Congressman
Paul E. Kanjorski

**Select the Upper
Susquehanna-Lackawanna
Watershed as an
American Heritage River**

The designation of the Upper Susquehanna-Lackawanna Watershed as an American Heritage River will help ensure a secure future for Northeastern Pennsylvania in three specific ways.

First, it will allow the community to complete a comprehensive study of the watershed's ecosystem that will then help its leaders to prioritize environmental restoration and natural resource protection projects.

Second, the designation will help to promote economic development and further economic revitalization goals.

Finally, the selection will aid in the improvement of the watershed's cultural, historical, and educational resources.

AMERICAN HERITAGE RIVERS
