State of Duty Station: CA

Description of Service: Sustainable agriculture

Ethnicity (Solo sites):

Community Serv. Obj. #1: CORPORATION FOR NATIONAL SERVICE  
COMMUNITY BUILDING OBJECTIVE

GRANTEE: USDA Soil Conservation Service SITE: Petaluma, California

COMPONENTS OF OBJECTIVE STATEMENTS: To reduce sediment and animal waste in streams and improve fish habitat.

1. What work will be done? What service activities will your participants engage in?

Develop nutrient budgets for dairies applying animal wastes as fertilizers. Sample water quality, identify restoration needs, develop maps, etc.

2. What is the hoped for result of the work/activities described above?

To reduce the sediment and animal waste in rivers and streams thereby improving water quality and fish habitat.

3. How will you measure the quality of your product or impact of your service?

Interview dairy operators, surveys, establish a "milestones" schedule.

4. By what standard will you gauge success?

80% of dairy operators rate service as helpful; 30% of dairy operators purchase test kits; increased number of restoration and conservation sites; develop project "evaluation checklist" to measure restoration effectiveness qualitatively.

5. How many individuals will receive the benefit of the work your participants perform?

20 dairies, 8 watersheds.

Description of Service: Rural forest work

Ethnicity (Solo sites):

Community Serv. Obj. #1: Grantee Department of Agriculture

Site RD - 4 -Corners

objective Code 15

CORPORATION FOR NATIONAL SERVICE  
COMMUNITY BUILDING OBJECTIVES

OBJECTIVE STATEMENT

To seek sustainable economic development opportunities to diversify local economies, resulting in local people obtaining jobs and higher paying employment while maintaining the quality of the rural environment.

COMPONENTS OF OBJECTIVE STATEMENT

1) What activities will you be engaged in?

Members will work directly with 5 local communities to inventory existing resources, identify 15 sustainable economic development opportunities, conduct 8 feasibility studies, and assist in writing 10 community plans and grant proposals.

Issues of environmental concern will be analyzed with any related new business venture

2) What is the hoped for result of the activities described above?

Increasing local employment and income.

15 Local individuals will be trained for employment.

RECORD #: 72

5 Community plans will be developed and funding sought

3) How will you measure the quality of these activities?

Professionals will review all environmental impact analysis.

obtaining feedback from community members throughout the project.

Community Serv. Obj. #2: Grantee Department of Agriculture

Site RD - 4-Corners

Objective Code 16

CORPORATION FOR NATIONAL SERVICE

COMMUNITY BUILDING OBJECTIVES

OBJECTIVE STATEMENT

To promote alternative wood and agricultural products and value added manufacturing technologies resulting in local people obtaining jobs and higher paying employment while maintaining the quality of the rural environment.

COMPONENTS OF OBJECTIVE STATEMENT

1) What activities will you be engaged in?

Identify 5 potential wood and agricultural products markets and three needed technologies.

Train 2 existing and new wood products manufacturers in value added technologies.

2) What is the hoped for result of the activities described above?

Increasing value of locally produced wood products by 25% among participating manufacturers.

Higher employment and income levels.

3) How will you measure the quality of these activities?

Survey participating wood products manufacturers before and after project on value their products.

Description of Service: Anti-hunger services

Ethnicity (Solo sites):

Community Serv. Obj. #1: 1. Food Stamp Program Outreach and Enrollment Assistance to Senior Citizens

## 1. What work will be done? What service activities will your participants engage in?

In a project coordinated by DC Hunger Action, members will work to help senior citizens sign up for the Food Stamp Program. Members will also hold cooking and nutrition education demonstrations at senior citizens' housing complexes, as well as teach seniors how to improve the nutritional value and cost-effectiveness of their grocery shopping on a limited budget.

## 2. What is the hoped-for result of the work/activities described above?

Low-income senior citizens, a particularly vulnerable population in terms of adequate nutrition, will be able to improve their basic diets through the expanded food dollars available to them as Food Stamp Program recipients, thereby reducing the incidence of nutritionally-related medical conditions among the elderly population in the District of Columbia.

## 3. How will you measure the quality of your product or impact of your service?

The number of elderly individuals/households who apply for and are enrolled in the Food Stamp Program will be carefully tracked and attributed specifically to DC Hunger Action's Client Enrollment Assistance Project. Improvements in senior citizens' food shopping choices will be documented through follow-up interviews with those who attend the presentations (shopping instruction, cooking demonstrations) offered.

## 4. By what standard will you gauge success?

[Insert responses from Colleen Fee when received]

RECORD #: 75

5. How many individuals will receive the benefit of the work your participants perform?

[Insert responses from Colleen Fee when received]

Community Serv. Obj. #2: II. Nutrition Work in Local Schools

1. What work will be done? What service activities will your participants engage in?

In a project coordinated by the DC Public Schools' Food Services office, members will design and perform skits on nutrition education for children in grades 1-3 and will provide more advanced nutrition workshops for children in grades 4-6. Members will also work on school-based gardening projects, tentatively planned to start in January, that will be coordinated by the University of the District of Columbia.

2. What is the hoped-for result of the work/activities described above?

Young children will be made more aware of the importance of good nutrition to their overall health and performance in school, sports, and everyday events. This expanded awareness will be enable them to develop the habit of making wise food choices early in life. This objective also directly supports the Children's Nutrition Campaign that is currently being launched by USDA's Food and Consumer Services (FCS) agency (formerly the Food and Nutrition Service (FNS)).

3. How will you measure the quality of your product or impact of your service?

The students will be tested on their nutrition knowledge before and after they participate in the presentations.

4. By what standard will you gauge success?

The number of children who receive the nutrition education will be documented. FCS will work with the School Food Services office to observe and document (as much as possible) the eating habits of the elementary school children who participate in the School Breakfast and Lunch Programs, to see if, for example, they are eating more vegetables and fruits as a regular part of their meals.

5. How many individuals will receive the benefit of the work your participants perform?

This objective will be deemed successful if the students' nutrition knowledge increases by \_\_\_ percent in the post-instruction test. We also hope to create \_\_\_ gardens, on \_\_\_ acres, that should be able to provide fresh fruits and vegetables to \_\_\_ hungry people.

Community Serv. Obj. #3: III. Work with Homeless Citizens

1. What work will be done? What service activities will your participants engage in?

Members will provide outreach at homeless shelters, soup kitchens, and on the street to homeless people in order to help them enroll in the Food Stamp and other food assistance programs, visit job placement services, open bank accounts, utilize community gardens and farmers' markets, and obtain substance abuse counseling.

RECORD #: 75

2. What is the hoped-for result of the work/activities described above?

Homeless persons in the District of Columbia will be able to access basic services essential to their continued existence. Many homeless persons are not aware that these services and benefits are indeed available to them, or do not know how to go about applying for and obtaining them; the anti-hunger team, in cooperation with the DC Coalition for the Homeless, will provide this information to homeless persons in a variety of settings: shelters, family housing centers, streets, etc.

3. How will you measure the quality of your product or impact of your service?

The quality of this effort will be measured by the number of homeless persons who are able to improve their situations by accessing the various types of assistance for which they may be eligible, and who are ultimately able to open their own bank accounts, move into apartments, and especially to improve their health by eating better.

4. By what standard will you gauge success?

The number of homeless persons who are referred to food, health care, or other public assistance agencies will be tracked and documented, both in the initial outreach effort and through the agencies that provide such services.

5. How many individuals will receive the benefit of the work your participants perform?

This objective will be deemed successful if \_\_\_ homeless persons are referred to and enrolled in assistance programs that will enable them to improve the quality of their lives.

Community Serv. Obj. #4: IV. Direct Service in Soup Kitchens and Food Pantries

1. What work will be done? What service activities will your participants engage in?

Members will work directly in soup kitchens, food pantries, homeless shelters, and regional food banks to perform a wide variety of critical tasks.

2. What is the hoped-for result of the work/activities described above?

Individuals and families in the District of Columbia who need emergency food assistance will be able to receive it more effectively through the efforts of the AmeriCorps anti-hunger team.

3. How will you measure the quality of your product or impact of your service?

The quality of this effort will be measured by the number of persons who are able to receive emergency food assistance.

4. By what standard will you gauge success?

The success of this objective will be determined by an increased number of persons or households receiving food through these direct outlets, as well as an increase in the outlets' capacity to serve needy people that arises from the assistance of the AmeriCorps members.

RECORD #: 75

5. How many individuals will receive the benefit of the work your participants perform?

This objective will be deemed successful if \_\_\_ needy persons or households are fed because of these efforts.

Community Serv. Obj. #5: V. Summer Food Service Program Expansion

1. What work will be done? What service activities will your participants engage in?

Under the guidance of the DC Public Schools' Food Service office, members will create or expand a select number of SFSP sites in undeserved or underutilized neighborhoods, by combining the feeding program with recreational programs, entertainment, and/or nutrition education workshops.

2. What is the hoped-for result of the work/activities described above?

Those children who participate in the National School Lunch Program during the school year will be able to obtain at least one nutritious meal per day during the summer month as well. Access to the SFSP will be improved by expanding the number of sites where meals are offered, and greater incentives will be provided for children to take advantage of the SFSP by offering additional activities and opportunities at the SFSP sites.

3. How will you measure the quality of your product or impact of your service?

The quality of this effort will be measured by the number of SFSP sites that begin to offer other activities and opportunities to the children who come to them, and by the number of new SFSP sites that are opened in the summer of 1995.

4. By what standard will you gauge success?

The success of this objective will be determined by an increased number of children participating in the SFSP in 1995.

5. How many individuals will receive the benefit of the work your participants perform?

This objective will be deemed successful if \_\_\_ SFSP sites are added, \_\_\_ SFSP sites are expanded, and \_\_\_ more children participate in the SFSP in the summer of 1995.

Objective Code 31

CORPORATION FOR NATIONAL SERVICE  
COMMUNITY BUILDING OBJECTIVES

OBJECTIVE STATEMENT

Facilitate creation of tourism opportunities through festivals and other events resulting in 50\* of the attendees coming from outside the county.

COMPONENTS OF OBJECTIVE STATEMENT

1) What activities will you be engaged in?

Market research and development to identify potential tourists.

Develop partnerships with regional tourism groups.

Assist in planning tourism events and local festivals.

Create interpretive signs and programs.

2) What is the hoped for result of the activities described above?

RECORD #: 84

Increase tourism while maintaining the rural character of the area.

3 meaningful partnerships developed.

3) How will you measure the quality of these activities?

Implementation of 2 events which draw at least 50\* non-local people (Currently < 10\*) to attend as measured by survey of tourists.

Participation in planning of these events by 2 tourism groups.

4) By what standard will you gauge success?

At least one of the events will become annual.

COMMUNITY SERVICE OBJECTIVE

GRANTEE: USDA Soil Conservation Service SITE: Iowa

COMPONENTS OF OBJECTIVE STATEMENTS: To restore and protect resources damaged  
in Southern

Iowa by the record floods of 1993.

1. What work will be done? What service activities will your participants engage in?  
Restoration of flood control facilities and public infrastructure.
2. What is the hoped for result of the work/activities described above?  
Protection of farmland, small rural communities, and public works of improvement.
3. How will you measure the quality of your product or impact of your service?  
Structural measures according to SCS and State of Iowa standards and specifications.  
All work done to the professional/SCS standards for that discipline/employee.
4. By what standard will you gauge success?  
Number of communities assisted and number and kind of public facilities restored and protected.
5. How many individuals will receive the benefit of the work your participants perform?  
49 counties, 100 municipalities, and 50 agricultural resource districts.

Community Serv. Obj. #2: CORPORATION FOR NATIONAL SERVICE  
COMMUNITY SERVICE OBJECTIVE

GRANTEE: USDA Soil Conservation Service SITE: Iowa

RECORD #: 86

COMPONENTS OF OBJECTIVE STATEMENTS: To address high priority environmental issues including wetland restoration, special water quality projects, and wildlife habitat restoration.

1. What work will be done? What service activities will your participants engage in? Identify, inform, educate, and motivate landusers with potential wetland restoration sites to voluntarily restore wetlands through the many available federal, state, and local programs.

Restore wetlands, by helping implement Emergency Wetlands Reserve program (EWRP) and Wetlands Reserve Program (WRP).

Develop and implement an inventory of existing wetland easements and other potential sites utilizing GIS technology.

Assist the Coordinator of the Iowa River Corridor Project implement the objectives of the project.

Develop and implement an inventory of special water quality and wetland restoration projects.

Develop and implement a public information program on wetlands, alternative floodplain management and water quality.

Assist in the site location, survey, design and construction of wetland restoration projects.

2. What is the hoped for result of the work/activities described above?

Conduct a wetland inventory in 30 counties for potential sites for wetland restoration.

Persuade 200 landowners to voluntarily restore wetlands and prairie areas.

The Iowa River corridor plan is completed.

Public is educated on wetland benefits.

Wetland restoration plans are completed in a timely manner.

A public information program is developed in the identified counties.

3. How will you measure the quality of your product or impact of your service?

Wetland restoration activity meets SCS and FWS standards and specifications.

Effective presentation of interpretive and illustrated news items, feature items, slide sets, videos, field days, outdoor classrooms, radio programs, TV coverage, newsletters, and brochures.

Number and quality of completed inventories and completed plans. Number of landowners and potential acres of wetland to be restored. Comments from cooperating agencies and other groups and landowners about the quality of members' work.

4. By what standard will you gauge success?

5000 landowners contacted to restore sites. 200 wetlands restored. 25 prairies restored.

Number of public information events, members work independently.

5. How many individuals will receive the benefit of the work your participants perform?

600 landowners in 3 cluster sites. 300,000 people in the urban and rural sectors around the project sites. Iowa City water supply recipients - 60,000 people.

CORPORATION FOR NATIONAL SERVICE

COMMUNITY SERVICE OBJECTIVE

GRANTEE: USDA Soil Conservation Service SITE: Iowa

RECORD #: 86

COMPONENTS OF OBJECTIVE STATEMENTS: Assist rural communities in southern Iowa address environmental economic, and social problems and issues aggravated by the records floods of 1993.

1. What work will be done? What service activities will your participants engage in? Design of geographic information systems (GIS) structures, creation of GIS data bases, and the development and application of GIS analytical techniques and models. Production of GIS related information and materials and provide instruction in their application and usefulness to local residents and representatives of private organizations and public agencies. Development and application of GIS technology as a decision making tool for local residents, elected officials, the leadership of private organizations, and representatives of public agencies. Provide assistance and education to local residents in planning community betterment projects and securing the resources necessary for their implementation. Plan and design for rural communities and landscapes including water quality, watershed protection and awareness, excessive soil loss, habitat restoration and enhancement and outdoor education. Development of advanced communication techniques for professionals working in rural communities.

2. What is the hoped for result of the work/activities described above? Improved decision making capabilities of local leadership and public service providers regarding important environmental, economic, and social problems and issues. Development of necessary GIS data layers, analytical techniques and models as well as instruction in their use. A significant improvement in local resident's ability to successfully plan, secure necessary resources, and implement community betterment projects. Enhanced sense of pride and ownership of products of residents of the communities assisted.

3. How will you measure the quality of your product or impact of your service? Number of assisted organizations and agencies. Number of residents participating in the projects. Number of communication techniques and illustrations used. Number of requests for information and assistance received and satisfied.

4. By what standard will you gauge success? 24 GIS requests successfully responded to in a timely manner. Responses meet quality standards as per established guidelines. Successful planning and completion of 6 community betterment projects. Development of tools that are reproducible by other technical specialists.

5. How many individuals will receive the benefit of the work your participants perform? 500,000 residents in southwestern Iowa (30 counties, 16 communities, and 3 Resource Conservation and Development Councils).

Ethnicity (Solo sites):

Community Serv. Obj. #1: CORPORATION FOR NATIONAL SERVICE  
COMMUNITY SERVICE OBJECTIVE

GRANTEE: USDA Soil Conservation Service SITE: Iowa

COMPONENTS OF OBJECTIVE STATEMENTS: To restore and protect resources damaged  
in Southern

Iowa by the record floods of 1993.

1. What work will be done? What service activities will your participants engage in?  
Restoration of flood control facilities and public infrastructure.
2. What is the hoped for result of the work/activities described above?  
Protection of farmland, small rural communities, and public works of improvement.
3. How will you measure the quality of your product or impact of your service?  
Structural measures according to SCS and State of Iowa standards and specifications.  
All work done to the professional/SCS standards for that discipline/employee.
4. By what standard will you gauge success?  
Number of communities assisted and number and kind of public facilities restored and protected.
5. How many individuals will receive the benefit of the work your participants perform?  
49 counties, 100 municipalities, and 50 agricultural resource districts.

Community Serv. Obj. #2: CORPORATION FOR NATIONAL SERVICE  
COMMUNITY SERVICE OBJECTIVE

GRANTEE: USDA Soil Conservation Service SITE: Iowa

RECORD #: 90

COMPONENTS OF OBJECTIVE STATEMENTS: To address high priority environmental issues including wetland restoration, special water quality projects, and wildlife habitat restoration.

1. What work will be done? What service activities will your participants engage in? Identify, inform, educate, and motivate landusers with potential wetland restoration sites to voluntarily restore wetlands through the many available federal, state, and local programs.

Restore wetlands, by helping implement Emergency Wetlands Reserve program (EWRP) and Wetlands Reserve Program (WRP).

Develop and implement an inventory of existing wetland easements and other potential sites utilizing GIS technology.

Assist the Coordinator of the Iowa River Corridor Project implement the objectives of the project.

Develop and implement an inventory of special water quality and wetland restoration projects.

Develop and implement a public information program on wetlands, alternative floodplain management and water quality.

Assist in the site location, survey, design and construction of wetland restoration projects.

2. What is the hoped for result of the work/activities described above?

Conduct a wetland inventory in 30 counties for potential sites for wetland restoration.

Persuade 200 landowners to voluntarily restore wetlands and prairie areas.

The Iowa River corridor plan is completed.

Public is educated on wetland benefits.

Wetland restoration plans are completed in a timely manner.

A public information program is developed in the identified counties.

3. How will you measure the quality of your product or impact of your service?

Wetland restoration activity meets SCS and FWS standards and specifications.

Effective presentation of interpretive and illustrated news items, feature items, slide sets, videos, field days, outdoor classrooms, radio programs, TV coverage, newsletters, and brochures.

Number and quality of completed inventories and completed plans. Number of landowners and potential acres of wetland to be restored. Comments from cooperating agencies and other groups and landowners about the quality of members' work.

4. By what standard will you gauge success?

5000 landowners contacted to restore sites. 200 wetlands restored. 25 prairies restored.

Number of public information events, members work independently.

5. How many individuals will receive the benefit of the work your participants perform?

600 landowners in 3 cluster sites. 300,000 people in the urban and rural sectors around the project sites. Iowa City water supply recipients - 60,000 people.

CORPORATION FOR NATIONAL SERVICE

COMMUNITY SERVICE OBJECTIVE

GRANTEE: USDA Soil Conservation Service SITE: Iowa

RECORD #: 90

COMPONENTS OF OBJECTIVE STATEMENTS: Assist rural communities in southern Iowa address environmental economic, and social problems and issues aggravated by the records floods of 1993.

1. What work will be done? What service activities will your participants engage in? Design of geographic information systems (GIS) structures, creation of GIS data bases, and the development and application of GIS analytical techniques and models. Production of GIS related information and materials and provide instruction in their application and usefulness to local residents and representatives of private organizations and public agencies. Development and application of GIS technology as a decision making tool for local residents, elected officials, the leadership of private organizations, and representatives of public agencies. Provide assistance and education to local residents in planning community betterment projects and securing the resources necessary for their implementation. Plan and design for rural communities and landscapes including water quality, watershed protection and awareness, excessive soil loss, habitat restoration and enhancement and outdoor education. Development of advanced communication techniques for professionals working in rural communities.

2. What is the hoped for result of the work/activities described above? Improved decision making capabilities of local leadership and public service providers regarding important environmental, economic, and social problems and issues. Development of necessary GIS data layers, analytical techniques and models as well as instruction in their use. A significant improvement in local resident's ability to successfully plan, secure necessary resources, and implement community betterment projects. Enhanced sense of pride and ownership of products of residents of the communities assisted.

3. How will you measure the quality of your product or impact of your service? Number of assisted organizations and agencies. Number of residents participating in the projects. Number of communication techniques and illustrations used. Number of requests for information and assistance received and satisfied.

4. By what standard will you gauge success? 24 GIS requests successfully responded to in a timely manner. Responses meet quality standards as per established guidelines. Successful planning and completion of 6 community betterment projects. Development of tools that are reproducible by other technical specialists.

5. How many individuals will receive the benefit of the work your participants perform? 500,000 residents in southwestern Iowa (30 counties, 16 communities, and 3 Resource Conservation and Development Councils).

COMPONENTS OF OBJECTIVE STATEMENTS: Assist rural communities in northeastern Iowa improve

RECORD #: 90

their economic and social well being by improving tourism and promotional activities through the Silos and Smokestacks leadership.

1. What work will be done? What service activities will your participants engage in?

Plan four Heritage Areas attractions to encourage the protection of environmental, scenic and cultural resources of the area. Develop plan concepts. Identify harmful prejudices within the targeted area. Develop strategies to increase understanding between rural and urban lifestyles. Develop strategies to eliminate discrimination of local minorities. Plan joint rural and urban activities. Plan multicultural activities.

2. What is the hoped for result of the work/activities described above?

Supplemental funding packages will be developed and presented to farm, agribusiness, and corporate interests. 100,000 new visitors to the area each year. Historic and multicultural activities held throughout the region.

3. How will you measure the quality of your product or impact of your service?

Goals and concepts are developed and local communities accept and decide to implement them. Four marketing concept plans developed.

4. By what standard will you gauge success?

Communities begin implementing the plans. Funding sources contribute to specific projects.

5. How many individuals will receive the benefit of the work your participants perform?

100,000 new visitors. All citizens of the 30 county area.

COMMUNITY BUILDING OBJECTIVE

GRANTEE: USDA Soil Conservation Service

SITE: Chicago, Illinois

14-01 ✓

COMPONENTS OF OBJECTIVE STATEMENTS: To provide environmental and urban agriculture education, provide water quality monitoring, urban greening service and to build upon the USDA Summer of Safety Program by recruiting 500 volunteers to help create sites that combine urban agriculture and public safety.

1. What activities will you be engaged in?  
Recruiting additional volunteers. Developing partnerships with other agencies. Creating urban agriculture and public safety sites.
2. What is the hoped for result of the activities described above?  
500 additional volunteers recruited. Meaningful partnerships developed.
3. How will you measure the quality of these activities?  
75% of teachers and partners surveyed indicate that the education provided was worthwhile.
4. By what standard will you gauge success?  
500 volunteers recruited. 1,000 students given urban agriculture education.

✓

COMMUNITY SERVICE OBJECTIVE

14-02

RECORD #: 95

GRANTEE: USDA Soil Conservation Service

SITE: Chicago, Illinois

COMPONENTS OF OBJECTIVE STATEMENTS: To provide environmental and urban agriculture education

1,000 students in Chicago public schools.

1. What work will be done?

Education of urban students about agriculture.

2. What is the hoped for result of the work/activities described above?  
Improved awareness of urban agriculture.

3. How will you measure the quality of your product or impact of your service?  
Evaluation of the education and knowledge gained by the students.

4. By what standard will you gauge success?  
Increased knowledge about urban agriculture by 75%.

5. How many individuals will receive the benefit of the work your participants perform?  
1,000 students and 100 teachers.

Community Serv. Obj. #3: CORPORATION FOR NATIONAL SERVICE  
COMMUNITY SERVICE OBJECTIVE

GRANTEE: USDA Soil Conservation Service

SITE: Chicago, Illinois

COMPONENTS OF OBJECTIVE STATEMENTS: To provide 11,000 hours of tree planting, water quality monitoring, and urban greening service under the direction of the Urban Resources Partnership.

1. What work will be done?  
Tree planting, urban greening, and water quality monitoring.

2. What is the hoped for result of the work/activities described above?  
11,000 hours of tree planting and urban greening.

3. How will you measure the quality of your product or impact of your service?  
Judgment of partners: USDA, US DOI, and US EPA.

4. By what standard will you gauge success?  
Number of trees planted and amount of lots with urban green completed.

5. How many individuals will receive the benefit of the work your participants perform?  
1,000 students.

CORPORATION FOR NATIONAL SERVICE

COMMUNITY SERVICE OBJECTIVE

GRANTEE: USDA Soil Conservation Service SITE: Kansas

COMPONENTS OF OBJECTIVE STATEMENTS: Cleanup and maintenance support for state park and wildlife areas

1. What work will be done? What service activities will your participants engage in?  
Provide cleanup and maintenance support for state park and wildlife areas where 1993 floodwater caused damage to grounds, facilities and wildlife habitat at Webster Reservoir, Glen Elder Lake, Kanopolis Lake, Milford Lake, Perry Lake and other flood damaged recreational facilities.
2. What is the hoped for result of the work/activities described above?  
Four thousand acres of parks' grounds, facilities, and wildlife areas will be restored and enhanced.
3. How will you measure the quality of your product or impact of your service?  
Measure the recreational use of the parks and wildlife areas compared to the pre-flood condition.  
Measure wildlife population and diversity compared to pre-flood conditions.
4. By what standard will you gauge success?  
Recreational use is at least 90 percent of the pre-flood condition. Wildlife population and diversity are at least 90 percent of pre-flood conditions.
5. How many individuals will receive the benefit of the work your participants perform?  
Recreators with over four million user days of recreational use at parks and wildlife areas.

RECORD #: 111

## Community Serv. Obj. #2:

CORPORATION FOR NATIONAL SERVICE  
COMMUNITY BUILDING OBJECTIVE

GRANTEE: USDA Soil Conservation Service      SITE: Kansas

COMPONENTS OF OBJECTIVE STATEMENTS: Recruit volunteers and partnerships to join in the restoration efforts in the lakes and parks areas damaged by the 1993 flood.

1. What work will be done? What service activities will your participants engage in?  
Develop partnerships with park agencies and associations. Developing partnerships with volunteer groups and communities to join the effort in restoring the park and wildlife areas.
2. What is the hoped for result of the work/activities described above?  
Increased volunteerism will assist wildlife and parks personnel in the restoration and maintenance of the park and public land system. Increased volunteerism will allow park and public land personnel to concentrate on jobs requiring technical skills.
3. How will you measure the quality of your product or impact of your service?  
Observation of the citizen volunteer group's appreciation and respect for public use and wildlife facilities and areas. Observation of the interaction of citizen volunteers with AmeriCorps members and parks staff in accomplishing restoration tasks. Survey volunteers to determine perceived success of the AmeriCorps team.
4. By what standard will you gauge success?  
The participation level of citizen volunteer group will increase 20 percent. Eighty percent of volunteers surveyed believe the AmeriCorps team effort was successful.
5. How many individuals will receive the benefit of the work your participants perform?  
Communities in the immediate geographic vicinity of the park. The recreation community with over 4 million user days of recreational use at parks and wildlife areas.

Community Serv. Obj. #1: After the curriculum is set up, hire a program director. Hire kids from all over the county and provide them with tasks to perform, get them involved. Establish daily schedule/agenda from July-August or another 8 weeks in summer. Go out in communities in Magoffin County and physically locate interested children as well as adults, locate resources and organizations. Ask the youth of Magoffin County what type of activities they are interested in and what they would like to become involved in.

Result would be the total teenage population in Magoffin County actively involved in recreational activities.

Measure the number of youth actively involved in recreational activities as staff and/or participants.

By number of youth actively involved.

Total population of Magoffin County, not just the youth. The total population because adults will

2/28/95

CORPORATION FOR NATIONAL SERVICE

COMMUNITY BUILDING OBJECTIVES

OBJECTIVE STATEMENT

To seek sustainable economic development opportunities to diversify local economies, resulting in local people obtaining job training and higher paying employment while maintaining the quality of the rural environment.

COMPONENTS OF OBJECTIVE STATEMENT

1) What activities will you be engaged in?

members will work directly with local business leaders to inventory existing resources, identify sustainable economic development opportunities, conduct feasibility studies, and assist in writing (3.5) business plans.

Issues of environmental concern will be analyzed with any related new business venture.

2) What is the hoped for result of the activities described above?

increasing local employment and income.

2/28/95

USDA AMERICORPS PROJECT INFORMATION AND OBJECTIVES

Page: 256

RECORD #: 128

Local individuals will be trained for employment.

Business plans will be developed and funding sought.

3) How will you measure the quality of these activities?

Professionals will review all environmental impact analysis.

Local business leaders will be interviewed following completion of project.

Loans and other funding will be obtained for 25\* of the business plans developed.

4) By what standard will you gauge success?

Establishment of a sustainable, natural resource based business employing 5 locally trained people.

Community Serv. Obj. #1: The Fiscal year 1994-95 will be devoted to organizing and planning. A representative group from the eight county area will be organized and supported. All information used to develop a five year action plan for family preservation.

A five year plan to provide preventative and support services for families at risk and also to encourage all families to use appropriate community resources to maintain healthy families.

Organizational, planning and assessment efforts will be managed and monitored by the Department for social services in Frankfort. Their acceptance of Cumberland Valley Area Development district activities will assume a quality product. Eventual funding of the five year plan will also determine success.

Numbers of families served by a coordinated system of services. Approval of the five year plan by June 30, 1995.

Community Serv. Obj. #1: Locate and acquire an industrial real estate site and update the counties industrial site files, assist in the preparation of applications and reports for submission to funding sources, prepare a community assets inventory for all 12 area counties and their seats, prepare status reports on the Jackson, Clinton/Wayne County EZ/EC and HUD Tax Credit Program, and compile demographic statistics and information for use in program proposals for funding under the auspices of the Community Development Finance Institutions Act, Office of Community Services, the Crime Bill and other funding initiatives.

The hoped for result is the acquisition of an attractive industrial site to create jobs, the successful submission of applications to all planned and pertinent funding sources, the completion of a community assets inventory that will provide essential information as to how best invest funds in the community, and informed communities regarding the EZ/EC.

Success will be measured by the number of new jobs that will be created and the usefulness of a community assets inventory in investing in communities.

The standard of success would be that "x" number of jobs have been created, all intended funding

RECORD #: 131

applications were submitted and a community assets guide will exist that can be updated and used for future reference to investing in the community.

The unemployed that are hired and the communities in Jackson, Wayne and Clinton counties.

COMMUNITY BUILDING OBJECTIVES

## OBJECTIVE STATEMENT

To identify demonstration sites and demonstrate modern timber bridge technology.

## COMPONENTS OF OBJECTIVE STATEMENT

1) What activities will you be engaged in?

Survey and assess existing bridges in 3 counties.

Meet with local officials to discuss program.

Assist sponsors to plan, design, survey, test, monitor and secure funding to construct 3 demonstration timber bridges.

2) What is the hoped for result of the activities described above?

Reliable and safe transportation in rural communities.

RECORD #: 140

Modern timber bridge information and technology transferred.

3) How will you measure the quality of these activities?

All work plans will be approved by the State Department of Transportation.

USDA Forest Service Engineers will review and approve all modern timber bridge designs.

4) By what standard will you gauge success?

County officials and engineers become familiar with the modern timber bridge.

Timber Bridge Demonstration proposals are developed and funded.

Community Serv. Obj. #1: My mission is to increase knowledge among socially and economically disadvantaged individuals in the surrounding communities of the availability for rural housing ownership, housing repair, and water hookup services, and assist applicants through the loan process.

The number of rural housing loans over the previous five year average will increase 25% and the actual number of individuals receiving loans by 10%.

Members of the rural community will be contacted in order to increase their knowledge of the availability of loans and grants for rural housing ownership, housing repair, and water hookup services.

Rural residents in the target area will increase the number of rural housing program loans by 25% over previous five year average, or use 100% of FmHA's funds and to increase actual numbers of applicants

CORPORATION FOR NATIONAL SERVICE  
COMMUNITY BUILDING OBJECTIVES

## OBJECTIVE STATEMENT

Facilitate creation of tourism opportunities through festivals and other events resulting in 50\* of the attendees coming from outside the county.

## COMPONENTS OF OBJECTIVE STATEMENT

1) What activities will you be engaged in?

Market research and development to identify potential tourists.

Develop partnerships with regional tourism groups.

Assist in planning tourism events and local festivals.

Create interpretive signs and programs.

2) What is the hoped for result of the activities described above?

2/28/95

USDA AMERICORPS PROJECT INFORMATION AND OBJECTIVES

Page: 281

RECORD #: 145

Increase tourism while maintaining the rural character of the area.

3 meaningful partnerships developed.

3) How will you measure the quality of these activities?

Implementation of 2 events which draw at least 50\* non-local people (Currently < 10\*) to attend as measured by survey of tourists.

Participation in planning of these events by 2 tourism groups.

4) By what standard will you gauge success?

At least one of the events will become annual.
