CORPORATION FOR NATIONAL SERVICE
COMMUNITY BUILDING OBJECTIVE

8
8-01

GRANTEE: USDA Soil Conservation Service SITE: Webster, Texas

COMPONENTS OF OBJECTIVE STATEMENTS: Build partnerships and develop
a skilled work force to
protect shoreline and
restore wetlands.

1. What work will be done? What service activities will your
participants engage in?
Developing partnerships with other service organizations.
Providing training to participants.

2. What is the hoped for result of the work/activities described
above?
Four (4) meaningful partnerships developed.
Skilled and productive work force.

3. How will you measure the quality of your product or impact of
your service?
Progress of project.

4. By what standard will you gauge success?
100% of partners believe the quality of service delivery has
improved due to the partnership. Productivity of participants.

CORPORATION FOR NATIONAL SERVICE
COMMUNITY SERVICE OBJECTIVE

08-02

8

GRANTEE: USDA Soil Conservation Service SITE: Webster, Texas

COMPONENTS OF OBJECTIVE STATEMENTS: Protect shoreline from erosion along the Texas coast.

1. What work will be done? What service activities will your participants engage in?

Members will establish vegetative covers to protect 5280 feet of Texas Shoreline from erosion.

2. What is the hoped for result of the work/activities described above?

Slow down erosion of shoreline, which usually averages 3 to 4 feet per year. This will protect property and benefit water quality.

3. How will you measure the quality of your product or impact of your service?

Successful establishment of grass and reduction in erosion rates.

4. By what standard will you gauge success?

90% reduction in active shoreline erosion rate.

5. How many individuals will receive the benefit of the work your participants perform?

All citizens of Texas, but in particular residents of the Texas Gulf Coast Region.

CORPORATION FOR NATIONAL SERVICE
COMMUNITY SERVICE OBJECTIVE

08-03

GRANTEE: USDA Soil Conservation Service SITE: Webster, Texas

COMPONENTS OF OBJECTIVE STATEMENTS: Restore 200 acres of wetlands.

1. What work will be done? What service activities will your participants engage in?

Restore 200 acres of dredged area to wetlands by establishing permanent vegetation.

2. What is the hoped for result of the work/activities described above?

Increase use by migratory water fowl and finfish. Also improved water quality.

3. How will you measure the quality of your product or impact of your service?

increase in fish production, water fowl use, and success of re-vegetation efforts.

4. By what standard will you gauge success?

75% vegetation survival rate, 50% increase in use by finfish and fowl.

5. How many individuals will receive the benefit of the work your participants perform?

All of Texas.

CORPORATION FOR NATIONAL SERVICE
COMMUNITY SERVICE OBJECTIVE

09-01

Grantee: USDA Soil Conservation Service
Georgia

Site: Atlanta,

COMPONENTS OF OBJECTIVE STATEMENTS: The AmeriCorps team will provide assistance to improve water quality through effective watershed management activities.

1. What work will be done?

Watershed management/water quality activities. Examples include: streamwatches, streambank stabilization, identification and treatment of contamination sources, storm drain stenciling, park clean-up.

2. What is the hoped for result of the work/activities described above?

An improved watershed condition and improved community awareness of watershed protection.

3. How will you measure the quality of your product or impact of your service?

Square feet of land/streambank stabilized, number of stormdrains stencilled, number of parks cleaned and beautified. Work will be measured by standards and specifications set forth in the SCS Field Office Technical Guide. Sponsor satisfaction and local citizen opinion will also be a measure of our quality.

4. By what standard will you gauge success?

Success will be measured by standards set forth in the SCS Technical guide.

5. How many individuals will receive the benefit of the work your participants perform?

- 5 low-income neighborhoods
- 3 eroding streambanks

CORPORATION FOR NATIONAL SERVICE
COMMUNITY BUILDING OBJECTIVE

09-02

Grantee: USDA Soil Conservation Service
Georgia

Site: Atlanta,

COMPONENTS OF OBJECTIVE STATEMENTS: The AmeriCorps team will increase public awareness of conserving natural resources through conservation education.

1. What activities will you be engaged in?
Educating students/public on conservation. Activities:
Conservation education in classrooms and to scout groups:
participating in public education campaigns.

2. What is the hoped for result of the activities described above?
Improved public awareness of conserving natural resources.

3. How will you measure the quality of these activities?
Increase composting/recycling activities. Surveying schools that were visited.

4. By what standard will you gauge success?
Increased public response.

5. How many individuals will receive the benefit of the work your participants perform?
10 grammar school classrooms: 3 career fairs for high school: 5 public outreach activities (recycle Christmas trees, ...)

9

CORPORATION FOR NATIONAL SERVICE
COMMUNITY SERVICE OBJECTIVE

89-03

Grantee: USDA Soil Conservation Service
Georgia

Site: Atlanta,

COMPONENTS OF OBJECTIVE STATEMENTS: The AmeriCorps team will increase create and operate the pilot Satellite Plant Materials Center located in Acworth, Georgia.

1. What activities will you be engaged in?

Propagation of plant materials for conservation use, assist with pilot Plant Materials Center activities.

2. What is the hoped for result of the activities described above?

Propagation of plant materials for conservation use, increased public awareness of the use of native vegetation to control erosion and improve water quality are the desired results.

3. How will you measure the quality of these activities?

By success of propagation, and success of transferring plant materials to test sites for monitored growth.

4. By what standard will you gauge success?

The standard of success will be measured by specifications set forth in the SCS Technical Guide and standards set by the field office agronomist.

5. How many individuals will receive the benefit of the work your participants perform?

100 people will tour facility and learn about program: Additional benefit from data gathered.

1. What work will be done? What service activities will your
participants engage in?

Garden sites selected and analyzed. Plans for each garden
developed. Gardens prepared for planting, maintained and
harvested.

2. What is the hoped for result of the work/activities described
above?

Fruits and vegetables provided to consumers at a low cost.

3. How will you measure the quality of your product or impact of
your service?

Families diet improved. Career and job opportunities realized.

4. By what standard will you gauge success?

100% of the gardens will be established and produce a harvest.

5. How many individuals will receive the benefit of the work your
participants perform?

450 residents.

CORPORATION FOR NATIONAL SERVICE
COMMUNITY BUILDING OBJECTIVE

13-01

GRANTEE: USDA Soil Conservation Service SITE: Maryland

COMPONENTS OF OBJECTIVE STATEMENTS: Working with the community to be involved in and take ownership of projects completed by AmeriCorps members.

1. What work will be done? What service activities will your participants engage in?
Building partnerships through activities and training for participants for outreach.
2. What is the hoped for result of the work/activities described above?
Three partnerships will be developed
3. How will you measure the quality of your product or impact of your service?
Evaluation forms for feedback from the community.
4. By what standard will you gauge success?
By the end of the program, participants will be able to train others and work with groups as leaders.

CORPORATION FOR NATIONAL SERVICE
COMMUNITY BUILDING OBJECTIVE

13-02

GRANTEE: USDA Soil Conservation Service SITE: Maryland

COMPONENTS OF OBJECTIVE STATEMENTS: Transfer successes to other communities

1. What work will be done? What service activities will your participants engage in?
Have team members make presentations on their work products to other organizations.

2. What is the hoped for result of the work/activities described above?
Three presentations will be made

3. How will you measure the quality of your product or impact of your service?
Evaluation forms for feedback from the community after presentations.

4. By what standard will you gauge success?
Additional requests for presentations. Participants will, through evaluations forms, express interest in further public speaking training or career development in that area.

13

Partnerships with the

-
1. What work will be done? What service activities will your participants engage in?
Develop and construct or enhance environmental resources to be used by the public for environmental education and community outreach.
 2. What is the hoped for result of the work/activities described above?
Education/interact generation of nearby residents in the importance of local natural resources.
 3. How will you measure the quality of your product or impact of your service?
Increased use of the site.
 4. By what standard will you gauge success?
Increased number and quality of environmental education facilities.
 5. How many individuals will receive the benefit of the work your participants perform?
The population of the community served.

13

CORPORATION FOR NATIONAL SERVICE
COMMUNITY SERVICE OBJECTIVE

13-04

GRANTEE: USDA Soil Conservation Service

SITE: Maryland

COMPONENTS OF OBJECTIVE STATEMENTS: Positive interaction with local community groups.

1. What work will be done? What service activities will your participants engage in?
Establish a partnership with the local community providing a mentoring base for a special emphasis group (i.e., youth corps, drug intervention program).
2. What is the hoped for result of the work/activities described above?
Provide plant materials to a community to enhance natural resources while providing the mentoring base above.
3. How will you measure the quality of your product or impact of your service?
Positive feedback from the leader of the group.
4. By what standard will you gauge success?
Request for repeat program (feedback).
5. How many individuals will receive the benefit of the work your participants perform?
The members of the community.

CORPORATION FOR NATIONAL SERVICE
COMMUNITY SERVICE OBJECTIVE

13
13-05

GRANTEE: USDA Soil Conservation Service

SITE: Maryland

COMPONENTS OF OBJECTIVE STATEMENTS: Enhanced outdoor experiences for the local community.

1. What work will be done? What service activities will your participants engage in?

Renovation of public park and recreation areas.

2. What is the hoped for result of the work/activities described above?

Needed maintenance to areas currently lacking attention, improving the aesthetics of an urban environment.

3. How will you measure the quality of your product or impact of your service?

Random surveys of neighborhood residents and area use counts conducted will determine changes in use of public parks and recreations centers.

4. By what standard will you gauge success?

Increased use of public parks and recreation centers by neighborhood residents.

5. How many individuals will receive the benefit of the work your participants perform?

Approximately 28,500 neighborhood residents will benefit by improving the aesthetics of an urban environment.

13

CORPORATION FOR NATIONAL SERVICE
COMMUNITY SERVICE OBJECTIVE

USDA National Arboretum SITE: District of Columbia

GRANTEE:

OF OBJECTIVE STATEMENTS: Crabapple Hillside

COMPONENTS

What work will be done? What service activities will your participants engage in? What work will be done? What service activities will your participants engage in?
The old, overgrown, undermaintained, choked with vines Crabapple Trees will be rejuvenated. It will be accomplished by untangling, pruning, devining and removing all weeds and vines from beneath the trees canopy.

What is the hoped for result of the work/activities described above?
This will improve the hillsides appearance for the New York Avenue commuters. It will also improve the overall health of the trees, decreasing the insect and fungi problems and increasing the floral potential.

How will you measure the quality of your produce or impact of your service?
By the overall improved health of the trees as well as the improved appearance of the hillside along New York Avenue.

By what standard will you gauge success?
Leaving the trees in the state that they were in would have allowed the trees to continue their rapid decline. After our work, the trees should bloom vivaciously and allow the plant to live healthily for many years to come.

How many individuals will receive the benefit of the work your participants perform?
The estimated 40,000 commuters that travel New York Ave. daily as well as Crabapple observers and their organizations.

CORPORATION FOR NATIONAL SERVICE
COMMUNITY SERVICE OBJECTIVE

GRANTEE: USDA National Arboretum SITE: District of Columbia

COMPONENTS OF OBJECTIVE STATEMENTS: Boxwood Winterization

What work will be done? What service activities will your participants engage in?

Members will prepare the collection for spring. This requires removing the above ground portions of the perennial as well as the weed trees and vines that have grown into the Boxwoods.

What is the hoped for result of the work/activities described above?

This will keep the insect infestations in the spring to a minimum. This will also prevent weed trees and vines to from destroying portions and/or eventually entire Boxwood plants.

How will you measure the quality of your produce or impact of your service?

If there are low levels of insect infestations and Boxwood plants do not have to compete with weed trees and vines than we were successful.

By what standard will you gauge success?

In the spring, the vast array of colors and flowers from daylillies, iris and peony will bloom vivaciously because insects are not draining vital fluids. Also if the Boxwoods are healthy compared to their state last year.

How many individuals will receive the benefit of the work your participants perform?

The 300,000 Arboretum visitors, including individuals and organizations that observe iris, daylillies, peonies and boxwoods.

CORPORATION FOR NATIONAL SERVICE
COMMUNITY SERVICE OBJECTIVE

GRANTEE: USDA National Arboretum SITE: District of Columbia

COMPONENTS OF OBJECTIVE STATEMENTS: Renovate the Azalea Overlook

What work will be done? What service activities will your participants engage in?
The task will be completed in seven stages. It will be accomplished by removing the weeds and vines that have engulfed the accessioned plants. These plants are observed and monitored.

What is the hoped for result of the work/activities described above?
In the spring, plants that survived the onslaught of overwhelming weeds and vines will provide a feast of color for the visitors. Periodic maintenance will prevent another major invasion from occurring any time soon.

How will you measure the quality of your produce or impact of your service?
By the rejuvenization of the desired plants at the overlook and by making it easily accessible for observers. Provide the plants with non-threatening surroundings. Weeds are a threat.

By what standard will you gauge success?
The ability to prevent further weed infestation. How quickly the accessioned plants rejuvenate and excel.

How many individuals will receive the benefit of the work your participants perform?
The estimated 300,000 yearly Arboretum visitors as well as Azalea organizations.

Description of Service: Forest conservation work
Community Serv. Obj. #1: San Bernardino National Forest #1

OBJECTIVE STATEMENT

The program hosted on the San Bernardino National Forest will initially (by October 31, 1994) include 100 members, with a target membership by April 1, 1995 of 77 members. The members will perform work on public lands to conserve, restore, and sustain natural habitats within various ecosystems. To maintain, improve, and construct recreational facilities including camp sites, trails, access points, and other significant projects to benefit the users of public lands (National Forest, National Parks, Bureau of Land Management public lands, and city and county government public lands). To perform work that will improve habitat for Threatened, Endangered, and Sensitive species and improve forest health and sustain forest ecosystems through thinning, restoration, and planting. To assist in disaster relief and recovery efforts when requested in the areas of flood control, forest firefighting, and earthquake events. To provide environmental education opportunities and education to the public that reside within the forest as well as those who live adjacent to or outside the National Forest. To provide technical assistance as para-professionals assisting resource technicians and professionals in data collection and document preparation for compliance with the National Environmental Protection Act.

COMPONENTS OF OBJECTIVE STATEMENT

- 1) What work will be done? What service will your members engage in?

Construct hiking, mountain bike, and off-highway vehicle trails throughout the forest, meeting regional trail construction standards. Construction to occur throughout the year. Off-highway vehicle trail construction to be performed in partnership with local off-highway vehicle clubs,

California State Green Sticker Commission, and Honda Motor Company of America.

68 MILES of trail will be constructed.

Construct 6 miles of new trail within the National Childrens Forest.

Assist in constructing 32 miles of mountain bike trail in Fobes Ranch Road and Morris Ranch Road area.

Assist in constructing 30 miles of mountain bike trail in the Santa Rosa/Old Sawmill area.

Construct additional off-highway vehicle trails that tie into the existing trail network.

2) What is the hoped for result of the activities described above?

We hope to improve the quality of a recreational visitors experience while on the National Forest.

3) How will you measure the quality of these activities?

Most activities will be measured against established and approved standards. Project sponsors will have a responsibility to provide clear, understandable instructions and guidance to team supervisors and leaders. A pre-project meeting will occur during the project application process, as well as a post-project review of work accomplished.

4) By what standard will you gage success?

A number of areas will be focused on to measure success:

Customer satisfaction will be considered. We will constantly communicate with our customers to ensure we are meeting their goals. Are we completing there projects in a timely manner? Are they pleased with the quality and quantity of our work?

Our ability to leverage our AmeriCorps budget to work with other funding sources to increase our flexibility to "get things done...", while meeting the goals of our diverse group of

project sponsors.

A major success would be a program that would serve as a model for public and community activity on public lands. The assurance that the program funding continued in the future, and that our program becomes stronger and larger as a result.

Support among the Forest Service community, a feeling among our peers that AmeriCorps really does "get things done...".

5) How many individuals will receive the benefit of the work your members perform?

In the short term, thousands of forest users, local communities, children and young adults.

Community Serv. Obj. #2: San Bernardino National Forest #2

OBJECTIVE STATEMENT

The program hosted on the San Bernardino National Forest will initially (by October 31, 1994) include 100 members, with a target membership by April 1, 1995 of 77 members. The members will perform work on public lands to conserve, restore, and sustain natural habitats within various ecosystems. To maintain, improve, and construct recreational facilities including camp sites, trails, access points, and other significant projects to benefit the users of public lands (National Forest, National Parks, Bureau of Land Management public lands, and city and county government public lands). To perform work that will improve habitat for Threatened, Endangered, and Sensitive species and improve forest health and sustain forest ecosystems through thinning, restoration, and planting. To assist in disaster relief and recovery efforts when requested in the areas of flood control, forest firefighting, and earthquake events. To provide environmental education opportunities and education to the public that reside within the forest as well as those who live adjacent to or outside the National Forest. To provide technical assistance as para-professionals assisting resource technicians and professionals in data collection and document preparation for compliance with the National Environmental Protection Act.

COMPONENTS OF OBJECTIVE STATEMENT

1) What work will be done? What service will your members engage in?

280 MILES of trails will be maintained.

Maintain approximately 200 miles of hiking trails within the forest and wilderness areas on the San Bernardino, Inyo, Sierra and Sequoia National Forest's, completing 50% of the trail maintenance by July 4, and the remainder by August 15, meeting regional trail standards.

Maintain approximately 80 miles of off-highway vehicle trails within the forest, completing the work by September 1, 1995, and meeting regional off-highway vehicle trail guidelines.

2) What is the hoped for result of the activities described above?

We hope to improve the quality of a recreational visitors experience while on the National Forest. Many existing facilities are over 25 years old and AmeriCorps work to rehabilitate them will provide a much needed face lift.

3) How will you measure the quality of these activities?

Most activities will be measured against established and approved standards. Project sponsors will have a responsibility to provide clear, understandable instructions and guidance to team supervisors and leaders. A pre-project meeting will occur during the project application process, as well as a post-project review of work accomplished.

4) By what standard will you gage success? A number of areas will be focused on to measure success:

Customer satisfaction will be considered. We will constantly communicate with our customers to ensure we are meeting their goals. Are we completing there projects in a timely manner? Are they pleased with the quality and quantity of our work?

Our ability to leverage our AmeriCorps budget to work with other funding sources to increase our flexibility to "get things done...", while meeting the goals of our diverse group of project sponsors.

A major success would be a program that would serve as a model for public and community activity on public lands. The assurance that the program funding continued in the future,

and that our program becomes stronger and larger as a result.

Support among the Forest Service community, a feeling among our peers that AmeriCorps really does "get things done...".

5) How many individuals will receive the benefit of the work your members perform?

In the short term, thousands of forest users, local communities, children and young adults.

Community Serv. Obj. #3: San Bernardino National Forest #3

OBJECTIVE STATEMENT

The program hosted on the San Bernardino National Forest will initially (by October 31, 1994) include 100 members, with a target membership by April 1, 1995 of 77 members. The members will perform work on public lands to conserve, restore, and sustain natural habitats within various ecosystems. To maintain, improve, and construct recreational facilities including camp sites, trails, access points, and other significant projects to benefit the users of public lands (National Forest, National Parks, Bureau of Land Management public lands, and city and county government public lands). To perform work that will improve habitat for Threatened, Endangered, and Sensitive species and improve forest health and sustain forest ecosystems through thinning, restoration, and planting. To assist in disaster relief and recovery efforts when requested in the areas of flood control, forest firefighting, and earthquake events. To provide environmental education opportunities and education to the public that reside within the forest as well as those who live adjacent to or outside the National Forest. To provide technical assistance as para-professionals assisting resource technicians and professionals in data collection and document preparation for compliance with the National Environmental Protection Act.

COMPONENTS OF OBJECTIVE STATEMENT

1) What work will be done? What service will your members engage in?

Rehabilitate campgrounds, picnic areas and other developed recreation sites on the San Bernardino, Inyo, Sierra and Sequoia National Forest's, meeting guidelines set by project specialist at

specific locations, and completing the projects by September 1, 1995, at the following (non-inclusive) locations;

8 SITES will be rehabilitated:

Rehabilitate Aspen Glen and Schwitzer day use picnic areas.

Rehabilitate and convert Grout Bay Campground to a day use picnic area.

Rehabilitate Coldbrook and Horse Springs Campgrounds on the Big Bear and

San Gorgonio Ranger Districts, and Apple White Campground on the Cajon Ranger District.

Build a family equestrian campground at Heart Bar, working with local horse riding associations.

2) What is the hoped for result of the activities described above?

We hope to improve the quality of a recreational visitors experience while on the National Forest. Many existing facilities are over 25 years old and AmeriCorps work to rehabilitate them will provide a much needed face lift.

3) How will you measure the quality of these activities?

Most activities will be measured against established and approved standards. Project sponsors will have a responsibility to provide clear, understandable instructions and guidance to team supervisors and leaders. A pre-project meeting will occur during the project application process, as well as a post-project review of work accomplished.

4) By what standard will you gage success?

A number of areas will be focused on to measure success:

Customer satisfaction will be considered. We will constantly communicate with our customers to ensure we are meeting their goals. Are we completing there projects in a timely manner?

16

Are they pleased with the quality and quantity of our work?

Our ability to leverage our AmeriCorps budget to work with other funding sources to increase our flexibility to "get things done...", while meeting the goals of our diverse group of project sponsors.

A major success would be a program that would serve as a model for public and community activity on public lands. The assurance that the program funding continued in the future, and that our program becomes stronger and larger as a result.

Support among the Forest Service community, a feeling among our peers that AmeriCorps really does "get things done...".

- 5) How many individuals will receive the benefit of the work your members perform?

In the short term, thousands of forest users, local communities, children and young adults. In the long term, hundreds of thousands, through the use of the recreational infrastructure, including; campgrounds, visitor centers, hiking trails, OHV trails, historical sites and more. Additional benefits will be to the AmeriCorps members and staff who ten years down the road will return to project sites with their spouses and children and have a sense of pride about their ability to "get thing done..." during their service in AmeriCorps.

Community Serv. Obj. #4: San Bernardino National Forest #4

OBJECTIVE STATEMENT

The program hosted on the San Bernardino National Forest will initially (by October 31, 1994) include 100 members, with a target membership by April 1, 1995 of 77 members. The members will perform work on public lands to conserve, restore, and sustain natural habitats within various ecosystems. To maintain, improve, and construct recreational facilities including camp sites, trails, access points, and other significant projects to benefit the users of public lands (National Forest, National Parks, Bureau of Land Management public lands, and city and county government public lands). To perform work that will improve habitat for Threatened, Endangered, and Sensitive species and improve forest health and sustain forest ecosystems through thinning, restoration, and planting. To assist in disaster

relief and recovery efforts when requested in the areas of flood control, forest firefighting, and earthquake events. To provide environmental education opportunities and education to the public that reside within the forest as well as those who live adjacent to or outside the National Forest. To provide technical assistance as para-professionals assisting resource technicians and professionals in data collection and document preparation for compliance with the National Environmental Protection Act.

COMPONENTS OF OBJECTIVE STATEMENT

1) What work will be done? What service will your members engage in?

Maintain and enhance the ecosystems for threatened and endangered sensitive species throughout the forest, following guidelines set forth by the project specialist, and completing projects in a time frame that would be sensitive to the needs of individual species, but no later than September 1, 1995, at the following (non-inclusive) locations;

Enhance spotted owl ecosystems on 450 ACRES.

Install bird boxes in developed sites and snag-deficient trails.

Inspect and maintain bird and bat boxes.

Improve osprey habitat in vicinity of Snow Valley Lake.

Install and maintain guzzlers in areas without water sources in wildlife habitat project areas.

Underplant in spotted owl core area as needed and 150 acres of habitat blocks with oak and conifer.

Create wildlife corridors outside of spotted owl core and habitat areas by planting 300 acres of native brush, oak, and conifer.

Install fences, barriers, or other types of closures necessary to protect known sensitive species.

Release suppressed seedlings to improve forest health, utilizing standards set forth by project specialist, by September 1, 1995.

Plant trees in post-wildfire and timber harvest sites, and other sites as needed and appropriate, completing the project by July 1, 1995.

- 4) By what standard will you gage success?

A number of areas will be focused on to measure success:

Customer satisfaction will be considered. We will constantly communicate with our customers to ensure we are meeting their goals. Are we completing there projects in a timely manner? Are they pleased with the quality and quantity of our work?

Our ability to leverage our AmeriCorps budget to work with other funding sources to increase our flexibility to "get things done...", while meeting the goals of our diverse group of project sponsors.

A major success would be a program that would serve as a model for public and community activity on public lands. The assurance that the program funding continued in the future, and that our program becomes stronger and larger as a result.

Support among the Forest Service community, a feeling among our peers that AmeriCorps really does "get things done...".

- 5) How many individuals will receive the benefit of the work your members perform?

In the short term, thousands of forest users, local communities, children and young adults.

Community Serv. Obj. #5: San Bernardino National Forest #5

OBJECTIVE STATEMENT

16

The program hosted on the San Bernardino National Forest will initially (by October 31, 1994) include 100 members, with a target membership by April 1, 1995 of 77 members. The members will perform work on public lands to conserve, restore, and sustain natural habitats within various ecosystems. To maintain, improve, and construct recreational facilities including camp sites, trails, access points, and other significant projects to benefit the users of public lands (National Forest, National Parks, Bureau of Land Management public lands, and city and county government public lands). To perform work that will improve habitat for Threatened, Endangered, and Sensitive species and improve forest health and sustain forest ecosystems through thinning, restoration, and planting. To assist in disaster relief and recovery efforts when requested in the areas of flood control, forest firefighting, and earthquake events. To provide environmental education opportunities and education to the public that reside within the forest as well as those who live adjacent to or outside the National Forest. To provide technical assistance as para-professionals assisting resource technicians and professionals in data collection and document preparation for compliance with the National Environmental Protection Act.

COMPONENTS OF OBJECTIVE STATEMENT

- 1) What work will be done? What service will your members engage in?

Provide environmental and ecosystem management education programs to children in elementary schools throughout the Southern California Community, targeting 750 classrooms, or 22,500 STUDENTS, providing 80% of the programs by June 10, 1995, and meeting course standards set forth in the following nationally identified training courses;

Hug-A-Tree,

Project Learning Tree, and

Adopt-A-Watershed.

Provide environmental education at 10 Southern California Shopping Malls, using puppet shows for children as the vehicle, and ecosystems on National Forest as the theme. Complete 80% of the weekend events by June 1, 1995, and reaching an audience in excess of 50,000 children and parents.

16

Work in conjunction with Knotts Berry Farm entertainment park to provide environmental education, using puppet shows and theme displays explaining wildfire prevention, wildlife habitat of the forest, and watershed protection. Provide National Forest exposure to over 250,000 park visitors.

Restore historical sites at Death Valley National Monument, building adobe bricks, and reconstructing walls. Complete project by March 1, 1995.

- 2) What is the hoped for result of the activities described above?

In the area of environmental education, we plan on changing attitudes about the National Forest in particular, and public lands in general, through education and information. We propose to change, through hands on opportunity, the value that youth place on the environment around them, while explaining the impacts that millions of Southern California residents and visitors have on public lands.

We hope to foster good working relationships and partnerships with the private sector, non-profit clubs and organizations, and special interest groups, by working together as teams to accomplish agreed upon objectives.

- 3) How will you measure the quality of these activities?

Educational professionals, and topic area specialists will be invited to review all educational material. The program will constantly review all activities, focus on our mission and objectives, and re-direct our activities as necessary.

- 4) By what standard will you gage success?

A number of areas will be focused on to measure success:

Customer satisfaction will be considered. We will constantly communicate with our customers to ensure we are meeting their goals. Are we completing there projects in a timely manner? Are they pleased with the quality and quantity of our work?

Our ability to leverage our AmeriCorps budget to work with other funding sources to increase

our flexibility to "get things done...", while meeting the goals of our diverse group of project sponsors.

A major success would be a program that would serve as a model for public and community activity on public lands. The assurance that the program funding continued in the future, and that our program becomes stronger and larger as a result.

Support among the Forest Service community, a feeling among our peers that AmeriCorps really does "get things done...".

- 5) How many individuals will receive the benefit of the work your members perform?

In the short term, thousands children and young adults.

 Description of Service: Forest conservation work
 Community Serv. Obj. #1: Six Rivers National Forest #1

OBJECTIVE STATEMENT:

To perform work on public lands to conserve, restore, and sustain natural habitats within various ecosystems. To maintain, improve, and construct recreation facilities including camp sites, trails, access points, etc. to benefit users of the National Forest System. To perform work that will improve habitat for Threatened, Endangered, and Sensitive species and improve forest health through thinning and restoration. To assist in restoring natural beauty in the national forests and assist in disaster recovery efforts when requested.

COMPONENTS OF OBJECTIVE STATEMENT

- 1) What work will be done? What service will your members engage in?

AmeriCorps Interns: (mentored by US Forest Service Professionals)

Analyzing and evaluating geomorphic and ecologic process within three major, critical watersheds to provide a basis for monitoring and restoration. Developing and implementing prescriptions for 900 acres of watershed restoration and inventory information for 600 acres of aquatic habitat condition.

Develop plans and specifications for three campground facility renovation projects.

Develop four Cultural Resource Inventory (CRI) and two Environmental Impact Statements.

Develop three interpretive projects (exhibits/displays).

Develop four interpretive publications and prepare for three community special events.

Provide environmental and ecosystem management education programs to a minimum of 300 STUDENTS in 12 classes of elementary school children.

2) What is the hoped for result of the activities described above?

That school children will become more environmentally aware and that the Members develop not only "natural resource technician" related skills, but also improved citizenship and land use ethic/stewardship awareness.

That critical resource base data can be collected for improved evaluation and restoration implementation. 3) How will you measure the quality of these activities?

We'll work with the schools to conduct and evaluate pre/post tests to determine and measure the success of the environmental education programs.

4) By what standard will you gage success?

By completion of all the work in a timely manner per established standards for quality.

5) How many individuals will receive the benefit of the work your members perform?

Approximately 300-400 children will receive environmental education.

Community Serv. Obj. #2: Six Rivers National Forest #2

OBJECTIVE STATEMENT:

To perform work on public lands to conserve, restore, and sustain natural habitats within various ecosystems. To maintain, improve, and construct recreation facilities including camp sites, trails, access points, etc. to benefit users of the National Forest System. To perform work that will improve

habitat for Threatened, Endangered, and Sensitive species and improve forest health through thinning and restoration. To assist in restoring natural beauty in the national forests and assist in disaster recovery efforts when requested.

COMPONENTS OF OBJECTIVE STATEMENT

- 1) What work will be done? What service will your members engage in?

AmeriCorps Crews:

Construct, redesign/improve 55 STRUCTURES instream essential for restoring critical salmon and steelhead fisheries habitat. Forty miles of streams will be improved.

Collection and cultivation of native plants to reestablish 850 acres of riparian habitat.

- 2) What is the hoped for result of the activities described above?

That watershed restoration work will improve wildlife habitat, reduce erosion, reestablish important anadromous and resident fisheries habitat and improve general forest health. That projects will be completed based on priority in a timely and quality manner to increase visitor satisfaction and safety.

- 3) How will you measure the quality of these activities?

The majority of these activities will be measured against established and approved standards within Forest Service Land and Resource Management Plans, handbooks, operation, maintenance and construction guidelines, and project workplans. Line Officers will be responsible for accepting the quality of work accomplishments and will hold Members and 3rd parties accountable as part of their performance expectations.

- 4) By what standard will you gage success?

By completion of all the work in a timely manner per established standards for quality.

- 5) How many individuals will receive the benefit of the work your members perform?

Approximately 15 communities will be served. There will be an expected minimum of 5% increase in total Recreation Visitor Days (currently 1.3 million RVD) within the Six Rivers National Forest.

Community Serv. Obj. #3: Six Rivers National Forest #3

OBJECTIVE STATEMENT:

To perform work on public lands to conserve, restore, and sustain natural habitats within various ecosystems. To maintain, improve, and construct recreation facilities including camp sites, trails, access points, etc. to benefit users of the National Forest System. To perform work that will improve habitat for Threatened, Endangered, and Sensitive species and improve forest health through thinning and restoration. To assist in restoring natural beauty in the national forests and assist in disaster recovery efforts when requested.

COMPONENTS OF OBJECTIVE STATEMENT

1) What work will be done? What service will your members engage in?

Enhances fisheries habitat on 1,400 ACRES of land.

Increase riparian vegetation diversification. Create conifer species recovery for improved canopy, long term wood recruitment and bank stabilization for 900 acres of fisheries and wildlife habitat.

Stabilize and reduce erosion on landslides. Activities would include rip rapping, channel restoration, planting and mulching on 500 acres and 20 miles of salmon and steelhead spawning and rearing streams.

Construction of 50 wildlife habitat structures.

Renovation of eight visitor use facilities including campsites, roads, trails, information/interpretative displays, erosion control, vegetation management, etc.

Construction of two new handicapped access sites. Improvement of two existing sites for handicapped access.

Conduct trail maintenance on approximately 60 miles of trails including recreation river access. Work will consist of brushing, erosion control, tread renovation, installation of signs, etc.

- 2) What is the hoped for result of the activities described above?

That watershed restoration work will improve wildlife habitat, reduce erosion, reestablish important anadromous and resident fisheries habitat and improve general forest health. That projects will be completed based on priority in a timely and quality manner to increase visitor satisfaction and safety.

- 3) How will you measure the quality of these activities?

The majority of these activities will be measured against established and approved standards within Forest Service Land and Resource Management Plans, handbooks, operation, maintenance and construction guidelines, and project workplans. Line Officers will be responsible for accepting the quality of work accomplishments and will hold Members and 3rd parties accountable as part of their performance expectations. 4) By what standard will you gage success?

By completion of all the work in a timely manner per established standards for quality.

- 5) How many individuals will receive the benefit of the work your members perform?

Approximately 15 communities will be served. There will be an expected minimum of 5% increase in total Recreation Visitor Days (currently 1.3 million RVD) within the Six Rivers National Forest.

Community Serv. Obj. #4: Six Rivers National Forest #4

OBJECTIVE STATEMENT:

To perform work on public lands to conserve, restore, and sustain natural habitats within various

ecosystems. To maintain, improve, and construct recreation facilities including camp sites, trails, access points, etc. to benefit users of the National Forest System. To perform work that will improve habitat for Threatened, Endangered, and Sensitive species and improve forest health through thinning and restoration. To assist in restoring natural beauty in the national forests and assist in disaster recovery efforts when requested.
