press when you read "The Little Train That Could" to a local youth.

Over the last 8 years, Wayne County's economy has significantly improved, and a number of communities in the county have flourished, with increasing wages and improved economic opportunities. Unemployment in Wayne County is down from 10% in 1993 to a low 3.3% in May 2000. In addition, Wayne County has experienced dramatic improvements in the quality of its environmental resources. From the Rouge River clean-up to the designation of the Detroit River as a "Heritage River," the Administration's commitment to both protecting the environment and growing the economy is well evident in Wayne County.

Given its proximity to Detroit, we would be able to draw a large, energetic crowd to Wyandotte. Further, according to recent polling, an event in the Detroit media market, specifically Wayne County, would reach almost a half million persuadable voters.

LANSING, MI

Lansing, a city of 173,000 people located in the south central part of Michigan, is represented by Congresswoman Debbie Stabenow, a Senate candidate. It is slightly more diverse than other Michigan cities, with an 11% African American and 5% Hispanic population. The mayor, David Hollister, is a Democrat and very supportive of your Administration.

Since 1992, the economy has surged in Lansing, with a drop in the unemployment rate from 6.4% in 1993 to 2.6% in May, 2000. It recently underwent a number of major downtown economic development projects, including the renovation of its "Old Town" area of the city. Historically an auto town, Lansing's economy is becoming increasingly diversified. As you know, Lansing is home to Michigan State, this year's NCAA men's basketball champions.

Over the last 8 years, the Clinton-Gore Administration has had a strong presence in Lansing, with a number of trips there by both you and the Vice President. Your Administration has also done much to improve quality of life in Lansing, including providing over \$2.7 million to the

8-3-00

Lansing School District to prevent gun violence, cleaning up 2 Superfund sites, and funding 6 COPS officers and 12 Americorps programs.

Given that Lansing was the site of one of our largest crowd events during the 1992 campaign, we feel we could easily create a large, energetic event to both mobilize the Democratic base and reach out to undecided voters.

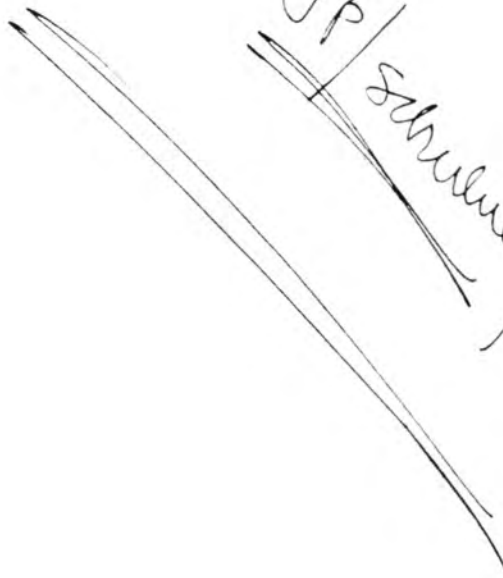

Which of the 3 do you prefer?

- A. **Monroe** ____
- B. **Wyandotte** ____
- C. **Lansing** ____
- D. **Discuss** ____

any OK
when - should
do what's best
for UP, Stabenow
Monroe might
help in Detroit
but I'm OK as
any of the 3 -
work for UP, ~~etc~~

ACTION

MEMORANDUM FOR THE PRESIDENT

FROM: SAMUEL BERGER
GENE SPERLING
CHARLES M. BRAIN

SUBJECT: Computer Export Control Reform

Copied
Berger
NSC staff
Sperling
Brain
Podesta

PURPOSE

To adjust export controls on high performance computers.

BACKGROUND

You have revised controls on high performance computer (HPC) exports four times since 1993 based on consensus recommendations from the Departments of Defense, Commerce, State, and Energy. These agencies continue to review developments in computer technology, and, based on their most recent analysis, have unanimously recommended further adjustments to HPC controls. The National Security Council and the National Economic Council support these recommendations.

DISCUSSION

We use a four-tiered computer export control system that distinguishes risk by country and end-user. No licenses are required for Tier 1 countries (friends and allies). For Tier 2 states, which present low proliferation risk, licenses are needed for systems above 33,000 MTOPS (Millions of Theoretical Operations per Second). For Tier 3 countries, which present higher proliferation risks, licenses are needed for exports above 20,000 MTOPS to civilian end-users, and above 12,500 MTOPS for military end-users. Generally, no computer exports are permitted to Tier 4 (the terrorist-supporting countries).

Also, the 1998 Defense Authorization Act (NDAA) requires that U.S. companies provide the USG prior notice of exports for systems above a certain performance level to all Tier 3 end-

cc: Vice President
Chief of Staff

users. The Commerce Department then tells exporters within ten days if an export license is needed. Based on your February 2000 decision, the current notice level of 6,500 MTOPS will rise to 12,500 MTOPS on August 14, at the end of the required six-month Congressional notification period. The FY 2001 Defense Authorization bill, if enacted, would change the six-month period to two months for future changes to the NDAA level.

National Security Applications. The Department of Defense has reaffirmed its previous assessment that there are no meaningful breakpoints in computer performance levels for most national security applications. DoD finds there are many sensitive military applications that are or can be performed on very low performance systems, as well as very high performance systems. Likewise, the Department of Energy has reaffirmed its assessment that computer speed is not the most critical element in nuclear weapons design work; the quality of the codes and the capability and experience of the designers are more important to determining the competence of a nuclear weapon's design.

Technology trends. Continued improvement in and widespread availability of computer components and software make it increasingly easy to assemble and maintain high performance systems without U.S. vendor support. For example, when the Intel Corporation releases its "Foster" processor in the spring of 2001, the speed of the standard chip made for use in desktop systems, workstations and servers will have increased by a factor of 16 since your 1995 decision took effect. It is clear that general-purpose chips like the Foster are not controllable: they are made in huge quantities, are highly portable, and are used in virtually all consumer and business computers, millions of which are sold by U.S., European and Asian manufacturers through multiple distribution channels worldwide.

Tier 3 Changes. Two to eight processor computers are the most widely used in business. Current controls permit the license-free export of systems with up to four processors (12,500 MTOPS) to Tier 3 military end-users and up to eight processors (20,000 MTOPS) to Tier 3 civil end-users. This distinction is based on the previous judgement of the national security agencies that there is a difference in the availability and ease of upgrade/assembly between four and eight processor systems.

Agencies now judge that the "4-way/8-way" distinction no longer exists due to improvements in, and worldwide availability of, single processors, boards, chipsets, and operating systems. Agencies thus recommend merging the civil and military licensing

levels for Tier 3. Agencies further recommend setting the Tier 3 licensing and NDAA notification levels at the eight-processor level. An "8-way" system using the processors that will be available for general-purpose business systems by spring 2001 will be rated at approximately 28,000 MTOPS.

Finally, based on improvements to its export control system and continued good cooperation on export controls, agencies recommend moving Estonia from Tier 3 to Tier 2. If you approve, the change to the NDAA notice level and the movement of Estonia to Tier 2 will go into effect 180 days and 120 days, respectively, after we report your decision to Congress.

Additional Actions. Agencies have agreed to raise the Tier 2 level from 30,000 MTOPS to 45,000 MTOPS, and to move Argentina from Tier 2 to Tier 1. These changes do not require action on your part. Agencies should finalize their recommendations for a new computer export control metric by fall 2000.

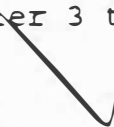

Industry Reaction. We believe the computer industry will support these changes.

Congressional reaction. Congress has taken no action to override your July 1999 or February 2000 decisions to raise the NDAA notification level other than to commission General Accounting Office analyses of those actions.

RECOMMENDATION

That you approve the consensus recommendations as follows:

- Remove the civil/military distinction in Tier 3;
- Change the Tier 3 licensing and NDAA notification levels to 28,000 MTOPS; and
- Move Estonia from Tier 3 to Tier 2.

July 25, 2000

President Bill Clinton
The White House

Dear Mr. President:

First, I would like to say that it saddens me greatly to know that your term is ending in November. I have worked diligently for the past several years with Jan Paschal, the Secretary's Regional Representative for the U.S. Department of Education and your friend. I was very motivated by Jan and her own personal mission for children. Then I met you, twice in Connecticut and once in Massachusetts. As you may recall, I was the catalyst and the financier for the *Every Child is Ours* initiative.

I would like to say that in all of my years, you are by far the greatest President we have ever had. Having grown up in the inner city projects and one of the few that made it, I will always remember how much you cared for people like me. It had a great impact on me.

In the several years that I have been traveling with Jan, on my own time and at my own expense, we have visited and lectured in the inner city schools throughout the northeast. This has not gone unrecognized. I received the John Stanford Hero in Education award from you and Secretary Riley and the Director's Community Leadership Award from FBI Director Louis Freeh. It now appears that Showtime would like to do a movie on my life.

I created a Foundation called the Kids for Life Foundation that offers mentoring programs for inner city kids throughout the northeast. I initiated and am part of the program between the United States Department of Education and the Federal Bureau of Investigation throughout New England working with inner city years. It has been an incredibly successful program and has had a significant impact on the children in High Schools.

I, myself, am a tenth degree black belt and have been in the martial arts for thirty years. Prior to martial arts, when I lived in the projects, I fought out of the Rocky Marciano gym in Brockton, Massachusetts. I have been in health and fitness for thirty-five years of my life and as a martial artist have reached the pinnacle of my career by achieving status as the only non-Asian in China's history to be made an Ambassador, Grandmaster, and Disciple of China's Shaolin Temples. This was telecast this past June to over four hundred million people. I only tell you this, because I am deeply concerned about the physical well being of the children in our country. As you know, we are at an all time high for obesity in children, which perpetuates a variety of additional behavioral and emotional problems. Not to mention, this greatly affects them academically and in many

other areas of life. I own thirty martial arts studios with over five thousand students, mostly children. It is evident that this can have a significant impact on their physical, academic and social levels of life.

About two years ago, through my friend Jan, I was fortunate to have lunch at the Mess with Bob Nash. We spoke about the President's Fitness Council and that I would be a great asset to this council. He thought I would have a good chance to get on. I was happy to just be considered. I know that it is a Presidential appointment. I didn't feel comfortable writing you about it. Several months went by, and after two dinners and meetings with Ruth, I was told this was all approved. Ruth told me that there would be a few vacancies in December (1999), I was to be appointed to your council either way. I was just waiting for the paperwork to go through. Several months passed, not a word and I knew Ruth had taken another position. I corresponded with Bob Nash's people and they told me I was the first one at the top of the list and it was just a matter of time. I was told that the President wanted to revamp the council and my appointment would be part of that process. Today, I found out that I would not be appointed. I was basically told that I would have to reapply with the new administration. I only write this letter because I know that this would concern you. I believe that I would be an asset to your council and would be always a strong advocate of what you stand for and how you feel about children. Having been with Jan for so many years, so often, sometimes daily for weeks at a time, I felt that I knew you personally. I have spoken on the same stage as Carol Rasco and Bonnie Campbell and many other people that you have appointed. I am certain they would give a personal reference for me. I hope that you will be able to do something before you leave. If not, I thank you in advance for taking the time to read this.

Regardless of what happens, you will still be the greatest President in my lifetime.

Sincerely,

Stephen B. DeMasco

Dear President Clinton,

At the suggestion of a mutual friend of ours, I am contacting you regarding the imminent disclosure regarding unacknowledged projects related to so-called UFOs, extraterrestrial intelligence and advanced energy and propulsion systems.

Our group has obtained the needed assets to effect this disclosure between now and the end of your term of office. For this reason we feel it is important that you be properly briefed on these developments as they will certainly impact your administration and your legacy.

I wish to emphasize that we feel you and your administration have been victims of excessive secrecy on these and related projects – secrecy which is so extreme that it has escaped the constitutional oversight required by our system of government. Indeed, it is our assessment that previous administrations since Eisenhower have similarly been denied proper access and oversight of such programs.

Nevertheless, the upcoming disclosure will certainly bring to the fore these issues and you and your administration will be implicated in one of two ways unless certain actions are taken: Either you will be perceived as being complicit in the secrecy- or, perhaps worse, not being in control of or involved with these projects and the upcoming disclosure.

This disclosure will involve the following elements:

- The disclosure by several dozen top-secret government and government contractor witnesses of information regarding specific events and projects related to military, industrial and intelligence involvement with so-called UFOs, extraterrestrial intelligence and associated exotic energy and propulsion systems. These witnesses will be from the US, UK, former USSR, Brazil, Italy and other countries. Many of these witnesses have deep insider knowledge of such projects and their coming forward as whistle-blowers will constitute a de facto government disclosure.
- The disclosure will be a news-oriented event with multi-media support and very high profile venues used. The disclosure process will persist for several months beginning this fall.
- The disclosures will encompass the following areas:
 1. Substantial and convincing evidence, testimony, government documents, scientific evidence, radar cases, retrieved extraterrestrial

- devices, reconnaissance programs, intercept programs, photographic and video evidence, hard materiel evidence, etc.
2. Information related to how USAPs (unacknowledged special access projects – see attachments) connected to the subject operate, how they are associated with certain corporations such as Lockheed/Martin, SAIC, Raytheon and others, and how they have escaped proper oversight and control. In short, how secrecy has been maintained for the past 50 years or so will be thoroughly disclosed.
 3. Detailed information related to covert technologies associated with exotic energy and propulsion systems – systems that will enable the earth to have an endless source of energy without pollution and for nominal energy costs. Such technologies are already fully operational but remain hidden within covert USAPs. Once disclosed, these technologies will replace all sources of fossil fuels and nuclear energy. Such a disclosure, while allowing for a long-term sustainable civilization on earth, will also greatly alter the current industrial and economic infrastructure and geo-political order. The implications of such a disclosure cannot be overstated. The exposition of this matter will explain the reasons behind secrecy. (Note that this matter is also being discussed by us with a Senate committee chairman.)

Our purpose for making these disclosures at this time is to return these projects to proper, lawful and constitutional control and oversight; to facilitate a peaceful use of space and an enlightened approach to extraterrestrial civilizations ; and to enable advanced energy and propulsion technologies to be released for peaceful applications which will benefit humanity and the earth's environment.

This disclosure will also enable the organs of democracy to properly handle the challenges, both diplomatic and technological, related to the subject.

As the United States' President, we are especially concerned that you and your administration may not be aware of the serious –even grave – security risks arising from continued secrecy on this subject. Briefly, these include:

- The unacknowledged covert agenda related to the SDI/Ballistic Missile Defense System insofar as it relates to space-based weapon systems which are in part designed to target objects of extraterrestrial origin;
- The planned use of so-called Alien Reproduction Vehicles (ARVs) that are manufactured by covert human programs, to stage a false extraterrestrial attack on conventional military targets, thus providing the rationale for a race into space with costly weapon systems;
- The near-term economic and environmental risks, including an exponential decay in the global ecosystem , resulting from the continued withholding of advanced energy and propulsion systems;
- Growing disparity between industrialized and third world nations which poses a significant threat to world security and which would be greatly ameliorated by the release of these technologies.

This disclosure, which will involve convincing and undeniable testimony and evidence on these and related matters, will certainly affect you and your administration. At a minimum, we feel that you should be fully briefed on these matters and on the timing and logistics of the disclosure itself. Ideally, you would be prepared to either assist or cooperate with these disclosures and provide reassuring leadership as these facts are made public.

Your legacy as a two term President would be forever altered by your identification with a disclosure which would restore democracy, restrain the abuses of the military/intelligence/industrial complex, announce the existence of intelligent life elsewhere in the universe and disclose technologies which will renew the fortunes of the earth and humanity for centuries. Identification with such a disclosure would relegate the current scandals to a mere footnote in history, rather than a central part of your historical legacy.

Indeed, it is our intent that this disclosure, while exposing some of the excesses of secrecy, be primarily focused on the new and sustainable world quite within the grasp of a long-suffering humanity. The price of continued secrecy will be a ruined ecosystem and grave threats to world security while that of disclosure will be a sustainable and just world civilization. This is the true legacy each of us must leave our children.

Our mutual friend mentioned that you are something of a night owl, as am I. Should you deem it appropriate, I would welcome a telephone call at any time convenient to you. Also, we live outside of Charlottesville VA and keep a small coop in DC and I would certainly be willing to discuss these issues with you in person at your convenience.

I have voted for you twice- and would vote for you a third time if that were possible. It is my sincere desire that the upcoming events redound to your legacy as a great world leader who arose to the truly significant challenges of our time to do the right and just thing. I hope we can work together to make that a reality.

Respectfully,

Steven M. Greer MD

DISCLOSURE NEWS PROGRAMMING ANNOUNCEMENT

12 June 2000

Dr. Steven M. Greer announced today that the long-awaited process to disclose definitive evidence and proof regarding extraterrestrial intelligence, UFOs and covert government projects related to the subject has been funded and launched.

Disclosure News Programming (DNP), an investigative reporting news organization, has been formed to spearhead and coordinate this disclosure over the next year. Key features of the project include:

- A prolonged, sustained and coordinated multimedia global release of definitive evidence and the testimony of top secret witnesses about extraterrestrial intelligence, secret and compartmented government programs and advanced technologies related to energy and propulsion systems;
- An integrated strategy which includes a multi-part investigative news special, compendia books and transcripts of government witness testimony, an Internet site dedicated to the disclosure evidence and on-going executive briefings for government, military, scientific, congressional, international, and corporate leaders;
- A de facto international government disclosure by virtue of the large numbers of military, intelligence, government, corporate, scientific and government-related institute witnesses now ready to come forward during this integrated and sustained program;
- A news conference during which top-secret witnesses disclose the full nature of their direct knowledge concerning the subject.

Currently, over 200 top-secret witnesses have been identified in the US, Brazil, United Kingdom, Denmark, Germany, Norway, Belgium, Russia, Italy and other countries. It is important to note that during briefings at the Pentagon and with senior congressional leaders and Executive Branch staff that this civilian effort to disclose this matter has been repeatedly green-lighted and even encouraged.

Disclosure News Programming and its related strategies are supported by a team of senior researchers and consultants with substantial expertise in military affairs, international affairs, national security, science, technology and related areas.

This international team working intensely on the disclosure process has been recently joined by a former senior aerospace executive - a person who has been aware since the 1970s that the Ballistic Missile Defense Program would be used to target extraterrestrial objects in space - even though there is no evidence of any credible threat from these craft.

It has been determined that the combination of accelerating global environmental degradation and the dangers associated with the weaponization of space necessitates a near-term disclosure process. The risks of doing nothing and the benefits to humanity resulting from disclosure make it clear that such an effort - long overdue by most accounts - is now a global imperative.

The public is invited to assist in this project by referring credible government and corporate witnesses who have first-hand knowledge of these covert programs, as well as other evidence and materials, to Disclosure News Programming (DNP).

About Steven M. Greer, M.D.	525

On December 1958, I went to Washington, D.C., to meet with Mr. Woolsey. The cover party consisted of Mr. Woolsey (Chief of Operations) and our host, Mr. Greer. I learned that I was part of the Central Intelligence Agency (CIA) intelligence: information on the

Naturally, I carried with me case evidence, with photographs of UFOs, government documents and pleasant

I learned that one of these UFOs was seen at daylight. So after the meeting, Mr. Woolsey told me about what

This book is a book certainly pre-1958. It is really about me and a handful of these cases. It contains photographs and something very real going on. Why are they here? What are the implications to the facts mean? How do

Dear Mr. Rosenthal,
Please excuse the
quality of this copy
regarding the information
will make up for it.

Sincerely,
Frederick E. Greer
