Pittsfield survey findings 'significant'

By Deborah Gertz

Herald-Whig Staff Writer

PITTSFIELD, Ill. — Look at downtown Pittsfield as an employer, and it's the largest one in Pike County.

The downtown area has 122 businesses, churches and fraternal organizations and 674 employees, based on findings from a recent central business district survey.

"That's significant," said Robin Hendley, the city's economic development director.

"I had no idea there were that many businesses in that small of an area and that many employees."

The survey, done by Hendley's office and two rural development team members from the AmeriCorps program through Two Rivers Resource Conservation and Development, looked at a nine-block area bordered by Memorial, Jackson, Jefferson and Fayette streets. Interviews were done with 111 — 90.9 percent — of the establishments.

"I don't see how you can develop any kind of strategy without data and information to base it on," Hendley said. "It's a good

AT A GLANCE

The findings of a recent Pittsfield central business district survey include:

- The district had 674 employees — 482 full-time and 192 part-time.

- Employers classified the workforce as 54.9 percent white collar and 45.1 percent blue collar.

- Seventy-one of the 111 establishments surveyed are owner-occupied. Forty rent or lease the property.

- Retailers represented the largest group of employers with 26 — or 23.4 percent of the total.

- Five commercial establishments — Kientzle Shoe Store, the Pike Press, First Bank, Farmers State Bank and Alexander Lumber — were established prior to 1900.

- Forty-nine of the businesses surveyed were established since 1981, with 26 coming after 1990.

- Fifty-nine percent of the non-residential structures were rated in good to very good condition. Forty-nine of the buildings had the original facade.

- The district has 602 on-street parking spaces and 629 spaces in parking lots.

baseline, something good to start with."

Business owners/managers were asked about the product or service offered, the year established, employment levels, classification of employees and

use of upper floors. The survey also looked at structural roof and facade condition and use of basements.

"It gives you a lot of information," said Mayor Rick Conner. "Who knows what some of this

data will be useful for at a later date?"

The survey, for example, could help the city look at parking needs, Conner said. "If the traffic patterns continue, the city could look at public/private partnerships ... leasing parking for certain hours."

Conner also pointed to the number of businesses established since 1990.

"Eight or 10 years ago there was a downswing in the core area of the community and the council became aggressive in promoting the downtown area. Now it's showing its full effects," he said. "I think we have an extremely solid downtown area compared to most communities our size."

Business owners and managers also take pride in their buildings. "Over 50 percent of the buildings are in good to very good (condition)," Hendley said. "They do take care of them."

Many business owners and managers offered comments and suggestions about the downtown. "Thirty people were very happy" with the area, Hendley said. "That's a real good sign."

AmeriCorps: making a difference

the 46 teams assigned to the U.S. Department of Agriculture (USDA) under the AmeriCorps program, South Carolina is hosting three.

AmeriCorps is the new service initiative described by President Clinton in his inaugural address and put into operation shortly thereafter.

Sponsored by government agencies, AmeriCorps provides opportunities for a diverse group of members from varied ages and backgrounds to serve

their country while receiving educational awards and vocational training in return.

In exchange for their year of service, the participants receive a living stipend, educational awards for college or vocational training, basic health insurance, and, in some cases, child-care allowances. The program benefits the participants by giving them job skills, experiences and training in a diversity of subjects.

Of the three teams serving in South Carolina, the Rural Economic and Community Development Service (RECD) was granted 15 members to concentrate on the southwestern Lowcountry of the state. U.S. Forest Service (USFS) received five and Natural Resources Conservation Service (NRCS) received 20.

Based in Greenwood and Newberry, the NRCS put its first group to work on public safety and community development. They spent six weeks on a road inventory in Edgefield County, creating a spreadsheet database of data that supplemented an updated road map of the county.

The second Greenwood group spent four weeks on a stream coding project to upgrade the state's ability to gather information about the quality of streams, rivers and lakes.

Another group conducted a grassland survey in Abbeville County, while a final group visited 16 farms to conduct water-quality surveys in Newberry County.

The RECD teams are concentrating their efforts on the southwestern Lowcountry, while the USFS members are centering on Williamsburg County.

Qualifications

Education backgrounds vary for the AmeriCorps team members who are either

AmeriCorps volunteers John E. Morgan, III, and Karen Kinard test livestock lagoon waste water.

from the project areas or nearby counties. Mostly college and professional school graduates, the members' expertise is matched with the needs of the rural community they serve.

The teams work to empower communities to help themselves by developing local leadership needed to assure community planning activities that help them reach their goals.

These volunteers learn skills in community and coalition building, strategic planning, environmental protection strategies

and communication enhancement.

USDA

Overall, there are more than 20,000 AmeriCorps volunteers in this service initiative designed to address the nation's needs in the areas of education, human service, public safety and environmental needs from a community perspective.

The United States Department of Agriculture received almost half of the 2,500 AmeriCorps slots awarded to federal agencies. Of these, the 40 members assigned to South Carolina are carrying out their assigned task.

USDA was set up by Congress as a "people's department to acquire among the people of the United States useful information on subjects connected with agriculture... and to procure, propagate and distribute among the people new and valuable seeds and plants."

Rural electrification was initially set up as a part of the USDA, and continues under that agency.

"The USDA of today is leading the effort to bring the AmeriCorps service program to success," said Mark Berkland, South Carolina State Conservationist with the USDA.

"The USDA-AmeriCorps members will help to plant seeds throughout America for a future built upon volunteerism and community service," he continued. [From material gathered by Angi Paulus.] ♣

School program features fuel reduction

As part of the community Communication Program for Fuel Reduction, the Education Coordinator for Americorps, Natural Resource Conservation Service, Aleta Apgar, has presented a series of ecosystem-themed workshops to explain to students grades 5-12 in El Dorado County the basics of fire safety in our wild land-urban interface.

The presentations are aimed at helping to reduce catastrophic wildfires in our county through community education. The public school system currently endorses both cross-curriculum learning and community awareness. The education program emphasizes things each student can do now to be aware and help address this critical issue in the Sierra Nevada foothills. Sharing with peers, adults, and teachers the components of fire safety at home and in our forests an important facet of the series of presentations.

Reducing catastrophic fire is a goal with which all of us can agree. The problem is being addressed by agencies on the federal, state, and local level, one of the issues where we are seeing cooperation between private landowners and government agencies.

El Dorado Unified High School was the first school to be involved in this program. Camino Opportunity School, Ponderado, is lining up a schedule for March. Sierra Ridge has expressed an interest in scheduling presentations. The Pollock Pines area was targeted first to coincide with a community

action project co-sponsored by the KCD's Mark Hicks, U.C. Cooperative Extension's Bill Frost, and the District 2 Supervisor, Ray Nutting.

On Saturday, Feb. 11 there was a cooperative effort to make two lots in Sly Park Hills a fire safe demonstration model.

Later in the Spring, Forest Service Representatives are willing to do a school presentation to coincide with the Mormon Emigrant Trail Fuel Break Burn as part of the series' thrust to expose students to the high risks and prevention measures in our region.

An outdoor environmental education component, a casual vegetation survey of the sites is also offered as part of the program. By law, schools have fire defensible space, but students do not necessarily understand what this entails. Their own schools are a good starting place.

In conjunction with the goal of making the Traverse Creek Watershed fire safe it is hoped the program will expand to the Black Oak Mine Unified School District Schools.

Any interested teachers in El Dorado County wanting to schedule presentations or desiring more information should contact Aleta Apgar, Americorps, NRCS, 415 Placerville Dr., Suite M, Placerville, CA 95667, phone 622-1410.

AmeriCorps in Four Corners

AZTEC – Four AmeriCorps workers have set up shop in the Natural Resources Conservation and Development office in Aztec, N.M., while nine more are working with the Council of the San Juan Resource Conservation and Development in Southwest Colorado.

AmeriCorps engages diverse groups of Americans in performing service to meet human, environmental, public safety, and educational needs in return for vouchers for education, vocational training, or loan repayment.

The Department of Agriculture is running three types of AmeriCorps teams – an anti-hunger team, a public lands and environmental team, and a rural development team. There are 1200 workers in the various programs at 42 urban and rural sites nationwide.

The Aztec contingent is made up of Ana Gomes, a natural resource specialist from central valley California specializing in environmental anthropology; Erick Aune, a natural resource specialist from Detroit specializing in natural resource development; Laura Horochowski, an education information specialist from Missouri specializing in fine arts. They will be focusing on San Juan, McKinley and Cibola counties. Another AmeriCorps member,

Shantel Farnsworth, is working for Rural Economic and Community Development, formerly known as the Farmers Home Administration.

Nine AmeriCorps members are working with the San Juan Resource Conservation and Development, the USDA Forest Service, Region 9 Economic Development District of Southwest Colorado, the Southern Ute Tribe, the Ute Mountain Ute Tribe and the San Juan Forum.

Region 9 is up-dating its Overall Economic Development Plan. One worker, Amy Callard, a graduate of Colorado State University with a masters degree in business administration and an undergraduate degree from Fort Lewis College, is up-dating data through information gathered from the Colorado Census Bureau, the National Census Bureau, the state office of the Division of Local Governments, County Clerks and Chamber of Commerces.

The information will be offered to the public in written form, and through the San Juan Basin's new telecommunications information system, SCAN, the Southwest Colorado Access Network, 259-9350. The information is accessed by a computer with modem and a telephone line. 

Learning to make it in life

The youths provided the labor needed for the national forest including trail clearing and other maintenance.

Service corps helps at-risk young people

■ The program allows enrollees to earn a diploma while learning to work.

By Mary Jefferson
Clarion-Ledger Staff Writer

It's far from a dream workweek: 25 hours at minimum wage and 15 hours of volunteer duty, much of it heavy labor.

But for about 50 young people like Eric Jackson, their toil is nothing compared with their reward.

TODAY'S EXTRA

Jackson, 20, is a member of the Greater Jackson Youth Service Corps program. In its fifth year, the corps is an educational program for at-risk males and females 16-23. While earning their high school equivalency diplomas, young people acquire self-esteem, pride in their community and good work and study habits.

"The whole program is such a

learning experience," Jackson said. "It is not like anything I have ever been involved in. It is wonderful. The people over the corps really make sure you understand what you need to in order to make it in life."

The service program has three facets:

■ The U.S. Department of Agriculture's Anti-Hunger Corps.

■ The agriculture department's AmeriCorps Public Lands Corps, part of the initiative signed into

law last September by President Clinton.

■ The Urban Corps.

Jackson, a participant in the Public Lands Corps, said the program not only provides him a chance to improve his character, but gives him support he needs to continue his education.

"We work the young people for one year on various community service projects," said Alfred Martin, Greater Jackson Youth Ser-

See YOUTHS, 10A

Youth

From 1A

Urban Corps executive director. "Although each site has different projects, our mission is all the same. We want these young people to be the best they can be."

Members of the Urban Corps traveled Monday from Jackson to the Forest to work with the Public Lands Corps at Bienville National Forest. The workers are improving the 23-mile Shockaloe Trail for the spring arrival of horseback riders.

The two groups went to south Jackson Wednesday and will be there again today to work on demolishing a vacant building and cleaning the lot at 5020 Gertrude Drive.

Public Lands Corps program coordinator Richard Dolan said corps members always make him proud.

"The attitude is always real good," he said. "They are all hard workers, and one day they will be able to bring their children to some of the sites they have improved and say, 'See, Junior, I did that.'"

He said one of the more important projects his land corps completed was restoring an abandoned building marred by graffiti and vagrants.

"They got in there, cleaned it up and painted it," Dolan said. "The Scott County Board of Supervisors was so pleased with the initiative and the work that they donated the building to us for the next five years. The young people deserved that."

Dolan said before any work project, students are briefed on the goal and method of accomplishment. He

said when tools are to be used, classes are held to teach safety and proper use.

"They have worked very well here," said Laura Garrison of the U.S. Department of Agriculture's Forest Service/Bienville National Forest. "We have even pulled them off this to do other projects."

Garrison said Monday's work moved slower than usual because urban students weren't familiar with the terrain. She said the students adjusted well and the groups together did an exceptional job.

"The object is to develop teamwork as well as social interaction among the rural and urban corps members," Martin said. "I think there is nothing they cannot do. If it addresses the mission, we will go for

it. They have probably done about 100 projects each year, everything from planting plants to helping senior citizens with maintenance on their homes.

"The Urban Corps members even helped the Jackson Police Department stencil addresses on houses in the Georgetown area."

The students, who are paid bi-monthly, will have completed 1,700 hours of work at the close of their program term. Each student will receive \$4,700 to go toward college or to pay back a student loan.

Jackson said the program offers many incentives, in addition to helping members receive their General Education Development certificates.

"They have taught me to respect

myself and others as well, and I am thankful for that. Being a part of it gave me a chance to redeem myself," said Kenneth Walker, 19, who was the first Urban Corps member to receive his high school equivalency diploma this school year.

Members attend classes each weekday morning before doing community service projects in the afternoon. "They are being taught things from life skills and parenting skills to how to work well with others," Martin said.

Mark Evans, 19, in the Public Lands Corps for about six months, said the program has "given me the confidence I needed to do better."

"The program has really turned me around. I am headed in a much better direction now."

AmeriCorps: Volunteers for America

By Mara Caitlin Roche
Poly Post Reporter

AmeriCorps, the "brain child" of President Clinton, has been in the news lately. Republican members in Congress, notably Newt Gingrich, have recently mentioned it as a possible target for funding cuts. But, what you might not know is that there are four full-time AmeriCorps members here at Cal Poly.

In the AmeriCorps application, Clinton states, "Through national service, you can help lift up America. There is so much to be done today, including teaching children to read, caring for the sick, and keeping our streets safe and our parks clean. Through AmeriCorps, you can help make America everything it ought to be—a nation where all our citizens, whatever their backgrounds, can live up to the fullest of their potential."

The four students interviewed have had positive experiences with working for AmeriCorps, though they are concerned about possible cutbacks to the organization, due to the congressional opposition.

"There is funding for the first two years [for AmeriCorps]. We are trying to establish a tradition of excellence so AmeriCorps can continue," said Jami Fisher, a senior in Landscape Irrigation Science. "Because this is the first year—we do need publicity. We're a lot like the Peace Corps—but we deal more with the community."

The group is currently working on a project for the Morongo Indian Reservation, helping that community with a flood-water control project. "We are able to provide the additional labor and technical assistance needed on projects like this," said Fisher. Fisher said that projects such as this would normally have to wait months to get off the ground if the extra assistance was not available through AmeriCorps.

Additional projects this past year have included developing waste-management plans for dairies and environmental improvements for area high schools.

"We are working with one high school, developing a 'demonstration garden' of native plants on steep, rocky soil," said Fisher.

"The program is good for community service," said Tai Diep, a junior in Civil Engineer major. When asked to explain the difference between Poly Corps and AmeriCorps Diep said, "They are both developed to help the community. But the focus is different for AmeriCorps groups; Poly Corps deals mainly with community service."

In the application, Clinton continues, "... through national service you will learn things that money can never buy. You'll join America's

AmeriCorp's volunteers Tai Diep, Kevin Nguyen, Jami Fisher and Adrian Gonzalez

Mara Roche / Poly Post

long tradition of great citizens—men and women of every race and religion who come together to build up our communities and our country."

When asked how he felt about the diversity of AmeriCorps, Kevin Nguyen, a junior in civil engineering, said that he thinks it is important because, "It's not only friendship that we exchange, but we exchange our cultural backgrounds as well."

"Communication is a key to everything. Well, we've managed to work in groups, and handle problems—we manage to achieve power in a group," said Adrian Gonzalez, a senior in Agricultural engineering.

Last week, the group had a surprise visit by Richard Rominger, acting secretary of Agriculture. He fielded questions from the students, including some about the questionable support in Congress for the 20,000 member workforce.

"There are people who think it costs too much money, but it has bipartisan support in Congress and it's a high priority for the president," Rominger said.

Hopefully, students such as Fisher, Diep, Nguyen and Gonzalez can show those in Congress that the work they do does make a difference.

Group tracing pioneer paths

By William Saunders
Staff Writer

Several groups are working to make U.S. 25E and U.S. 11W into a tourist attraction for Tennessee.

The Tennessee Wilderness Road will trace historic pioneer paths that follow the current routes, as well as highlighting area food, lodging and entertainment sites.

"We have a lot of families that came through here years ago when the area was being founded, and now people come through here looking to trace their roots," said Mary Russell, Clinch-Powell Resource

Conservation and Development (RC&D) - Americorps.

The road begins at Elizabethtown, runs through Rogersville and ends at Cumberland Gap. "We're planning a map of the Wilderness Road with historical sites on it, as well as food, lodging and a range of other items," she added. The map is scheduled to go to print June 1.

The goal of the road, she said, is to highlight the historical significance of the area, as well as to bring in tourism.

"Our main goal is historical preservation," she said. "We've been writing grants to preserve different sites along the road. Also, the road will bring visitors to the area with appreciation of the historical areas of Tennessee, including but not limited to Daniel Boone."

"The main trail will attract visitors here initially, and offshoots from the trail will get them into surrounding counties," said Lindy Turner, Clinch-Powell RC&D.

"Our main goal is historical preservation. We've been writing grants to preserve different sites along the road. Also, the road will bring visitors to the area with appreciation of the historical areas of Tennessee, including but not limited to Daniel Boone."

—Mary Russell

Area counties that would be directly affected by the Tennessee Wilderness Road will be Claiborne, Hawkins and Grainger.

The road program came about through the combined efforts of Clinch-Powell RC&D, Northeast Tennessee Tourism Council, First Tennessee Development District and Middle East Tennessee Tourism Council.

Russell said the program was based on similar roads in Virginia and Kentucky, such as the Daniel Boone Heritage Trail in Kentucky. Such roads have been proven to help boost economies in the communities through which they pass.

Road signs marking the trail are not in place, but Russell said they will be posted at a later date.

AmeriCorps assists Northeast Tennessee rural communities

AmeriCorps is "getting things done" in Northeast Tennessee. Seven members of this new domestic peace corps have taken on the challenge to address human and environmental needs in Northeast Tennessee communities.

AmeriCorps members recently helped serve meals at the Haven of Mercy in Johnson City. This was one of many community service projects they will undertake this year.

Amy Crumley and Billie Barlow are two AmeriCorps members based in Johnson City. They are part of the U.S. Department of Agriculture's (USDA) Rural Development Team. Directed by the USDA-Forest Service, they are working in the six-county Appalachian-Northeast Tennessee Resource Conservation & Development (RC&D) Area, which includes Carter, Greene, Johnson, Sullivan, Unicoi, and Washington counties. The Rural Development Team's objectives include assisting rural communities with economic development and natural resources conservation.

Crumley and Barlow are assisting the RC&D Council with new and ongoing projects. They are coordinating conservation education programs for elementary and high school students and organizing and promoting recycling and hazardous waste collection programs. They are

also developing promotional materials for a local tourism council. In addition, they will assist the RC&D Forestry Committee with a wood waste assessment.

The other five AmeriCorps members in Northeast Tennessee are also part of the USDA Rural Development Team. Their projects are directed by the Farmers Home Administration in Greeneville, Mountain City, and Sneedville, and the Natural Resources Conservation Service (formerly Soil Conservation Service) in Morristown.

In addition to their assigned projects, the seven AmeriCorps members in Northeast Tennessee work as a "cluster" on community service projects of their choice. Several members recently helped serve meals at the Haven of Mercy in Johnson City. The cluster also plans to work on a streambank protection project and would like to help with housing construction for those in need.

The AmeriCorps National Service Program is a grassroots effort to solve the problems facing communities across the nation. The AmeriCorps ethic is embodied in four phrases: getting things done, strengthening communities, encouraging responsibility, and expanding opportunity. The program offers Americans of all ages and backgrounds the opportunity to serve their country and earn education awards in

return. Members serve a limited term of nine months to a year. They receive a living stipend, and at the completion of service, they are awarded an education voucher for payment of tuition or outstanding student loans.

The United States Department of Agriculture (USDA) prohibits discrimination in its programs on the basis of race, color, national origin, sex, religion, age, disability, political beliefs and marital or familial status. (Not all prohibited bases apply to all programs.) Persons with disabili-

ties who require alternative means for communication of program information (Braille, large print, audiotape, etc.) should contact the USDA Office of Communications at (202) 720-5881 (voice) or (202) 720-7808 (TDD).

To file a complaint, write the Secretary of Agriculture, U.S. Department of Agriculture, Washington, D.C., 20250, or call (202) 720-7327 (voice) or (202) 720-1127 (TDD). USDA is an equal employment opportunity employer.

AmeriCorps member Amy Crumley, sponsored by the U.S. Forest Service, has been assisting in the preparation of meals to those in need at the Haven of Mercy in Johnson City.

Clinch Powell Development Council employing AmeriCorps participants

RUTLEDGE — The Clinch-Powell Resource Conservation and Development Council has employed six AmeriCorps Participants.

AmeriCorps is President Clinton's national service initiative that allows young people to earn money for school and loan repayments while serving critical needs in their communities. The Clinch-Powell RC&D AmeriCorps are sponsored by the United States Forest Service and Natural Resource Conservation Service to aid the rural community.

The positions they are filling are Environmental Education,

Solid Waste and Recycling Specialist, Recycling Specialist and a Specialty Recreation and Tourism team. Participants will be working in the five counties served by the Council. Those counties include Claiborne, Grainger, Hancock, Hawkins and Union.

Sarah Buchanan is serving as the Environmental Education coordinator. Buchanan will work in the schools conducting various programs and activities which include solid waste education, a clean water program, Conservation Camp, Envirothon and Teacher Inservice Workshops. Other activities will include newsletters to area schools, publicity of the environmental education program and the environmental resource library maintained by the council. Buchanan holds a BS degree in Agriculture Communications.

Liz Upchurch is serving as the Solid Waste and Recycling Specialist. Duties will include developing exhibits and displays, assisting solid waste boards, education and a promotion campaign to increase recycling and waste reduction, development of a Buy Recycled campaign and integration with the Keep America Beautiful coordinator and environmental education activities. Upchurch is a recent University of Tennessee graduate in Geography.

Mikhail Delong, Mary Russell and Jeremy Williams are serving as the Specialty Recreation and Tourism Team. While serving these individuals will be evaluating and

establishing a tourism base for the five counties served by the council. The formation of a regional advisory committee for the project and working with established tourism committees will be the basis of developing a long range tourism development plan. Russell and Williams hold MS degrees in Geography from UT and Delong is a geography graduate from U.T.

Steve Karnitz will be serving as Recycling Specialist for the Recycling Marketing Cooperative for East Tennessee. RMCT, located in Knoxville serves thirty-four East Tennessee counties. Karnitz will be working on the inventory and database management of recycling programs, program design and materials management.

Recruitment of members and education of the public concerning market and promotions of recycling in terms of solid waste management will also be addressed by the participant. Karnitz is a Tennessee Technological University graduate in chemical engineering.

AmeriCorps participants are assigned to work 1812 hours and are eligible to serve for two years. Call the RC&D office at 828-5927 or 828-8354 to find out more about the AmeriCorps program.

"The AmeriCorps program is helping RC&D to meet important needs in the communities we serve. The talents of the AmeriCorps workers and their dedication to community service is an exciting addition to our programs," reports Lindy Turner, RC&D Coordinator.

AmeriCorps succeeds in S.D.

BY ROBERT PORE
OF THE PLAINSMAN

Despite attacks by House Speaker Newt Gingrich as "coerced volunteerism," President Clinton's AmeriCorps program has been a success in South Dakota, said an official of the Natural Resources and Conservation Service.

"It has made a difference with the communities that have been working with the environment here in South Dakota," said Joyce Watkins of Huron, who is the director for the Natural Resources Conservation Service AmeriCorps team.

Last September, nine Huron residents were sworn in as members of AmeriCorps, a national service organization.

Among the members of the Huron team are: Brad Bader,

Jeffrey Dronen, Jim Hansen, Neal Hegg, Jason Kleinsasser, Michael Knigge, Shelli Meehan, Kendra Sargent and Kerry Zihlman.

Twenty AmeriCorps slots were allocated for NRCS in South Dakota, Watkins said. Currently there are 18 AmeriCorps members, nine in Huron, four in Brookings and five in Mitchell.

In Clinton's budget, he's proposing to increase funding to the AmeriCorps program. He would boost the number of participants from 20,000 currently to 47,000 by the end of the 1996 budget year, boosting the funding for the program's parent agency by \$290 million.

Sixteen of the 18 AmeriCorps workers receive \$7,760 for 1,700 hours of community service, Watkins said. The other two

members will receive \$12,000 for their supervisory responsibility.

The workers also receive free health care and a \$4,725 educational voucher for one year of work. The \$4,725 can be used for college, vocational education or to pay off college loans.

Also in South Dakota, there are AmeriCorps members working on the Rosebud Reservation and on a YMCA program in the Timber Lake area, Watkins said.

"The AmeriCorps members working outside of Huron have been involved in conservation work designing and building riparian areas by planting trees and helping in stream bank stabilization," Watkins said.

She said AmeriCorps members have also been collecting information for the USDA's Natural

AMERICORPS / page 3

AMERICORPS / from page 1

Resources Inventory and doing conservation programs, such as on windbreaks and wetlands, for South Dakota youth.

"AmeriCorps members will be working with the Beadle Conservation District on the Ravine Lake project this spring," Watkins said. "They have helped to bring a lot of community awareness when it comes to conservation programs."

While Watkins said their wages amount to "just enough to buy groceries and keep a roof over their heads," AmeriCorps members are keeping busy.

She said the AmeriCorps program is a "valuable aid" to conservation work in South Dakota.

"It gives the Natural Resources and Conservation Service another tool to help promote environmental awareness and what it means to South Dakota," she said.

Along with AmeriCorps help-

ers, NRCS also has an Earth Team Program, with members providing more than 10,000 hours of volunteer service to the field of conservation work.

Watkins said the NRCS will be seeking to renew its grant with the organization that administers the AmeriCorps program.

AmeriCorps teams across the country work in a variety of programs including anti-hunger, public lands and environment and rural development.

Watkins said her agency will be working with the Consolidated Farm Service agency and the Rural Economic and Community Development agency on future AmeriCorps projects.

"What's important is that the program is giving the AmeriCorps members a sense of personal satisfaction in the work they are doing," she said. "They also learn the value of community service."

March 30 cut-off date for first-time assistance

Dairy Owners Check Out Ammonia Test Kits

As the water from the relentless January storms drained off the land, AmeriCorps members Colin Close and Julie Maggi donned rubber boots and headed out to visit three of Sonoma County's dairies. Working out of the Natural Resources Conservation Service in Santa Rosa, the two AmeriCorps members have made themselves available to train dairy farmers on how to use ammonia test kits.

The CHEMetrics kit, which produces test results on location in just a couple of minutes, is used to analyze the amount of ammonia contained in a water sample. The derived results enable dairy operators to locate any potential problems. As dairymen Doug Buttke, Jim Kehoe and Jack Dei, Jr., were the first to ask for assistance in learning how to use the ammonia test kits, they were among the first to receive one of the ten test kits that were generously donated by the Gold Ridge

So far, all of the dairy farmers that have been introduced to the ammonia test kit were happily surprised to find the kit quick and easy to use. It was also viewed by each dairy operator to be a valuable tool to help better manage their dairy.

The test results may be a rewarding testimony to the time, money and energy invested in improving water quality upon a dairy.

Dairy owner Jack Dei, Jr., has made yearly changes in management practices to better improve his operation. Says Dei, "Using the test kit is very valuable because now when I make changes I can monitor the improvement of the water quality."

Jim Kehoe, the dairy manager of Saint Anthony's Dairy, says of the water quality issue, "It's a tough subject that needs to be addressed, but it all can't be done overnight. We have to work together to solve the prob-

Kits

from page 1

lems and do what we need to do to avoid future problems."

Appointments are still being made for any dairy farmer interested in learning to use the ammonia test kit. Telephone calls to arrange for first time appointments will be taken until March 30, although follow-up appointments will be accepted at any time.

Visits made, come rain or shine, are free and confidential. For more information call Colin Close or Julie Maggi at the Natural Resources Conservation Service's Santa Rosa field office, (707) 575-1409.

The AmeriCorps members wish to express their gratitude to Doug Buttke, Jim Kehoe and Jack Dei, Jr. for their active commitment to the water quality issue and for their consent to use their names for this article.

Mangum Shelter Belt Was America's First

By Lillie-Beth Sanger
Lawton Bureau

Col. Frank H. Shepard remembers well the blowing sand and dirt that gave Oklahoma a place among the Dust Bowl states in the 1930s.

Shepard, 75, of Midwest City also remembers the efforts in which he participated to conserve the soil for Oklahoma farmers by planting trees and reshaping farmlands.

"The sand had blown so hard it had covered up all the fences," Shepard said. "You couldn't find the fences. You couldn't find the farm implements. ... You could actually see the soil moving."

At the time, he became part of the Civilian Conservation Corps' movement to plant rows of trees — called shelter belts — to serve as windbreaks for the farms losing soil to erosion.

CCC volunteers planted 2,000 miles

of shelter belts in Oklahoma alone, as well as others from Texas to the Dakotas, said Dwain Phillips, a public affairs specialist with the National Resources Conservation Service in Stillwater.

Their efforts helped put an end to the Dust Bowl, he said.

The first shelter belt in the nation, located near Mangum, was planted March 18, 1935. It still has the same trees, along with a few new ones.

On Friday, Shepard and other former CCC volunteers, state conservation officials and members of the AmeriCorps volunteer service program will celebrate the 60th anniversary at the shelter belt.

The Mangum shelter belt, one of the larger ones planted, is about 12 rows of trees thick and provides the windbreak on an isolated field surrounded by shel-

— Staff Photo by Lillie-Beth Sanger

AmeriCorps volunteer Brent Smith, 24, of Sentinel packs dirt around a red cedar seedling as that will be part of a windbreak.

From Page 1

belts on all sides. It also shelters wildlife, from deer to turkeys.

Pat Curtis owns shelter belt No. 1 and remembers her husband, the late Horace Curtis, telling stories about helping plant the windbreak to stop the blowing sand, which they called "sugar sand" because of the way it moved.

Curtis' father opened his land to the radical shelter belt idea amid skepticism from other farmers, Pat Curtis said.

"We were in a drought. There was no rain coming in," and farmers didn't think the trees would live, she remembered. "Some of the farmers didn't want to give up their land."

But Horace Curtis didn't take his shelter belts for granted, said Pat Curtis, noting her husband's protective attitude in taking care of the nation's first one.

"The years have taken some of them, but those that are left are those that were planted 60 years ago," Pat Curtis said. "That's something. For that, he just didn't want it destroyed."

The windbreaks aren't hard to spot on Oklahoma's landscape. Trees are planted in rows and line edges of fields. Smaller trees are planted on the outside, the larger ones closer to the field to provide the greatest protection. Fuller trees, like cedars, often fill in gaps.

And if you stand inside one on a windy day, you can hardly feel the breeze.

Sixty years after "No. 1," a new group of workers is renovating shelter belts in western Oklahoma as members of AmeriCorps, the national service program implemented last year.

student loans and to learn more about the soil conservation side of agronomy, his major at Cameron University in Lawton.

Since September, he has cleared debris, chopped down dead trees and prepared the ground for planting new ones.

The shelter belt where Smith works at Moonlight Farm near Sentinel, owned by Rusty Rigin, now has just one row of tall trees because high winds last summer destroyed many of the others.

Smith and his work crew began planting two more rows of red cedar seedlings last week.

"It feels good to actually see what we've accomplished," Smith said. Newer windbreaks contain three to five rows of trees, unlike the first one's 12 or so.

Many farmers take the windbreaks for granted because they were planted so long ago, said Linden Haygood, district conservationist for the Conservation Service in Mangum.

"They've been here forever, and a lot of times they (farmers) don't care for them the way they should," Haygood said.

He said that since the AmeriCorps program began last fall, more have asked for their names to be added to the waiting list.

The shelter belt celebration will begin at 10 a.m. Friday. The 20 AmeriCorps program members in southwest Oklahoma, all working through the U.S. Department of Agriculture, will be recognized, and U.S. Rep. Frank Lucas, R-Cheyenne, and Paul Johnson, chief of the Conservation Service, will be among the speakers.

A lunch will follow.

PARTICIPATE IN COMMUNITY MEETING: Residents concerned about the future of Holly Grove attended a Monday night meeting to discuss community issues. Mayor Lula Tyler and Americorps Coordinator Renee Spurlock spearheaded the program. Participants listened to the concerns of the new mayor and then signed up to work on committees in various areas. Committees will be focusing on the issues of health care, crime and drugs, city beautification, education development, economic development, and recreation and tourism. The individual committees will meet on February 13 starting at 6:00 p.m. at the Holly Grove City Hall. For more information about serving on a committee contact Lula Tyler or Renee Spurlock.

Crews working it out

AmeriCorps gives job experience

By Lee Peterson
Daily Bulletin

LYTLE CREEK — They wanted to work, and they got what they asked for.

After a few months of chopping, clearing, shoveling and sculpting, the parcel behind the Lytle Creek Ranger Station is more than halfway toward becoming a multihabitat nature trail, thanks to a team of AmeriCorps workers.

The trail is just one of several projects assigned to the AmeriCorps workers hired by the San Bernardino National Forest last October. In addition to the trail, tasks performed by the

various crews have included restoration of fire-scarred wild lands, hiking trail maintenance and graffiti removal from picnic tables.

"It's hard work and it's something I enjoy," said Barbara Hicks, a 26-year-old Bloomington resident, who is part of the nature trail crew.

Hicks, like many AmeriCorps workers, joined the federally funded "domestic Peace Corps" in its inaugural year in order to gain work experience and earn money toward education. The minimum age for AmeriCorps members is 18, and there is no maximum. The enlistees serve for one year, with an option of joining for one more year. The National Forest's crews average age is 26.

In return for a \$4,725 educational grant and \$4.23 per hour, the workers are required to put in 40 hours per week, show up on time and put in a full day's labor, said Jessie McIntire, a Forest Service AmeriCorps team supervisor.

Lazar Jackson of Rialto said he joined the National Forest's AmeriCorps because he wanted to get more experience in forestry, as a possible career. After almost three months in the corps, the 22-year-old said he's getting the variety of experience that will help him decide exactly what career to pursue.

Shannon McCallum of San Bernardino is also part of the nature trail

See AMERICORPS/B2

AmeriCorps/from B1

crew. "I'm looking forward to seeing it in five to six years down the road when everything grows in."

McCallum is also thinking about "re-enlisting" in AmeriCorps next year, after this program is completed in September.

But members of the Republican majority in Congress have mentioned AmeriCorps as a possible target of funding cuts.

On a visit to Lytle Creek Friday, Richard Rominger, the acting secretary of Agriculture, was optimistic about the continuing federal support for AmeriCorps, which employs about 20,000 people nationwide.

"There are people who think it costs too much money, but it has bipartisan support in

Congress and it's a high priority for the president," Rominger said.

While there's plenty of sweaty heavy labor to do in the National Forest, AmeriCorps workers have been assigned to a variety of federal agencies and do a wide variety of work.

The Inland Empire West Resource Conservation District has four AmeriCorps workers, who are serving in a variety of consulting, surveying and educational roles.

Administered through the U.S. Natural Resource Conservation Service, the workers are helping dairies create manure management plans, educating the public on resource conservation and consulting on various environmental projects.

Jami Fisher, a Cal Poly Pomona landscape irrigation science major, is going to school on a limited basis this academic year in order to make time for AmeriCorps.

By working for the Resource Conservation District, she said she's getting real-world experience in designing irrigation and consulting on other projects. That experience will help when she starts looking for a job upon graduation in 1996.

"It's not just going out carrying tools and doing the hard grunt work," Fisher said.

The district's other AmeriCorps members include two Cal Poly civil engineering students and a Cal State San Bernardino environmental studies and geography major.

MID-DELTA BRIEFS

GREENVILLE — Ten AmeriCorps volunteers in the Delta will spend the year trying to improve bridges, sewer systems and recycling programs in an effort to improve the general quality of life among residents.

AmeriCorps is President Clinton's new national service program, involving 20,000 Americans, 17 and older.

Volunteers receive money at the end of the year of service, which began in September. They can use the money to further their education or pay back student loans.

The 10 volunteers are stationed throughout the Delta, in Greenville, Greenwood, Belzoni, Cleveland and Stoneville, according to team leader Cassandra McClure.

"Each member has different objectives," McClure said.

In Greenville, for instance, Wandra Arrington and Jethro Henderson hope to obtain grants to help fund local recycling programs already in place in Washington, Issaquena and Sharkey counties.

"We're working with local leaders and public officials in the area to expand, evaluate and work with existing projects," Arrington explained.

Another volunteer is an assistant forester;

two in Cleveland are working on the sewer systems; and the Belzoni team is evaluating the safety of timber bridges to find out which ones need to be fixed, McClure said.

The Northwest Resource Conservation and Development Area in Stoneville acts as the sponsor for the program. Part of the federal Soil Conservation and Development Service, the non-profit agency works on rural development programs in the Mississippi Delta.

Throughout the year, volunteers also hope to initiate other projects related to education, public safety and human and environmental needs.

**NATIONAL SERVICE REPORT SHOWS
PRESIDENT CLINTON'S AMERICORPS IS WORKING FOR AMERICA**
(Report surveys USDA-funded AmeriCorps projects in 38 states)

WASHINGTON, March 23, 1995--The first quarterly report on USDA's national service projects in 38 states shows that President Clinton's AmeriCorps members are making a positive difference in their communities.

"Our USDA AmeriCorps members have turned a concept on paper into something solid, beneficial, and practical for communities across the nation," said Acting Secretary of Agriculture Richard Rominger.

"AmeriCorps members are helping pull people together to solve community problems."

AmeriCorps is a program that engages diverse groups of Americans in performing critical service to meet human, environmental, public safety, and educational needs in return for vouchers for education, vocational training, or loan repayments.

All AmeriCorps programs are focused on "getting things done" while building community, opportunity, and responsibility. During the reporting period from Sept. 12 to Nov. 31, 1994, the 1,200 USDA/AmeriCorps members have provided more than 360,000 hours of service to urban and rural communities, rebuilding rural America, fighting hunger, and protecting the environment.

AmeriCorps, created in 1994, has approximately 20,000 members working in schools, hospitals, neighborhoods, and parks. A key Presidential commitment, national service represents President Clinton's vision that people who take responsibility for helping to solve community problems should be rewarded -- in this case with help in furthering their education.

The following is a sampling of the achievements of the first quarter of operation of the USDA/AmeriCorps members on Anti-Hunger, Public Lands and Environment, and Rural Development Teams.

AmeriCorps members on the Public Lands and Environment Team managed by the Forest Service in seven states (Ariz., Calif., Miss., N.H., Ore., Vt., Wash.) have:

- * Performed rehabilitation/watershed protection work on 12,000 acres of fire-damaged land;

- * Maintained 61.3 miles of hiking and horseback riding trails and constructed 6 miles of new hiking trails, of which 1.2 miles were made accessible for the physically challenged; and

-more-

* Hung erosion control netting on 300 feet of steep Forest Service road cutbacks and helped clear 15 miles of road that provide critical access to water monitoring sites after an early winter snowstorm.

Members on the five USDA Anti-Hunger, Nutrition, and Empowerment Team, managed by USDA's Food and Consumer Service through local partnerships with anti-hunger groups and youth service corps in five locations (Calif., D.C., Miss., Vt., Wis.), have:

* Sorted over 93,000 pounds of food at local food banks;

* Provided nutrition outreach and education for senior citizens and elementary school students;

* Contacted and encouraged about 150 families to immunize their children; and

* Assisted 200 earthquake victims with emergency food information through an informational referral service.

Members on the Environmental Team, sponsored by USDA's Natural Resources Conservation Service on private lands in urban and rural areas and sponsored by USDA's Agricultural Research Service at the National Arboretum in Washington, D.C., have:

* Repaired and restored five reservoir flood-damaged recreation areas in Kansas;

* In and around Atlanta, Ga., conducted water quality monitoring at 30 locations throughout the Big Creek Watershed; cleaned up, reseeded, mulched, and removed trash from an urban trail benefitting 400 residents; and built a greenhouse to raise plants for stream bank restoration at the North Metro Technical Institute in Acworth, Ga.;

* Restored 15 windbreaks originally created by the Civilian Conservation Corps on 7.5 miles of land in five counties in western Oklahoma; and

* In Chicago, maintained and beautified stream banks and created a safe-haven lot at Lathrop Homes; cleaned up a lagoon in Washington Park; landscaped a public high school; remodeled and prepared a play lot at Kennicott Park; helped organize a "Neighbors Against Gang Violence--Day of Dead Memorial;" remodeled the Donnelly Youth Center; and planted bulbs at the Fellowship Youth Center.

Members on the USDA/Rural Development Team, who are placed individually like VISTA volunteers, have:

* In Marion, Ark., helped provide a rural waterline that is furnishing seven households--with 22 residents--with running water for the first time;

* Helped 25 families without bathroom and kitchen plumbing obtain sanitary and safe plumbing facilities in four rural areas in southern Texas;

* In Pittsfield, Ill., completed a Small Businesses Research and Revitalization Project and updated the town's overall economic development plan.

AMERICORPS/USDA MEMBERS SET EARTH DAY ACTIVITIES NATIONWIDE

WASHINGTON, April 21, 1995--U.S. Department of Agriculture AmeriCorps members today planted a garden across from the White House to celebrate the 25th anniversary of Earth Day, while AmeriCorps/USDA members nationwide will commemorate the April 22 event with projects in their own backyards.

Paul Johnson, chief of USDA's Natural Resources Conservation Service, said that seventeen AmeriCorps members from Maryland and the District of Columbia, sponsored by NRCS and USDA's Agricultural Research Service, planted a Native American Heritage Garden with indigenous plants from throughout the country on a plot on the Ellipse, south of the White House. The garden is part of an Earth Day Program sponsored by Native Americans.

Visitors to the garden will receive a packet of heirloom seeds and information on the indigenous plants, the Native American heritage of conservation, and current conservation efforts. Callers may dial 1-800-THE SOIL to order a free action packet on current conservation practices.

A sampling of AmeriCorps/USDA Earth Day events being sponsored around the country follows:

- * In Marion, Va., AmeriCorps/USDA members will present a guidebook they wrote for a new Tree Identification Lab--which is an interpretive trail on the banks of the Middle Fork Holston River--to the Marion community during an April 22 ceremony;

- * In Cloquet, Minn., AmeriCorps/USDA members will plant approximately 5,000 trees at three sites with the assistance of about 200 community volunteers on April 22; and

- * In Kingsport, Tenn., AmeriCorps/USDA members today created and set up two displays to inform the public about an upcoming Regional Household Hazardous Waste Collection Program in Kingsport.

AmeriCorps is a national service program, created by President Clinton and passed with bipartisan support from Congress, that engages diverse groups of Americans in performing critical service to meet community needs. In return for their service, AmeriCorps members receive educational awards that can be used to pay for college, graduate school, or job training. The majority of AmeriCorps members are working in community-based partnerships with states, local governments, and non-profit organizations.

-more-

USDA is running three types of AmeriCorps teams, composed of approximately 1,200 members, in 38 states across the country: an Anti-Hunger Team, a Public Lands and Environment Team, and a Rural Development Team.

"All the AmeriCorps projects are designed to get things done, while boosting community, opportunity, and responsibility," Johnson said.

AMERICORPS/USDA MEMBERS TO PARTICIPATE IN "NATIONAL DAY OF SERVICE"

WASHINGTON, April 24, 1995--AmeriCorps/USDA members in Farmington, N.M. will clean up a site on a ranch for disadvantaged youth--for future construction of a petting zoo designed by an AmeriCorps/USDA member--on Tuesday, April 25, as part of their observance of "National Day of Service."

Through this activity, the AmeriCorps/USDA members are joining their AmeriCorps counterparts in special community service projects nationwide on that date.

National Day of Service is being jointly sponsored by the Corporation for National and Community Service, Youth Serve America, and the Points of Light Foundation during National Volunteer Week, April 23-29.

"The National Day of Service is intended to highlight how AmeriCorps projects work cooperatively with community volunteers," said Joel Berg, director of National Service for the U.S. Department of Agriculture.

Navajo Nation AmeriCorps members and VISTA Volunteers will join the AmeriCorps/USDA members on that date at Our Ranch, a non-profit facility in New Mexico that provides opportunities for disadvantaged youth through horsemanship and outdoor activities.

Here are some of the community service activities planned for Tuesday by AmeriCorps/USDA members:

* In Des Moines, Iowa, 25 AmeriCorps/USDA members will join with about 150 of their colleagues at a downtown housing project to clean the apartments of elderly and handicapped persons, landscape the grounds, and reorganize the library and thrift shop.

* In Wellington, Utah, AmeriCorps/USDA members--along with the city's mayor, Paul Clark--will landscape the grounds in front of the newly remodeled city building.

* In Santee, S.C., AmeriCorps/USDA members and Santee residents will unite in a project to beautify the town.

AmeriCorps is a national service program, created by President Clinton and passed with bipartisan support from Congress, that engages 20,000 Americans of diverse backgrounds in performing service that meets critical community needs. In return for this service, AmeriCorps members receive awards to help pay for higher education, job training, or to pay back student loans. The majority of AmeriCorps members are working in partnerships with states, local governments, and non-profit organizations.

USDA is running three types of AmeriCorps teams, composed of approximately 1,200 Members: an Anti-Hunger Team, a Public Lands and Environment Team, and a Rural Development Team. The USDA program has projects in 38 states, many of which are sponsored by community-based organizations. "All AmeriCorps projects are designed to get things done, while boosting community, opportunity, and responsibility," said Berg.

Dear Janice:

I want to thank you for all your work during the 1995 Christmas Toy & Joy Shop. Your efforts made it a great success.

We hope that you will consider volunteering in this capacity again next year.

Please remember that there are many volunteer opportunities available throughout the year. Should you be interested in these opportunities, please contact our office.

Again, thank you for all your help!

Washington DC 20250-1310

Dear Sir or Madam:

My wife and I have just attended an "open house" staged by leaders of the Americorps organization in Goldendale, Washington. The Greener Pastures Institute is in the process of building a new headquarters in Washington state.

We met some very dynamic, committed young people at the open house describing their myriad efforts to restore riparian habitat in Klickitat County and take on other needed community service projects.

I understand that political pressures may be brought to bear to disband this program which is obviously creating educational and training opportunities for young people while at the same time contributing to community beautification and development. It reminds me of the old VISTA (Volunteers in Service to America) program.

I hope you will pass this letter along to those who can positively influence continued funding of the Americorps program.

Sincerely,

William L. Seavey

Dear Ana:

I would like to take this opportunity to thank you for your superb assistance with the Aztec and Bloomfield business survey. Without your dedicated effort we would have been unable to meet the stringent deadline set forth for the completion of the project.

I've spoken with Patty Lundstrom and Jennifer Dowling at the COG, and they were equally impressed by the timeliness in which you were able to conduct all of the surveys. Though the analysis is currently in its early stages, the results appear to be promising and we anticipate gaining a great deal of insight.

Thank you again for your help and we will forward a copy of the final report to your office.

**METRO**

March 24, 1995

Senator Mark Hatfield
711 Hart Senate Office Bldg
Washington, DC 20510

Dear Senator Hatfield:

Attached is a resolution adopted March 23, 1995, by the Metro Council, in support of continued funding for the AmeriCorps program. We have found AmeriCorps to be a valuable tool to provide valuable work experience for urban youth and college students, while helping local projects aimed at cleaning and restoring the environment.

We have local experience with AmeriCorps, through an EnviroCorps project employing 20 young people working to restore parts of the Columbia Slough and other fragile natural environments. This program is already producing results from a committed group of workers.

We hope that you will give strong consideration to continuing funding for AmeriCorps on a national level, to continue producing benefits, like those already accruing to the Portland metropolitan region, in communities throughout the United States. Thank you for your consideration.

Sincerely,

Ruth McFarland

RESOLUTION NO. 95-2119

Introduced by Councilor
Ed Washington

WHEREAS, The AmeriCorps program was established in June, 1994 to provide opportunities for young men and women across the country to work on conservation projects while earning a small stipend and college tuition credit; and

WHEREAS, The AmeriCorps program also provides the opportunity for its participants to gain valuable work experience while contributing to their community; and

WHEREAS, Metro is a participant in a local EnviroCorps program that is affiliated with AmeriCorps, which provides work experience for up to 20 young adults in helping to restore the Columbia Slough area adjacent to the former Whitaker School; and

WHEREAS, The local EnviroCorps program provides an excellent opportunity for inner-city youth to serve their community by cleaning and restoring this part of the Columbia Slough, and serve their own interests by doing productive work; and

WHEREAS, The EnviroCorps program is an excellent example of federal and local cooperation to achieve the multiple goals of assistance to our young people and environmental restoration; and

WHEREAS, Reduction or elimination of funding for the program at the federal level will deprive residents of the Metro area and across the country from realizing the multiple benefits of this most worthwhile program; now, therefore,

BE IT RESOLVED,

That the Metro Council supports continued funding for the AmeriCorps program by the U.S. Congress, and directs that this resolution and a cover letter be sent to all members of Oregon's and southwest Washington's congressional delegations.

ADOPTED this 23 day of March, 1995.

J. Ruth McFarland
J. Ruth McFarland, Presiding Officer

House of Representatives

Committee:

Medical, Military, Public
and Municipal Affairs

March 30, 1995

Ms Jacqueline Porter
205 Izlar Street
Blackville, SC 29817

Dear Ms Porter:

I would like to commend you on your work for the Blackville community as an Americorp volunteer. After reading your letter concerning services for HIV positive citizens, I contacted Ms Debra Dicks of the Barnwell City Health Department. The following is a list of services Ms Dicks indicated are available for citizens of the area:

- Pre-test Counseling regarding what HIV is;
- Counseling on being HIV positive once a test is positive, including counseling about health factors and lifestyle behaviors;
- Counseling on the AIDS disease once a second lab test indicates HIV positive status;
- Questioning on whether the client has a private medical provider and/or health insurance;
- A client is then referred to an HIV case manager who is in the district. Case management is based on individual need and is funded by Ryan White funding that just recently became available;
- Help in filling out disability of Medicaid form;
- Referrals to other departments, such as the South Carolina Mental Health Department, which also provide services for HIV positive individuals; the HIV Consortium; and given information on private counseling groups (located in Aiken, South Carolina);
- At the choice of the client, follow up lab work regarding T-4 counts can be performed by the Health Department. This work is based on availability.

Page Two
March 30, 1995

In addition, the department now has contracts with physicians on an as-needed basis for those clients who do not have a private source medical provider. Some medication can be obtained from the Consortium, Ryan White funds, and from drug companies. The Health Department aids in filling out the necessary applications for this medication.

From this information, it appears that the problem for the county is not the lack of services, but is in convincing citizens to come forward and utilize these services. Your position as an Americorp volunteer to link resources and people is ideal for this challenge.

It is my pleasure to help you in any way I can in confronting this problem. I hope you will let me know if I can be of further assistance to you.

Sincerely,

A handwritten signature in dark ink, appearing to read "Wilbur L. Cave". The signature is fluid and cursive, with the first name "Wilbur" being more prominent and the last name "Cave" following in a similar style.

CITY OF MARVELL
P.O. BOX 837
MARVELL, AR 72366

April 6, 1995

Mr. Joel Berg
AmeriCorps Director
USDA
Room 538-A
14th & Ind., SE
Washington, DC 20256

Dear Mr. Berg,

The City of Marvell would like to express their sincere appreciation for the work that the AmeriCorps volunteers have provided in our rural community. The workers have provided services that our city would not have been otherwise able to afford or provide.

Currently Jana Coleman is working with the City of Marvell filling out grant applications, organizing community volunteer committees, and assisting with the planning and installation of handicap ramps in our downtown area. She is a major force in getting the City prepared for new projects to be implemented, such as Neighborhood Watch, a new county library in our community, and an updated City map. In conjunction with the AmeriCorps participant and the Natural Resources Conservation Service, the City of Marvell has applied for a Floodplain Management Study. With the AmeriCorps volunteers assistance this project, which is greatly needed in our area, is closer to becoming a reality for the City of Marvell.

Other individuals and groups are also being helped by additional AmeriCorps volunteers in our area. Vivian Jones is teaching Staff Development at the Boys, Girls, Adults Community Development Center located in Marvell. Harrison Locke is assisting an area farmer in vegetable production.

In closing, the AmeriCorps volunteers are an asset to not only our town but to the entire Delta region. It is with great respect that I request the continuance of this program.

Sincerely,

Clark Hall, Mayor

Helena, AR 72342

Dear Jana,

As mayor of Marvell, I just wanted to say thank you for all the long hours you put in on our recent Cops-More grant. The job you did was outstanding. The City was indeed lucky to have your co-operation.

Please keep us informed on the Flood Plain Management Study. We are in desperate need of this service. If there is anything further that I need to do please let me know.

If there is any way possible I would like to have you in Marvell on a regular basis. I feel that with your help, together we could tackle all of our problems.

Again, thanks for a great job. If there is anything I can do to help you in other programs just let me know. I am looking forward to working with you in the near future.

Thanks again

Clark Hall, Mayor

A program makes a difference

AMERICORPS
continued from C1

age 14, he wrote an article in the Kakiat Junior High school newspaper on what he viewed as drug abuse among his fellow students.

When the school board moved to squelch the article, Berg sought local newspaper and radio coverage to publicize his position.

"I felt it was a greater First Amendment issue," he says. "That started me in politics. I saw how a person in office could affect public policy."

At age 18, he ran for a position on the East Ramapo district's school board. While a student at Columbia University, he worked on Democrat Gary Hart's presidential campaign, and on Bruce Levine's first campaign for the Rockland County Legislature in 1985.

Berg continued to forge his imprint in the political arena after graduating from Columbia in 1986. That year, he accepted the Democratic mantle in the race for state senator against popular incumbent Eugene Levy, who won easily.

Thereafter followed a stint

working in New York on Bruce Babbitt's presidential campaign. After the election in 1988, Berg came to Washington and landed a job as a policy analyst for the Democratic Leadership Council's Progressive Policy Institute. His primary issue was national service.

The council, chaired by Sen. Sam Nunn, introduced a project called City Year in Boston that attracted Clinton's attention, Berg says.

"In the past, programs like the Peace Corps and VISTA (Volunteers in Service to America) were mainly for upper middle class people. And there were other programs for kids from lower economic levels. But City Year connected all kinds of kids. Clinton saw this and he went from enthusiastic to evangelical. He made national service one of the centerpieces of his campaign."

'Getting things done'

Berg worked on Clinton's campaign for a year and was a member of his transition team. For three months, he held the position of U.S. Department of Agriculture director of public affairs, reporting to then Secretary of Agriculture

Mike Espy.

For the next year, he served as USDA director of public liaison, which entailed dealing with special interest groups.

"People have to remember that the USDA is not just involved with farming," Berg says. "It's also nutrition, inspecting meat, world development, research, national forests."

A year ago, Berg secured his current position, USDA director of national service, in which he strives toward four general goals: "getting things done, promoting community, building responsibility and expanding opportunity."

Berg works with community-based agencies such as youth service corps, soil conservation districts and county governments. He reports to Segal, the AmeriCorps president, and Dan Glickman, the U.S. Secretary of Agriculture.

"The leadership and spirit of Joel and his colleagues at the Department of Agriculture," says Segal, "have inspired creation of service programs that make a difference to thousands of families, and give hundreds of AmeriCorps participants a chance to give something back to their country."

Clearing a path to success

Education

John Soto (foreground) of Indio and Patrina Olvera of Desert Hot Springs cut and clear a portion of the Pacific Crest Trail recently as part of an AmeriCorps

project. The workers provide community service in exchange for minimum wage and funds to apply toward their education.

AmeriCorps provides paychecks, pride

by PAUL R. HUARD

The Desert Sun

Karen Perry stretched her arms wide, gesturing at the mountains around her as she stood on the wilderness trail she helped repair.

"This is my office," the 26-year-old Riverside woman said. "I want to tell you how proud I am of the work I do."

Perry was one of 18 crew members in the regional AmeriCorps program who recently helped clear and repair a section

BACKGROUND: When, why AmeriCorps was started/A5

of the Pacific Crest Trail in the San Bernardino Mountains above Whitewater.

AmeriCorps, a national service program, was signed into law by President Clinton in 1993. As a trade-off for a year's worth of labor, participants receive money for college.

Clinton said the program, with 20,000 people enrolled nation-

wide, is his proudest achievement. But it has come under fire from a Republican-controlled Congress looking for ways to trim federal spending.

Last month, House Speaker Newt Gingrich called the program "coerced volunteerism," "gimmickry" and waste of money.

Republican Congressman Sonny Bono said he didn't know enough about AmeriCorps to advocate it being cut, but he said the

See CORPS/A5

Corps

Continued from A1

\$1.5 billion allocated over three years would make many of his colleagues take a hard look at the program.

"It's apparent there will be a lot of sacrifices required in the future. Then the question becomes, 'Where are the priorities?'" he said. "If it's just giving away a billion-and-a-half, then I think it's going to be a big problem from the get-go."

To many people enrolled in AmeriCorps of the San Bernardino National Forest — a regional program for Riverside, San Bernardino and Los Angeles counties — the program has become a means to a better life.

Angie Savio of Palm Springs worked alongside Perry, hauling rocks into a drainage ditch they built to keep the trail from eroding.

A few months ago, friends questioned Savio's sanity when she told them she would be working in the wilderness.

"Now I can use a chainsaw," said the 20-year-old member of Crew 13, based at the Palm Springs Bureau of Land Management office. "Nobody tells me I can't do or learn anything."

Although many might consider this opportunity for public service the equivalent of hard labor, the AmeriCorps members said the program is doing more for young people than the jobs they probably otherwise would get in fast-food restaurants.

"I could be clearing tables," said 27-year-old Eve Koenenbuch of Indio. "Instead, I'll be clearing brush. Which job do you think is going to teach me more?"

Called "the domestic Peace Corps" by its supporters, AmeriCorps employs 85 people from Riverside and San Bernardino counties — including five from the Coachella Valley. Participants repair hiking trails, remove graffiti from picnic sites in the San Bernardino National Forest and plant trees on fire-scarred mountains.

In return, they receive minimum wage and a \$4,725 award that can be used for college tuition or to repay an existing student loan.

Desert Sun photo by Andy Gumpert

ROAD TO SUCCESS: AmeriCorps workers earn money for school by clearing a narrow, winding section of the Pacific Crest Trail. The program has enrolled 20,000 since it began in 1994.

For information

AmeriCorps of the San Bernardino National Forest: (909) 794-6198.

Corporation for National and Community Service: 1100 Vermont Ave. N.W., Washington, D.C. 20525, (202) 606-5000.

Recruitment: This spring, AmeriCorps will recruit in high schools and community colleges throughout Riverside, San Bernardino and Los Angeles counties.

Applications: Accepted beginning in June. Next service year begins in August.

To participate: Candidates must complete an application, orientation and interview. Members are chosen based on "a true desire to go on to school," Director Randy Scurry said.

Local projects:

Repairing walking trails in the Big Morongo Canyon Preserve; removing brush and trees near I-15; rebuilding trails to resist erosion in Joshua Tree National Park.

member said the program already helped him choose a career. John Soto of Indio rose to the position of crew boss since he joined AmeriCorps in October.

Soto, 29, said he wants to be a firefighter, a job he learned to admire while working in AmeriCorps.

"When you're young, you don't look to the future," Soto said. "I need to provide for my family. I think I've found a way."

people to help us get the message out," Clifton said before leaving Palm Springs this week.

Americorps takes root in A.V.

*Tree-planting
helps residents
weather storms*

By Karen Maeshiro
Daily News Staff Writer

ANTELOPE ACRES — April Jorgen was a student at Antelope Valley College, Sandy Haynes was working in real estate and Phillip Sam was fresh out of college with a degree in agricultural biology.

The three took up the call to join President Clinton's Americorps community service program last fall and have come together in the Antelope Valley, where they will help residents plant trees as windbreaks against dust storms.

"I've always been interested in volunteering and helping people, and I'm a real outdoors person," said Haynes, a 57-year-old resident of Lancaster. "It's the joy of helping people and being outdoors. We've learned a lot about windbreaks, and we're disseminating the information to the people."

On Saturday, Haynes, Jorgen and Sam attended a tree-planting demonstration at the Antelope Acres Community Center to launch the program by the Natural Resources Conservation Service, where the three have been assigned.

About 20 people were on hand to watch as 54 Arizona cypress seedlings were placed into the ground. In the center, Natural Resources Conservation Service staff discussed the program with residents and answered their questions.

The three Americorps members will be working with residents in Antelope Acres to help plan the windbreak, determine the number and type of trees needed, and provide the labor to plant the seedlings.

Jorgen, who is hearing-impaired, provides staff support by writing up reports. Haynes and Sam get to do the outdoor work, which has included helping residents in fire-ravaged areas of

AmeriCorps... *Domestic 'Peace Corps' active in area*

By Vicki Adams
Contributing Writer

AmeriCorps, the national service organization signed into law by President Bill Clinton, has been termed a success since Winnsboro adopted it in the fall.

AmeriCorps has been called the president's domestic version of the Peace Corps. Sponsored by government agencies, it allows groups of people to perform critical services to meet environmental, human, public safety and educational needs.

The members of AmeriCorps assist with tourism development, community planning, rural fire protection, timber bridge replacement and farm safety.

Lee Wooldridge, a local member of AmeriCorps, says he enjoys helping people in the community.

"I don't mind helping people and I do it everyday," Wooldridge said.

"A program I'm working on now is tutoring students in grades K-7. I'm also giving farm safety classes at local elementary schools."

Wooldridge is sponsored by Rural Economic and Community Development (RECD), which is a subset of the United States Department of Agriculture (USDA).

The USDA is a large supporter of the AmeriCorps program. Other agencies under USDA are Forest Service (FS) and Natural Resources Conservation Service (NRCS).

Judith Ned of Baton Rouge now lives in Winnsboro as a community planner for 12 surround-

Susan Mullins of Mangham

Joel Berg

as tourism specialist.

"I like the benefits of AmeriCorps," Mullins said. "It pays child care while I'm working and I know the education and money are there if I ever decide to go back to school."

Donna Remedies, the Resource Conservation and Development (RC&D) coordinator, is the AmeriCorps supervisor over Ned and Mullins.

"I don't feel I could have accomplished as much in the community since I've been here without the girls' help," Remedies said. "All the members under FS are college graduates. They could be making a lot more money but they chose to help here. We get a lot done."

Joel Berg, the director of National Services for the Department of Agriculture, visited Winnsboro on March 30 to speak to AmeriCorps members in the area. He oversees 1,200 AmeriCorps members serving in USDA anti-hunger, environmental and rural development projects in 33 states.

"AmeriCorps is about four

things: getting things done, community, opportunity and responsibility," Berg said.

"It creates more jobs, a cleaner environment and safer community. You'll soon see how critical it is to your community."

The AmeriCorps also participated in Saturday's Catfish Festival, where they manned a children's booth.

Sandy Eley, a local AmeriCorps member who's also with the Macon Ridge Economic Development Foundation, coordinated the booth, which included face painting, cartoon characters and information about farm safety, mental health, conservation awareness and fire safety.

The booth also featured identification cards for the children, which will be registered with the police station.

North Little Rock, AR 72116

Dear Mr. Leggitt:

Renee Spurlock, Audria Coleman, and Jana Coleman, members of the AmeriCorps-USDA, are very active in and concerned about our community.

They serve on various projects whose mission is to improve the quality of life in the Holly Grove community. Two good examples are the Crime and Drug Committee and the Education Development Committee. One goal of the Crime and Drug Committee is to organize Neighborhood Watch Programs throughout the city.

As members of the City Beautification, Recreation and Tourism Committee, Ms. Spurlock and Ms. J. Coleman have the task of implementing ideas that will encourage tourism in our city thereby improving our sagging economy.

Vivian Jones is a member of the AmeriCorps-USDA Program who is working on the DAD (Dealing With Adolescent Development) Program. The goals of the DAD Program are to bring job opportunities to the city and to provide the African American youth of the city with programs to help them deal with problems they currently face. As a member of the DAD program, I plan to personally work with about thirty of these at risk African American males.

I have observed both concern and dedication to purpose in Ms. A. Coleman, Ms. J. Coleman, Mrs. Jones and Ms. Spurlock. As a fellow member serving on several committees with them, I have seen their devotion and hard work.

Sincerely,

Harry Mayo, Principal

Paula Cole Jones
Director, Americorp
USDA-NRCS

Dear Ms. Jones:

The City of Holly Grove is very proud to have Americorps workers in our town. They have shown a great interest in improving the living conditions for all of our citizens. They have shown much enthusiasm and motivation in working with our community.

The City has undertaken several projects and the Americorp workers have been very instrumental in keeping the projects out front. They have been very active in the FEMA buy-out and also in reactivating committees that will determine the growth of the City. Also they have been very beneficial in locating funding sources for our projects.

All of the citizens, especially the senior citizens, look forward to reading The Holly Grove Update that is prepared monthly by the Americorps workers. This effort has also brought the City closer together.

It is a pleasure to have Americorps workers in our community. They have been most helpful and cooperative in our endeavor to motivate our residents to become an active part of our community. I hope to see the Americorps program extended here in Holly Grove for at least another year to allow for the completion of the projects that have already been started and to further educate the public in order that the programs that have been initiated by the Americorps workers will continue to be successful.

Respectfully,

Lula Tyler

DEAR MR. BERKLAND:

THIS LETTER IS TO EXPRESS THE APPRECIATION FOR THE WORK PERFORMED BY THE AMERICORP TEAM IN EDGEFIELD COUNTY. THE AMERICORP VOLUNTEERS FOR OUR COUNTY CONSISTED OF CHAD WESTON, ANGI PAULUS, CHRIS BEVER, SHERRELL STEVENS AND SUSAN MILLER.

THEY DID A ROAD INVENTORY TO HELP US IN THE IMPLEMENTATION OF THE 911 SYSTEM HERE. THERE HAD BEEN NO ACCURATE RECORDS UPDATED AS TO ALL ROADS AND ROAD NAMES IN OUR COUNTY IN A LONG TIME. DUE TO THEIR EFFORTS, WE NOW ARE ABLE TO CONTINUE WITH THE NAMING OF ROADS.

OUR TEAM HAD A VERY PROFESSIONAL AND ORGANIZED OUTLOOK ON THE PROJECT. THERE WAS NEVER A DAY THAT WENT BY THAT THEY WERE NOT A BLESSING TO US.

PERSONALLY, I CAME TO KNOW EACH PERSONALITY TRAIT AND I HOPE WE WILL ALWAYS HAVE A LASTING FRIENDSHIP BECAUSE THEY ARE VERY DEAR FRIENDS TO ME.

IN APPRECIATION FOR EDGEFIELD COUNTY AND THE 911 PROGRAM, I SAY "THANK YOU".

SINCERLY,

Mr. Mark Berkland, State Conservationist
USDA-Natural Resources Conservation Service
1850 Assembly Street
Strom Thurmond Building, Room 950
Columbia, South Carolina 29201

Dear Mr. Berkland:

I would like to thank you and your staff, especially Jim Wilson, for the assistance provided to Wildlife Management Region II, S. C. Department of Natural Resources, by the Greenwood 1 AmeriCorps team. The team was eager and enthusiastic and, other than initial instructions, went about their tasks with little need for supervision by my staff. They posted about 100 miles of Wildlife Management Area boundary with about 900 signs, coded over 3,000 deer data cards, and used GPS technology to obtain location and size information on 30 of our permanent wildlife openings. Along with our personnel they helped in control burning about 300 acres to improve wildlife habitat and erected 24 new wood duck nest boxes.

The members of team, Chris Bever, Angi Paulus, Susan Miller, Sherell Stevens and Chad Weston, showed considerable interest in and appreciation for the wildlife resources of the area, even though their career choices lay in other fields. Hopefully their brief exposure will help them be more aware of the need for natural resource conservation as they pursue their careers.

I am hopeful that we will be able to obtain the assistance of another AmeriCorps team either later this year or in future years. Their help will make a significant impact on our ability to more effectively management the wildlife resources of the area.

Sincerely,

A handwritten signature in cursive script that reads "Robert W. Gooding".

135 Assembly Street
Columbia, South Carolina 29201

Dear Sir;

As Sheriff of Saluda County and being in charge of the Jail and Dispatch Services for the Sheriff's Office, The Saluda Police Department, The Ridge Spring Police Department, Nine(9) Fire Departments in the county along with having to communicate with State Highway Patrol through the Greenwood District Office as well The Department of Social Services, Alcohol and Drug Abuse, the local Department of Probation-Parole and Pardon Services, and local Wildlife officers through Edgefield Wildlife, no one realize the importance of more than I.

I e found that there is a lot of preliminary work to be done before 911 can become a reality. this is not only time consuming, but also expensive. this created a problem, as I was not sure where this money or the qualified personnel would come from to undertake such an enormous and tedious task.

Fortunately however, I was informed by our Chamber of Commerce of an organization called AmeriCorps and the services they offer. This has been a blessing to us. The job these young people have done has been very professional. We are not only very pleased with their work but also impressed with the way it was done.

To you Sir and AmeriCorps we are forever grateful.

Sincerely,

Dudley Rushton

Columbia SC 29201

Dear Mr. Berkland:

On behalf of the Saluda County Chamber of Commerce, I wish to express my thanks to the NRCS for their assistance in allowing us the opportunity to witness firsthand the services of AmeriCorps volunteers in our community from January 3 through January 25th.

The Newberry I team; Diggs Hill, Abbe Gage, Karen Kinard, Madeline Cislo, and John E. Morgan III exhibited sunny attitudes, abundant energy, and a willingness to work that will be hard to match by anyone else. Their work was so extremely significant to our project here for the implementation of the "911" program.

The team divided the county, researched information and gathered data, physically visited and inventoried every road in the county and prepared maps showing the location of homes, hazards, roads, etc. They developed spread sheet information identifying five fire districts in the county and computerized all the data. The information will now be assembled into revised maps of the county which will be distributed to the emergency and law enforcement personnel. The AmeriCorps Newberry I team touched the lives of every resident of Saluda County with their work in a very short time, and we truly appreciate having met and known them all.

We do look forward to seeing our friends again soon. Please extend our thanks for an excellent job! A photo is enclosed.

Sincerely,

Carol S. Williams
Executive Secretary

Mr. Mark Berkland
State Conservationist
USDA - Natural Resources Conservation Service
1835 Assembly Street, Room 950
Columbia, South Carolina 29201

Dear Mr. Berkland,

I am writing to express my appreciation for the work performed by the Americorps Greenwood No. Two Volunteer team. Initially, I had submitted a proposal for the Americorps volunteers to code SCDHEC's water classifications on hardcopy maps of the state's stream system for a nine county area. I had anticipated this work effort would take approximately three to four weeks. Work was to begin October 17, 1994, with a completion date of November 17th. The team finished the initial task within a week's time and continued to complete the water classification coding for the entire state. The process incorporated a rigorous quality assurance/quality control program that the volunteers adhered to diligently. In addition, the team labeled and sleeved 2,000 photographs associated with our National Aerial Photography Program, indexed and inventoried hundreds of topographics maps, keyed in historic data on our state's water classifications and accompanied staff field biologists on sampling expeditions.

For each team member their week consisted of traveling one day to the SCDHEC's Central office in Columbia to key in data and assist in GIS coding, one day travel to meet with the field biologist for sampling, two days in the Greenwood Office for stream map coding and on their 'Free Friday' cleared and developed nature trails and erected fences at an Earth Education Resource Center in Laurens. Days began at 8:00 sharp and whether they were traveling from Augusta, Laurens or Greenwood, all volunteers arrived at the various work locations promptly. The Americorps volunteers were always professional and enthusiastic about their work, maintaining a wonderful sense of humor even when tasks became difficult or tedious. Each volunteer was a joy to work with and I cannot overstate how appreciative SCDHEC is of being the recipient of the work produced from the volunteer's effort. I believe the Americorps Program has established a wonderful beginning with this initial effort from the Greenwood Office and I wish the program continued success with future endeavors. You can be proud of the work the Greenwood No. Two team has accomplished. Again, I appreciate the opportunity to have been associated with the Americorps Program.

Sincerely yours,

Jeannie Pickett Eidson

NEWSLETTERS AND OTHER OUTREACH MATERIALS

A SLOUGH OF ACTIVITY

E N V I R O C O R P S

An environmentally focused group participating in President Clinton's AmeriCorps program

This is our first Newsletter. Quite a bit is happening on both the full and part-time crews, so here is a brief description of a few major projects we are working on during our year of service in the AmeriCorps program.

•Part-time crew•

Team leader Tamra Cochran is involved in all the activities which the part-time crews participate in.

•Roosevelt team•

Beth Polidoro, Jonathan Mugglestone, Cassandra Rutherford, and Katherine Demsky, the part-timers involved with Ms. Dunster's class at Roosevelt High School, drafted a proposal to include her students in an upcoming event at Smith and Bybee Lakes on April 29th.

The Roosevelt students and EnviroCorps members have gathered cuttings from plant species found in the wetlands around the lakes and are rooting them in a greenhouse adjoining Ms. Dunster's classroom. On April 29th, at the Smith and Bybee Lakes Day, the students will demonstrate how to transplant the newly rooted cuttings and then assist anyone who wishes to join in and help plant them.

As the project progresses Ms. Dunster and the EnviroCorps crew will teach the students something about the ecology of the Columbia Slough watershed system in which the cuttings they have rooted are to be planted. It should be a rewarding experience for all concerned.

•Alberta Park team•

The other group of part-time members; Alexandria Le, Grayson Hashida, Robert Smith Jr., Richard Melo, and Avis Dunas have drafted a proposal for a multi-faceted project in Alberta Park, located in the Vernon neighborhood of Northeast Portland.

The park is an ideal spot to design naturesscaped areas in which native plants are grown to attract birds and other species of small animals. It is also a good location to develop a community garden, which will afford students from nearby Vernon Elementary School a safe place to grow flowers and vegetables.

There is a possibility that building an 'urban tree house' can be incorporated into the plans as well. The tree house will serve as an outdoor classroom where community residents can participate in educational and cultural workshops on a wide variety of topics, geared towards experiential learning.

The EnviroCorps team is coordinating efforts with Mr. Yamashida from the Parks Department to discuss and refine plans for the proposed project. In early March a public forum was held at Vernon Elementary School giving people interested in the park an opportunity to voice ideas and concerns they held about any proposed changes in, or additions to, their neighborhood greenspace.

People living nearby definitely want more lights installed. We will provide the Parks Department with information about the expressed needs of the community in the hopes of gaining the city's support to make necessary improvements in the park a reality.

When we arrive at a mutually agreed upon course of action students from Jefferson High School will join EnviroCorps team members for a six week summer session in the park. Team members, serving as mentor/laborers, and the Jefferson student 'youth partners', will provide the brains and the brawn needed to get the job done.

•Full-time crew•

The full-time crew, Brian Elliot, Cheng Cha, Joshua Burke, Joshua Feigin, Kathryn Heriza, Karen Shay, Terri Tufts, and team leader Michael Burch have been busy too.

• Halton Tractor •

Their main focus recently has been the formulation of a plan for a restoration project on property owned by Halton Tractor Company along the Columbia Slough in North Portland.

They have mapped out the physical characteristics of the site including a survey of existing trees and shrubs. With the gathered data they have put together a series of drawings illustrating their ideas for a future nature trail and park running through the property.

The initial presentation to the Halton Company owner Chuck Harrison and his staff was met with considerable enthusiasm, both for the professional manner in which the crew members accomplished their work and for the impressive plans they drew up for the site.

The team worked for a two week period with Dennis O'Connor and Esther Lev, consultants sponsored by the Bureau of Environmental Services, to learn the steps involved in preparing a proposal of this scale.

The project will take months to work its way through the various studies and permit requirements before final approval is given and actual work on the site can begin. The EnviroCorps team next year may inherit this project, but the groundwork is well under way.

•Full and part-time crews•

Everyone usually works together on Saturdays when it's possible. Often the part-time crew joins in on a project which the full-timers have been working on for several days or more.

•Oxbow Park•

Removing giant sword ferns from Oxbow Park along the Sandy River was such a project. Plans to create an Elk meadow within the park requires the clearing of several acres. Trees, shrubs, and numerous old ferns

are slated for removal. Permission was granted for the EnviroCorps teams to dig up and transplant as many of the ferns as possible before they are destroyed. The full-time crew worked out at Oxbow over a period of two or three weeks and the part-time team joined them on a number of Saturdays. The salvaged ferns are being divided and transplanted where they will thrive at other restoration sites that we are working on. ■■■■■■■■■■■■■■■■■■■■■■

Fairview Creek Headwaters

Another planting project that has been underway for a few months is out at the headwaters of Fairview Creek. The full-timers, and occasionally the part-timers, have been planting native species in an area which was recently re-contoured to more closely resemble the natural meanderings of an intact waterway. There are more scheduled work days along the creek in the next few months.

•BES -Airport Way Ponds•

These are a series of ponds constructed to contain toxic run-off from a future industrial park. Water levels in the ponds can be controlled as water is slowly released back into the Columbia Slough Watershed System. Some of the toxins can be recovered before release of the water and any remaining waste will filter through the containment ponds before entering the natural wetlands. Both crews have been involved in planting native trees and shrubs around the ponds. (continued on next page column 2)

ENVIROCORPS'

internship program commenced after the New Year, providing team members the opportunity to work individually with various Portland environmental and educational agencies.

Though designed primarily to enhance the diversity of the team members' education, which they in turn later apply to future EnviroCorps projects, the internship program also establishes working relationships with the Portland-area environmental community.

PHOTO - RYAN BOND

Internships include working with such groups as; The Nature Conservancy, The Wetlands Conservancy, The Audubon Society, and The Oregon Natural Resources Council. Other internships include taking environmentally minded classes and working with young students in the classroom.

True to the design of many of the EnviroCorps projects during the team's first year, the internship program provides team members ample educational opportunities while performing service activities.

The internship program continues through June.

RICHARD MELO

• **Whitaker Ponds** • is a large project that the EnviroCorps teams are working on in stages. The entire plan for the area will take years to fully implement, but our crews have worked steadily to plant indigenous grasses, trees, and shrubs around sections of the ponds. We plan to organize more work parties and a summer project which will focus on restoration efforts in the area.

• AmeriCorps Video Project •

Several of the EnviroCorps members are involved in documenting the myriad projects that other AmeriCorps teams around Oregon are working on.

We are interested in meeting the people from the diverse programs throughout the state and recording their stories. The experiences which they share with us about their year of service will be added to an ever growing testimonial that we hope will show the value of these national service projects all around the country.

The list of projects in which we are involved goes on and on. We have worked in cooperation with many other groups and each of us fortunate enough to have been here at the beginning of this 'new' idea for service will come away with something worthwhile to ponder.

Thanks to our management team for their often behind the scenes support. You know who you are.

There are many events coming up in the next few months. To find out additional information about these events, the AmeriCorps program, or other questions you may have please write or give us a call. Thanks for your interest.

READY- AIM- FIRE

CONFLICT and RESOLUTION
No Problem at GLEN ELDER

The AmeriCorps crew at Glen Elder is beginning to see the results of its work. The team has worked on and off at the target range that was demolished during the flood of 1993. The latest effort was setting limestone posts around the parking area. It was a day at the target range that spurred AmeriCorps Member Judy Long to draw a cartoon depicting how well the crew "works together" and handles "Conflict and Resolution." According to Long, "One of the crew was especially ornery one day. Although the crew didn't actually tie the member to the post with barbed wire, it was mentioned - all in a spirit of fun."

The cartoon was presented to the Regional Facilitator at the training session for all members on Conflict and Resolution on March 14.

While the team at Glen Elder has not "fired" on any of its members, it has, like other environment teams, worked with fire. They have been doing a lot of burning in the wildlife areas.

WILLIAM ALLEN WHITE WOULD BE PROUD OF THE GOOD NEWS FROM EMPORIA

The wetland team of Neil Bass and Jim Peterson have completed remote sensing and the riparian inventory in Lyon and Morris counties. In addition to their daily community service, the team has been active with students and senior citizens.

Members have been assisting with the OWLS (outdoor wildlife learning station) project at Emporia Middle School. Member Jim Peterson says, "This exciting program was initiated by 8th grade science teacher Janet Hesterman and utilizes grant monies provided by the Kansas Department of Wildlife and Parks (KDW&P) and matched by Diddle-Webb Press of Emporia." The funds are being used to purchase hundreds of trees and shrubs that will eventually form a 1300 ft., six-row windbreak north of the school building. The planting will provide necessary habitat and food for a variety of wildlife and will be used as a living classroom by middle school science classes, in addition to beautifying school grounds. AmeriCorps biologists Neil Bass and Jim Peterson contributed technical and practical knowledge that will ensure the success of this worthwhile project. Member Neil Bass said, "The team plus representatives from the NRCS field office, KDW&P, Diddle-Webb Press, and middle school volunteers were present on March 31 to assist with planting. McDonald's of Emporia contributed refreshments."

The Emporia team has also placed wild bird feeders (compliments of KDW&P) at local retirement centers and schools.

PERRY TEAM REPRESENTS A GOOD MIX

Nathan Sexton grew up in Southeast Kansas and currently lives in Emporia. He graduated from Emporia State University with a bachelor's degree in Environmental Biology and enjoys sports and outdoor activities. Through the AmeriCorps program he hopes to gain experience in a wildlife related agency, with a goal of being employed in wildlife management or conservation. He has two aquariums filled with fish.

Rick Linneman grew up in Smith Center, Kansas, and currently lives in Topeka. He is the Corps' lone Kansas University graduate with a bachelor's degree in geography. Rich enjoys hunting and has adopted a dog named "Meri-Corps" who he is attempting to train to hunt. Rick is also a member of the U.S. Naval Reserve.

Greg Wahlmeier, from Mayetta, joined AmeriCorps for the educational benefits and for the experience. He is currently attending community college night classes. Greg is enrolled in the Kansas State University (KSU) Professional Pilot program. In addition to his AmeriCorps service, he serves as a crew chief for the Kansas Army National Guard on a UH-1 Huey helicopter, and is awaiting a slot for Warrant Officer/Flight School. Greg has been a pilot since age 17 and he too enjoys hunting and fishing.

T.J. Wahlmeier, also from Mayetta, like brother Greg joined AmeriCorps for the educational benefits and for the experience. He is currently on active duty with the Kansas Army National Guard, and will return in July to finish his tour with AmeriCorps. T.J. is training as a crew chief in the UH-60 Blackhawk helicopter, and plans on attending Office Candidate flight school in the future. T.J. received his private pilots license in 1994.

Greg says, "One nice thing about our team is that we all come from different areas, and have separate views on the situations we encounter. These differences also make for some interesting conversation. Each one of us has a speciality that educates the others and adds to our ability to 'GET THINGS DONE.' Nathan is a wealth of information on wildlife and teaches us something about it every day. T.J. is the one who pushes us to 'get things done,' and seems to have a million different ways to do everything. Rick is an excellent time manager and keeps us on track during the day so that we can get as much done as we can." Rick says, "Greg can fix anything he can get his hands on, broke or not."

The team is involved in a number of different park projects ranging from restoration and maintenance of flood damaged facilities, to the building of wildlife habitat and controlled burns. Greg says, "We spend a good portion of the week interacting with the public in one way or another. It may be in the form of giving informative presentations to local boy scout troops, working with local schools, talking with visitors to the lake, or in just talking about what is new during our daily stop at Jim's Station, while eating peanuts and sipping sodas."

Greg says, "We all agree that AmeriCorps is an enjoyable experience, and we are pleased that we were given the opportunity to participate in the program. Being given the trust and opportunity to be involved in the decision making process enhances the learning experience and builds self-esteem and confidence, therefore making us better people."

THANK YOU FOR PARTICIPATING IN THE CELEBRATION OF COMMUNITY SERVICE

Thanks to those of you who will participate in the Celebration of Community Service in Topeka on April 19. Meeting and working with non-USDA AmeriCorps Members from across the state will be a good experience.

Arlen Flax and Cody Lind will represent you in the "Celebration of Service" in Kansas City, Kansas, on April 25.

WETLANDS TEAMS HAVE NEW DIRECTION

On April 6, Secretary of Agriculture Dan Glickman announced that the U.S. Department of Agriculture will make agriculture wetlands delineations and certifications only upon request until the Congress completes action on the 1995 farm bill and the National Academy of Science completes work on a wetlands study.

"Current wetlands determinations by USDA's Natural Resources Conservation Service (NRCS) are still valid," said Jim Lyons, under secretary for natural resources and environment. "Any new delineations also will be valid. What we're saying is that we are not going to make delineations in advance until we and Congress have a chance to review and, if appropriate, revise current policy."

What will the wetlands teams now focus on? Kansas AmeriCorps Project Director Larry Miles says, "During the week of April 24 we are going to get together with NRCS principal staff and Area Conservationists to determine the new focus of the teams. The emphasis will continue to be wetland and riparian related."

PROPOSED 1995/1996 AMERICORPS PROJECTS

Kansas AmeriCorps/USDA Larry Miles says, "We are at this time proposing that the Parks and Wildlife teams be renewed for 1995/1996. Three other projects have been proposed: Aquatic Habitat & Riparian Restoration, Shawnee County, 5 members; State Park Restoration, Crawford County, 5 members; and Big Creek Bank Stabilization & Riparian Improvement, Hays, 2 full time and 16 part time members."

DID YOU KNOW?

The family of Hays team member Tracy Beech, wife Kim, and son Brenden, have family cat, and a pet ferret. Kevin Feleay will married to Angela Schirer on (b)(6). Craig Curtis, also of the Hays team, is to be married in (b)(6) to Anita Lessor. Audrey and Ryan Tompkin (a member of the Manhattan team) have a 7 month old daughter named Leigh.

Administrators Meet with AmeriCorps Members

By: Laura Duncan

AmeriCorps Pledge

I will get things done for America--to make people safer, smarter, and healthier.

I will bring Americans together to strengthen our communities.

Faced with apathy, I will take action. Faced with conflict, I will seek common ground. Faced with adversity, I will persevere.

I will carry this commitment with me this year and beyond.

I am an AmeriCorps Member. And I'm going to get things done.

On November 28, 1994, AmeriCorps participants met with Michael Dunn, Acting Administrator of Rural Housing Community and Development Services, and Dayton Watkins, Acting Administrator of Rural Business and Cooperative Development Service, after they spoke at the Kentucky RECD state conference. Dunn and Watkins talked to AmeriCorps members about the role of AmeriCorps and the services that AmeriCorps members may provide in their communities. Watkins inquired about the communities each served in. Please see "Administrators", p2

ADMINISTRATORS

(cont.)

He stressed the importance of community involvement to the members and challenged participants to demonstrate, through their efforts, the vital role of AmeriCorps in community life.

Happy New Year

Getting The Job Done

By: Rebecca Estep

Getting the job done—that is the goal of the AmeriCorps program. It's in our pledge. It is our motto. I joined the AmeriCorps program for many reasons, not the least of which was the opportunity to make a difference in the community—to get the job done.

~~It's not been easy. I~~

have had to face many obstacles along the way, such as growing into a new job; learning all the ins and outs of a set of government regulations which sometimes seem to make little or no sense and which at times appear to hinder more than help; dealing with lack of funds, space and equipment; and adjusting to the awkward feeling of taking one step forward, two steps back. Even worse is the feeling that for every person we can help, there are ten other people that need our help.

The area to which I've been assigned is one of appalling poverty, joblessness, and other conditions that one would associate with a so-called "third world" country. While it's a joy to help one person improve their standard of living, that joy dissipates very rapidly when returning to either the office, or home, and driving past even more dwellings that are not fit for animals to live in. Even worse is when you're trying to alleviate the problem (and it seems the more energy you put into your work, the more it grows in intensity), that's when you discover that you're one person very quickly.

So, what do we do? Do we rejoice with the ones we've helped? Or dwell on those who still need help? Do we say that the glass is half full or half empty? I believe that doing exclusively one or the other poses a danger.

More obvious is the danger of just seeing the problem, seeing the glass that is

half empty. If we dwell on simply how much more needs to be done, we lose courage, and quickly become overwhelmed and paralyzed in our pessimism, becoming of no use to the people we are agonizing about.

On the other hand, there is equally a danger of just seeing what we've accomplished, seeing the glass as half full. When we lose sight of our mission and just focus on what we have done, we become tempted to just rest on our laurels. We slack off and are not as effective in reaching those who yet need help.

Perhaps what needs to be practiced is balance. We can take pride in our successes, but we need to use those successes as an incentive to spur us to do even more for our community. We must never lose sight of our mission; realizing that one person cannot alleviate all of the problems in our area, we can at least make a start.

As I write this, we are on the threshold of a new year, a new beginning. We should start this new chapter in our lives by remembering that we are here to make a difference in our lives and the lives of others. With that in mind, I wish you the blessings of the season.

KRADD Update: School-to-Work Initiative

By: Laura Duncan

On November 28, 1994, Matthew Hall, the AmeriCorps participant working at Kentucky River Area Development District (KRADD), went to Frankfort to receive a \$180,000 grant check for KRADD's School-to-Work initiative from the Governor of Kentucky, Brereton Jones. Kentucky was one of eight states to receive funding for the School-to-Work initiative.

Following a competitive application process, Governor Jones awarded KRADD monies to initiate its program. Matt Hall worked extensively on the grant package in October and November of 1994. He helped put together the package, revise the document, and went to Frankfort to participate in an application interview prior to receiving the funds.

The School-to-Work initiative will incorporate career education into the curriculum of grades K-12. The curriculum will include such innovative techniques as vocational training, mentoring programs, and shadowing programs. The purpose of the initiative is to provide the students with broad transferable job skills. The goal of KRADD's program, according to Hall, is to "integrate changes, enhance

Governor Jones (left) issues award check to Matthew Hall (second from right)

overall learning of students, and provide industry training."

Though Hall is no longer working with the project, he has found the experience a rewarding one. He especially enjoyed working with the council that advised on and planned the School-to-Work initiative for KRADD. The council, composed of members of the community from the business, industry, labor, and education sectors, helped Matt to feel comfortable in his role and appreciated.

The relationship he established with the council was the highlight of his work. Another crowning moment came for Hall when he had his picture taken with the governor of Kentucky. Though he didn't get to talk with the governor, receiving the check from Governor Jones was a

dream come true for Hall.

Hall expects the educational aspect of the initiative to begin right away. As soon as a coordinator has been hired, the curriculum will be implemented. Some high school students participating in the program will be placed at job sites right away, but the full impact of the program will be felt in 2007 or 2008 after today's kindergartners complete the twelve year plan.

Jackson, Wayne/Clinton Designated a Rural Empowerment Zone

By: John Mills

It was about four forty-five p.m. Tuesday evening, December the 20th, just before closing time at Kentucky Highlands Investment Corporation when the phone began ringing almost continuously. The little office that houses the organization was frantic for several hours beyond its regular closing time. The staff hurriedly received and relayed information for the following day's presidential phone call from Washington officially announcing that Kentucky Highlands was an empowerment Zone winner.

The constituency of callers that evening consisted mainly of officials from the White House, senator's offices, county Judge-Executives, and reporters from the Louisville Courier Journal, the Lexington Herald-Leader, and a few local papers. As each of us heard of the announcement, we felt KHIC President Jerry Rickett was up to his typical prank of prematurely and confidently announcing we had received the award.

However, we quickly came to realize from his intense expressions that this time, it was the real thing. Once confirmed, the behavior emanated between incredible excitement, with people

jumping up and down or shouting, and that of quiet amazement or simply trying to overcome disbelief.

Many of the people responsible for developing the "strategic plan" for the Jackson, Wayne/Clinton EZ attended the news conference the next day, which was held in the basement of Kentucky Highlands. There was media coverage from WLEX TV18, WYMT TV57, and a handful

of journalists were present to document the official announcement from President Clinton via telephone. The conference phone call linked all of the EZ or EC awardees together on the same line so that President Clinton could speak to each recipient. What was said was not audible to the people in attendance, but it was nevertheless exciting to watch the President of the United States recognize and award three counties in southeastern Kentucky and the people who devote themselves to those communities.

Everyone should realize that each county in southeastern Kentucky needed

an EZ, but it is important that we appreciate the fact that at least some counties in our area received an EZ. The economic impact that the EZ funds can make in those counties should extend beyond their borders to surrounding counties. We like to think of ourselves in Southern and Eastern Kentucky as a close knit group of neighbors with a common identity sharing the same basic problems. Maybe we need to live up to that vision.

What Now?

By: Laura Duncan

We all knew this day was coming, yet I wasn't prepared for the shock of it. I fully expected Cumberland Gap to be designated an Empowerment Zone (EZ), or an Enterprise Community (EC) at the very least. The odds of this happening were incredibly small. Still, I hoped. When the announcements were made on December 21, 1994, Cumberland Gap was absent from the list of designees. In my four months of working with AmeriCorps, I had never thought seriously about what I would do if Cumberland Gap didn't become an EZ or EC. Now I have to.

Thinking about my disappointment, I wondered if other AmeriCorps members felt the same. Of course, we had been fortunate enough to get one of our AmeriCorps. Please see "What", p5

WHAT (cont.)

sites designated an Empowerment Zone--Kentucky Highlands Investment Corporation (KHIC). I realize after talking to him that John Mills, our AmeriCorps volunteer at KHIC, is as excited as I am disappointed, but how does Matt at KRADD feel? Or Michele at CVADD? Mona at KCEOC? Lara at Big Sandy Area Development District? I imagine that all of them feel as I do to some degree because this changes things for all of us.

Now, we all must learn how to do something with nothing. And perhaps this is the greatest challenge of all--to accomplish something, to get things done, with limited resources. But perhaps this is the biggest blessing of all as well. More often than not most of us, as AmeriCorps workers and as human beings, will have to do much with little. Such is life. More often than not, even if there are resources available, we have to dig a little to find them. It is not a simple thing.

This is something that the communities we work in already know. Since I came to Middlesboro in October, I have watched as Bell County tried to build an industrial park. To finance it, the county had to apply for grant funds through three different agencies. Pineville, also in Bell County, attempting to expand its water treatment plant, has applied or will apply for funds (mostly loan funds) through at least two separate agencies. Each of these agencies, of course, have their own policies and procedures for applying for, receiving, and using grant and loan funds, and the applicant is responsible for figuring out the rules and following them carefully. This is hard work.

For each of the AmeriCorps participants whose site did not receive a designation, it will be hard work, also. Work to redirect our energies. Work to get things done. Work to empower ourselves and our communities. But there will be rewards, too. Rewards like seeing our communities evolve. Rewards like becoming an essential part of our communities. Rewards like getting things done for our communities, ourselves, our country.

We could look at this situation as a disappointment, but we can also see it as an opportunity--an opportunity to test our abilities, to grow as people, to rise to the challenge that life has offered us, to excel.

Something Good in Barbourville

By: Rebecca Davidson

A couple of weeks ago when Laura Duncan asked someone to write an article about something good that had happened on the job, I didn't feel I had anything good to say because of a couple of disappointing loan applications which hadn't worked out.

After several things not working out, you look forward to something that does. It finally did. A young couple with two small children came in and applied for a 504 repair loan.

I went with Barry Turner, ACS, to make the initial inspection. We found that more than half the roof leaks, there are holes and cracks in the walls big enough to put your arm through, there is absolutely no insulation in the entire house, the porch has fallen through, and they are presently heating their house with portable electric heaters.

It is just a dangerous situation for the whole family, especially for the six-month old baby and the three-year old toddler. Everything looks good, and we will probably be able to do the loan. However, their house is in such bad shape that it will take more than our loan to help them with everything they need.

I took the advice of Dave Gibson in Washington Please see "Good", p6

GOOD (cont.)

with whom we all spoke at the December 13th AmeriCorps meeting. Mr. Gibson said we should try to find other resources to help the families in our communities. Anna Jean Tackett came to our office to talk with Robert Dunn, County Supervisor, about another family, and while she was there, I asked her about the programs she works with that assist lower income families-KIP, GEER, ARC, and GAP. While discussing the family I have been working with, Ms. Tackett and I found that two of the four programs she works with might benefit this family. They may receive enough help now to make most of the necessary pairs to ensure safety for their children.

Programs like AmeriCorps are what help a community. I am glad to be able to make a difference in my community while being an AmeriCorps member.

December Training

By: Laura Duncan

The final AmeriCorps training session of 1994 was held on December 13th. The session held at ECU campus in Corbin, KY was hosted by KCEOC's AmeriCorps participant, Mona Powell. Powell graciously provided refreshments to AmeriCorps participants and RECD session trainers. Thanks Mona!

The first half of the session was devoted to introducing AmeriCorps members to RECD waste/water loans and grants and public facilities loans. RECD employees Doug Moore and Jimmy Hall discussed qualifications for these loans and processing of the loans, then reviewed a checklist of documents required for receiving a loan. Afterwards, Moore and Hall fielded questions from AmeriCorps participants and discussed with several participants particular RECD loans or potential loans within their service areas.

The second part of the session was used to discuss site objectives and to call Dave Gibson, the national RECD AmeriCorps director, in Washington to discuss the objectives and other issues. Gibson pointed out specific areas of a few participants' objectives which need work. He said that AmeriCorps members need to become "resource[s] for technical assistance" within their communities. As part of the process of becoming a resource in the community, Gibson suggested that AmeriCorps members spend time on the

Internet. Gibson stated, "Tons of resources [are available] on Internet for small communities." AmeriCorps members individually introduced themselves to Gibson and told Gibson a little bit about the communities in which they work. Louis Elliott, Kentucky's RECD AmeriCorps director, asked Gibson to attend an AmeriCorps training session slated for February and to meet with AmeriCorps members. Gibson plans to attend.

Site Profile:

Kentucky Highland

By: Laura Duncan
with John Mills

Kentucky Highlands Investment Corporation began in the 1960's as part of the Kennedy and Johnson administrations' initiative called the War on Poverty. The Job Start Corporation was established 26 years ago using federal grant funds in order to create jobs and provide economic opportunity in southeast Kentucky. It evolved into Kentucky Highlands Investment Corporation (KHIC). During the Reagan administration, KHIC was forced to learn to survive without federal grant funds. KHIC responded by thriving. According to Elmer Parlier, Vice President of Investment at KHIC, "[KHIC] should be a model for Please see KHIC, p7

KHIC (cont.)

investment companies to "illustrate how venture capital can be implemented for community/economic development." Indeed, Kentucky Highlands stayed in business after other non-profit CDCs (Community Development Corporations) ceased to exist following the Reagan era.

Kentucky Highlands serves eleven counties in eastern Kentucky-Bell, Clay, Harlan, Jackson, Knox, McCreary, Pulaski, Rockcastle, Whitley, and Wayne. 3,832 people are employed by companies that KHIC has invested in.

Managing government programs which help businesses create jobs is KHIC's essence. KHIC is expert at packaging start up business deals, getting capital, creating a business plan, complying with tax regulations, and training management personnel.

The future of KHIC looks as promising as its history. KHIC applied for and recently received designation of its Jackson, Wayne/Clinton area as a rural Empowerment

Zone. The Clinton/Gore administration, which spearheaded this economic development plan, announced KHIC's designation in late December of 1994. Due to the award, over the next ten years 40 million dollars worth of grant funds and tax incentives will be funneled into the area to attract businesses and promote economic growth. KHIC has several projects planned.

In Jackson County, there are plans to improve interior access roads and the sewer system in Jackson County Industrial Park as well as to build a spec building on the site; to construct a large water supply reservoir; to establish an entrepreneurial training center; to renovate downtown areas in McKee and Annville; and to build a community center.

In Clinton/ Wayne County, plans include the construction of an industrial park; renovation and expansion of the Clinton County Public Library (which will include a state-of-the-art computer center with a fiber optics network); acquisition of a recycling and composting facility; construction of an amphitheater; development of a youth center and swimming pool; revitalization of downtown Albany; building of a Wayne County Youth Center; extension of waterlines to unserved sections of the Zone; construction of a regional airport; and construction and equipping of rural fire stations within the

Zone.

At the time that I finish this article, KHIC has not received any EZ funds, and so preparatory work is still underway. AmeriCorps' John Mills has been helping write letters to get the word out about the designation and attending planning meetings. He foresees a similar role even after the funds start rolling in, with him and many other KHIC personnel quietly working behind the scenes to assure that jobs continue to be created, the economy gains strength, and the quality of life is improved for eastern Kentuckians.

Get Yourself Connected: BBSmania

By: Laura Duncan

In the last issue of the newsletter, I supplied you with basic information needed to access online services such as America Online, Compuserve and the Internet. In this issue, I'll tell you about Bulletin Board Systems or BBSes. The first computer bulletin board systems were created in the early 1980's. They were first designed so people could list objects to sell or trade. As computer speed grew and PCs became more powerful, transferrable files, freeware, shareware, and even chat and mail were added.

Please see "Mania", p8

MANIA (cont.)

The typical BBS has hundreds or even thousands of freeware and shareware programs stored on it. Some BBS Sysops (System Operators) charge a monthly fee to use the BBS, but the large majority are free to use--the only charge being for the phone call, and most cities have at least one BBS, so the phone call is free also.

Why would someone run a BBS?

Some people run a BBS to collect software. This is done using basically the same process as saving a file. Another reason for running a BBS is for profit. In addition, many businesses run a BBS to support their customers. The customer can get information about products from the BBS or use it to ask questions about products they plan to buy or already own. In recent years, many cities have started running BBSes. This is done so people can call the BBS and get information about the city.

Besides hundreds of freeware and shareware programs, some BBSes offer advice and help. An example

of such a BBS is the Small Business Administration BBS or SBA Online. SBA Online offers files for business owners to view or download to help them with running their small business. SBA Online offers a 800 (free) line, a direct dial line, and a 900 line. The 800 line offers a few files to download, including one with phone numbers for many government BBS services and information about the system. It is used basically to get one acquainted with the BBS. To get the file with phone numbers of the government BBSes just dial the 800 line and download or view the file called "GOVBBS". The 900 line and the direct dial line offer complete access which means the caller can download hundreds of files and programs or even connect to the Internet. Some useful numbers for SBA Online and other BBSes are listed below.

MICHELE (cont.)

thought the job sounded perfect for her, so she made a call and soon was part of Team AmeriCorps.

Prior to joining AmeriCorps, Michele was involved with several community projects. She participated in the development of a community Empowerment Zone strategy, raised money for the local Little League, and while canoeing down an eleven mile stretch of the Rockcastle River, she and several friends initiated a clean-up effort of the river by gathering litter along the way.

Michele's work with AmeriCorps is especially important to her since her work has provided a necessary transition for her from college to the real world. Michele is taking a break from school for a while and gaining important experience during her hiatus. She would like to join the Peace Corps and eventually have a career in politics.

Her experiences with AmeriCorps are allowing her to get a closer look at local politics. In addition, she has been influenced in a positive way by her association with people she works with at CVADD and RECD. Already, her work with AmeriCorps has changed her. In fact, Michele has been so touched by the foster children she has worked with during focus groups she conducts as part of her family planning and preservation

project that she has decided to be a foster parent some day.

Michele couldn't have a more appropriate job responsibility because she values family highly. She counts her grandfather, Estill Dotson, and her stepfather, Doug Fiechter, as two of the greatest influences in her life. One of Michele's favorite sayings is "Take only memories and leave only footprints." Being the nature lover that she is, Michele, I am sure, has lived up to this saying while exploring the caves, traveling down the rivers, and hiking the trails and mountains of eastern Kentucky.

**Deadline for

MAR. 95, VOL. 4

911-ABBEVILLE

Greenwood I has spent the last three weeks in Abbeville county completing the roadwork phase of Abbeville's 911 implementation. Their objectives were to inventory every road in the county, compile a spreadsheet of their gathered data, and update a digitized road map of the county. Their road data included road type, signage, number of residents, zip codes, fire districts, political boundaries, and landmarks. They included anything that might help a rescue squad get to their destination faster. Abbeville County will now begin their addressing phase.

Greenwood I project leader, Angi Paulus, debriefs corps members on the activities planned for the day.

Dam Inspections

Newberry Team II was assigned to work with DHEC under the direction of George Ballentine to survey low hazard dams. The survey was done in Aiken County and Newberry Team II surveyed the county in search of 100 low hazard dams. After locating the dam, the team looked for new development and used the GPS (Global Positioning System) to measure latitude and longitude. In addition, dam ownership was verified to update DHEC's records. The information will be useful to Aiken residents as well because if new development is present, the classification of the dam is upgraded to high hazard, thus alerting residents to the danger of a broken dam.

Newberry II members, Amy Overstreet, Jay Henderson, and Angela Brinkley, use a GPS unit for dam inspections in Aiken County.

911-SALUDA

Newberry I has returned to Saluda County to continue work on the Emergency 911 project where phase 1 ended, by undertaking Phase 2 during the month of March. AmeriCorps' primary objective involves modifying every county tax map, over 200, in an effort to create a comprehensive numbering system which will eventually include every household in Saluda County. The Newberry I volunteers are dedicated to improving the quality of life for South Carolinians and are proud to do their part in upholding the AmeriCorps' pledge of "Getting Things Done".

Newberry I team member, Karen Kinard, busies herself with one of over 200 county tax maps during the AmeriCorps/Saluda County Emergency 911 conversion effort.

911-McCormick

For the two weeks ending March 17th, the Greenwood II team of AmeriCorps surveyed and remapped McCormick County by mapping and recording data on all state, county, and forest service roads in the county limits. This is the first phase of a program to initiate an emergency response system that does not exist at the present time. The Greenwood II team, with project leader David E. Holcombe, has been able to help get this program off the ground by providing assistance to the Council of Governments, Upper Savannah Division, as well as Mr. Paul Bjorkman. The team members took accurate mileage measurements, as well as recording the number of residences and commercial properties, and grading the roads. This data was then put in a computer file for future use in the county.

Greenwood II member Greg Maxwell inspects flooded county road for 911 survey in McCormick County.

FEB. 95, VOL. 3

Dry Hydrant Program

Newberry Team II has been working in Richland County for two weeks under the direction of George Rice with the Richland County Emergency Services. The team completed installation of 19 dry hydrants which included painting the pipe red, stabilization of hydrant heads, and marking the area for high visibility with water point signs and blue reflective plates. The benefits of dry hydrants include improved fire protection, water conservation, lower insurance premiums for homeowners, and will ultimately save lives and property. After the installation of dry hydrants in rural SC, an estimated \$52,270,178 will be saved on insurance premiums, property, fuel and water. A press conference and demonstration will be held on March 3rd at 10:00a.m.

Newberry II members Angela Brinkley(left) and Jay Henderson, both of Columbia, paint a dry hydrant in Richland County.

Dam Inspections

For twelve days during the month of February, Greenwood Team I inspected 83 Low Hazard dams in Lexington county for the SC DHEC-Bureau of Water Pollution Control. Data from the survey will be compiled onto Classification Check Sheets and mapped to indicate dam locations. The technicians that usually inspect these dams are no longer assigned to the task of inspection, therefore, the team provided a valuable service to DHEC and the Lexington community. Now, dam ownership records will be updated and information on hazardous dams will be available for community members.

Greenwood I members Susan Miller, Chris Bever, Angi Paulus, and Sherell Stevens inspect a dam in Lexington County.

Environmental Education

Ninety Six was the location of Greenwood Team II's three week initiative for February. In conjunction with the National Park Service, the team has been busy on a number of different projects carried out at Ninety Six National Historical Site. For patrolling purposes, over a mile of boundary has been cleared. In addition, the team planted grass, performed a biological survey for an already existing classroom pond, and constructed a colonial kitchen garden.

The team was also involved with the "Parks as Classrooms" program. Greenwood II assisted with the creation of Science and History curriculum for 8th, 9th, and 10th grades. This project was also adopted by the Ninety-Six Resources Conservation and Development Council.

Greenwood II members Dawn Kendall and Greg Maxwell brave the cold at Ninety-Six historical site as they clear a boundary area.

Community Outreach

Newberry Team One has been assisting the Newberry Soil and Water Conservation District in beginning a public campaign to assess the local needs and long term goals for the development of Lynches Woods Park. Located in Newberry county, Lynches Woods Park is 260 acres of exquisite wilderness that was donated to public use in the 1930's. The team took on the responsibility of increasing public awareness concerning future utilization of the park.

Newberry I members at Lynches Woods Park with Dr. Charles N. Horn, Associate Professor of Biology and Chemistry at Newberry College (far right).

USDA/NATURAL RESOURCES CONSERVATION SERVICE
RURAL DEVELOPMENT

EST. Dec., 1994

JAN. 95, VOL. 2

WATERSHED MODELING

In the area of environmental conservation, the Newberry 2 team, lead by Amy Overstreet, has completed a watershed model and data analysis in Newberry County. This project was sponsored by the Newberry Conservation District with technical assistance being provided by Steven Henry, an Agricultural Engineer. The two components of this project involved watershed modeling, utilizing the AGNPS computer model (Agricultural Nonpoint Source Pollution), and creating a spreadsheet to include data from SCDHEC water monitoring stations.

Two targeted subwatersheds, within the Bush River Camp Creek watershed, were studied using parameters such as topography, land use, soil type, practice factors, etc. The gathered information was loaded into the computer system and resulted in a watershed model to be used in comparing management techniques and pinpointing potential solutions to nonpoint source pollution.

The team also created a Lotus 123 spreadsheet using the water monitoring data, collected over many years, to allow researchers to plot trends and make predictions for the future.

Jim Wilson (right), of NRCS, provides technical assistance in measuring land slope Percentages to AmeriCorps N2 members.

EMERGENCY-911 CONVERSION

The Newberry 1 team completed "phase one", a road inventory, in Saluda County during the month of January. The team's responsibilities included copying all tax maps (over 200), modifying maps to include all roads in Saluda County, establishing road sheets containing all road names, numbers, and lack thereof as reference to the map. These tasks were accomplished in 13 working days and saved Saluda County taxpayers a substantial amount. This team of volunteers went down every road in the entire county in order to ensure the location and number of houses on these roads to help qualify Saluda County for 911 installation. This project will help make Saluda County a safer place to be in the case of an emergency.

Newberry 1 team member, John E. Morgan III, surveys a Saluda County Map during the road inventory portion of "phase one" of the emergency-911 Conversion

WILDLIFE ENHANCEMENT

The Greenwood 1 team has been working on a wildlife enhancement project sponsored by the Wildlife Dept. in Abbeville County during the month of Jan. 1995. Their work consisted of: deer card coding, control burning, installing Woodduck boxes, posting WMA signs (Wildlife Mngt. Area) in designated areas, and marking wildlife habitat clearings (food plots) on maps using a Global Positioning System (GPS). The concentrated areas were McCormick, Greenwood, Edgefield, and Abbeville counties.

The team put up over 600 WMA boundary signs, about .10 of a mile apart, and coded over 1500 deer data cards for the Wildlife Dept. to scan and compile all information in one database. The volunteers also helped the Wildlife Dept. with controlled burns at specific locations in the AmeriCorps nine county service area, assisted in the removal of old duck boxes, and installed new boxes for the beginning of the Feb. Woodduck nesting.

Members of AmeriCorps Greenwood 1, Sherril, Chad, Chris, and Susan code deer information cards to help the Wildlife Dept. in their efforts for enhancing wildlife habitats.

ENVIRONMENTAL EDUCATION

During January, the volunteers of the Greenwood 2 team have been working at the John Del La Howe School in McCormick County on building a wilderness campsite. AmeriCorps members, with the assistance of two carpenters, have constructed 8 buildings as part of an outdoor learning environment to be utilized by students and teachers. The buildings, with a combined total of 1,816 sq. ft., will be used by 12 students and 2 adults for a four month period. After every four month period, a new group of students would be allowed to make use of the wilderness campsite.

This is just another way AmeriCorps, Rural Development Team, is continuing to uphold its pledge of community service for South Carolina.

Greenwood 2 volunteers, Greg Maxwell (left) and Richard Eaton (middle), get building assistance from professional carpenter (right) during work at John Del La Howe School in McCormick County.

USDA/NATIONAL RESOURCES CONSERVATION SERVICE

"GETTING THINGS DONE"

DEC. 94, VOL. 1

Under the area of Public Safety and Community Development, the Greenwood 1 team spent six weeks during November working on road inventory in Edgefield County as the first phase of an E-911 system implementation. The team of five created a spreadsheet data base of road inventory and an updated road map of the county, which is critical to an effective E-911 service. Edgefield County will now begin the addressing phase of the process.

During December, Greenwood 1 worked on the team's annual publicity campaign. They generated this newsletter, a script for a state wide video, Public Service Announcements, a quick fact sheet about the AmeriCorps, and several other key publicity items.

In dealing with Grassland Initiatives, Newberry 2 conducted a Grassland Survey in Abbeville County. They collected data for 223 Primary Sample Units (PSU's), including grass type and height, land use, water source, water access points, and erosion effects. At the completion of the four week project, the data was stored in a spreadsheet for future reference. This information will be useful in assessing the demand and basic needs for sustaining or enhancing the pasture resources of the land units surveyed.

Newberry 2 went to Aiken's Camp Long in December. Their objective was to create human intervention study sites to study the effect of man on nature. This 4-H camp is used by kids from all over South Carolina.

Greenwood 2 spent four weeks in November on a Stream Coding Project designed to upgrade the entire state's ability to gather information about the quality of the streams, rivers, and lakes located within each of the 46 counties in South Carolina. The objective of the project was to code Environmental Protection Agency's (EPA) Carolina River Reach 3 files and maps for water quality according to data the Department of Health and Environmental Control provided. Upon completion of their project, the team had plotted and verified more than 660 streams throughout the state.

Their December project involved building an outdoor education center in Batesburg-Leesville with the help of area school kids. They created trails and outdoor classrooms to help incorporate lessons with nature.

The Newberry 1 team visited 16 farms in Newberry County to evaluate the water quality of agricultural waste facilities and receiving fields for the development of environmentally safe utilization of agriculture by-products. Soil samples were taken to be fertilized with the waste material from the holding facilities and analyzed. Thirty-four percent of the forty-four fields sampled were excessively high in phosphorus concentrations. Their results showed that waste should not be applied to a third of the fields sampled.

During December this team worked on a teacher/farmer curriculum for schools in Newberry. They took inventory on farms for possible resource use in classrooms

Fact Sheet

SC RURAL DEVELOPMENT AMERICORPS USDA-Natural Resources Conservation Service

The USDA Natural Resources Conservation Service in South Carolina is sponsoring an AmeriCorps rural development project. A diverse team of 20 members with varied educational, social, and ethnic backgrounds are challenged by projects relating to specific rural objectives. The rural development objectives are the driving force behind the AmeriCorps projects which include: water quality, environmental education, public safety, wildlife habitat, and community enhancement. We work with a variety of sponsors including federal, state and county government agencies, and private organizations.

Our twenty members are divided into four teams of five. Each five member team works on community projects lasting from three to four weeks. We have targeted our assistance the first year in nine rural counties in the state.

The development of the individuals through training, leadership positions, and community service is an integral part of our AmeriCorps project. Each of our members have key roles and responsibilities within their five member team. These roles include team leader, administrative, publicity, morale, and transportation. The team members selected their team mates for each position. They each serve as a project leader which enables them to plan, resource, and work directly with a community sponsor and be responsible for the implementation of a three to four week project. To date we have kept all twenty of our original members which makes us feel good about how members relate to our project.

Success

Through the end of February 1995, our AmeriCorps members had completed over 20 rural development projects (see attached list). The community sponsors have been highly complimentary of our members accomplishments (see excerpts from letters received by state conservationist).

Some additional accomplishments:

- * 2 brochures
- * monthly newsletter
- * over 50 newspaper and magazine articles
- * 5 television programs
- * project video for South Carolina
- * approximately 25 presentations to groups & organizations
