Grass Valley AmeriCorps Group

The Grass Valley AmeriCorps has set a goal of concentrating on public outreach for Nevada County. Their mission is to help educate the public on fuels management and to provide sources of information and technical assistance.

In Grass Valley the AmeriCorps has contacted various agencies to find a source of interest in helping the general public. In association with the Nevada County Resource Conservation District (RCD), the group has worked with California Department of Forestry and Fire Protection (CDF), the local fire departments, Northern Sierra Air Quality Management District (NSAQM), and local contractors to bring three wildfire hazard reduction seminars to Nevada County. The seminars have provided useful information on subjects about landscaping for fire protection, fuels reduction, how to remove fuels and methods to dispose of material.

A mailing was sent to over 53 homeowner associations to make them aware of the services available in the Grass Valley field office. Currently we have made presentations before five community groups. Groups are currently contacting us for future presentations.

As a demonstration project the AmeriCorps coordinated with the Nevada County RCD, NSAQMD, Nevada County

Consolidated Fire and Nevada Irrigation District to bring a chipping and shredding project to Alta Sierra. The response was positive with approximately 160 residents bringing in brush, leaves, needles and other yard waste materials. To evaluate the program the AmeriCorps sent out a public opinion poll to all the participants. Having 95 residents respond with comments there was a need established to take the project on the road to Grass Valley and Banner Mountain in Nevada City.

A necessity to participate and work with the schools was also a goal of this group. Athea Brusin worked with Washington Elementary School to educate students on the delicate balance between wildlife, human influence and wildfire hazard. Those skills were then put to use in constructing a model depicting a scene of a well maintained homesite versus a neglected property. This model will be displayed at the local county fair as well as other fuels related functions.

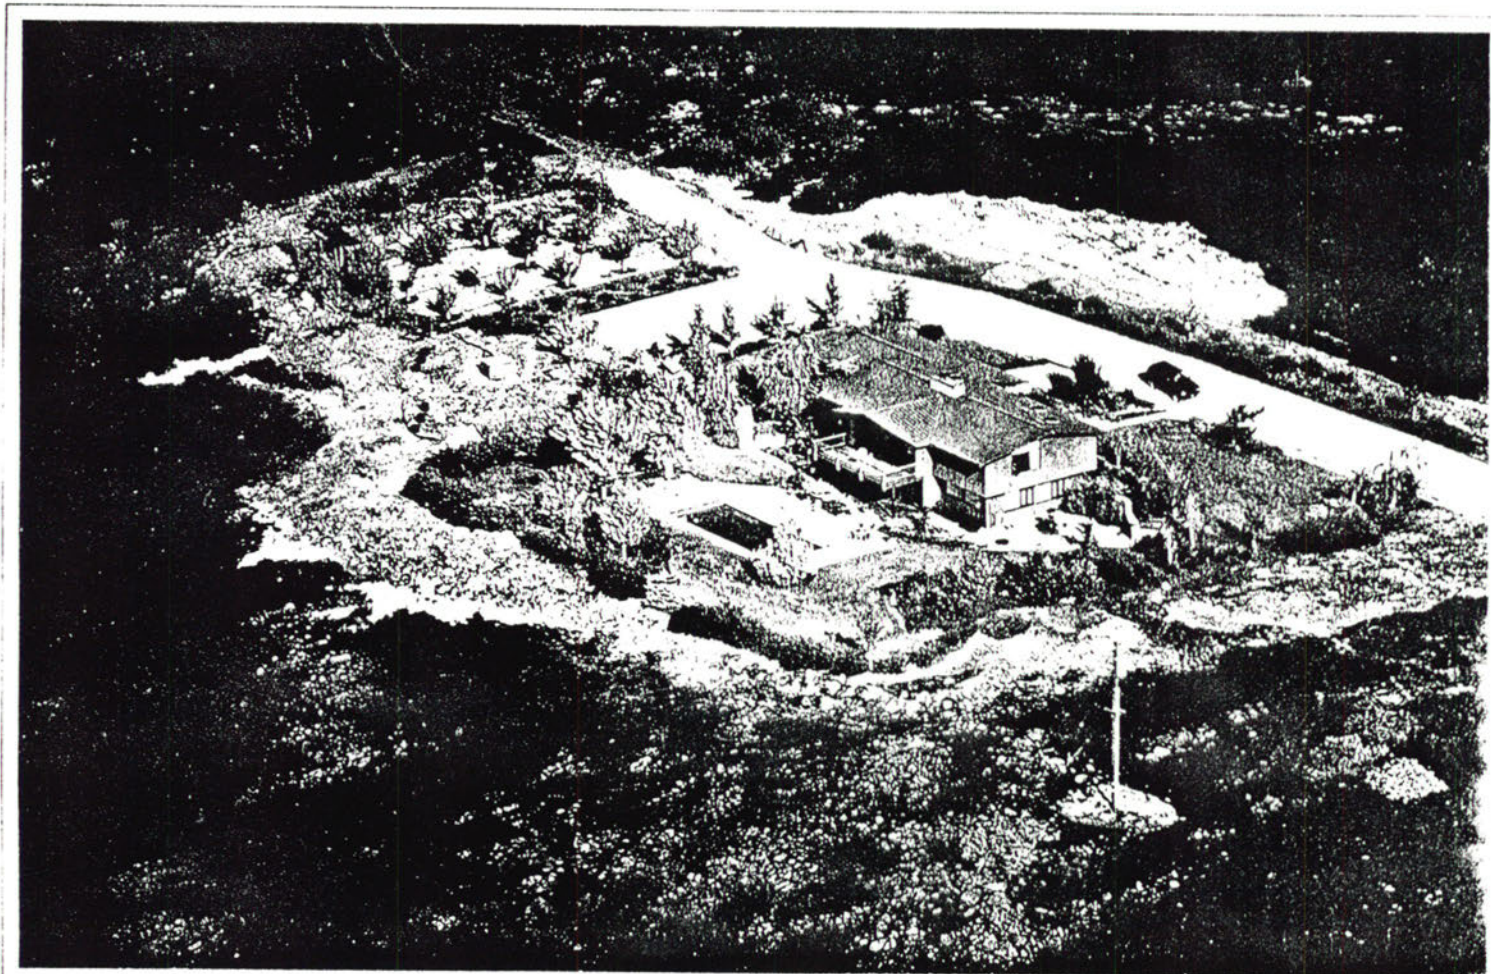

The Nevada County RCD and AmeriCorps in cooperation with local fire departments, CDF and a local home owners group is currently producing a Wildfire Preparedness Handbook for distribution to landowners in Nevada County. This booklet will contain useful information on fuels management and preparation before and after a fire passes.

The AmeriCorps have also been fortunate through the resources of the RCD to purchase 600 firescape brochures produced by East Bay Municipal Utility District. These have been given to the public at workshops, the chipping and shredding projects and over the counter. This has been helpful to give a better grasp of what fuels management is.

After consulting with various fire and local agencies there was a need established for work in Cascade Shores. With the research and assistance from the AmeriCorps staff the RCD was able to submit a proposal for CDF grant funds. The proposal is for funding to establish a fuels reduction plan and implementation for Cascade Shores.

Along with all the progress that AmeriCorps has made there was participation in on the job training as well as various conferences. Andy Lovato and Ron Zinke gave the group training in the daily operations of the RCD and the Natural Resources Conservation Service. The group was involved with pasture management and erosion to attending a public awareness seminar on the closing of the research facility Sagehen. The group participated in workshops on Timber and Hardwood management, pasture management, fuels reduction and fire prevention.

Hints for calling in an Emergency!

*** TUNE INTO KNCO 89.1 ***
*** KVMR ***

* When in doubt look for smell for smoke, if you see smoke
look for the source and look for a column, don't call if
you just smell smoke, look for the CDF spotter plane.

* When calling 911 do not use your cellular phone if
possible.

Cell calls are routed to Sacramento!

TIMING IS EVERYTHING

It is not a case of if a wild fire will happen, but when and where! No matter when or how it occurs, you can be sure that it will surprise you. So in addition to preparing for the inevitable by firescaping your home, developing a report with your neighbors and local fire district, take some time to address the natural processes that make wildfire such a hazard to Nevada County and our homes.

Nevada County Is Considered A High Fire Severity Zone

As Deemed By California Department Of Forestry And Fire Protection

Any person that owns, leases, controls, operates, or maintains any building or structure in, upon, or adjoining any mountainous area or forest-covered lands, brush-covered lands, or grass-covered lands, or any land which is covered with flammable material, shall at all times do all the following:

a) Maintain around and adjacent to such building or structure a firebreak made by removing and clearing away, for a distance of not less than 30 feet on each side thereof or to the property line, whichever is nearer, all flammable vegetation or other combustible growth. This subdivision does not apply to single specimens of trees, ornamental shrubbery, or similar plants which are used as ground cover, if the do not form a means of rapidly transmitting fire from the native growth to any building or structure.

b) Maintain around and adjacent to any building or structure additional fire protection or firebreak made by removing all brush, flammable vegetation, or combustible growth which is located from **30' feet to 100 feet** from such building or structure or to the property line, whichever is nearer, as may be required by the director if he finds that, because of extra hazardous conditions, a fuelbreak of only 30' around such building or structure is not sufficient to provide reasonable fire safety. Grass and other vegetation located more than 30' feet from such building or structure and less than 18 inches in height above the ground may be maintained where necessary to stabilize the soil and prevent erosion.

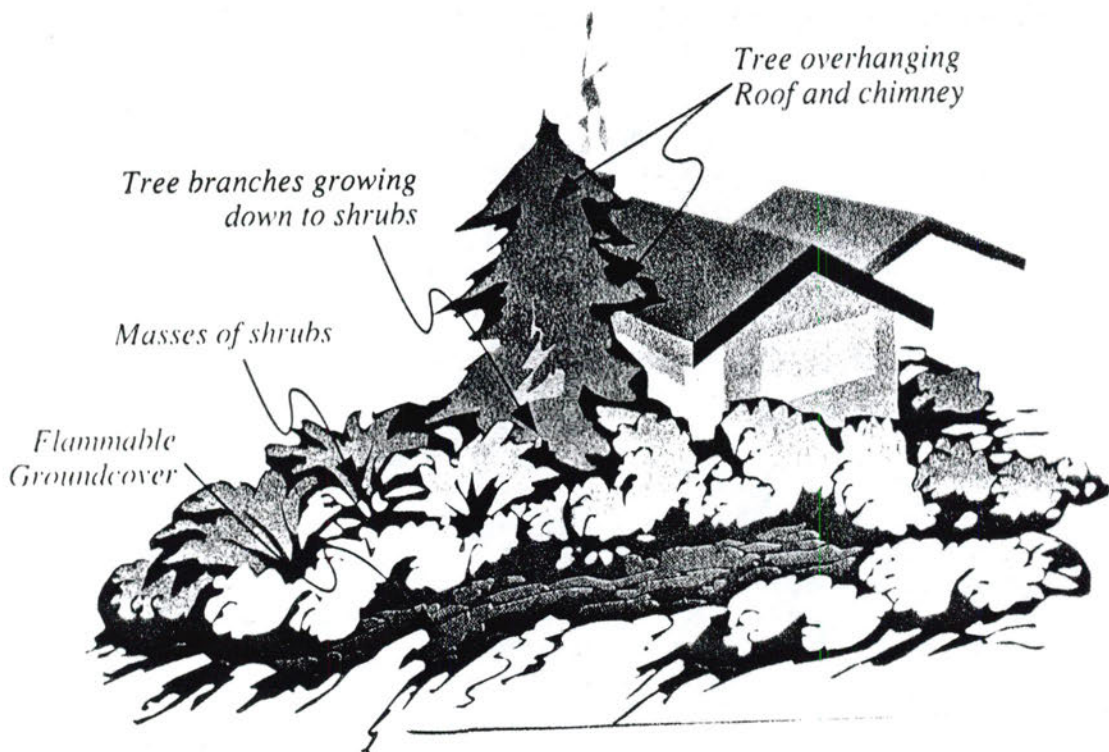

c) Remove that portion of any tree which extends within 10 feet of the outlet of any chimney or stovepipe.

d) Maintain any tree adjacent to or overhanging any building free of dead or dying wood.

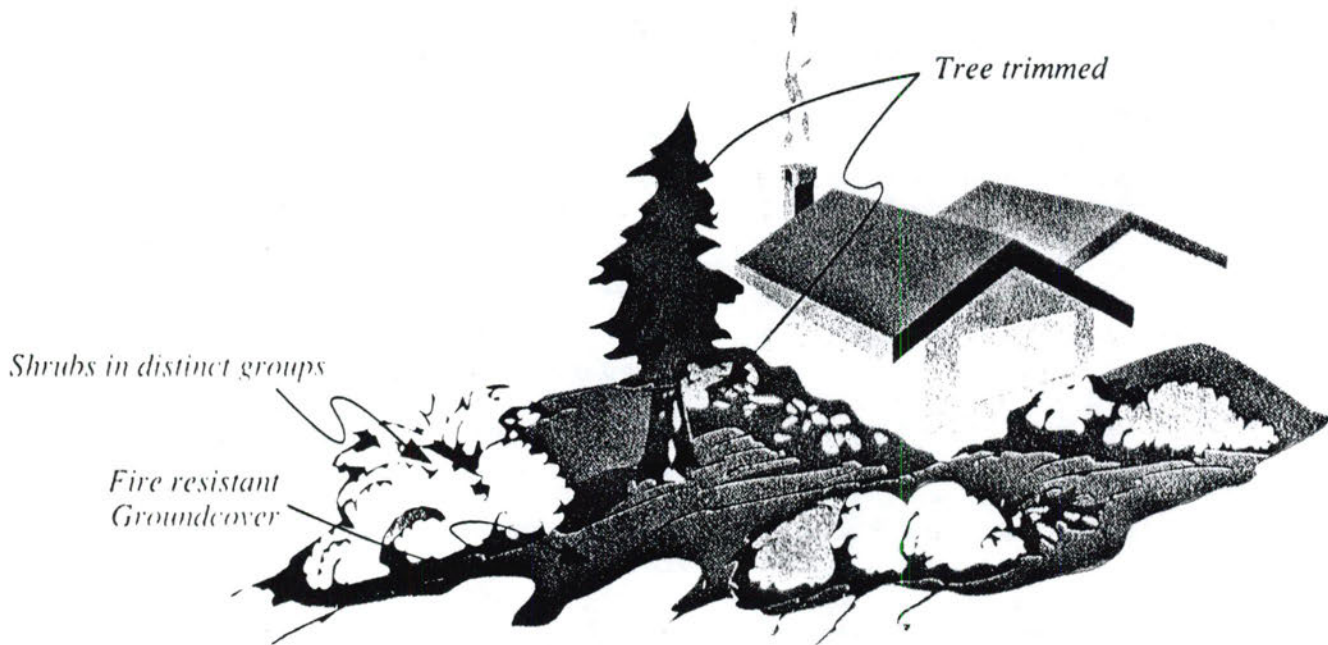

e) Maintain the roof of any structure free of leaves, needles, or other dead vegetative growth.

f) Provide and maintain at all times a screen over the outlet of every chimney or stovepipe that is attached to any fireplace, stove, or other device that burns any solid or liquid fuel.

HAVE A DEFENSIBLE SPACE IT'S THE LAW!!

Fire ladder

Well maintained landscape

"A" fuels are fuels up to 18" from the ground, ie: grasses, low growing landscape materials, needles, leaves, etc...

"B" fuels are the middle level fuels up to approx. 6' in height, small trees, untrimmed branches, manzanita, buck brush and scotch broom et... You want to remove these to break up the "ladder" effect. The fire can move from the ground to the tree tops by means of your "B" fuels.

"C" fuels are your canopy fuels. Proper spacing of at least 10' apart will help to reduce the "crowning" effect. You want to break up your continuous canopy, when you look up you should see sky. Tree trimming should be done in the fall, and trees limbed up 6-8 feet from the ground and ten feet away from each other.

REDUCE

Reduce vegetation within a 30-foot area adjacent to any structure. Trees should be limbed up and dead limbs removed. Base vegetation and lower limbs should be removed to prevent a ground fire from "crowing" into a tree. The removal of plant parts, such as branches or leaves, pruning dead wood from a shrub, removing tree branches below 6-8 feet and mowing dried grass. Irrigation to grassland keeps it green and less susceptible to fire. Annual grasses grow in the early spring, and are a fire hazard by June. Grazing, mowing, raking to 4" or less keep them as ground fuels, instead of ladder fuels.

REMOVE

Remove hazardous brush, weeds and other vegetation for a distance min. of 30 up to 100 feet around any structure located in a hazardous fire area. If surrounding terrain is steep, clearances of min of 100 up to 300 feet are often necessary to provide adequate fire protection. Removal of entire plants, particularly trees and shrubs that form continuous lines vertically or horizontally. Selective removal of trees and brush reduces the fuel load, and is accomplished by mechanical, biological or chemical means. Remove any portion of a tree which extends within 10 feet of the outlet of any chimney or stovepipe. Remove any material from roof, gutters and decks. Roads and driveways should be well cleared of trees and brush to permit safe fire access. Be sure that all wood is stored at least 30 feet from a structure. All propane tanks should be 30 feet from the structure and be cleared of vegetation by 10'. Dead and dying trees and brush are unsightly and a fire hazard. Groom or remove them before fire season.

REPLACE

Replace weeded and cleared areas with fire resistant plants. A well trimmed, low-growing, well-watered landscape is good protection and retains valuable soil in our mountain community.

Substitute brush with less flammable designated fire hazard plants remember, no plants are fire retardant, however, you can control how they will burn and where!

See appendix for useful tools!

LANDSCAPING PRINCIPLES

AND DEFENSIBLE SPACE:

Safety in numbers: 4 Zones of defensible space

ZONE 4

Is located between 400 AND 150 Feet from the home, depending on native vegetation and slope. The goal is to thin out overcrowded native plants, eliminate ladder fuels and remove any dead plants that will aid in the fire.

ZONE 3

Is located between 150 and 50 feet from the home. It consists of irrigated and semi-irrigated native and ornamental plantings, grouping together with a minimum of 10 feet apart, or 5 times the height of the shrubs/trees involved.

ZONE 2

This zone is located between 50 and 10 feet from the home. It consists of irrigated plantings, and turf. The potential flammability of these plantings is critical.

ZONE 1

Located 5-10 feet from the home, irrigation, placement, and fuel volume are especially important. Bedding plants and ornamentals with low volatile oil contents should be considered.

BEFORE EVACUATION

- ** TUNE INTO KNCO OR KVMR FOR FIRE INFORMATION
- ** ELDERLY PEOPLE NEED EXTRA TIME AND HELP
TELECARE/ BEVERLY PARD TRANSPORTATION DIRECTOR
(916) 273-6217
- ** IN AN EMERGENCY, LIVESTOCK CAN BE BOARDED AT THE
NEVADA COUNTY FAIRGROUNDS. CALL GLADYS SHORT
(916)273-6217 VET ON STAFF
- ** SHUT OFF PROPANE TANK VALVE WHICH IS LOCATED ON TOP OF
THE TANK. PROVIDE A WRENCH. KEEP ALL TOOLS WHERE
THEY CAN EASILY BE FOUND.
- ** CLOSE ALL WINDOWS, INTERIOR AND EXTERIOR DOORS
- ** FOIL THE INSIDE OF WINDOWS TO REFLECT THE HEAT.
- ** REMOVE CURTAINS IF POSSIBLE
- ** PACK VITAL PRESCRIPTION MEDICINES, IMPORTANT PAPERS
AND IRREPLACEABLE MEMORABILIA.
- ** TURN OFF MAIN ELECTRICAL BREAKER, LOCATEDXXXXXX
SOME HOMES HAVE 2, ONE MAIN AND ONE FOR THE HOT WATER
HEATER. BE SURE OF WHICH ONE YOU ARE WORKING WITH!!
- ** LIMIT YOUR WATER USE. WATER DOWN AROUND THE HOME
BEFORE!
- ** WHEN LEAVING, BE CONCERNED NOT TO BLOCK THE ROADS AND
KNOW YOUR ESCAPE ROUTES.
- ** WILD ANIMALS ARE DANGEROUS, ESPECIALLY WHEN SCARED BE
CAREFUL.

PRE - FIRE PLANING

1. Predesignate a meeting place out of your area incase members of your family are not allowed back into the homesite. Know your access out. Have a minimum of two escape routes out.
2. Discuss fire plans with elderly neighbors who need assistance.
3. Identify what you may wish to remove during a fire. Have important papers and memorables, etc... ready to go.
4. Be sure to completely bury all plastic water lines. Exposed water lines and risers will burn and drain water systems.
5. Equip pool or hot tubs with a gasoline powered pump for use as an auxiliary water supply for hose lines. Completely drain gas from engine when not in use. Store fresh gas in metal can.
6. Fire extinguishers are probably the most effective first hit on a small fire. Have a few strategically mounted near doors or exit points of buildings.
7. Periodically, check your fire insurance policy to see if it will pay for rebuilding your home in today's economy. Research Consumer Reports on your insurance carrier.

See page ---- for tools to use in case of a fire, and have them available. Know the "safe zone" a spot where you can be safe. Have the emergencies supplies ready from page ---.

Extinguishing methods involve removing one or more of the elements that feed fire: FUEL, OXYGEN, HEAT.

The following basic emergency methods may be used while the fire department and help are on their way the scene on small or spot fires only.

WATER: best and fastest tool. Smother other fire with a heavy, dissipated spray aimed at the base of the flames. The idea is to make as much steam as possible. Well pumps are driven by electricity. A private water source such as a pond will be very valuable in the event of a wildfire. Think about purchasing a generator or a pump for your water system, contact your local fire department for info.

DIRT: smothers the fire by removing the air. It should be thrown in swinging motion to scatter in a thin layer at the base of the flames of snags, stumps, grass along a fire's edge. However, buried fire should be uncovered and extinguished after the spread of the fire is extinguished.

Wet Blanket: Can be effectively used on grass fires by two people walking along the fire's edge and lying the blanket down gently for a few seconds to smother a section of the fire.

Wet Burlap Sack: Spank the fire with the sack.

Fire Line: Scratching a line to the mineral soil 1 to 1 1/2 times the height of the adjacent fuel will help prevent the fire from advancing.

AFTER THE FIRE PASSES

Outside the house: check all roof surfaces first. Also check ground fuels, around the structure to make sure they aren't still smoldering.

Inside the house: check all furniture, window coverings, bedding, carpets, closets and storage areas, from the attic to the garage.

Once over is not enough. Continue checking for at least six to ten hours after you think the fire is out.

IF YOU CHOOSE TO STAY, PROTECT YOUR HOUSE

If law enforcement and fire authorities permit and it's "safe for you" to do so, and you chose to remain and protect your house in the absences of Fire Fighters it's a wise idea for able-bodied members of the house to remain to protect the house in the absence of fire fighters, providing you:

1. Understand just how vulnerable you really are. Has the brush around your home been adequately cleared? Do you have adequate water stored on your site? Municipal water traditionally has been unavailable during fires. Moreover, during fires, winds are intense, erratic and extremely dangerous.
2. Notify someone that you have decided to stay and fight the fire.
3. Always have an escape route in mind and safety zone to go to.
4. Stay clam, work at a steady pace suited to your physical condition. Wear protective fire gear.
5. If an air tanker unloads its "slurry" near you, lie face down towards the plane to lessen direct impact.
6. Park well off the road and driveways out of the path of fire engines.

"The Fire"

- * Stay calm and control your adrenalin.
- * Have your fire tools ready, see page---.
- * Wear personal safety gear.
- * Share rides - minimize vehicles at the fire.
- * Do not speed
- * Park well off the road leaving room for fire equipment.
- * Park Vehicle for quick departure, roll up winds and leave keys in vehicle.

Work safely,

Use your home as a shelter.

EMERGENCY SUPPLIES

In the event of a fire or earthquake, you can anticipate that our mountain community could be without electricity, telephone and water supplies for 3-4 days. Local roads may also be closed by fire or rockslides, so you need to be well prepared. The following list should provide some guidelines for what you should have on hand for emergency Preparedness.

- O FLASHLIGHTS WITH SPARE BATTERIES
- O PORTABLE RADIO AND BATTERIES
- O BATTERY POWERED SCANNER
- O FIRST-AID KIT
- O FIRE EXTINGUISHER
- O FOOD--CANNED AND DEHYDRATED, POWDERED MILK, CANNED JUICES AND MEATS, DRIED CEREALS
- O ALTERNATE COOKING SOURCES. CAMP STOVE
- O SPECIAL ITEMS--INFANT FOOD, MEDICINES, ETC.
- O WATER- AT LEAST 3 GALLONS PER PERSON/72 HOURS
- O TOOLS

Tools for landscaping and Fire Fighting

Store all tools and equipment you might use for fighting a fire in one central and convenient place. Useful tools include:

Axes	Chainsaw	Blankets
Maddock	Weedwhip	Burlap Bags
McLeod	Rake	Water Buckets
Hoe	Helmets	Bow Saw
Shovels	Goggles	Pulaski
Pipe Wrenches	Fire Hoses	Nomex Fire Suit
Back Pump	Home Fire Protection System	
Fire Shelter -	Contact Your Local Fire Department	

PRESS RELEASE

COMING EVENTS

272-3417

FREE SEMINAR
ON
WILDFIRE HAZARD REDUCTION

THE NEVADA COUNTY RESOURCE CONSERVATION DISTRICT (RCD),
IS SPONSORING A SEMINAR ON THE PRINCIPLES INVOLVED IN
WILDFIRE HAZARD REDUCTION, AND FIRE-SAFE LANDSCAPING, FOR
LARGE AND SMALL ACREAGES ON THURSDAY, MARCH 23, 1995. THIS
FREE SEMINAR, WHICH IS OPEN TO ALL INTERESTED LANDOWNERS,
WILL BE HELD FROM 6 TO 8 PM AT :

NEVADA COUNTY LIBRARY
980 HELLING WAY
NEVADA CITY, CA 95959

FEATURED SPEAKERS WILL BE MR. ERIC CARR, CALIFORNIA
DEPARTMENT OF FORESTRY- DIVISION CHIEF; MR. GREG GILBERT,
AIR POLLUTION CONTROL SPECIALIST; AND MS. CINDY MOFFAT,
LANDSCAPE ARCHITECT. TOPICS COVERED INCLUDE FUEL REDUCTION
AND REMOVAL OPTIONS, AIR QUALITY CONSIDERATIONS, AND
FIRE-SAFE LANDSCAPING TECHNIQUES. A FREE PACKET OF
PERTINENT INFORMATION WILL BE PROVIDED TO ALL IN ATTENDANCE
WHILE SUPPLIES LAST. FOR MORE INFORMATION, CALL THE RCD
OFFICE AT 272-3417.

OUR AGENCY PROHIBITS DISCRIMINATION ON THE BASIS OF RACE,
COLOR, SEX, AGE, HANDICAP, RELIGION, MARITAL STATUS, OR
NATIONAL ORIGIN.

THIS SEMINAR IS PRESENTED TO AID PRIVATE CITIZENS MAKE
INFORMED CHOICES TO PROTECT THEIR PROPERTY FROM WILDFIRES IN
CALIFORNIA. ONE OF THE ROLES OF THE RCD IS TO PROVIDE
COORDINATION ON NATURAL RESOURCE ISSUES IN THE COMMUNITY.

ALTA SIERRA RESIDENTS

NO-COST VEGETATIVE YARD WASTE CHIPPING AND SHREDDING OFFERED TO ALTA SIERRA RESIDENTS IN FEBRUARY

Please bring your residential vegetative yard wastes for free chipping or shredding to the NID Storage Pond at Francis Drive and Ragan Way the first three (3) weekends in February.

**Drop-off hours are 9:00AM to 4:00PM, starting
Saturday, February 4th.**

If it is raining, yard wastes will be accepted the next dry weekend, which could extend drop-off weekends into March. Access to the NID site is limited and your drop-offs will be under the supervision of our Project personnel.

**LOOK FOR THE SIGN ON
FRANCIS DRIVE
ANNOUNCING THE NEXT WEEKEND'S
"OPEN HOURS".**

Please Follow These Requirements:

- ★ Brush, prunings and tree limbs up to 6 inches in diameter must be unloaded by you at the NID site with heavy ends in the same direction, free of any nails, metal, rocks. No construction material or tree stumps.
- ★ Garden wastes, vines, twigs, leaves, needles and cones must be reasonably free of moisture. No wet or damp needles will be accepted. Please cover your leaf and needle piles at home before it rains!!
- ★ All yard wastes must be free of trash or contaminants that would prevent their processing through our equipment. Materials intermingled with dirt, rocks, or garbage will not be accepted.
- ★ Keep brush and tree limbs separate from leaves and needles; you will be required to off load them in *separate* piles at the NID site.
- ★ You may deliver your yard wastes in plastic bags, but you will be required to empty and then take them offsite. Personnel will be available to help Handicapped and Senior Citizens off load their materials.
- ★ Please bring no more than the equivalent of three (3) pickup-truck loads of yard wastes per weekend.

HELPFUL HINTS

- ★ Do not rake or gather leaves and needles until they are dry and keep piles dry by covering with plastic before it rains.
- ★ Brush and limbs can be damp, but leaves and needles must be dry or they will be refused.
- ★ Placing materials on plastic or a tarp makes them much easier to drag or lift.
- ★ Wood chips and leaf mulch will be available to residents on the second and third weekend of the Project.

WHO, HOW AND WHY!!!

This COMMUNITY YARD WASTE PROGRAM is a cooperative effort of the Nevada Irrigation District, the Natural Resources Conservation Service and Americorps personnel, the Northern Sierra Air Quality Management District, the Nevada County Consolidated Fire District, and local private Contractors. We are all local folks dedicated to helping you reduce fire risk, save our air quality and protect our community and its unique resources.

Because of the risk of wildfire in our County each year, *please* reduce your yard's unnecessary vegetation by clearing a FIRESAFE ZONE of 30 to 100 feet or more around your dwelling every Spring without fail. If you need to burn your yard wastes in the future, for our air quality's sake *please* burn them when they are dry and free of soil and burn with as much heat as is safe to reduce particulate pollution. If possible, have your yard wastes chipped or shredded — once processed, these materials make wonderful ground cover or mulch. In the coming months we hope to bring you more programs and seminars to help reduce air pollution and fire risk in our community. If you have questions or comments, or if you can help us help others in the future, please call us.

Natural Resources Conservation Service and Americorps personnel are available at **272-3417**.

Northern Sierra Air Quality **274-9360**
Nevada County Consolidated Fire District **273-3158**
For after-hours or weekend inquiries, call Fire Station 88 at **272-6635**.

WASHINGTON SCHOOL SCIENCE PROJECT

The Nevada County Resource Conservation District (RCD), Americorps personnel Athea Brusin, and seven 4th and 5th graders from Theresa Wilson's Science Class at Washington School, created a Wildfire Hazard Display for the Nevada County Fair. The Display consists of 2 separate homesteads of different hazard levels: a protected homestead and a typical uncleared site. The displays also illustrate the effect of slope and homesite selection on wildfire pathways.

The students involved were Jack Tiffany; Robbie Eaton; Ricky Eaton; Shanna Moran; Tony Lamardelli; Alexandra Greenly; Christi-anne Greenly. These students worked on the project once a week for six weeks, and Athea introduced them to the associated topics of flora and fauna, and their role in a Firesafe Landscape design.

The Display is currently housed at the Resource Conservation District Office until the Fair in August. Property owners and other interested parties are encouraged to come have a look, and discuss your personal situation with the AmeriCorps staff members.

For more information, call the RCD office at 272-3417.

Our agency prohibits discrimination on the basis of race, color, sex, age, handicap, religion, marital status, or national origin.

One of the roles of the RCD is to provide coordination on natural resource issues in the community.

MOSQUITO FISH CULTIVATION

The Nevada County Resource Conservation District (RCD), and the Americorps personnel, Athea Brusin and Christi Maison, aided longtime resident Abe Tobis with the harvesting of mosquito fish from his lower pond on Tuesday April 4, 1995. This was done in an effort to facilitate other local pond owners in the use of mosquito fish for mosquito control.

Mr. Tobis has been supplying Nevada County ponds with free mosquito fish for 26 years. Until recently, Abe has had the fish at his home, but is now supplying the Pet Mine Pet Store with his precious catch, available to Nevada County residents during normal business hours.

For more information, call the RCD office at 272-3417.

Our agency prohibits discrimination on the basis of race, color, sex, age, handicap, religion, marital status, or national origin.

One of the roles of the RCD is to provide coordination on natural resource issues in the community.
