CORPORATION FOR NATIONAL SERVICE
COMMUNITY SERVICE OBJECTIVE

27-25 ✓

GRANTEE: USDA Soil Conservation Service SITE: Helena, Arkansas

COMPONENTS OF OBJECTIVE STATEMENTS: Identify and catalog all units of government and non-profit community organizations in three counties by contacting county and city governments, county judges, Quorum Court members, mayors, city councilmen and community organizations for the purpose of identifying needs and problems of the rural communities and locating grants available for problem solving of those needs.

1. What work will be done? What service activities will your participants engage in? Identify and catalog all units of government and non-profit community organizations in Phillips, Lee, and Monroe counties. Member will hold community meetings to aid in identifying key community problems. The member will work in conjunction with the Forest Service member in identifying potential funders to address the problems. Member will hold community meetings to present findings and aid concerned groups in developing formal proposal to funders.
2. What is the hoped for result of the work/activities described above? That all problems and needs of rural communities, units of government, and non-profit organizations can be identified and addressed. It is further hoped that the standard of living for people in rural communities and small towns can be improved.
3. How will you measure the quality of your product or impact of your service? By improving the quality of living for approximately 30,000 people in these counties.
4. By what standard will you gauge success? By the number of units of government and non-profit organizations contacted, by the number of needs and problems identified, and by the number of problems addressed.

PHOTOCOPY
PRESERVATION

1. What work will be done? What service activities will your participants engage in?
Update economic statistical data needed to assist groups, agencies, organizations, and individuals to plan and carry out projects in support of the final report recommendations made by the federally created Lower Mississippi Delta Development Commission. Most data now available to the Center was developed in the late 1980's and is in need of revision. In addition, some of the data was not collected during the commission's work. The information will be broken down to the smallest unit possible to get useful data, in other words, county, state, and regional level data.

2. What is the hoped for result of the work/activities described above?
This factual data will be made available to entities that are planning and implementing Delta projects that support the "Delta Initiatives" report. The LMDD Center will become the clearing house for providing information to various interests that want to work to help alleviate problems identified by the LMDD Commission. It is hoped that, by having data available for distribution, this information will make it easier and quicker for adequate plans to be put together to address the needs of the region.

3. How will you measure the quality of your product or impact of your service?
The quality of the data developed and/or collected will be judged by the usefulness it has for various interests requesting and using it to help develop projects for the region.

4. By what standard will you gauge success?
An extensive list of information needed has been compiled and the success will be measured by the number of the data lists completed. A successful project will compile, assimilate and have available for use not less than 5 of the data sets on the list.

5. How many individuals will receive the benefit of the work your participants perform?
All the lower Mississippi Delta.

COMMUNITY SERVICE OBJECTIVE

A

GRANTEE: USDA Soil Conservation Service SITE: Batesville, Arkansas

COMPONENTS OF OBJECTIVE STATEMENTS: Identifying and establishing a mechanism for exchange of information and training with limited resource woodland owners with holdings in or around the county to improve the economic and environmental sustainability of limited resource woodland farmers.

1. What work will be done? What service activities will your participants engage in?
Members will identify and establish a mechanism for exchange of information and contact with the limited resource woodland owners with holdings in or around Independence county. Members will work with various county, state, and federal employees to develop and test strategies to improve the economic and environmental sustainability of limited resource farmers. He/she will provide the logistical support to help farmers organize a county or area woodland

owners association. The member will help develop and prepare an association newsletter to impart technical information and share success stories. The member will help organize field days, and develop fact sheets or other materials to disseminate knowledge gained from the demonstrations. Will serve as liaison between the emerging association and the technical advisor group(s).

2. What is the hoped for result of the work/activities described above?

Short term results will be a fully functional woodland owners association, with a membership that identifies their needs and plans appropriate activities to meet these needs. Expected long term results will be an improving woodland base, an increased interest in forestry management practices, and greater sustained incomes from limited resource woodland owners from sale of woodland products. We hope for increased interest in satellite programs such as concentration yards, dry kiln facilities, firewood cutter associations, and new market development. It is also hoped that successes in this association will create interest in the development of other woodland associations..

3. How will you measure the quality of your product or impact of your service?

Through the organization of a woodland owners association, and the development of an information infrastructure to train association members in the technical aspects of forestry and product marketing.

4. By what standard will you gauge success?

By the number of charter members enrolled in this association. The project will be successful if 5% of the total woodland owners in the designated area participate in the initial organization.

5. How many individuals will receive the benefit of the work your participants perform?

Initially all identified woodland owners will be contacted. This number is approximately 1,000.

Community Serv. Obj. #5:

CORPORATION FOR NATIONAL SERVICE
COMMUNITY SERVICE OBJECTIVE

27-29✓

GRANTEE: USDA Soil Conservation Service SITE: Pine Bluff, Arkansas

COMPONENTS OF OBJECTIVE STATEMENTS: Work with faculty and students in the
Agricultural

Economic Program in assisting three research projects involving agricultural marketing that will benefit small scale farmers in Southeast Arkansas and lower delta region of Arkansas

1. What work will be done? What service activities will your participants engage in?

Members will work with faculty, staff, and students in the Agricultural Economics Program. Will assist the faculty with various aspects of three research projects in the area of agricultural marketing. All projects involve generating reliable and useful results that will benefit small-scale farmers in southeast Arkansas and the Lower Mississippi Delta Region. The focus is the production, processing, distribution, and marketing of alternative agricultural enterprises. The main focus of the member will be to organize and conduct public meetings to key groups for presentation of research data.

2. What is the hoped for result of the work/activities described above?

Small-scale farmers will utilize the results of the research to aid them in establishing and operating successful agricultural enterprises. The foregoing will contribute toward enhancement of the quality of life of farmers and other residents of farming communities.

3. How will you measure the quality of your product or impact of your service?

The feedback and recommendation of the public meetings will enable the University to assess the quality of their research direction and efforts. It is hoped that 10% of the socially disadvantaged farmers will initially utilize research findings.

4. By what standard will you gauge success?

The level of success will depend on the number of farmers reached through the public meetings who utilize the results and impact of the research on size of operation, income level, and profit level. Growth in American industries have been tied to good research.

5. How many individuals will receive the benefit of the work your participants perform?

At least 100 small-scale farmers in Southeast Arkansas will benefit from the work performed by the member. The indirect benefits will accrue to a much larger population, since a large number of consumers will comprise a significant segment of this population. These 100 socially disadvantaged farmers will be reached by the member through no less than ten public meetings.

27-25

5. How many individuals will receive the benefit of the work your participants perform?

An estimated 30,000 people reside in Phillips, Lee and Monroe Counties. It is the goal of this project to develop pertinent proposals that will benefit at least 10% of the residents within the first year.

Community Serv. Obj. #2:

CORPORATION FOR NATIONAL SERVICE
COMMUNITY SERVICE OBJECTIVE

27-26

GRANTEE: USDA Soil Conservation Service SITE: North Little Rock, Arkansas

COMPONENTS OF OBJECTIVE STATEMENTS: Will work to implementing statewide Rural Conservation and Development initiative to spread alternative fuel technology (wood pellet fuel).

1. What work will be done? What service activities will your participants engage in?

Members will implement RC&D state wide initiative to place wood pellets stoves and furnaces in 35 businesses and public buildings to promote the use of wood pellets as a source of heat.

2. What is the hoped for result of the work/activities described above?

Wood pellets be one of the primary sources of heat for rural homes and businesses in Arkansas.

3. How will you measure the quality of your product or impact of your service?

By the number of homes and businesses who convert to wood pellets.

4. By what standard will you gauge success?

After one heating season using wood pellet technology, we gauge our success by the number of businesses who are satisfied with wood pellet heat and the economic savings.

5. How many individuals will receive the benefit of the work your participants perform?

Initially 35 pellet stoves will be placed in public facilities and businesses in Arkansas. We anticipate over 100,000 individuals will be aware of the benefits of wood pellet technology within the year.

CORPORATION FOR NATIONAL SERVICE

COMMUNITY SERVICE OBJECTIVES

OBJECTIVE STATEMENT

To provide assistance to rural communities interested in implementing community forestry programs resulting in improved living conditions and opportunities for neighborhood service.

COMPONENTS OF OBJECTIVE STATEMENT

1) What work will be done? What service will your members engage in?

Develop a plan and identify suitable planting sites for urban forestry projects.

Secure funding for purchase of materials.

Recruit and organize volunteers to plant trees.

2) What is the hoped for result of the activities described above?

Establishment of native tree species in residential and business areas in small communities.

Involvement of local civic and volunteer groups.

3) How will you measure the quality of these activities?

Survival rate of 60% of planted trees.

Participation by 3 local groups.

4) By what standard will you gauge success?

Improvement of overall aesthetic quality of area.

Increase in real estate values.

5) How many individuals will receive the benefit of the work you members perform? All residents of the 8-10 communities involved.

Community Serv. Obj. #2: Grantee Department of Agriculture Site Rural Development, KY, MS, SC & AR
Objective Code 25

CORPORATION FOR NATIONAL SERVICE
COMMUNITY BUILDING OBJECTIVES

OBJECTIVE STATEMENT

To seek sustainable economic development opportunities to diversify local economies, resulting in local people obtaining job training and higher paying employment while maintaining the quality of the rural environment.

COMPONENTS OF OBJECTIVE STATEMENT

1) What activities will you be engaged in?

members will work directly with local business leaders to inventory existing resources, identify sustainable economic development opportunities, conduct feasibility studies, and assist in writing (3.5) business plans.

Issues of environmental concern will be analyzed with any related new business venture.

2) What is the hoped for result of the activities described above?

increasing local employment and income.

Local individuals will be trained for employment.

Business plans will be developed and funding sought.

3) How will you measure the quality of these activities?

Professionals will review all environmental impact analysis.

Local business leaders will be interviewed following completion of project.

Loans and other funding will be obtained for 25* of the business plans developed.

4) By what standard will you gauge success?

Establishment of a sustainable, natural resource based business employing 5 locally trained people.

Community Serv. Obj. #3: Grantee Department of Agriculture Site Rural Development, VA, KY, TN & AR
Objective Code 26

CORPORATION FOR NATIONAL SERVICE
COMMUNITY BUILDING OBJECTIVES

OBJECTIVE STATEMENT

To promote alternative wood products and value added manufacturing technologies resulting in local people obtaining job training and higher paying employment while maintaining the quality of the rural environment.

COMPONENTS OF OBJECTIVE STATEMENT

1) What activities will you be engaged in?

Identify potential wood products markets and needed technologies.

Solicit participation from existing wood products manufacturers.

Train 2 existing wood products manufacturers in value added technologies.

2) What is the hoped for result of the activities described above?

Increasing value of locally produced wood products.

Higher employment and income levels.

3) How will you measure the quality of these activities?

Survey participating wood products manufacturers before and after project on value their product.

4) By what standard will you gauge success?

Increase of 50* in value of product.

Survival rate of 60% of planted trees.

Participation by 3 local groups.

4) By what standard will you gauge success?

Improvement of overall aesthetic quality of area.

Increase in real estate values.

5) How many individuals will receive the benefit of the work you members perform? All residents of the 8-10 communities involved.

Community Serv. Obj. #2: Grantee Department of Agriculture Site Rural Development, KY, MS, SC & AR
Objective Code 25

CORPORATION FOR NATIONAL SERVICE
COMMUNITY BUILDING OBJECTIVES

OBJECTIVE STATEMENT

To seek sustainable economic development opportunities to diversify local economies, resulting in local people obtaining job training and higher paying employment while maintaining the quality of the rural environment.

COMPONENTS OF OBJECTIVE STATEMENT

1) What activities will you be engaged in?

members will work directly with local business leaders to inventory existing resources, identify sustainable economic development opportunities, conduct feasibility studies, and assist in writing (3.5) business plans.

Issues of environmental concern will be analyzed with any related new business venture.

2) What is the hoped for result of the activities described above?

increasing local employment and income.

Local individuals will be trained for employment.

Business plans will be developed and funding sought.

3) How will you measure the quality of these activities?

Professionals will review all environmental impact analysis.

Local business leaders will be interviewed following completion of project.

Loans and other funding will be obtained for 25% of the business plans developed.

4) By what standard will you gauge success?

Establishment of a sustainable, natural resource based business employing 5 locally trained people.

Community Serv. Obj. #3: Grantee Department of Agriculture Site Rural Development, VA, KY, TN & AR
Objective Code 26

CORPORATION FOR NATIONAL SERVICE
COMMUNITY BUILDING OBJECTIVES

OBJECTIVE STATEMENT

To promote alternative wood products and value added manufacturing technologies resulting in local people obtaining job training and higher paying employment while maintaining the quality of the rural environment.

COMPONENTS OF OBJECTIVE STATEMENT

1) What activities will you be engaged in?

Identify potential wood products markets and needed technologies.

Solicit participation from existing wood products manufacturers.

Train 2 existing wood products manufacturers in value added technologies.

2) What is the hoped for result of the activities described above?

Increasing value of locally produced wood products.

Higher employment and income levels.

3) How will you measure the quality of these activities?

Survey participating wood products manufacturers before and after project on value their product.

4) By what standard will you gauge success?

Increase of 50* in value of product.

Community Serv. Obj. #1: The AmeriCorps participant will serve as a liaison between Arkansas Land and Farm Development Corporation, East Central Arkansas Economic Development Corporation and other zone communities. The applicant will assist low and very low income clients in finding and making applications for affordable housing and other assistance through Farmers Home Administration's youth loans, 502-504 programs and other available resources they may be eligible for through government or nongovernment agencies. The participant will provide technical assistance with applications, loan packaging and resource development. This applicant will also assist with management and marketing skills so residents in eastern Arkansas can make better use of time and resources.

Low income individuals will have a thorough knowledge of accessing self-help programs and will have gained knowledge of what it means to "empower" themselves and their communities. The end result will be community people who have received the necessary ingredients to be successful in making the transition into the 21st century with marketable employment skills and knowledge that will enhance their livelihoods. This will begin a cycle of generational self-sufficiency.

Work will be measured by the number of low income people that are identified and assisted in making application to governmental and non governmental sources. Participant will be required to keep a

computer log of data on all applicants' progress, failures and successes. Any progress, failures or successes will be compared with the national norm. The work can also be measured by the data compiled on progress of strategies that were identified in residents EZ/EC application process.

The standard of quality or impact the program hopes to meet will be the number of individuals assisted and those who have obtained a level of self-sufficiency, empowerment and the necessities for a productive livelihood.

Approximately 30,000 residents of eastern Arkansas who live in Monroe, Lee, Cross and St. Francis counties.

COMMUNITY SERVICE OBJECTIVE

GRANTEE: USDA Soil Conservation Service SITE: Marion, Arkansas

COMPONENTS OF OBJECTIVE STATEMENTS: Identifying socially disadvantaged households who do

not have safe drinking water in the county, and working with organizations, local, state, federal agencies to provide safe extension of rural water for needy households.

1. What work will be done? What service activities will your participants engage in?

Members will identify limited resource and socially disadvantaged individuals who do not have safe household drinking water within Crittendon County, Arkansas. Members will work with local rural water districts, county governments, state legislature, and state governmental units for extension of lines to the needy households. Members will work with affected residents in preparing and submission of applications to FmHA for assistance in installation of needed plumbing facilities for applicant households. Members will identify available labor force to install plumbing fixtures as funds are secured.

2. What is the hoped for result of the work/activities described above?

Water lines extended to all needy residents. All limited resource and socially disadvantaged residents will have the necessary plumbing installed in their homes to allow for a better quality of life.

3. How will you measure the quality of your product or impact of your service?

All water lines installed will meet Arkansas Rural Water Association standards.

27-20 ✓

4. By what standard will you gauge success?

By determining the percentage of house holds who are furnished a safe supply of drinking water. The target is 100% with a minimum target of 80%.

5. How many individuals will receive the benefit of the work your participants perform?

An estimated 24 households are without drinking water. This equates to an estimated 100 individuals.

Community Serv. Obj. #2:

GRANTEE: USDA Soil Conservation Service SITE: Holly Grove, Arkansas

COMPONENTS OF OBJECTIVE STATEMENTS: Identifying property owners that are in the flood prone area in Holly Grove for a relocation process and working with local existing committees in addressing recommendations of improvement identified by the Holly Grove Flood Plain Management Study.

1. What work will be done? What service activities will your participants engage in? Member will work with the local leaders in trying to identify who owns property that is in a flood prone area in Holly Grove. Relocating of these families. There are approximately 90 persons living in the flood prone area.

2. What is the hoped for result of the work/activities described above? All families relocated out of the flood prone areas.

3. How will you measure the quality of your product or impact of your service? By moving these families out of the flood prone area and into an environment that is safe for them and their families.

4. By what standard will you gauge success? By returning to Holly Grove and seeing the homes out of the flood prone area and residents moved to an area where there is no danger of flooding. It is hoped that apartment complexes can be built for these families.

5. How many individuals will receive the benefit of the work your participants perform? At this time, it is estimated that approximately 90 individuals are living in the flood prone area.

Community Serv. Obj. #3:

CORPORATION FOR NATIONAL SERVICE
COMMUNITY SERVICE OBJECTIVE

GRANTEE: USDA Soil Conservation Service SITE: Fargo, Arkansas

27-22 ✓

COMPONENTS OF OBJECTIVE STATEMENTS: Conduct training and provide demonstration to limited resource youth, farmers, and landowners in sustainable crop production and woodland management.

1. What work will be done? What service activities will your participants engage in?

Members will conduct training and provide demonstration to limited resource, youth, farmers, and landowners in sustainable crop production and woodland management. Members will work with USDA agency staff, university faculty and community-based farm organizations. On the farms and woodlands of limited resource farmers and land owner in counties of Arkansas Land and Farm Development Corporation Program activities. The member will identify and secure supplies and equipment related to alternative training and demonstration packages.

2. What is the hoped for result of the work/activities described above?

More entry level farmers, youth and existing farmers will adopt alternative crop and woodland technologies and management practices in needy local farm communities. Also, it is expected that more limited resource farm operations will demonstrate increased profitability.

3. How will you measure the quality of your product or impact of your service?

By comparing new production practices with traditional production practices, especially yield results and operating costs. Also, improvement on limited resource crop farms related to post-harvest handling and marketing management.

4. By what standard will you gauge success?

By determining the percentage of limited resource farmers and land owners who receive training and demonstration packages who adopt new management practices or alternative enterprises. The target is 75% with a minimum of 50%.

5. How many individuals will receive the benefit of the work your participants perform?

An estimated 50 representatives from farm households attend each training event in the fall and winter months. ALFDC provides a minimum of 6 farmer production and marketing training events. This equates to 300 people served. ALFDC estimates 8 field day demonstrations with an average of 100 people attending in the spring and summer months for 800 people served. Thus the total number of limited resource farmers benefiting directly and indirectly is estimated at 1100.

Community Serv. Obj. #4: CORPORATION FOR NATIONAL SERVICE
COMMUNITY SERVICE OBJECTIVE

GRANTEE: USDA Soil Conservation Service SITE: Pine Bluff, Arkansas

COMPONENTS OF OBJECTIVE STATEMENTS: Work with local, state, and federal agencies, university faculty, and community-based farm organizations to provide training and demonstrations to limited resource, youth, farmers, and landowners in sustainable crop production and help farmers in identifying and securing supplies and equipment for alternative enterprises.

27-23✓

1. What work will be done? What service activities will your participants engage in?
Members will work with local, state, and federal agencies, university faculty, and community-based farm organizations. Member will conduct training and provide demonstrations to limited resource, youth, farmers, and landowners in sustainable crop production. The member will help farmers in identifying and securing supplies and equipment for alternative enterprises. Member will assist in developing demonstration packages and training for alternative enterprises.
2. What is the hoped for result of the work/activities described above?
More entry level farmers, youth and existing farmers will adopt alternative crop and woodland technologies and management practices in needy local farm communities. Also, it is expected that more limited resource farm operations will demonstrate increased profitability.
3. How will you measure the quality of your product or impact of your service?
By comparing alternative crops and production practices with traditional crops and production practices, especially yields, operating costs and income per acre; also, by noting improvements in management skills of farmers as related to post-harvest handling and marketing management.
4. By what standard will you gauge success?
By determining the percentage of limited resource farmers and land owners (who receive training and demonstration packages) who adopt new management practices or alternative enterprises.
5. How many individuals will receive the benefit of the work your participants perform?
University of Arkansas at Pine Bluff provides a minimum of 50 farmer production and marketing training events. This equated to 2,000 people served. UAPB estimates two field day demonstrations, with an average of 50 people attending in the summer and fall months, for 100 people served. Thus, the total number of limited resource farmers benefiting directly and indirectly is estimated at approximately 2,000.

Community Serv. Obj. #5:

CORPORATION FOR NATIONAL SERVICE
COMMUNITY SERVICE OBJECTIVE

27-24 ✓

GRANTEE: USDA Soil Conservation Service SITE: North Little Rock, Arkansas

COMPONENTS OF OBJECTIVE STATEMENTS: Working with Arkansas Natural Heritage
Commission (ANHCC)

in identifying endangered and threatened species for each of the delta counties, National Forest areas, and adjacent counties and cataloging information in packet form for public use in project planning with cities, communities and State and Federal projects.

1. What work will be done? What service activities will your participants engage in?
Member will identify species of federal concern in Arkansas with special emphasis on the delta region. The member will present this information to local units of government, organizations, and civic groups. This information will be used to meet permit requirements for needed community improvements involving construction. The information will also be used in ecosystem based assistance in planning efforts with land users.

2. What is the hoped for result of the work/activities described above?

The member will develop manuals for each Arkansas county with special emphasis on delta counties. It is hoped that through county meetings which will be organized and conducted by the member will lead to county wide acceptance of the use of the species manual for planning and construction efforts.

3. How will you measure the quality of your product or impact of your service?

The impact will be determined by the acceptance among those involved in ecosystem based planning and construction activities. The manuals will be reviewed by the Arkansas Natural Heritage Commission and Arkansas Game and fish Commission to ensure its quality and accuracy.

4. By what standard will you gauge success?

The standard for success will be the number of manuals completed and the acceptance of those involved in ecosystem based planning efforts. The probability of success can be forecast through feedback obtained through presentations during public meetings.

5. How many individuals will receive the benefit of the work your participants perform?

All individuals from each of Arkansas' 75 counties who are involved in and receive benefit from ecosystem based planning and construction will receive benefit from the manuals. It is anticipated the long term benefits of the project will eventually affect all Arkansans.

This information will be used to meet permit requirements for needed community improvements involving construction. The information will also be used in ecosystem based assistance in planning efforts with land users.

2. What is the hoped for result of the work/activities described above?

The member will develop manuals for each Arkansas county with special emphasis on delta

counties. It is hoped that through county meetings which will be organized and conducted by the member will lead to county wide acceptance of the use of the species manual for planning and construction efforts.

3. How will you measure the quality of your product or impact of your service?

The impact will be determined by the acceptance among those involved in ecosystem based planning and construction activities. The manuals will be reviewed by the Arkansas Natural Heritage Commission and Arkansas Game and fish Commission to ensure its quality and accuracy.

4. By what standard will you gauge success?

The standard for success will be the number of manuals completed and the acceptance of those involved in ecosystem based planning efforts. The probability of success can be forecast through feedback obtained through presentations during public meetings.

5. How many individuals will receive the benefit of the work your participants perform?

All individuals from each of Arkansas' 75 counties who are involved in and receive benefit from ecosystem based planning and construction will receive benefit from the manuals. It is anticipated the long term benefits of the project will eventually affect all Arkansans.

Description of Service: Rural forest work

Ethnicity (Solo sites):

Community Serv. Obj. #1: Grantee Department of Agriculture Site Rural Development, MS, AR, & VA

Objective Code 23

CORPORATION FOR NATIONAL SERVICE

COMMUNITY SERVICE OBJECTIVES

OBJECTIVE STATEMENT

To provide assistance to rural communities interested in implementing community forestry programs resulting in improved living conditions and opportunities for neighborhood service.

COMPONENTS OF OBJECTIVE STATEMENT

1) What work will be done? What service will your members engage in?

Develop a plan and identify suitable planting sites for urban forestry projects.

Secure funding for purchase of materials.

Recruit and organize volunteers to plant trees.

2) What is the hoped for result of the activities described above?

Establishment of native tree species in residential and business areas in small communities.

Involvement of local civic and volunteer groups.

3) How will you measure the quality of these activities?

Survival rate of 60% of planted trees.

Participation by 3 local groups.

4) By what standard will you gauge success?

Improvement of overall aesthetic quality of area.

Increase in real estate values.

5) How many individuals will receive the benefit of the work you members perform? All residents of the 8-10 communities involved.

Community Serv. Obj. #2: Grantee Department of Agriculture Site Rural Development, KY, MS, SC & AR
Objective Code 25

CORPORATION FOR NATIONAL SERVICE
COMMUNITY BUILDING OBJECTIVES

OBJECTIVE STATEMENT

To seek sustainable economic development opportunities to diversify local economies, resulting in local people obtaining job training and higher paying employment while maintaining the quality of the rural environment.

COMPONENTS OF OBJECTIVE STATEMENT

1) What activities will you be engaged in?

members will work directly with local business leaders to inventory existing resources, identify sustainable economic development opportunities, conduct feasibility studies, and assist in writing (3.5) business plans.

Issues of environmental concern will be analyzed with any related new business venture.

2) What is the hoped for result of the activities described above?

increasing local employment and income.

Local individuals will be trained for employment.

Business plans will be developed and funding sought.

3) How will you measure the quality of these activities?

Professionals will review all environmental impact analysis.

Local business leaders will be interviewed following completion of project.

Loans and other funding will be obtained for 25* of the business plans developed.

4) By what standard will you gauge success?

Establishment of a sustainable, natural resource based business employing 5 locally trained people.

Community Serv. Obj. #3: Grantee Department of Agriculture Site Rural Development, VA, KY, TN & AR
Objective Code 26

CORPORATION FOR NATIONAL SERVICE
COMMUNITY BUILDING OBJECTIVES

OBJECTIVE STATEMENT

To promote alternative wood products and value added manufacturing technologies resulting in local people obtaining job training and higher paying employment while maintaining the quality of the rural environment.

COMPONENTS OF OBJECTIVE STATEMENT

1) What activities will you be engaged in?

Identify potential wood products markets and needed technologies.

Solicit participation from existing wood products manufacturers.

Train 2 existing wood products manufacturers in value added technologies.

2) What is the hoped for result of the activities described above?

Increasing value of locally produced wood products.

Higher employment and income levels.

3) How will you measure the quality of these activities?

Survey participating wood products manufacturers before and after project on value their product.

4) By what standard will you gauge success?

Increase of 50* in value of product.

CORPORATION FOR NATIONAL SERVICE

COMMUNITY SERVICE OBJECTIVE

GRANTEE: USDA Soil Conservation Service SITE: Helena, Arkansas

COMPONENTS OF OBJECTIVE STATEMENTS: Identify and catalog all units of government and non-profit community organizations in three counties by contacting county and city governments, county judges, Quorum Court members, mayors, city councilmen and community organizations for the purpose of identifying needs and problems of the rural communities and locating grants available for problem solving of those needs.

1. What work will be done? What service activities will your participants engage in? Identify and catalog all units of government and non-profit community organizations in Phillips, Lee, and Monroe counties. Member will hold community meetings to aid in identifying key community problems. The member will work in conjunction with the Forest Service member in identifying potential funders to address the problems. Member will hold community meetings to present findings and aid concerned groups in developing formal proposal to funders.
2. What is the hoped for result of the work/activities described above? That all problems and needs of rural communities, units of government, and non-profit organizations can be identified and addressed. It is further hoped that the standard of living for people in rural communities and small towns can be improved.
3. How will you measure the quality of your product or impact of your service? By improving the quality of living for approximately 30,000 people in these counties.

4. By what standard will you gauge success?

By the number of units of government and non-profit organizations contacted, by the number of needs and problems identified, and by the number of problems addressed.

5. How many individuals will receive the benefit of the work your participants perform?

An estimated 30,000 people reside in Phillips, Lee and Monroe Counties. It is the goal of this project to develop pertinent proposals that will benefit at least 10% of the residents within the first year.

Community Serv. Obj. #2:

CORPORATION FOR NATIONAL SERVICE

COMMUNITY SERVICE OBJECTIVE

GRANTEE: USDA Soil Conservation Service SITE: North Little Rock, Arkansas

COMPONENTS OF OBJECTIVE STATEMENTS: Will work to implementing statewide

Rural Conservation and Development initiative to spread alternative fuel technology (wood pellet fuel).

1. What work will be done? What service activities will your participants engage in?

Members will implement RC&D state wide initiative to place wood pellets stoves and furnaces in 35 businesses and public buildings to promote the use of wood pellets as a source of heat.

2. What is the hoped for result of the work/activities described above?

Wood pellets be one of the primary sources of heat for rural homes and businesses in Arkansas.

3. How will you measure the quality of your product or impact of your service?

By the number of homes and businesses who convert to wood pellets.

4. By what standard will you gauge success?

After one heating season using wood pellet technology, we gauge our success by the number of businesses who are satisfied with wood pellet heat and the economic savings.

5. How many individuals will receive the benefit of the work your participants perform?

Initially 35 pellet stoves will be placed in public facilities and businesses in Arkansas. We anticipate over 100,000 individuals will be aware of the benefits of wood pellet technology within the year.

Community Serv. Obj. #3:

CORPORATION FOR NATIONAL SERVICE

COMMUNITY SERVICE OBJECTIVE

GRANTEE: USDA Soil Conservation Service SITE: Marion, Arkansas

COMPONENTS OF OBJECTIVE STATEMENTS: Working with the Lower Mississippi Delta Development

Commission (LMDCC) on updating economic data needed to assist groups, agencies,

organizations, and individuals to carry out projects in implementing delta initiatives identified by the LMDCC.

1. What work will be done? What service activities will your participants engage in?
Update economic statistical data needed to assist groups, agencies, organizations, and individuals to plan and carry out projects in support of the final report recommendations made by the federally created Lower Mississippi Delta Development Commission. Most data now available to the Center was developed in the late 1980's and is in need of revision. In addition, some of the data was not collected during the commission's work. The information will be broken down to the smallest unit possible to get useful data, in other words, county, state, and regional level data.
2. What is the hoped for result of the work/activities described above?
This factual data will be made available to entities that are planning and implementing Delta projects that support the "Delta Initiatives" report. The LMDD Center will become the clearing house for providing information to various interests that want to work to help alleviate problems identified by the LMDD Commission. It is hoped that, by having data available for distribution, this information will make it easier and quicker for adequate plans to be put together to address the needs of the region.
3. How will you measure the quality of your product or impact of your service?
The quality of the data developed and/or collected will be judged by the usefulness it has for various interests requesting and using it to help develop projects for the region.
4. By what standard will you gauge success?
An extensive list of information needed has been compiled and the success will be measured by the number of the data lists completed. A successful project will compile, assimilate and have available for use not less than 5 of the data sets on the list.
5. How many individuals will receive the benefit of the work your participants perform?
All the lower Mississippi Delta.

Community Serv. Obj. #4:

CORPORATION FOR NATIONAL SERVICE
COMMUNITY SERVICE OBJECTIVE

A

GRANTEE: USDA Soil Conservation Service SITE: Batesville, Arkansas

COMPONENTS OF OBJECTIVE STATEMENTS: Identifying and establishing a mechanism for exchange of information and training with limited resource woodland owners with holdings in or around the county to improve the economic and environmental sustainability of limited resource woodland farmers.

1. What work will be done? What service activities will your participants engage in?
Members will identify and establish a mechanism for exchange of information and contact with the limited resource woodland owners with holdings in or around Independence county.

Members will work with various county, state, and federal employees to develop and test strategies to improve the economic and environmental sustainability of limited resource farmers. He/she will provide the logistical support to help farmers organize a county or area woodland owners association. The member will help develop and prepare an association newsletter to impart technical information and share success stories. The member will help organize field days, and develop fact sheets or other materials to disseminate knowledge gained from the demonstrations. Will serve as liaison between the emerging association and the technical advisor group(s).

2. What is the hoped for result of the work/activities described above?

Short term results will be a fully functional woodland owners association, with a membership that identifies their needs and plans appropriate activities to meet these needs. Expected long term results will be an improving woodland base, an increased interest in forestry management practices, and greater sustained incomes from limited resource woodland owners from sale of woodland products. We hope for increased interest in satellite programs such as concentration yards, dry kiln facilities, firewood cutter associations, and new market development. It is also hoped that successes in this association will create interest in the development of other woodland associations..

3. How will you measure the quality of your product or impact of your service?

Through the organization of a woodland owners association, and the development of an information infrastructure to train association members in the technical aspects of forestry and product marketing.

4. By what standard will you gauge success?

By the number of charter members enrolled in this association. The project will be successful if 5% of the total woodland owners in the designated area participate in the initial organization.

5. How many individuals will receive the benefit of the work your participants perform?

Initially all identified woodland owners will be contacted. This number is approximately 1,000.

Community Serv. Obj. #5:

CORPORATION FOR NATIONAL SERVICE

COMMUNITY SERVICE OBJECTIVE

GRANTEE: USDA Soil Conservation Service SITE: Pine Bluff, Arkansas

COMPONENTS OF OBJECTIVE STATEMENTS: Work with faculty and students in the Agricultural

Economic Program in assisting three research projects involving agricultural marketing that will benefit small scale farmers in Southeast Arkansas and lower delta region of Arkansas

1. What work will be done? What service activities will your participants engage in?

Members will work with faculty, staff, and students in the Agricultural Economics Program. Will assist the faculty with various aspects of three research projects in the area of agricultural marketing. All projects involve generating reliable and useful results that will benefit small-scale farmers in southeast Arkansas and the Lower Mississippi Delta Region. The focus is the production, processing, distribution, and marketing of alternative agricultural enterprises. The main focus of the member will be to organize and conduct public meetings to key groups for

presentation of research data.

2. What is the hoped for result of the work/activities described above?

Small-scale farmers will utilize the results of the research to aid them in establishing and operating successful agricultural enterprises. The foregoing will contribute toward enhancement of the quality of life of farmers and other residents of farming communities.

3. How will you measure the quality of your product or impact of your service?

The feedback and recommendation of the public meetings will enable the University to assess the quality of their research direction and efforts. It is hoped that 10% of the socially disadvantaged farmers will initially utilize research findings.

4. By what standard will you gauge success?

The level of success will depend on the number of farmers reached through the public meetings who utilize the results and impact of the research on size of operation, income level, and profit level. Growth in American industries have been tied to good research.

5. How many individuals will receive the benefit of the work your participants perform?

At least 100 small-scale farmers in Southeast Arkansas will benefit from the work performed by the member. The indirect benefits will accrue to a much larger population, since a large number of consumers will comprise a significant segment of this population. These 100 socially disadvantaged farmers will be reached by the member through no less than ten public meetings.

COMMUNITY SERVICE OBJECTIVE

GRANTEE: USDA Soil Conservation Service SITE: Marion, Arkansas

COMPONENTS OF OBJECTIVE STATEMENTS: Identifying socially disadvantaged households who do

not have safe drinking water in the county, and working with organizations, local, state, federal agencies to provide safe extension of rural water for needy households.

1. What work will be done? What service activities will your participants engage in?

Members will identify limited resource and socially disadvantaged individuals who do not have safe household drinking water within Crittendon County, Arkansas. Members will work with local rural water districts, county governments, state legislature, and state governmental units for extension of lines to the needy households. Members will work with affected residents in preparing and submission of applications to FmHA for assistance in installation of needed plumbing facilities for applicant households. Members will identify available labor force to install plumbing fixtures as funds are secured.

2. What is the hoped for result of the work/activities described above?

Water lines extended to all needy residents. All limited resource and socially disadvantaged residents will have the necessary plumbing installed in their homes to allow for a better quality of life.

3. How will you measure the quality of your product or impact of your service?

All water lines installed will meet Arkansas Rural Water Association standards.

4. By what standard will you gauge success?

By determining the percentage of house holds who are furnished a safe supply of drinking water. The target is 100% with a minimum target of 80%.

5. How many individuals will receive the benefit of the work your participants perform?
An estimated 24 households are without drinking water. This equates to an estimated 100 individuals.

Community Serv. Obj. #2:

CORPORATION FOR NATIONAL SERVICE
COMMUNITY SERVICE OBJECTIVE

GRANTEE: USDA Soil Conservation Service SITE: Holly Grove, Arkansas

COMPONENTS OF OBJECTIVE STATEMENTS: Identifying property owners that are in the flood prone area in Holly Grove for a relocation process and working with local existing committees in addressing recommendations of improvement identified by the Holly Grove Flood Plain Management Study.

1. What work will be done? What service activities will your participants engage in?
Member will work with the local leaders in trying to identify who owns property that is in a flood prone area in Holly Grove. Relocating of these families. There are approximately 90 persons living in the flood prone area.
2. What is the hoped for result of the work/activities described above?
All families relocated out of the flood prone areas.
3. How will you measure the quality of your product or impact of your service?
By moving these families out of the flood prone area and into an environment that is safe for them and their families.
4. By what standard will you gauge success?
By returning to Holly Grove and seeing the homes out of the flood prone area and residents moved to an area where there is no danger of flooding. It is hoped that apartment complexes can be built for these families.
5. How many individuals will receive the benefit of the work your participants perform?
At this time, it is estimated that approximately 90 individuals are living in the flood prone area.

Community Serv. Obj. #3:

CORPORATION FOR NATIONAL SERVICE
COMMUNITY SERVICE OBJECTIVE

GRANTEE: USDA Soil Conservation Service SITE: Fargo, Arkansas

COMPONENTS OF OBJECTIVE STATEMENTS: Conduct training and provide demonstration

to limited resource youth, farmers, and landowners in sustainable crop production and woodland management.

1. What work will be done? What service activities will your participants engage in?

Members will conduct training and provide demonstration to limited resource, youth, farmers, and landowners in sustainable crop production and woodland management. Members will work with USDA agency staff, university faculty and community-based farm organizations. On the farms and woodlands of limited resource farmers and land owner in counties of Arkansas Land and Farm Development Corporation Program activities. The member will identify and secure supplies and equipment related to alternative training and demonstration packages.

2. What is the hoped for result of the work/activities described above?

More entry level farmers, youth and existing farmers will adopt alternative crop and woodland technologies and management practices in needy local farm communities. Also, it is expected that more limited resource farm operations will demonstrate increased profitability.

3. How will you measure the quality of your product or impact of your service?

By comparing new production practices with traditional production practices, especially yield results and operating costs. Also, improvement on limited resource crop farms related to post-harvest handling and marketing management.

4. By what standard will you gauge success?

By determining the percentage of limited resource farmers and land owners who receive training and demonstration packages who adopt new management practices or alternative enterprises. The target is 75% with a minimum of 50%.

5. How many individuals will receive the benefit of the work your participants perform?

An estimated 50 representatives from farm households attend each training event in the fall and winter months. ALFDC provides a minimum of 6 farmer production and marketing training events. This equates to 300 people served. ALFDC estimates 8 field day demonstrations with an average of 100 people attending in the spring and summer months for 800 people served. Thus the total number of limited resource farmers benefiting directly and indirectly is estimated at 1100.

Community Serv. Obj. #4: CORPORATION FOR NATIONAL SERVICE
COMMUNITY SERVICE OBJECTIVE

GRANTEE: USDA Soil Conservation Service SITE: Pine Bluff, Arkansas

COMPONENTS OF OBJECTIVE STATEMENTS: Work with local, state, and federal agencies, university faculty, and community-based farm organizations to provide training and demonstrations to limited resource, youth, farmers, and landowners in sustainable crop production and help farmers in identifying and securing supplies and equipment for alternative enterprises.

1. What work will be done? What service activities will your participants engage in?

Members will work with local, state, and federal agencies, university faculty, and community-based farm organizations. Member will conduct training and provide demonstrations to limited resource, youth, farmers, and landowners in sustainable crop production. The member will help farmers in identifying and securing supplies and equipment for alternative enterprises. Member will assist in developing demonstration packages and training for alternative enterprises.

2. What is the hoped for result of the work/activities described above?

More entry level farmers, youth and existing farmers will adopt alternative crop and woodland technologies and management practices in needy local farm communities. Also, it is expected that more limited resource farm operations will demonstrate increased profitability.

3. How will you measure the quality of your product or impact of your service?

By comparing alternative crops and production practices with traditional crops and production practices, especially yields, operating costs and income per acre; also, by noting improvements in management skills of farmers as related to post-harvest handling and marketing management.

4. By what standard will you gauge success?

By determining the percentage of limited resource farmers and land owners (who receive training and demonstration packages) who adopt new management practices or alternative enterprises.

5. How many individuals will receive the benefit of the work your participants perform?

University of Arkansas at Pine Bluff provides a minimum of 50 farmer production and marketing training events. This equated to 2,000 people served. UAPB estimates two field day demonstrations, with an average of 50 people attending in the summer and fall months, for 100 people served. Thus, the total number of limited resource farmers benefiting directly and indirectly is estimated at approximately 2,000.

Community Serv. Obj. #5:

CORPORATION FOR NATIONAL SERVICE
COMMUNITY SERVICE OBJECTIVE

GRANTEE: USDA Soil Conservation Service SITE: North Little Rock, Arkansas

COMPONENTS OF OBJECTIVE STATEMENTS: Working with Arkansas Natural Heritage
Commission (ANHNC)

in identifying endangered and threatened species for each of the delta counties, National Forest areas, and adjacent counties and cataloging information in packet form for public use in project planning with cities, communities and State and Federal projects.

1. What work will be done? What service activities will your participants engage in?

Member will identify species of federal concern in Arkansas with special emphasis on the delta region. The member will present this information to local units of government, organizations, and civic groups. This information will be used to meet permit requirements for needed community improvements involving construction. The information will also be used in ecosystem based assistance in planning efforts with land users.

2. What is the hoped for result of the work/activities described above?

The member will develop manuals for each Arkansas county with special emphasis on delta counties. It is hoped that through county meetings which will be organized and conducted by the member will lead to county wide acceptance of the use of the species manual for planning and construction efforts.

3. How will you measure the quality of your product or impact of your service?

The impact will be determined by the acceptance among those involved in ecosystem based planning and construction activities. The manuals will be reviewed by the Arkansas Natural Heritage Commission and Arkansas Game and fish Commission to ensure its quality and accuracy.

4. By what standard will you gauge success?

The standard for success will be the number of manuals completed and the acceptance of those involved in ecosystem based planning efforts. The probability of success can be forecast through feedback obtained through presentations during public meetings.

5. How many individuals will receive the benefit of the work your participants perform?

All individuals from each of Arkansas' 75 counties who are involved in and receive benefit from ecosystem based planning and construction will receive benefit from the manuals. It is anticipated the long term benefits of the project will eventually affect all Arkansans.

Community Serv. Obj. #1: AmeriCorp and offices in Forrest City, the Arkansas Delta Housing Development Corporation and the Arkansas Delta Self-help Construction Corporation will work to organize mutual self-help housing programs, access federal and state financing and technical assistance and implement fair housing laws in Arkansas Delta Counties.

A community where all are offered accessible, affordable and quality housing to live normally, healthily and environmentally secure lives. By 2004 develop a sustainable neighborhood housing and community improvement/revitalization system with all key actors, residents, private and public sector being "full partners" and "direct beneficiaries" in the redevelopment process.

Work can be measured by the number of low and very low income people that are identified and/or assisted in making application to funding sources for assistance. The work can also be measured by the data compiled on progress of strategies that were identified in the EZ/EC application process.

The standard will be the number of individuals assisted, the needs identified as well as the resources identified that can be accessed to satisfy these needs.

At least 1500 families in the four county area will be impacted by implementation of the strategic plan.

The participant will identify and establish a network with community leaders and groups that provide

service to socially disadvantaged and low and very low income residents of rural areas. The participant will provide general information concerning housing and farmer programs to socially disadvantaged and very low income residents and assist these individuals in accessing the programs of the agency.

The program will result in very low income individuals obtaining loans and grants to obtain adequate housing or upgrade existing substandard housing. Socially disadvantaged farmers will obtain financial assistance to improve their economic plight.

Work can be measured by the number of applications submitted to FmHA or other funding sources. The work can also be measured by the number of groups identified that provide service to low income groups.

Groups in the three county areas will be made aware of programs of FmHA/RDA and other government agencies that are available to assist socially disadvantaged and very low income individuals.

500-600 individuals will be benefited through increased awareness of federal programs.

Community Serv. Obj. #1: Identify every media and community contact in the Willcox county office service territory. Prepare 502/504 informational packets for everyone identified. Contact and meet with tribal officials, media contacts, community officials, and private and nonprofit organizations.

There will be an increase in the awareness level of the rural residents, especially the very low and low income residents living in the service territory of the FmHA Willcox County Office, about the FmHA 504 and 502 housing loan programs available.

The targeted outreach individuals and groups in the service territory will be identified and met with to inform them and their members, readers, listeners, etc. about the FmHA housing programs.

A questionnaire will be designed to evaluate the effectiveness of the outreach message and mailed to one third of the contacts met with. Contact by telephone will be made to one third of the contacts met with and inquiry will be made as to whether an additional meeting or information would be helpful. The returned questionnaires will be reviewed and any followup action required will be implemented.

All rural residents living in the service territory of the FmHA Willcox County Office will be fully informed on the housing programs of the FmHA.

Community Serv. Obj. #1: The Americorps member will work closely with Tribal leaders in developing applications for submission to RDA/FmHA. He will provide technical support and research skills that are essential if a project is to be submitted properly.

Provide sufficient assistance to the various applicants to insure that no less than one application is approved for funding during FY95.

Impact will hopefully be increased applications and approval of applications for funding.

The AmeriCorps member and the District Loan Specialist will review the list of potential applications on a monthly basis and select those which have the greatest level of need and opportunity for funding. Member will also maintain and update on a regular basis status reports of each application to insure that target dates for delivery of critical application information are met.

The community will receive sufficient assistance to access the various loan programs available and will have improved housing, standard of living, etc.

Community Serv. Obj. #1: Develop a questionnaire necessary to survey the various municipalities types and levels of funding needs. Identify key personnel to contact with survey within the various communities.

Key personnel within the various communities will receive the survey and an explanation of the purpose of the survey. Funding types and levels needed for municipal projects will be identified.

Public, private and community organizations which may be a potential source of investment capital for a regional revolving loan fund will be identified.

Survey findings will be analyzed and a final report developed to reflect the findings.

An increased amount of investment capital will be made available for new business in Northern Arizona.

Community Serv. Obj. #1: Assist the city of Douglas in addressing the border issues identified in the EZ/EC application and with implementing the economic activities identified in the application as well as improve the quality of life of its residents; assist the city with improving the quality and quantity of education and training available for its residents.

Inquiries from prospective businesses will be responded to on an ongoing basis. A packet of informational literature for prospective businesses will be developed. Strategy will be developed to provide locally those products/services not currently available. A strategy will be developed to obtain additional financing for new and emerging business. Housing development will be promoted.

The four elements of the EZ/EC strategic plan (border issues; economic development; quality of life; education/training) will be favorably impacted by the efforts of the community on both sides of the border working together to create economic opportunity and promoting sustainable community development.

Customer satisfaction will be surveyed and customer relations workshops through the Cochise College Small Business Development Center, the Cochise Private Industry Council and the M.A.D.R.E.

The image of the City of Douglas will be improved through the development of a public relations

strategy. The AZ Dept. of Commerce grants for tourism development will increase and business recruitment efforts will increase.

COMMUNITY SERVICE OBJECTIVE

GRANTEE: USDA Soil Conservation Service
Development

SITE: Four Corners Regional Rural

Project - Arizona

COMPONENTS OF OBJECTIVE STATEMENTS: Small Scale Agriculture Development

1. What work will be done? What service activities will your participants engage in?
Contact and educate landowners.

2. What is the hoped for result of the work/activities described above?
Native Americans become more self-sufficient by producing agriculture products to feed themselves and sell the surplus to increase per-capita income.

3. How will you measure the quality of your product or impact of your service?
50% of participants who receive technical assistance develop small scale agriculture enterprises.

4. By what standard will you gauge success?
Based on surveys of before and after.

5. How many individuals will receive the benefit of the work your participants perform?
Thirty participants will benefit by the establishment of small scale agriculture enterprise, increased family nutrition, and more self-sufficient communities.

GRANTEE: USDA Soil Conservation Service SITE: Four Corners Regional Rural
Development

Project - Arizona

COMPONENTS OF OBJECTIVE STATEMENTS: Data Inventory and Industry Potential
Analysis

1. What work will be done? What service activities will your participants engage in?
Determine the potential for natural resource based industries.
2. What is the hoped for result of the work/activities described above?
Complete a report that describes the potential for at least four natural resource based industries.
3. How will you measure the quality of your product or impact of your service?
A report with sufficient detail that economic development specialists utilize the information with little additional information.
4. By what standard will you gauge success?
At least one natural resource based industry is developed within two years after completion of the report.
5. How many individuals will receive the benefit of the work your participants perform?
At least 100 jobs will be created.

COMPONENTS OF OBJECTIVE STATEMENTS: Develop partnerships

1. What work will be done? What service activities will your participants engage in?
Develop partnerships with other rural development partners, Federal and State agencies, towns and cities, county government, economic development organizations.
2. What is the hoped for result of the work/activities described above?
Better overall coordinated rural development efforts with all partners which maximizes impacts of limited financial and human resources.
3. How will you measure the quality of your product or impact of your service?
Survey partners satisfaction and involvement of partners in future coordinated rural development

efforts.

4. By what standard will you gauge success?

100% of partners believe the quality of service delivery has improved due to the partnership.

Description of Service: Forest conservation work

Ethnicity (Solo sites):

Community Serv. Obj. #1: Arizona National Forests #1

OBJECTIVE STATEMENT:

To perform work on public lands to conserve, restore, and sustain natural habitats within various ecosystems. To maintain, improve, and construct recreation facilities including camp sites, trails, access points, etc. to benefit users of the National Forest System. To perform work that will improve habitat for Threatened, Endangered, and Sensitive species and improve forest health through thinning and restoration. To assist in restoring natural beauty in the national forests and assist in disaster recovery efforts when requested.

COMPONENTS OF OBJECTIVE STATEMENT

All six National Forests in Arizona (Apache-Sitgreaves, Coconino, Kaibab, Prescott, Tonto and Coronado)

will benefit from Arizona Americorp projects. Specifics include the following:

Enhance and improve over twenty five developed and dispersed campgrounds and day use areas on National Forests in Arizona:

Provide graffiti removal, facility maintenance, tree hazard removal, plant landscape materials, construct one half mile of rail fence, construct rock masonry structures, construct three foot bridges, complete fire ring replacement, and a water storage tank,

Enhance campgrounds by completing several campground expansion projects as well as rehabilitating several others.

Provide for trail maintenance, reconstruction and new construction for over 200 miles of trail:

Retread work and erosion control on trails used for hiking, biking, equestrian, backpacking and other trail related uses on every National Forests in Arizona.

Construct foot bridges on trails at several locations.

Complete dozens of range and forage improvement projects which will enhance over 20 allotments:

Five miles of fence construction and the removal of 15 miles of old fence,
conducting range study analysis on several allotments,

completing three waterlot, two forage improvement and one meadow enhancement construction project,

providing support to prepare several sites for prescribed fires to improve ecosystem diversity on over 10,000 acres

Construct barricades to be used as strategic locations to prevent un-authorized mechanical intrusion into the several Wilderness areas.

Provide for soil erosion reduction:

Construct road and trail closures to protect hundreds of acres of sensitive areas, provide for erosion control by filling in gullies with trees from a 250 acre thinning operation.

Restoration and enhancement of ecosystems for Threatened and/or Endangered sensitive species throughout National Forests in Arizona:

Rehabilitation of over a dozen riparian areas, riparian exclosures,

Construction of several fish habitat improvement structures,

Completing 7 miles of habitat fencing improvements for antelope, fencing to protect
grassland forage for improved antelope habitat,

Conduct survey for Desert Tortise on hundreds of acres,

Construct and reconstruct six trick tank water improvements,

Provide Goshawk habitat improvement on several hundred acres,

Construct aspen enclosures to protect 1000 acres of aspen regeneration,

Implement components of the Tonto Creek Riparian Unit habitat improvements.

Other ecosystem management projects that will result in the increased health of the National Forests will include:

Litter pickup, tree thinning several hundred acres, chipping of slash materials along 5
miles of roadways, pinyon juniper invasion reduction on 350 acres, fuelbreak construction and the rehabilitation of wildfires on nearly 650 acres.

2) What is the hoped for result of the activities described above?

That the projects completed by the Arizona Americorp enrollee's will assist the Forest Service in implementing ecosystem management. The outcomes of the projects will result in improved wildlife and inland fish habitat, increased and improved recreation opportunities, improved recreation trails, protection of wilderness, a decrease in soil erosion, improved range and forage conditions and an overall increase of the health of National Forests in Arizona.

The outcomes for the Americorps personnel will include developing collaborative working skills, a positive work ethic, enhanced communication and leadership skills, a conservation ethic, a positive attitude, independent thinker skills, self-directed learning, technical skills training, quality production and a sense of community service.

3) How will you measure the quality of these activities?

The work quality produced will be measured against current established standards. The line officer will identify the quality performance and/or product. The enrollee will provide evidence of the outcomes through a carefully planned and organized portfolio containing samples of work, a daily log, assessments, improvement plans, and reflections that will be reviewed at a post project interview.

4) By what standard will you gage success?

The success indicators will be assessed in a conference/interview. The enrollee will provide evidence in the form of assessments, observations, logs, plans, etc. collected and organized in the form of a portfolio. The portfolio will be the tool for the enrollee to communicate performance in relation to the following outcomes: Collaborative Work, Quality Producer, Problem Solver, Effective Communication and Leadership, Self-directed Worker and Learner and a Conservation Ethic.

The success of a given project will be gaged on the basis of the project being completed in a timely manner per established standards for quality.

5) How many individuals will receive the benefit of the work your members perform?

The members themselves will benefit by being involved in implementing ecosystem management projects, learning employment skills, developing a conservation ethic and providing a public service to their communities.

National Forest customers by the thousands, thirty two local communities and 74,000 school children will receive the benefit of the ecosystem management projects the Arizona Americorps enrollee's will complete. Over 11 million people will benefit from the Arizona Americorp program as measured in Recreation Visitor Days. The People At One Time capacity in developed campgrounds will increase by over 200. Improved habitat for wildlife will create greater opportunities for ecotourism. Overall the implementation of ecosystem management projects by the Americorp enrollee's will result in helping to meet the needs of our customers today while insuring that they are helping to provide for the needs of future generations.

will benefit from Arizona Americorp projects. Specifics include the following:

Enhance and improve over twenty five developed and dispersed campgrounds and day use areas on National Forests in Arizona:

Provide graffiti removal, facility maintenance, tree hazard removal, plant landscape materials, construct one half mile of rail fence, construct rock masonry structures, construct three foot bridges, complete fire ring replacement, and a water storage tank,

Enhance campgrounds by completing several campground expansion projects as well as rehabilitating several others.

Provide for trail maintenance, reconstruction and new construction for over 200 miles of trail:

Retread work and erosion control on trails used for hiking, biking, equestrian, backpacking and other trail related uses on every National Forests in Arizona.

Construct foot bridges on trails at several locations.

Complete dozens of range and forage improvement projects which will enhance over 20 allotments:

Five miles of fence construction and the removal of 15 miles of old fence,

conducting range study analysis on several allotments,

completing three waterlot, two forage improvement and one meadow enhancement construction project,

providing support to prepare several sites for prescribed fires to improve ecosystem diversity on over 10,000 acres

Construct barricades to be used as strategic locations to prevent un-authorized mechanical intrusion into the several Wilderness areas.

Provide for soil erosion reduction:

Construct road and trail closures to protect hundreds of acres of sensitive areas, provide for erosion control by filling in gullies with trees from a 250 acre thinning operation.

Restoration and enhancement of ecosystems for Threatened and/or Endangered sensitive species throughout National Forests in Arizona:

Rehabilitation of over a dozen riparian areas, riparian exclosures,

Construction of several fish habitat improvement structures,

Completing 7 miles of habitat fencing improvements for antelope, fencing to protect grassland forage for improved antelope habitat,

Conduct survey for Desert Tortise on hundreds of acres,

Construct and reconstruct six trick tank water improvements,

Provide Goshawk habitat improvement on several hundred acres,

Construct aspen enclosures to protect 1000 acres of aspen regeneration,

Implement components of the Tonto Creek Riparian Unit habitat improvements.

Other ecosystem management projects that will result in the increased health of the National Forests will include:

Litter pickup, tree thinning several hundred acres, chipping of slash materials along 5 miles of roadways, pinyon juniper invasion reduction on 350 acres, fuelbreak construction and the rehabilitation of wildfires on nearly 650 acres.

2) What is the hoped for result of the activities described above?

That the projects completed by the Arizona Americorp enrollee's will assist the Forest Service in implementing ecosystem management. The outcomes of the projects will result in improved wildlife and inland fish habitat, increased and improved recreation opportunities, improved recreation trails, protection of wilderness, a decrease in soil erosion, improved range and forage conditions and an overall increase of the health of National Forests in Arizona.

The outcomes for the Americorps personnel will include developing collaborative working skills, a positive work ethic, enhanced communication and leadership skills, a conservation ethic, a positive attitude, independent thinker skills, self-directed learning, technical skills training,

quality production and a sense of community service.

3) How will you measure the quality of these activities?

The work quality produced will be measured against current established standards. The line officer will identify the quality performance and/or product. The enrollee will provide evidence of the outcomes through a carefully planned and organized portfolio containing samples of work, a daily log, assessments, improvement plans, and reflections that will be reviewed at a post project interview.

4) By what standard will you gage success?

The success indicators will be assessed in a conference/interview. The enrollee will provide evidence in the form of assessments, observations, logs, plans, etc. collected and organized in the form of a portfolio. The portfolio will be the tool for the enrollee to communicate performance in relation to the following outcomes: Collaborative Work, Quality Producer, Problem Solver, Effective Communication and Leadership, Self-directed Worker and Learner and a Conservation Ethic.

The success of a given project will be gaged on the basis of the project being completed in a timely manner per established standards for quality.

5) How many individuals will receive the benefit of the work your members perform?

The members themselves will benefit by being involved in implementing ecosystem management projects, learning employment skills, developing a conservation ethic and providing a public service to their communities.

National Forest customers by the thousands, thirty two local communities and 74,000 school children will receive the benefit of the ecosystem management projects the Arizona Americorps enrollee's will complete. Over 11 million people will benefit from the Arizona Americorp program as measured in Recreation Visitor Days. The People At One Time capacity in developed campgrounds will increase by over 200. Improved habitat for wildlife will create greater opportunities for ecotourism. Overall the implementation of ecosystem management projects by the Americorp enrollee's will result in helping to meet the needs of our customers today while insuring that they are helping to provide for the needs of future generations.

Community Serv. Obj. #3: Arizona National Forests #3

20-03

OBJECTIVE STATEMENT:

To perform work on public lands to conserve, restore, and sustain natural habitats within various ecosystems. To maintain, improve, and construct recreation facilities including camp sites, trails, access points, etc. to benefit users of the National Forest System. To perform work that will improve habitat for Threatened, Endangered, and Sensitive species and improve forest health through thinning and restoration. To assist in restoring natural beauty in the national forests and assist in disaster recovery efforts when requested.

COMPONENTS OF OBJECTIVE STATEMENT

All six National Forests in Arizona (Apache-Sitgreaves, Coconino, Kaibab, Prescott, Tonto and Coronado)

will benefit from Arizona Americorp projects. Specifics include the following:

Enhance and improve over twenty five developed and dispersed campgrounds and day use areas on National Forests in Arizona:

Provide graffiti removal, facility maintenance, tree hazard removal, plant landscape materials, construct one half mile of rail fence, construct rock masonry structures, construct three foot bridges, complete fire ring replacement, and a water storage tank,

Enhance campgrounds by completing several campground expansion projects as well as rehabilitating several others.

Provide for trail maintenance, reconstruction and new construction for over 200 miles of trail: Retread work and erosion control on trails used for hiking, biking, equestrian, backpacking and other trail related uses on every National Forests in Arizona.

Construct foot bridges on trails at several locations.

Complete dozens of range and forage improvement projects which will enhance over 20 allotments:

Five miles of fence construction and the removal of 15 miles of old fence,

conducting range study analysis on several allotments,

completing three waterlot, two forage improvement and one meadow enhancement construction project,

providing support to prepare several sites for prescribed fires to improve ecosystem diversity on over 10,000 acres

Construct barricades to be used as strategic locations to prevent un-authorized mechanical intrusion into the several Wilderness areas.

Provide for soil erosion reduction:

Construct road and trail closures to protect hundreds of acres of sensitive areas, provide for erosion control by filling in gullies with trees from a 250 acre thinning operation.

Restoration and enhancement of ecosystems for Threatened and/or Endangered sensitive species throughout National Forests in Arizona:

Rehabilitation of over a dozen riparian areas, riparian exclosures,

Construction of several fish habitat improvement structures,

Completing 7 miles of habitat fencing improvements for antelope, fencing to protect

grassland

forage for improved antelope habitat,

Conduct survey for Desert Tortoise on hundreds of acres,

Construct and reconstruct six trick tank water improvements,

Provide Goshawk habitat improvement on several hundred acres,

Construct aspen enclosures to protect 1000 acres of aspen regeneration,

Implement components of the Tonto Creek Riparian Unit habitat improvements.

Other ecosystem management projects that will result in the increased health of the National Forests will include:

Litter pickup, tree thinning several hundred acres, chipping of slash materials along 5

miles

of roadways, pinyon juniper invasion reduction on 350 acres, fuelbreak construction and the rehabilitation of wildfires on nearly 650 acres.

2) What is the hoped for result of the activities described above?

That the projects completed by the Arizona Americorp enrollee's will assist the Forest Service in implementing ecosystem management. The outcomes of the projects will result in improved wildlife and inland fish habitat, increased and improved recreation opportunities, improved recreation trails, protection of wilderness, a decrease in soil erosion, improved range and forage conditions

and an overall increase of the health of National Forests in Arizona.

The outcomes for the Americorps personnel will include developing collaborative working skills, a positive work ethic, enhanced communication and leadership skills, a conservation ethic, a positive attitude, independent thinker skills, self-directed learning, technical skills training, quality production and a sense of community service.

3) How will you measure the quality of these activities?

Community Serv. Obj. #1: CORPORATION FOR NATIONAL SERVICE
COMMUNITY SERVICE OBJECTIVE

GRANTEE: USDA Soil Conservation Service SITE: Four Corners Regional Rural
Development

Project - Arizona

COMPONENTS OF OBJECTIVE STATEMENTS: Small Scale Agriculture Development

1. What work will be done? What service activities will your participants engage in?
Contact and educate landowners.

2. What is the hoped for result of the work/activities described above?
Native Americans become more self-sufficient by producing agriculture products to feed themselves and sell the surplus to increase per-capita income.

3. How will you measure the quality of your product or impact of your service?
50% of participants who receive technical assistance develop small scale agriculture enterprises.

4. By what standard will you gauge success?
Based on surveys of before and after.

5. How many individuals will receive the benefit of the work your participants perform?
Thirty participants will benefit by the establishment of small scale agriculture enterprise, increased family nutrition, and more self-sufficient communities.

RECORD #: 47

Community Serv. Obj. #2: CORPORATION FOR NATIONAL SERVICE
COMMUNITY SERVICE OBJECTIVE

GRANTEE: USDA Soil Conservation Service SITE: Four Corners Regional Rural
Development

Project - Arizona

COMPONENTS OF OBJECTIVE STATEMENTS: Data Inventory and Industry Potential
Analysis

1. What work will be done? What service activities will your participants engage in?
Determine the potential for natural resource based industries.
2. What is the hoped for result of the work/activities described above?
Complete a report that describes the potential for at least four natural resource based industries.
3. How will you measure the quality of your product or impact of your service?
A report with sufficient detail that economic development specialists utilize the information with little additional information.
4. By what standard will you gauge success?
At least one natural resource based industry is developed within two years after completion of the report.
5. How many individuals will receive the benefit of the work your participants perform?
At least 100 jobs will be created.

Community Serv. Obj. #1: Complete the process of identifying and inventorying every building and section of land available for future economic development activities in the City of Eloy. Complete the process of identifying and inventorying the type and amount of goods and services available in Eloy. Complete the process of identifying and inventorying the work force in Eloy. Complete the inventory of the taxes levied on businesses in Eloy.

The address and condition of every building in Eloy which is available for potential economic development activity will be compiled. Every retail and wholesale outlet in Eloy will be contacted and the types and levels of goods and services the outlet is currently producing or distributing will be obtained. A census of every household in Eloy will be taken to obtain the number of employable residents and their educational and skill levels. Every taxing authority levying a tax in Eloy will be identified.

Economic development activity will both improve and increase.

The results of the identification and inventory process as outlined in the work objective will be compiled and submitted to the Eloy City Manager and the Eloy Chamber of Commerce to show that the goals set forth are met.

Community Serv. Obj. #1: Identify every media, tribal, and community contact in the Casa Grande county office service territory. Contact and meet with tribal officials, media contacts, community officials, and private and non-profit organizations. Evaluate effectiveness of the outreach effort and followup where necessary.

502/504 informational packets will be prepared for every media, tribal and community contact in the service territory. Will meet with as many contacts as possible. Community will be met with and informed about the FmHA housing programs.

The rural residents will have increased awareness, especially the very low and low income residents living in the service territory, about the FmHA 504 and 502 housing loan programs available.

A questionnaire will be designed to evaluate the effectiveness of the outreach message and mailed to one third of the contacts met with. One third of the contacts met with will be contacted by telephone to inquire if an additional meeting or information would be helpful. The returned questionnaires will be reviewed and any necessary followup action will be taken.

The community mayors, council members and staffs, media outlets, Tribal officials, private and non profit housing organizations will be made aware of assisted with access to the housing/loan grant programs.

Description of Service: Forest conservation work

Ethnicity (Solo sites):

Community Serv. Obj. #1: Six Rivers National Forest #1

OBJECTIVE STATEMENT:

To perform work on public lands to conserve, restore, and sustain natural habitats within various ecosystems. To maintain, improve, and construct recreation facilities including camp sites, trails, access points, etc. to benefit users of the National Forest System. To perform work that will improve habitat for Threatened, Endangered, and Sensitive species and improve forest health through thinning and restoration. To assist in restoring natural beauty in the national forests and assist in disaster recovery efforts when requested.

COMPONENTS OF OBJECTIVE STATEMENT

1) What work will be done? What service will your members engage in?

AmeriCorps Interns: (mentored by US Forest Service Professionals)

Analyzing and evaluating geomorphic and ecologic process within three major, critical watersheds to provide a basis for monitoring and restoration. Developing and implementing prescriptions for 900 acres of watershed restoration and inventory information for 600

acres

of aquatic habitat condition.

Develop plans and specifications for three campground facility renovation projects.

Develop four Cultural Resource Inventory (CRI) and two Environmental Impact Statements.

Develop three interpretive projects (exhibits/displays).

RECORD #: 56

Develop four interpretive publications and prepare for three community special events.

Provide environmental and ecosystem management education programs to a minimum of 300 STUDENTS in 12 classes of elementary school children.

2) What is the hoped for result of the activities described above?

That school children will become more environmentally aware and that the Members develop not only "natural resource technician" related skills, but also improved citizenship and land use ethic/stewardship awareness.

That critical resource base data can be collected for improved evaluation and restoration implementation. 3) How will you measure the quality of these activities?

We'll work with the schools to conduct and evaluate pre/post tests to determine and measure the success of the environmental education programs.

4) By what standard will you gauge success?

By completion of all the work in a timely manner per established standards for quality.

5) How many individuals will receive the benefit of the work your members perform?

Approximately 300-400 children will receive environmental education.

Community Serv. Obj. #2: Six Rivers National Forest #2

OBJECTIVE STATEMENT:

To perform work on public lands to conserve, restore, and sustain natural habitats within various ecosystems. To maintain, improve, and construct recreation facilities including camp sites, trails, access points, etc. to benefit users of the National Forest System. To perform work that will improve habitat for Threatened, Endangered, and Sensitive species and improve forest health through thinning and restoration. To assist in restoring natural beauty in the national forests and assist in disaster recovery efforts when requested.

COMPONENTS OF OBJECTIVE STATEMENT

1) What work will be done? What service will your members engage in?

AmeriCorps Crews:

Construct, redesign/improve 55 STRUCTURES instream essential for restoring critical salmon and steelhead fisheries habitat. Forty miles of streams will be improved.

Collection and cultivation of native plants to reestablish 850 acres of riparian habitat.

RECORD #: 56

- 2) What is the hoped for result of the activities described above?

That watershed restoration work will improve wildlife habitat, reduce erosion, reestablish important anadromous and resident fisheries habitat and improve general forest health. That projects will be completed based on priority in a timely and quality manner to increase visitor satisfaction and safety.

- 3) How will you measure the quality of these activities?

The majority of these activities will be measured against established and approved standards within Forest Service Land and Resource Management Plans, handbooks, operation, maintenance and construction guidelines, and project workplans. Line Officers will be responsible for accepting the quality of work accomplishments and will hold Members and 3rd parties accountable as part of their performance expectations.

- 4) By what standard will you gage success?

By completion of all the work in a timely manner per established standards for quality.

- 5) How many individuals will receive the benefit of the work your members perform?

Approximately 15 communities will be served. There will be an expected minimum of 5% increase in total Recreation Visitor Days (currently 1.3 million RVD) within the Six Rivers National Forest.

Community Serv. Obj. #3: Six Rivers National Forest #3

OBJECTIVE STATEMENT:

To perform work on public lands to conserve, restore, and sustain natural habitats within various ecosystems. To maintain, improve, and construct recreation facilities including camp sites, trails, access points, etc. to benefit users of the National Forest System. To perform work that will improve habitat for Threatened, Endangered, and Sensitive species and improve forest health through thinning and restoration. To assist in restoring natural beauty in the national forests and assist in disaster recovery efforts when requested.

COMPONENTS OF OBJECTIVE STATEMENT

- 1) What work will be done? What service will your members engage in?

Enhances fisheries habitat on 1,400 ACRES of land.

improved Increase riparian vegetation diversification. Create conifer species recovery for

canopy, long term wood recruitment and bank stabilization for 900 acres of fisheries and wildlife habitat.

RECORD #: 56

Stabilize and reduce erosion on landslides. Activities would include rip rapping, channel restoration, planting and mulching on 500 acres and 20 miles of salmon and steelhead spawning and rearing streams.

Construction of 50 wildlife habitat structures.

Renovation of eight visitor use facilities including campsites, roads, trails, information/interpretative displays, erosion control, vegetation management, etc.

Construction of two new handicapped access sites. Improvement of two existing sites for handicapped access.

Conduct trail maintenance on approximately 60 miles of trails including recreation river access. Work will consist of brushing, erosion control, tread renovation, installation of signs, etc.

2) What is the hoped for result of the activities described above?

That watershed restoration work will improve wildlife habitat, reduce erosion, reestablish important anadromous and resident fisheries habitat and improve general forest health. That projects will be completed based on priority in a timely and quality manner to increase visitor satisfaction and safety.

3) How will you measure the quality of these activities?

The majority of these activities will be measured against established and approved standards within Forest Service Land and Resource Management Plans, handbooks, operation, maintenance and construction guidelines, and project workplans. Line Officers will be responsible for accepting the quality of work accomplishments and will hold Members and 3rd parties accountable as part of their performance expectations. 4) By what standard will you gauge success?

By completion of all the work in a timely manner per established standards for quality.

5) How many individuals will receive the benefit of the work your members perform?

Approximately 15 communities will be served. There will be an expected minimum of 5% increase in total Recreation Visitor Days (currently 1.3 million RVD) within the Six Rivers National Forest.

Community Serv. Obj. #4: Six Rivers National Forest #4

OBJECTIVE STATEMENT:

To perform work on public lands to conserve, restore, and sustain natural habitats within various ecosystems. To maintain, improve, and construct recreation facilities including camp sites, trails, access points, etc. to benefit users of the National Forest System. To perform work that will improve

RECORD #: 56

habitat for Threatened, Endangered, and Sensitive species and improve forest health through thinning and restoration. To assist in restoring natural beauty in the national forests and assist in disaster recovery efforts when requested.

COMPONENTS OF OBJECTIVE STATEMENT

- 1) What work will be done? What service will your members engage in?

Construction of 50 STRUCTURES for wildlife habitat.

Renovation of eight visitor use facilities including campsites, roads, trails, information/interpretative displays, erosion control, vegetation management, etc.

Construction of two new handicapped access sites. Improvement of two existing sites for handicapped access.

- 2) What is the hoped for result of the activities described above?

Community Serv. Obj. #1: Meetings will be conducted in the rural towns within Imperial County to inform local home owners regarding FmHA 504 rural housing repair loans and grants. Requirements such as income level for loans, and income level and age requirements for grants will be covered. The kind of repairs that qualify will also be discussed.

It is hoped that after attending the town meetings, the local home owners will gain confidence and trust in FmHA and will look for assistance from the local FmHA programs regarding housing repair loans and grants under section 504.

Impact of success will be measured by how many inquiries and applications are received requesting program assistance under the 504 loan/grant rural housing program.

Success of the community outreach service will be measured by how much funding for loans, and how much

RECORD #: 58

funding for grants are used during the fiscal year of 1995.

It is estimated that the Imperial County has a population of 173,000 which encompasses all rural communities and the city of el Centro (the county seat). Out of the 173000 it is further estimated that about 25,000 county residents could potentially qualify for the 504 loan/grant under the rural housing program guidelines.

Description of Service: Anti-hunger services

Ethnicity (Solo sites):

Community Serv. Obj. #1: 1. Community Education

1. School Garden Project:

Goal: To establish a partnership with the Los Angeles Unified School Districts' (LAUSD) Homeless Project and work with one school which has a large population of homeless children to establish a community garden at the school.

Objective: To create one successful community garden at one school in which 30 students and their parents will be trained and participate for a school year.

1. The work to be done is to create one successful community garden at one school.
2. The result to be achieved is one new community garden established by 30 students and their parents.
3. The measure of quality is a survey of the skilled and training of 30 students.
4. The standard of success is the statements of 30 students sharing their experience and will provide the feasibility for another class of 30 at one other school.
5. 30 students have opportunities to eat produce they have grown and benefit from their new skills.

2. Healthy Eating is Fun:

Goal: Coordinate the relationship between the school district and local chefs who would visit the schools and provide training in healthy and enjoyable eating, bringing parents and children together in an innovative forum.

Objective: One presentation (with a follow-up, if requested) will be provided to a minimum of ten schools who will participate. With organizations such as EFNEP which

RECORD #: 62

emphasize nutrition education, we will coordinate presentations which will enable a greater number of schools to receive nutrition education.

1. The work to be done is hold one presentation for each 10 schools.
2. The result to be achieved is to provide nutritional education to 500 children and their families.
3. The measure of quality is a survey of 100 families who participated in the training events.
4. The standard of success is the follow-up Nutrition Education Resource Book in which 100 families share their new ideas for healthy eating.
5. All 500 children and their families will have new information and skills related to healthy eating.

3. Special Event Coordination:

Goal: Special event coordination within designated schools to promote healthy eating.
Objectives:

A. To conduct at least two district-wide promotions during the year.

1. The work to be done is to hold two district-wide promotions.
2. The result to be achieved is to expand the knowledge about healthy eating to 300 individuals at each promotion.
3. The measure of quality is an evaluation filled out by 50 individuals of all ages.
4. The standard of success is the follow-up response from 50 individuals who attended the event.
5. 50 individuals will have information on programs, organizations, and ideas directly related to improving the nutritional quality of their meals.

B. To conduct at least three campaigns at specially selected schools, with the overall goal of increasing participation in School Breakfast and School Lunch by 10% district-wide.

1. The work to be done is to conduct three campaigns to increase participation in School Breakfast and School Lunch.
2. The result to be achieved is the increase of participation 10%(2000) district-wide.
3. The measure of quality is a survey of 25% of participants in parents groups and school personnel involved.
4. The standard of success is the comparison of participation rates before and after special campaigns.

RECORD #: 62

5. 2000 additional children will participate in the School Breakfast and School Lunch program.

Community Serv. Obj. #2:

II. Community Outreach

I. You're Entitled:

Goal: To outreach to homeless, low income, working poor and people with AIDS and other disabilities to inform them of the benefits they are entitled, community activities (community gardens, farmers markets, school food programs, summer food program), and help with individual, client advocacy.

Objectives:

A. To perform community outreach three times a week to various neighborhood sites including local Department of Public Social Services (DPSS) offices, Women, Infant and Children (WIC) offices, county health facilities, housing projects, and senior centers.

B. To provide assistance to 1,000 people in a years period.

C. To conduct ten community trainings on the Earned Income Tax Credit leading to assisting 100 individuals in understanding and applying for this credit on their income tax forms.

1. The work to be done is performing community outreach.

2. The result to be achieved is providing outreach to 25 people a day (100 people a week).

3. The measure of quality is a survey of 25 people in need of outreach.

4. The standard of success is the statement of 25 people regarding the outreach provided.

5. All 100 people who received community outreach will have information regarding services, food programs and resources, available to them.

Community Serv. Obj. #3: III.

Summer Food

Let's Eat in the Heat: Summer Food Outreach:

Goal: To concentrate on the promotion of the Summer Food Service Program, a vastly under-utilized program which has the potential of reaching 700,000 children in greater Los Angeles and the surrounding area.

Objective: The objective of the members of the outreach team specializing in Summer Food will be to increase the number of children participating in the Summer Food program in Los Angeles by 2,000, and to produce at least one large scale event promoting the Summer Food Program.

RECORD #: 62

1. The work to be done is increasing the number of children participating in the Summer Food program in greater Los Angeles and to produce at least one large scale event promoting the Summer Food Program.

2. The result is increasing the number of children participating by 2,000.

3. The measure of quality is a survey of the Summer Food Program by participating children and their parents.

4. The standard of success is the increased number of participants by 2000.

5. 2000 additional children are participating in the Summer Food Program.

Community Serv. Obj. #4: IV. Community Access

1. Homeless Prevention Team:

Goal: To provide services in high impact areas to help them from becoming homeless.

Objective: The Quantified objective of these members of the Community Services team will be not to assist any certain number of people, as the number of disaster victims who might be potentially homeless or who have not received assistance cannot be known, but to assist 100% of those individuals and families with whom contact is made.

1. The work to be done is providing services to post earthquake victims.

2. The result to be achieved is informed individuals.

3. The measure of quality is an evaluation of 50 people affected by the earthquake.

4. The standard of success is the statement of 50 people affected by the earthquake.

5. 500 people will have knowledge of resources and how to access additional services as needed.

2. Community Coordination:

Will be a liaison between each of the other four program components and governmental agencies and community based organizations.

3. Homeless Outreach:

Goal: Short term life-saving outreach emergency shelter and services with longer term life-changing stabilization, transition and recovery services.

Objective: To engage, assess, refer, and provide limited case management to people living on the streets and in encampments, including the mentally ill.

1. Provide persons who are living on the street of acceptable alternatives which result in decisions by homeless people to abandon living in encampments on public property.

RECORD #: 62

2. The result to be achieved is to provide service information to 25 people every day. 12 individuals will have in depth one on one counseling,

3. The measure of quality

4. The standard of success is contacting the same individual so as over the course of the year 100 people off the streets.

5. 600 persons living on the streets and in encampments will have information on what services are available to.

4. Wet & Cold Weather Program:

Goal: Short term life-saving outreach emergency shelter and services.

Objective: Aid in establishing the Cold & Wet Weather Program and inform persons living on the streets of emergency shelter availability on wet and cold evenings during the winter months. November to March. 1,900 beds.

1. The work to be done is assist shelters to increase space available on cold and wet evenings. To inform persons in need of shelter on cold and wet days of this emergency program.

2. The result to be achieved is to inform 800 persons of the evening shelters.

3. The measure of quality will be people contacted will have the information.

4. The standard of success is 100% of emergency beds filled.

5. 800 individuals will have the information and will be able to access the emergency shelters.

Community Serv. Obj. #5: V. Community Assets

1. Community Gardening Project:

Goal: The goal of this component will be to substantially increase the use and number of community gardens in inner city Los Angeles and ensure their continued success, provide information on social services to gardeners, and to develop an outlet for marketable produce. Rejuvenate existing gardens which are in underutilized and decaying.

Objective: One new community garden will be established and two existing gardens rejuvenated.

1. The work to be done is to start one and rejuvenate two community gardens.

2. The result to be achieved is three local gardens which produce fresh vegetables for three communities.

3. The measure of quality is a survey of the organizers of the three gardens.

RECORD #: 62

4. The standard of success is the statement of the organizers of the three gardens that are using and providing fresh food for themselves and others.

5. Three community gardens will provide food resources to the people in the communities.

2. Certified Farmers' Market Project:

Goals: The development of additional Certified Farmers' Markets in supermarket deficient areas in Los Angeles;

To strengthen existing farmers' markets;

The development of farmers' markets as community institutions.

Objective: One additional farmers' market will be established.

1. The work to be done is starting one new farmers' market.

2. The result to be achieved is the availability of fresh, inexpensive, healthy food for community members.

3. The measure of quality is a survey of 100 shoppers at the farmers' market.

4. The standard of success are the statements from 100 shoppers at the farmers' market.

5. 300 people will benefit from the availability of fresh, healthy food on their tables.

3. Micro enterprise Project:

Goal: Based upon the success of other food-related micro enterprises, such as Food from the Hood, Justice Bakery, and Home Boy Industries, the goals of this project will be to spur the development of additional agricultural or food-related micro-enterprises.

Objective: One new micro enterprise will be established.

1. The work to be done is the establishment of a micro enterprise business.

2. The result to be achieved is one small business in the community.

3. The measure of quality is an evaluation of the group responsible for the micro enterprise.

4. The standard of success are the statements provided by the group that has started the business.

5. The one new micro enterprise will provide employment and income to put back into the new business.

COMMUNITY SERVICE OBJECTIVE

35-03 ✓

GRANTEE: USDA Soil Conservation Service SITE: Auburn, California

COMPONENTS OF OBJECTIVE STATEMENTS: To provide home owners with fuel reduction plans for private property in order to reduce wildfire hazards.

1. What work will be done? What service activities will your participants engage in?
Contact home owner, develop fuel reduction plans.

2. What is the hoped for result of the work/activities described above?
Reduction in natural fire loads in key watersheds to limit the damaging effects of wildfires is the desired result. These key watersheds have been selected because of their location to specific communities in the Sierra. The participants will learn how to deal with individuals and make decisions. They will also learn about natural resources and ways to plan a fire safe environment.

3. How will you measure the quality of your product or impact of your service?
The acceptance of the plans and the implementation of fuel reduction projects.

4. By what standard will you gauge success?
50% of plans implemented in the first year.

5. How many individuals will receive the benefit of the work your participants perform?
400 land owners.

Community Serv. Obj. #2: CORPORATION FOR NATIONAL SERVICE
COMMUNITY BUILDING OBJECTIVE

RECORD #: 63

GRANTEE: USDA Soil Conservation Service SITE: Auburn, California

COMPONENTS OF OBJECTIVE STATEMENTS: Identify future watersheds and critical areas for possible fuel reduction projects.

1. What work will be done? What service activities will your participants engage in? Contact agencies and organizations with responsibilities on wildfire activities concerning development of partnerships.

2. What is the hoped for result of the work/activities described above? The development of a long term program on natural fuel reduction with the area.

3. How will you measure the quality of your product or impact of your service? By the number of additional watersheds and critical areas designated for future fuel reduction efforts.

4. By what standard will you gauge success? A successful program will identify an additional ten watersheds and critical areas. We expect to develop partnerships with local fire districts, the California Department of Forestry, County Supervisors, the U.S. Forest Service, property owners associations, and local industries.

35-08 ✓

GRANTEE: USDA Soil Conservation Service SITE: Apple Valley, California

COMPONENTS OF OBJECTIVE STATEMENTS: Accelerate the development for three soil surveys within the Apple Valley Field Office work area by providing data on endangered plant and animal species, vegetation, and ecological site description data.

1. What work will be done? What service activities will your participants engage in?
Survey one million acres of land.

2. What is the hoped for result of the work/activities described above?
Acceleration of the availability of the soil survey data to base staff and other environmental planners.

3. How will you measure the quality of your product or impact of your service?
Additional acres mapped and/or reduction of time in soil survey data being made available to military planners and other customers. Presentations on the uses of the soil survey to land owners, groups, and other environmental planners who are conducting studies or projects on these military reservations.

4. By what standard will you gauge success?
Quality of work rated high by Soil Survey Project Leader. Tasks assigned are completed with a minimum of 80 percent accuracy.

5. How many individuals will receive the benefit of the work your participants perform?
Three branches of the military, 3 universities, Army Corps of engineers, various private environmental and engineering companies who are conducting special studies and/or projects on

Ethnicity (Solo sites):

Community Serv. Obj. #1: San Bernardino National Forest #1

OBJECTIVE STATEMENT

The program hosted on the San Bernardino National Forest will initially (by October 31, 1994) include 100 members, with a target membership by April 1, 1995 of 77 members. The members will perform work on public lands to conserve, restore, and sustain natural habitats within various ecosystems. To maintain, improve, and construct recreational facilities including camp sites, trails, access points, and other significant projects to benefit the users of public lands (National Forest, National Parks, Bureau of Land Management public lands, and city and county government public lands). To perform work that will improve habitat for Threatened, Endangered, and Sensitive species and improve forest health and sustain forest ecosystems through thinning, restoration, and planting. To assist in disaster relief and recovery efforts when requested in the areas of flood control, forest firefighting, and earthquake events. To provide environmental education opportunities and education to the public that reside within the forest as well as those who live adjacent to or outside the National Forest. To provide technical assistance as para-professionals assisting resource technicians and professionals in data collection and document preparation for compliance with the National Environmental Protection Act.

COMPONENTS OF OBJECTIVE STATEMENT

1) What work will be done? What service will your members engage in?

Construct hiking, mountain bike, and off-highway vehicle trails throughout the forest, meeting regional trail construction standards. Construction to occur throughout the year. Off-highway vehicle trail construction to be performed in partnership with local off-highway vehicle clubs, California State Green Sticker Commission, and Honda Motor Company of America.

68 MILES of trail will be constructed.

RECORD #: 67

Construct 6 miles of new trail within the National Childrens Forest.

Assist in constructing 32 miles of mountain bike trail in Fobes Ranch Road and Morris Ranch Road area.

Assist in constructing 30 miles of mountain bike trail in the Santa Rosa/Old Sawmill area.

Construct additional off-highway vehicle trails that tie into the existing trail network.

2) What is the hoped for result of the activities described above?

We hope to improve the quality of a recreational visitors experience while on the National Forest.

3) How will you measure the quality of these activities?

Most activities will be measured against established and approved standards. Project sponsors will have a responsibility to provide clear, understandable instructions and guidance to team supervisors and leaders. A pre-project meeting will occur during the project application process,

as well as a post-project review of work accomplished.

4) By what standard will you gauge success?

A number of areas will be focused on to measure success:

Customer satisfaction will be considered. We will constantly communicate with our customers to ensure we are meeting their goals. Are we completing there projects in a timely manner? Are they pleased with the quality and quantity of our work?

Our ability to leverage our AmeriCorps budget to work with other funding sources to increase our flexibility to "get things done...", while meeting the goals of our diverse group of project sponsors.

A major success would be a program that would serve as a model for public and community activity on public lands. The assurance that the program funding continued in the future, and that our program becomes stronger and larger as a result.

Support among the Forest Service community, a feeling among our peers that AmeriCorps really does "get things done...".

5) How many individuals will receive the benefit of the work your members perform?

In the short term, thousands of forest users, local communities, children and young adults.

Community Serv. Obj. #2: San Bernardino National Forest #2

OBJECTIVE STATEMENT

RECORD #: 67

The program hosted on the San Bernardino National Forest will initially (by October 31, 1994) include 100 members, with a target membership by April 1, 1995 of 77 members. The members will perform work on public lands to conserve, restore, and sustain natural habitats within various ecosystems. To maintain, improve, and construct recreational facilities including camp sites, trails, access points, and other significant projects to benefit the users of public lands (National Forest, National Parks, Bureau of Land Management public lands, and city and county government public lands). To perform work that will improve habitat for Threatened, Endangered, and Sensitive species and improve forest health and sustain forest ecosystems through thinning, restoration, and planting. To assist in disaster relief and recovery efforts when requested in the areas of flood control, forest firefighting, and earthquake events. To provide environmental education opportunities and education to the public that reside within the forest as well as those who live adjacent to or outside the National Forest. To provide technical assistance as para-professionals assisting resource technicians and professionals in data collection and document preparation for compliance with the National Environmental Protection Act.

COMPONENTS OF OBJECTIVE STATEMENT

- 1) What work will be done? What service will your members engage in?

280 MILES of trails will be maintained.

Maintain approximately 200 miles of hiking trails within the forest and wilderness areas on the San Bernardino, Inyo, Sierra and Sequoia National Forest's, completing 50% of the trail maintenance by July 4, and the remainder by August 15, meeting regional trail standards.

Maintain approximately 80 miles of off-highway vehicle trails within the forest, completing the work by September 1, 1995, and meeting regional off-highway vehicle trail guidelines.

- 2) What is the hoped for result of the activities described above?

We hope to improve the quality of a recreational visitors experience while on the National Forest.

Many existing facilities are over 25 years old and AmeriCorps work to rehabilitate them will provide a much needed face lift.

- 3) How will you measure the quality of these activities?

Most activities will be measured against established and approved standards. Project sponsors will have a responsibility to provide clear, understandable instructions and guidance to team supervisors and leaders. A pre-project meeting will occur during the project application process,

as well as a post-project review of work accomplished.

- 4) By what standard will you gage success? A number of areas will be focused on to measure success:

Customer satisfaction will be considered. We will constantly communicate with our customers to ensure we are meeting their goals. Are we completing there projects in a timely manner?

RECORD #: 67

Are they pleased with the quality and quantity of our work?

Our ability to leverage our AmeriCorps budget to work with other funding sources to increase our flexibility to "get things done...", while meeting the goals of our diverse group of project sponsors.

A major success would be a program that would serve as a model for public and community activity on public lands. The assurance that the program funding continued in the future, and that our program becomes stronger and larger as a result.

Support among the Forest Service community, a feeling among our peers that AmeriCorps really does "get things done...".

- 5) How many individuals will receive the benefit of the work your members perform?

In the short term, thousands of forest users, local communities, children and young adults.

Community Serv. Obj. #3: San Bernardino National Forest #3

OBJECTIVE STATEMENT

The program hosted on the San Bernardino National Forest will initially (by October 31, 1994) include 100 members, with a target membership by April 1, 1995 of 77 members. The members will perform work on public lands to conserve, restore, and sustain natural habitats within various ecosystems. To maintain, improve, and construct recreational facilities including camp sites, trails, access points, and other significant projects to benefit the users of public lands (National Forest, National Parks, Bureau of Land Management public lands, and city and county government public lands). To provide technical assistance as para-professionals assisting resource technicians and professionals in data collection and document preparation for compliance with the National Environmental Protection Act.

COMPONENTS OF OBJECTIVE STATEMENT

- 1) What work will be done? What service will your members engage in?

Rehabilitate campgrounds, picnic areas and other developed recreation sites on the San Bernardino,

Inyo, Sierra and Sequoia National Forest's, meeting guidelines set by project specialist at specific locations, and completing the projects by September 1, 1995, at the following (non-inclusive) locations;

8 SITES will be rehabilitated:

RECORD #: 67

Rehabilitate Aspen Glen and Schwitzer day use picnic areas.

Rehabilitate and convert Grout Bay Campground to a day use picnic area.

Rehabilitate Coldbrook and Horse Springs Campgrounds on the Big Bear and

San Gorgonio Ranger Districts, and Apple White Campground on the Cajon Ranger District.

Build a family equestrian campground at Heart Bar, working with local horse riding associations.

2) What is the hoped for result of the activities described above?

We hope to improve the quality of a recreational visitors experience while on the National Forest.

Many existing facilities are over 25 years old and AmeriCorps work to rehabilitate them will provide a much needed face lift.

3) How will you measure the quality of these activities?

Most activities will be measured against established and approved standards. Project sponsors will have a responsibility to provide clear, understandable instructions and guidance to team supervisors and leaders. To provide technical assistance as para-professionals assisting resource technicians and professionals in data collection and document preparation for compliance with the National Environmental Protection Act.

COMPONENTS OF OBJECTIVE STATEMENT

- 1) What work will be done? What service will your members engage in?

Maintain and enhance the ecosystems for threatened and endangered sensitive species throughout the

forest, following guidelines set forth by the project specialist, and completing projects in a time frame that would be sensitive to the needs of individual species, but no later than September

1, 1995, at the following (non-inclusive) locations;

Enhance spotted owl ecoystms on 450 ACRES.

Install bird boxes in developed sites and snag-deficient trails.

Inspect and maintain bird and bat boxes.

Improve osprey habitat in vicinity of Snow Valley Lake.

Install and maintain guzzlers in areas without water sources in wildlife habitat project areas.

Underplant in spotted owl core area as needed and 150 acres of habitat blocks with oak and

RECORD #: 67

conifer.

acres Create wildlife corridors outside of spotted owl core and habitat areas by planting 300 of native brush, oak, and conifer.

Install fences, barriers, or other types of closures necessary to protect known sensitive species.

Release suppressed seedlings to improve forest health, utilizing standards set forth by project specialist, by September 1, 1995.

Plant trees in post-wildfire and timber harvest sites, and other sites as needed and appropriate, completing the project by July 1, 1995.

4) By what standard will you gauge success?

A number of areas will be focused on to measure success:

Customer satisfaction will be considered. We will constantly communicate with our customers to ensure we are meeting their goals. Are we completing these projects in a timely manner? Are they pleased with the quality and quantity of our work?

Our ability to leverage our AmeriCorps budget to work with other funding sources to increase our flexibility to "get things done...", while meeting the goals of our diverse group of project sponsors.

A major success would be a program that would serve as a model for public and community activity on public lands. The assurance that the program funding continued in the future, and that our program becomes stronger and larger as a result.

Support among the Forest Service community, a feeling among our peers that AmeriCorps really does "get things done..."

5) How many individuals will receive the benefit of the work your members perform?

In the short term, thousands of forest users, local communities, children and young adults.

Community Serv. Obj. #5: San Bernardino National Forest #5

OBJECTIVE STATEMENT

The program hosted on the San Bernardino National Forest will initially (by October 31, 1994) include 100 members, with a target membership by April 1, 1995 of 77 members. The members will perform work on public lands to conserve, restore, and sustain natural habitats within various ecosystems. To maintain, improve, and construct recreational facilities including camp sites, trails, access points, and other significant projects to benefit the users of public lands (National Forest, National Parks, Bureau of Land Management public lands, and city and county government public lands). To perform work

RECORD #: 67

that will improve habitat for Threatened, Endangered, and Sensitive species and improve forest health and sustain forest ecosystems through thinning, restoration, and planting. To assist in disaster relief and recovery efforts when requested in the areas of flood control, forest firefighting, and earthquake events. To provide environmental education opportunities and education to the public that reside within the forest as well as those who live adjacent to or outside the National Forest. To provide technical assistance as para-professionals assisting resource technicians and professionals in data collection and document preparation for compliance with the National Environmental Protection Act.

COMPONENTS OF OBJECTIVE STATEMENT

- 1) What work will be done? What service will your members engage in?

Provide environmental and ecosystem management education programs to children in elementary schools throughout the Southern California Community, targeting 750 classrooms, or 22,500 STUDENTS, providing 80% of the programs by June 10, 1995, and meeting course standards set

forth in the following nationally identified training courses;

Hug-A-Tree,

Project Learning Tree, and

Adopt-A-Watershed.

Provide environmental education at 10 Southern California Shopping Malls, using puppet shows for children as the vehicle, and ecosystems on National Forest as the theme. Complete 80% of the weekend events by June 1, 1995, and reaching an audience in excess of 50,000 children and parents.

Work in conjunction with Knotts Berry Farm entertainment park to provide environmental education, using puppet shows and theme displays explaining wildfire prevention, wildlife habitat of the forest, and watershed protection. Provide National Forest exposure to over 250,000 park visitors.

Restore historical sites at Death Valley National Monument, building adobe bricks, and reconstructing walls. Complete project by March 1, 1995.

- 2) What is the hoped for result of the activities described above?

In the area of environmental education, we plan on changing attitudes about the National Forest in particular, and public lands in general, through education and information. We propose to change, through hands on opportunity, the value that youth place on the environment around them, while explaining the impacts that millions of Southern California residents and visitors have on public lands.

RECORD #: 67

We hope to foster good working relationships and partnerships with the private sector, non-profit clubs and organizations, and special interest groups, by working together as teams to accomplish agreed upon objectives.

3) How will you measure the quality of these activities?

Educational professionals, and topic area specialists will be invited to review all educational material. The program will constantly review all activities, focus on our mission and objectives, and re-direct our activities as necessary.

4) By what standard will you gage success?

A number of areas will be focused on to measure success:

Customer satisfaction will be considered. We will constantly communicate with our customers to ensure we are meeting their goals. Are we completing there projects in a timely manner?

Are they pleased with the quality and quantity of our work?

Our ability to leverage our AmeriCorps budget to work with other funding sources to increase our flexibility to "get things done...", while meeting the goals of our diverse group of project sponsors.

A major success would be a program that would serve as a model for public and community activity on public lands. The assurance that the program funding continued in the future, and that our program becomes stronger and larger as a result.

Support among the Forest Service community, a feeling among our peers that AmeriCorps really does "get things done...".

5) How many individuals will receive the benefit of the work your members perform?

In the short term, thousands children and young adults.
