Community Serv. Obj. #1: Establish programs for teen pregnancy prevention to accomplish the following: Educate teens about pregnancy, work with community organizations to develop teen pregnancy programs, work with high schools and middle schools, hold teen forums and rallies, and implement a teen pregnancy prevention program.

Decrease by 5-10% per year over three years the number of youth ages 9-19 who become pregnant; Increase the number of youth ages 9-19 who participate in regular health education including pregnancy prevention, human sexuality, sexually transmitted diseases and physical activity by 25% each year for three years.

Compare statistics - the number of teens pregnant in 1993 with the number pregnant in 1995.

Pre-test test the students knowledge of the consequences of premarital sex; Post-test- test the students knowledge of the consequences of premarital sex. By these test we hoping to guage whether the students realize they could get pregnant.

The 1990 Census indicated that there were 5476 teenages in Adams county. Mississippi statistics ("Vital Statistics Mississippi 1993; Mississippi State Department of Health") show that the total live births to teenage mothers in Adams county are astounding. Out of 568 recorded births in Adams county

2/28/95

Community Serv. Obj. #1: Community leaders will be visited informing them about the work of the B. F. Smith Chair. During these onsite visits, information about infrastructure and organizational resources will be collected.

That community leaders will become aware of the availability of the resources of the B. F. Smith Chair.

Feedback will be elicited from communities and leaders contacted. During these onsite visits, pre and post tests regarding prior knowledge of the B. F. Smith Chair and usefulness of the information given during these visits will be administered.

Four to six communities will be visited. All of the people and organizations contacted will be informed of the B.F. Smith Chair, its willingness to be of assistance, and its resources for providing services.

Between 20-40 community leaders will be contacted in the 4-6 communities visited.

Community Serv. Obj. #2:

That participants in these workshops and courses will have identified strengths and weaknesses in their own leadership style, become more knowledgeable about leadership and community development theory, and become able to identify strengths and weaknesses of the organizations and communities they represent.

RECORD #: 220

Feedback from participants on these programs will be used as an ongoing evaluation technique. Pre and post-tests will administered in the recruitment phase and as a closing to workshops and courses themselves.

These workshops and courses will benefit 100% of the participants.

50-100 people will benefit during the first year.

Community Serv. Obj. #3:

That participants in these workshops and courses will have identified strengths and weaknesses in their own leadership style, become more knowledgeable about leadership and community development theory, and become able to identify strengths and weaknesses of the organizations and communities they represent.

Description of Service: Rural forest work

Ethnicity (Solo sites):

Community Serv. Obj. #1: Grantee Department of Agriculture Site Rural Development, MS, AR, & VA

Objective Code 23

CORPORATION FOR NATIONAL SERVICE

COMMUNITY SERVICE OBJECTIVES

OBJECTIVE STATEMENT

To provide assistance to rural communities interested in implementing community forestry programs resulting in improved living conditions and opportunities for neighborhood service.

COMPONENTS OF OBJECTIVE STATEMENT

1) What work will be done? What service will your members engage in?

Develop a plan and identify suitable planting sites for urban forestry projects.

Secure funding for purchase of materials.

Recruit and organize volunteers to plant trees.

2) What is the hoped for result of the activities described above?

Establishment of native tree species in residential and business areas in small communities.

Involvement of local civic and volunteer groups.

RECORD #: 222

3) How will you measure the quality of these activities?

Survival rate of 60% of planted trees.

Participation by 3 local groups.

4) By what standard will you gauge success?

Improvement of overall aesthetic quality of area.

Increase in real estate values.

5) How many individuals will receive the benefit of the work you members perform? All residents of the 8-10 communities involved.

Community Serv. Obj. #2: Grantee Department of Agriculture Site Rural Development, KY, MS, SC & AR
Objective Code 25

CORPORATION FOR NATIONAL SERVICE
COMMUNITY BUILDING OBJECTIVES

OBJECTIVE STATEMENT

To seek sustainable economic development opportunities to diversify local economies, resulting in local people obtaining job training and higher paying employment while maintaining the quality of the rural environment.

COMPONENTS OF OBJECTIVE STATEMENT

1) What activities will you be engaged in?

members will work directly with local business leaders to inventory existing resources, identify sustainable economic development opportunities, conduct feasibility studies, and assist in writing (3.5) business plans.

Issues of environmental concern will be analyzed with any related new business venture.

2) What is the hoped for result of the activities described above?

increasing local employment and income.

Local individuals will be trained for employment.

Business plans will be developed and funding sought.

RECORD #: 222

3) How will you measure the quality of these activities?

Professionals will review all environmental impact analysis.

Local business leaders will be interviewed following completion of project.

Loans and other funding will be obtained for 25* of the business plans developed.

4) By what standard will you gauge success?

Establishment of a sustainable, natural resource based business employing 5 locally trained people.

Community Serv. Obj. #3: Grantee Department of Agriculture Site Rural Development, SC & MS
Objective Code 27

CORPORATION FOR NATIONAL SERVICE
COMMUNITY BUILDING OBJECTIVES

OBJECTIVE STATEMENT

To conduct 3 leadership development programs, as measured by 50% of the workshop participants beginning or increasing community activities.

COMPONENTS OF OBJECTIVE STATEMENT

1) What activities will you be engaged in?

Recruit 15-20 local youth, community leaders, and potential entrepreneurs to participate in leadership development workshops. Participants will be assigned a community project to plan, finance, implement and complete.

2) What is the hoped for result of the activities described above?

Develop leadership skills as they relate to the individual, family, the community, and society.

3) How will you measure the quality of these activities?

Follow-up on workshop participants throughout the year to review and evaluate success of their community projects.

2/28/95

USDA AMERICORPS PROJECT INFORMATION AND OBJECTIVES

Page: 468

RECORD #: 222

4) By what standard will you gauge success?

workshop participants begin or increase community activities, and/or start new businesses employing local people.

Community Serv. Obj. #1: AmeriCorps member will visit government, church, community, and business leaders to solicit support for the two committees. Committee members will be asked to join based on their past community service experience, recommendations by neighbors and friends and availability of time.

The result will be the proper formation of advisory committees specifically outlined in the community's EC proposal.

The quality of service will be measured according to the degree of diversity I am able to attain. In the past the Edwards community has failed to have a diversified representation on its advisory boards. I hope to be able to have every segment of the community's population presented in a representative fashion.

Success will be gauged in two ways. First, I will measure the overall diversity of the groups. Are both committees composed of the same people? Do the same people hold office on each council? If anomalous duplication of members can be held to less than 10% of the participants the effort will be successful. Secondly, I will seek to establish cultural diversity on each committee. If a member representing each ethnic background in the community is secured the effort will be successful. At the same time a representative membership may be achieved without each group being represented. (If either council's size falls below 15 it may be feasible to have only the larger demographic groups

RECORD #: 227

represented.

The entire population of Edwards will benefit from the establishment of an educated and well organized committee to oversee the fiscal and community affairs of the community. If EC designation is not granted to the community these committees can still function to empower the community's residents to enter the 21st century economically.

Community Serv. Obj. #2:

The teens on the panels and in the target audience will become better educated about the real life benefits of having at least a high school education. This new found knowledge will hopefully deter them from dropping out of school.

In the roundtable discussions the youths will be given a pre and post test to judge their attitudes towards education and their chances for success in our world today. Any degree of positive reaction not previously measured by a youth will be considered a success. The actual measure however is in getting youths serious enough about the program to "volunteer" to help facilitate an at large forum of their peers. Judging by the climate of the community having 35% of the youths asked to participate actually take part in the forum will be a success.

The participant estimates approximately 150 teens will be involved in the ongoing outreach programs. Though it is possible that these youths will continue to spread their message, there is no way to gauge how many persons will be indirectly affected by the forums and roundtable debates.

Community Serv. Obj. #3:

The teens on the panels and in the target audience will become better educated about the real life benefits of having at least a high school education. This new found knowledge will hopefully deter them from dropping out of school.

In the roundtable discussions the youths will be given a pre and post test to judge their attitudes towards education and their chances for success in our world today. Community Serv. Obj. #1: The AmeriCorps worker will work to inform and coordinate the needs of the rural housing borrowers with the services provided by FmHA and other service agencies in Madison County and surrounding areas. Also, set up an outreach program for present and future homeowners. This program will consist of budgeting, wise credit use, making application for a housing loan, energy conservation, maintenance of property, and loan requirements of lenders in the area.

The ruralhousing borrowers that are facing financial and medical hardships and problems will obtain needed assistance, will enhance their standard of living, and they will become successful homeowners. Also, the hoped for result is to make rural housing borrowers more aware of available services provided by public and private agencies.

A reduction in the rural housing delinquency of those borrowers facing financial and medical hardships.

729 Rural Housing Borrowers and 100 Applicants for housing assistance.

CORPORATION FOR NATIONAL SERVICE
COMMUNITY BUILDING OBJECTIVES

OBJECTIVE STATEMENT

To establish community planning programs in the Mississippi Delta, as measured by 50% (3 out of 6) of the contacted communities producing a feasible plan to improve living conditions.

COMPONENTS OF OBJECTIVE STATEMENT

1) What activities will you be engaged in?

Contacting community leaders and outreach to non-represented groups.

Collecting information on community needs, problems, and opportunities.

organizing community officials by facilitating meetings to prioritize goals and identify tasks.

2) What is the hoped for result of the activities described above?

All targeted communities are contacted and advised of the opportunity to participate in this program.

2/28/95

USDA AMERICORPS PROJECT INFORMATION AND OBJECTIVES

Page: 480

RECORD #: 230

At least 3 communities develop a feasible plan.

3) How will you measure the quality of these activities?

Contacts with communities will be documented.

Community plans will be reviewed by professionals

4) By what standard will you gauge success?

Community leaders showing an active interest in pursuing planning options.

Communities are able to secure funding to implement their plans.

Description of Service: Anti-hunger services

Ethnicity (Solo sites):

Community Serv. Obj. #1: GREATER JACKSON YOUTH SERVICE CORPS

COMMUNITY SERVICE OBJECTIVES -- ANTI-HUNGER PROJECT

1) What work will be done? What service activities will your participants engage in?

The USDA/AmeriCorps Anti-hunger Team will engage in anti-hunger and nutrition activities. They will go into low-income areas of the Sunflower/Humphreys Counties and do outreach work for senior citizens and low-income families. They will also conduct nutrition workshops in different areas in these counties.

2) What is the hoped for result of the work/activities described above?

The hoped for results of these activities will be:

- a. An increased awareness of nutritional programs available to seniors.
- b. An increased number of seniors receiving meals from different charity programs.
- c. An increased number of summer feeding sites in these areas.
- d. An increased number of children fed per site.

RECORD #: 233

- e. Improved knowledge of nutrition to all in the area.
- f. Improved knowledge of food safety.
- g. Increased number of people claiming EITC.
- h. Increased number of people receiving food stamps.

3) How will you measure the quality of your product or the impact of your service?

The impact of our services will be measured by the number of people who start receiving the assistance we are suggesting they look into and apply for. Our services will also be measured by the number of feeding sites that are approved by the counties.

4) By what standard will you gauge success?

The standards used to gauge success are:

- a. 25% rise in awareness of nutritional programs available to senior citizens.
- b. 25% rise in seniors receiving meals.
- c. 35% rise in summer feeding sites (3 sites).
- d. Increase the number of children fed by 40 per site.
- e. Nutrition counseling for 50% of school aged children.
- f. Circulate 5,000 pamphlets on food safety.
- g. 1 workshop on food safety per county.
- h. 25% increase in people claiming EITC in each county.
- j. 33% rise in people receiving food stamps.

5) How many individuals will receive the benefit of the work your participants perform?

Over 5,000 people will benefit from our services.

to senior citizens.

- b. 25% rise in seniors receiving meals.

RECORD #: 233

- c. 35% rise in summer feeding sites (3 sites).

 - j. 33% rise in people receiving food stamps.
- 5) How many individuals will receive the benefit of the work your participants perform?

Over 5,000 people will benefit from our services.

Community Serv. Obj. #2:

GREATER JACKSON YOUTH SERVICE CORPS
COMMUNITY BUILDING OBJECTIVES -- ANTI-HUNGER PROJECT

- 1) What activities will you be engaged in?

Our primary activity will be developing and/or establishing a good working relationship with the community action agencies as well as the schools in the Sunflower and Humphrey county areas.

- 2) What is the hoped for result of the activities described above?

Through our efforts we hope that stable partnerships are formed. We want to be able to have a "give/get" relationship that works both ways.

- 3) How will you measure the quality of these activities?

A quarterly questionnaire will be administered to each of the partners to evaluate the partnership.

- 4) By what standard will you gauge success?

100% of our partners will agree that through our outreach efforts, their services are being more commonly and adequately used.

Description of Service: Forest conservation work

Ethnicity (Solo sites):

Community Serv. Obj. #1: National Forests in Mississippi #1

OBJECTIVE STATEMENT:

To perform work on public lands to conserve, restore, and sustain natural habitats within various ecosystems. To maintain, improve, and construct recreation facilities including camp sites, trails, access points, etc. to benefit users of the National Forest System. To perform work that will improve habitat for Threatened, Endangered, and Sensitive species and improve forest health through thinning and restoration. To assist in restoring natural beauty in the national forests and assist in disaster recovery efforts when requested.

COMPONENTS OF OBJECTIVE STATEMENT

- 1) What work will be done? What service will your members engage in?

Enhance the habitat of the Red-Cockaded Woodpecker in 5 colonies for a total of 50 acres. Sites will be selected by the forest wildlife biologist and the work will be accomplished utilizing herbicides on the midstory vegetation. The project is to be completed by Summer of 1995. This is an ongoing project and there will be additional acres in the years that follow.

Upgrade and retread the Bienville Scenic Pine Trail to enable this trail to meet regional trails standards for hikers and handicapped forest visitors. This will include proper site hardening

and

water control, and is scheduled for completion by April 1, 1995. Open to handicapped forest visitors after approval by the forest recreation specialist.

Recondition and maintain 23 miles of the Shockaloe Trail to regional standards for horseback riding and hiking. Accomplish 80% of the trail work by August 20, 1995. Install a "Sweet smelling" toilet at Base Camp I and perform site conditioning work around the toilet. Trail and installation will be considered completed after final approval by forest recreation officer.

RECORD #: 234

Release 50 acres of overstocked seedlings to improve forest health, utilizing standards set forth by project specialist, by September 1, 1995. This precommercial thinning will improve the growth of the residual seedling and will be reviewed by the District Silviculturist.

Plant pine seedlings on 25 acres of National Forest land that has been cut due to Southern Pine Beetle infestation. The areas to be selected by the District Silviculturist.

2) What is the hoped for result of the activities described above?

That the projects will be completed in a timely and quality manner and that the recreation facilities will be made available to the public in a condition that meets or exceeds customer expectations. That Endangered species habitat for the Red-Cockaded Woodpecker will be maintained or improved to meet Forest Recovery Plan objectives. That forest health will be improved through thinning and reforestation.

3) How will you measure the quality of these activities?

The majority of these activities will be measured against established and approved standards within Forest Service Land and Resource Management Plans, handbooks, operation, maintenance and construction guidelines, and project workplans. Line Officers will be responsible for accepting the quality of work accomplishments and will hold Members and 3rd parties accountable as part of their performance expectations. We'll work with the schools to conduct and evaluate pre/post tests to determine and measure the success of the environmental education programs.

4) By what standard will you gauge success?

By completion of all the work in a timely manner per established standards for quality.

5) How many individuals will receive the benefit of the work your members perform?

Three to five thousand forest users and 1 local community would benefit from the proposed work.

Community Serv. Obj. #2: National Forests in Mississippi #2

Community Serv. Obj. #1: To attend pertinent meetings that effect the problems impact this corporation. Also to make positive contribution and suggestions (through my expertise) to help to reduce the current problematic areas that are presently impacting 500 workers and their families. Community Building Impact Area: To assist the community in general by promoting a more positive atmosphere between this corporation and the community.

To reduce/eliminate the current ratio problems of hired employee vs. those who quit after only two - three months. This is the major current problem at all three Durant plants.

The measure of impact quality will be accomplished by two scales. (a) To sustain the ongoing productive process of these three plants in Durant (to keep them from shutting down). (b) To increase the number of workers from the current 500 workers to approximately 600 workers (100 more local jobs).

If (a) these three plants remain open and if (b) more worker jobs (100) are added, the AmerCorps effort will have been a tremendous success.

(a) 500 employees will remain employed. (b) 100 new positions added. (c) The community based businesses (restaurants, grocery stores, gas stations, etc.) would continue to reap the benefits of the continued employment status of these employees in Durant.

Community Serv. Obj. #2:

To attract new industry to this site. Plans (in the infancy stage) include attempting to attract (a) a poultry processing plant and (b) a greenhouse tomato processing facility.

By the amount of progress achieved in the process of attracting industry to the park (any commitment to

RECORD #: 235

locate here).

Success (after 9 months of service) will be gauged on the amount of progress that has been attained by June, 1995 in being able to attract the interest of various industries.

If major industries can be attracted to the new industrial park the impact on several hundred new employees and their families would be tremendous. "Spin-off" businesses would also naturally be effected.

CORPORATION FOR NATIONAL SERVICE

COMMUNITY SERVICE OBJECTIVES

OBJECTIVE STATEMENT

To provide transfer recycling technology from existing rural and urban projects resulting in a recycling program starting which would employ 25 disabled workers from local institutions.

COMPONENTS OF OBJECTIVE STATEMENT

1) What work will be done? what service will your members engage in?

visit other institutions which have implemented similar projects.

Make contacts with local institutions.

Work with local leaders to find markets for recycled products.

Carry out education and promotion campaign.

2) What is the hoped for result of the activities described above?

Employment of 25 disabled adults to sort materials.

Reduction of materials filling local landfills.

3) How will you measure the quality of these activities?

2/28/95

USDA AMERICORPS PROJECT INFORMATION AND OBJECTIVES

Page: 499

RECORD #: 237

Quality of product will allow resale.

Sorted materials will be randomly checked.

Residents of institution will be interviewed on job satisfaction

4) By what standard will you gauge success?

Employment satisfaction of at least 50%- of the employed institution residents. Increase local recycling rate by 10*.

5) How many individuals will receive the benefit of the work you members perform?
25 mentally disabled adults.

Community Serv. Obj. #1: Grantee Department of Agriculture Site Rural Development, MS, AR, & VA

Objective Code 23

CORPORATION FOR NATIONAL SERVICE

COMMUNITY SERVICE OBJECTIVES

OBJECTIVE STATEMENT

To provide assistance to rural communities interested in implementing community forestry programs resulting in improved living conditions and opportunities for neighborhood service.

COMPONENTS OF OBJECTIVE STATEMENT

1) What work will be done? What service will your members engage in?

Develop a plan and identify suitable planting sites for urban forestry projects.

Secure funding for purchase of materials.

Recruit and organize volunteers to plant trees.

2) What is the hoped for result of the activities described above?

Establishment of native tree species in residential and business areas in small communities.

Involvement of local civic and volunteer groups.

RECORD #: 242

3) How will you measure the quality of these activities?

Survival rate of 60% of planted trees.

Participation by 3 local groups.

4) By what standard will you gauge success?

Improvement of overall aesthetic quality of area.

Increase in real estate values.

5) How many individuals will receive the benefit of the work you members perform? All residents of the 8-10 communities involved.

CORPORATION FOR NATIONAL SERVICE
COMMUNITY SERVICE OBJECTIVE

27-04

GRANTEE: USDA Soil Conservation Service SITE: Brookhaven, Mississippi

COMPONENTS OF OBJECTIVE STATEMENTS: Engage in an environmental public relations campaign and to disseminate conservation education to elementary schools.

1. What work will be done? What service activities will your participants engage in?

Coordinating a statewide project to distribute Environmental Adventures booklets to elementary school. Publish monthly newsletter covering AmeriCorps project activities. Develop and maintain computer databases in support of ongoing projects of the local non-profit RC&D Council, including AmeriCorps and other rural development activities requiring close networking with participating individuals and community groups.

2. What is the hoped for result of the work/activities described above?

All elementary schools in Mississippi to receive educational packages. Public and local partners kept informed of AmeriCorps activities. Increased public participation in AmeriCorps.

3. How will you measure the quality of your produce or impact of your service?

Eight news articles published. Nine issues of newsletters distributed, networking database established or maintained, Fifteen community groups involved, and objectives accomplished.

4. By what standard will you gauge success?

News releases, newsletters, and all supporting correspondence will result in achievement of

RECORD #: 244

objectives.

5. How many individuals will receive the benefit of the work your participants perform?
Students in 200 schools - approximately 20,000 students

Community Serv. Obj. #2:

CORPORATION FOR NATIONAL SERVICE
COMMUNITY BUILDING OBJECTIVE

GRANTEE: USDA Soil Conservation Service SITE: Brookhaven, Mississippi

COMPONENTS OF OBJECTIVE STATEMENTS: Recruit volunteers to "Adopt-A-Stream"
for cleanup and clean-up.

1. What work will be done? What service activities will your participants engage in?

Coordinating the promoting and solicitation of monitors (volunteers) to adopt stream sections for cleanup and environmental monitoring in cooperation with Mississippi Wildlife Federation's Adopt-A-Stream program.

2. What is the hoped for result of the work/activities described above?

The establishment of a water quality database to monitor changes caused by point and nonpoint pollution.

3. How will you measure the quality of your produce or impact of your service?

Tests must maintain quality control procedures and must be conducted on specified schedule.

4. By what standard will you gauge success?

By number of volunteers recruited (goal-50), miles of streams adopted (goal-100), by number monitoring points established (goal-30), and by number of targeted streams involved.

5. How many individuals will receive the benefit of the work your participants perform?

3000 recreational users in a 13 county area.

Community Serv. Obj. #3:

CORPORATION FOR NATIONAL SERVICE
COMMUNITY SERVICE OBJECTIVE

GRANTEE: USDA Soil Conservation Service SITE: Hattiesburg, Mississippi

COMPONENTS OF OBJECTIVE STATEMENTS: Development of a high quality regional
tourism strategic plan.

1. What work will be done? What service activities will your participants engage in?

RECORD #: 244

Forming cooperative partnerships with tourism related agencies, organizations, governmental bodies and businesses within an eighteen county southeast Mississippi region.

2. What is the hoped for result of the work/activities described above?

(a) Development of a high quality regional tourism strategic plan within an eighteen county region.

(b) Coordination of tourism related agencies, organizations, governmental bodies and businesses within an eighteen county region to implement a strategic plan.

3. How will you measure the quality of your produce or impact of your service?

(a) Formation of cooperative partnerships in the eighteen county region for tourism development.

(b) Implementation of action items included in the strategic plan, which includes a regional tourism conference, brochure, tourism inventory and database, and formation of formal cooperative partnerships.

4. By what standard will you gauge success?

(a) Development of an inventory of the tourism attractions in each of the eighteen counties in the Southeast Mississippi region.

(b) Development of a regional tourism brochure.

(c) Development and distribution of a bi-monthly newsletter.

(d) Development and coordination of a regional tourism conference.

5. How many individuals will receive the benefit of the work your participants perform?

18 county tourism industries involving 2000 people

Community Serv. Obj. #4:

CORPORATION FOR NATIONAL SERVICE
COMMUNITY SERVICE OBJECTIVE

27-03

GRANTEE: USDA Soil Conservation Service SITE: Liberty, Mississippi

COMPONENTS OF OBJECTIVE STATEMENTS: Identify and gain access to alternative water sources to be used in rural fire protection.

1. What work will be done? What service activities will your participants engage in?

Identifying potential alternative water sources (ponds, lakes, streams, etc.) for rural fire protection and obtaining data to certify sources. Obtaining easement from landowners for access. Coordinating activities with local county government to provide access roads.

2. What is the hoped for result of the work/activities described above?

Sufficient sources identified and accessed in 50 percent of the 13 project counties so that 75 percent of all residences are within 3 miles of an approved water supply for fire fighting.

3. How will you measure the quality of your produce or impact of your service?

By inspection of selected sites, legal review, and computer analysis.

RECORD #: 244

4. By what standard will you gauge success?

100 percent of selected sources must meet SCS and State Fire Academy Standards. All easements must be reviewed by an attorney and recorded. Computer analysis will verify proper distribution using satellite imagery.

5. How many individuals will receive the benefit of the work your participants perform?

2000 residents

Community Serv. Obj. #5:

CORPORATION FOR NATIONAL SERVICE
COMMUNITY SERVICE OBJECTIVE

GRANTEE: USDA Soil Conservation Service SITE: Magnolia, Mississippi

27-01

COMPONENTS OF OBJECTIVE STATEMENTS: The development and expansion of secondary wood products manufacturing enterprises and the organization of a woodworkers association.

1. What work will be done? What service activities will your participants engage in?

Coordinating activities to enhance the development and/or expansion of secondary wood products manufacturing enterprises in 13 counties of Southwest Mississippi. Organizing a Woodworkers Association.

Developing a local incentive program to encourage landowners to maintain CRP planted in trees beyond the 10-year contract period.

2. What is the hoped for result of the work/activities described above?

Eight secondary wood products enterprises started or expanded. One Woodworkers Association organized, and 95 percent of tree planted CRP acres signed up for incentive program.

3. How will you measure the quality of your produce or impact of your service?

Quality of assistance will be measured by evaluation of success of enterprise assisted, as well as number and size of enterprises assisted. Also quality of CRP project will be measured by the degree of participation by landowners.

4. By what standard will you gauge success?

Success will be measured by number of enterprises assisted, number of members active in Association, and number of acres signed up for extended incentive program.

5. How many individuals will receive the benefit of the work your participants perform?

300 landowners and 13 enterprises.

COMMUNITY SERVICE OBJECTIVE

27-02

GRANTEE: USDA Soil Conservation Service SITE: Monticello, Mississippi

COMPONENTS OF OBJECTIVE STATEMENTS: Evaluation, correction of problems, and the management livestock waste.

1. What work will be done? What service activities will your participants engage in?

Environmental evaluation of livestock waste lagoons. Mechanical pumpout of "problem" lagoons with land application. Support in design and construction of poultry dead-bird composters.

Environmental evaluation of storage and disposal of hazardous materials and their containers on farms.

2. What is the hoped for result of the work/activities described above?

Ninety percent of lagoon evaluated, 30 livestock waste management plans prepared, 10 lagoons pumped out, 8 dead-bird composters constructed, and 50 environmental evaluation completed.

3. How will you measure the quality of your produce or impact of your service?

100 percent must meet SCS technical specifications and state DEQ permit requirements.

4. By what standard will you gauge success?

By amount of goals listed in #2 above accomplished meeting standards in #3 above.

RECORD #: 245

5. How many individuals will receive the benefit of the work your participants perform?
100 landowners

CORPORATION FOR NATIONAL SERVICE
COMMUNITY SERVICE OBJECTIVE

27-06

GRANTEE: USDA Soil Conservation Service SITE: New Albany, Mississippi

COMPONENTS OF OBJECTIVE STATEMENTS: To survey and build two models of
community services to improve and protect water quality.

1. What work will be done? What service activities will your participants engage in?
Working with rural communities within the nine county area to survey, inventory, and assist with the planning of waste management systems for public and private facilities to improve and protect the quality of water.
2. What is the hoped for result of the work/activities described above?
Develop three (3) meaningful partnerships in respective communities to improve waste management systems by implementing new or improved systems of disposal, especially the grease, oil, food wastes of public and private food service institutions.
3. How will you measure the quality of your produce or impact of your service?
Plans are developed for each public facility in the nine county area. At least two public facilities budget for and/or install improved systems.
4. By what standard will you gauge success?
At least two public facilities will budget for and/or install improved systems. Performance of installed systems will be evaluated.
5. How many individuals will receive the benefit of the work your participants perform?
2 rural communities, 300 people

RECORD #: 254

Community Serv. Obj. #2:

CORPORATION FOR NATIONAL SERVICE
COMMUNITY SERVICE OBJECTIVE

GRANTEE: USDA Soil Conservation Service SITE: Tupelo, Mississippi

27-10

COMPONENTS OF OBJECTIVE STATEMENTS: To install 30 dry fire hydrants, develop 15 county-wide dry hydrant plans, and publish brochures, improve insurance classification; and also to increase public awareness to build public support for funding.

1. What work will be done? What service activities will your participants engage in?
 - (a) Assist each of the 15 county's fire coordinators to get two demonstration dry hydrants per county installed.
 - (b) Work with local Soil & Water Conservation Districts, county fire coordinators, and rural fire district chiefs to develop county-wide dry hydrants plans.
 - (c) Work with Extension Service GIS Unit to get county maps produced of available water sources and location.
 - (d) Develop and publish 500-1000 information and education brochures to promote community awareness and public support for each county plan.
2. What is the hoped for result of the work/activities described above?
 - (a) Improved rural fire protection capabilities in 30 volunteer fire district communities.
 - (b) Reduced travel distance to fill up points in 30 rural fire districts.
 - (c) Fifteen county-wide plans for installing dry hydrants.
 - (d) 500-1000 information/education brochures on each county-wide plan.
3. How will you measure the quality of your produce or impact of your service?
 - (a) Ten percent decrease in travel distance to water source in fire districts that install dry hydrants.
 - (b) Fifty percent increase community awareness and support for the installation and use of dry hydrants.
 - (c) Dry hydrants will be installed in 80% of the counties in the RC&D Areas.
 - (d) A county-wide plan will be developed in 80% of the counties in the RC&D area.
4. By what standard will you gauge success?

SCS technical standards and Mississippi Fire Standards.
5. How many individuals will receive the benefit of the work your participants perform?
 - (a) 30 fire districts servicing 30 community benefitting about 200 families in each community.

RECORD #: 254

(b) 15 counties receiving county-wide plans.

(c) 15 counties receiving 500-1000 informational and educational brochures.

COMPONENTS OF OBJECTIVE STATEMENTS: To create partnerships with local
community fire protection agencies and to install dry fire hydrants.

1. What work will be done? What service activities will your participants engage in?
Create gradually partnerships with rural community fire protection services.
2. What is the hoped for result of the work/activities described above?
Develop partnership with two (2) rural communities fire protection services to develop and
install eight (8) dry hydrants.
3. How will you measure the quality of your produce or impact of your service?
The number of partnerships established with rural communities.
4. By what standard will you gauge success?
The quality performed services rendered will be measured by the number services delivered to
partnerships.
5. How many individuals will receive the benefit of the work your participants perform?
2 rural communities, 400 people

CORPORATION FOR NATIONAL SERVICE
COMMUNITY SERVICE OBJECTIVE

27-12

GRANTEE: USDA Soil Conservation Service SITE: Greenville, Mississippi

COMPONENTS OF OBJECTIVE STATEMENTS: Implement Empowerment Zone and
Enterprise Community Action plans.

1. What work will be done? What service activities will your participants engage in?
Will assist communities with implementing Empowerment Zone (EZ) and Enterprise Community
(EC) action plans. This would include working with community action agencies, Housing
Authorities, MACE, and various federal, state, local agencies.

2. What is the hoped for result of the work/activities described above?
Inform the public of EZ/EC benefits and assist in organizing local groups to participate.

3. How will you measure the quality of your produce or impact of your service?
An overview and evaluation of activities will be conducted near the end of the program.

4. By what standard will you gauge success?
If EZ/EC benefits reach target group in an effective and timely method.

5. How many individuals will receive the benefit of the work your participants perform?
4,200 individuals.

Community Serv. Obj. #2:

CORPORATION FOR NATIONAL SERVICE
COMMUNITY SERVICE OBJECTIVE

27-11

RECORD #: 257

GRANTEE: USDA Soil Conservation Service SITE: Merigold, Mississippi

COMPONENTS OF OBJECTIVE STATEMENTS: Provide technical assistance to rural communities in the Mississippi Delta through community planning.

1. What work will be done? What service activities will your participants engage in?
Will advise and organize community officials and leaders to establish goals, priorities, programs, procedures in such areas as the pattern and intensity of land use, transportation facilities, housing, public utilities, public safety, health services, pollution control, and quality of the environment.
2. What is the hoped for result of the work/activities described above?
Communities will clearly identify goals and have an organized structure to pursue their priorities.
3. How will you measure the quality of your produce or impact of your service?
Before and after assessment of the communities will be done. Various state and federal agencies will be involved in the program.
4. By what standard will you gauge success?
90% of the target communities are contacted. 60% of contacted communities produce a feasible plan to improve living conditions. 50% secure funding to implement their plans.
5. How many individuals will receive the benefit of the work your participants perform?
1,200 individuals in 6 communities.

Community Serv. Obj. #3:

CORPORATION FOR NATIONAL SERVICE
COMMUNITY SERVICE OBJECTIVE

27-13

GRANTEE: USDA Soil Conservation Service SITE: Stoneville, Mississippi

COMPONENTS OF OBJECTIVE STATEMENTS: Foster bottomland hardwood ecosystem restoration.

1. What work will be done? What service activities will your participants engage in?
Assess landowner needs for technical assistance in Sharkey and Issaquena counties, including awareness of environmental benefits of restoring marginal cropland to bottomland hardwood forests; awareness of incentive programs; willingness to receive technical assistance. Assist the restoration forester in developing a technical assistance delivery program that meets identified landowner needs.
2. What is the hoped for result of the work/activities described above?
Georeferenced database of potential mitigation sites, including farmland submitted for the Wetland Reserve Program but not chosen; contact list of landowners receptive to a technical

RECORD #: 257

assistance visit by the restoration forester; promotional, educational, and training materials.

3. How will you measure the quality of your produce or impact of your service?

Survey design and data analysis will be supervised by research staff in Stoneville and New Orleans. Training materials will be co-authored by research and technical staff and subject to Station editorial review.

4. By what standard will you gauge success?

Return rate on questionnaire exceeds 20%. Five or more landowners receive technical assistance.

5. How many individuals will receive the benefit of the work your participants perform?

Community Serv. Obj. #1: As previously stated, there currently exists no single repository for information crucial to the economic development of Northwest MS. This objective would consist of organizing, compiling, and distributing comprehensive data for the expansion of existing industry and recruitment of suitable industry for local and regional economic development partners.

The result of the work accomplished will be an accurate, dependable source of information for economic development organizations working to create employment opportunities for the region.

By the number of existing industries and potential companies who gain access to the information. 2) By the adoption of this information as the official source documentation by Chambers of Commerce, Industrial Foundations, regional organizations, and the State of Mississippi. 3) By the number of expansions and locations directly resulting from the use of this information.

Success will ultimately be measured by the number of new employment opportunities created directly as a result of base work performed under this project. Goals would include a minimum of three new industrial locations and five industrial expansions generated with assistance from the data utilized.

Indirectly, all 500,000 citizens of Northwest MS will benefit from increased employment, and decreased dependency upon transfer payments, etc. Direct benefits can modestly be put at 1,000 new employment opportunities for their families. This will be measured only on projects that directly benefit from AmeriCorps participation.

RECORD #: 258

Community Serv. Obj. #2:

An increased awareness of continuous improvement and other progressive management styles among local and regional employers. Increased participation in existing groups.

This will be measured by the creation of additional Continuous Improvement groups in the region. There are currently only six companies involved in such activities.

By the addition of six companies participating in CIUG activities in the program year.

A minimum of 750 persons will directly benefit from the insertion of progressive management in the six companies projected.

Community Serv. Obj. #3:

CORPORATION FOR NATIONAL SERVICE

COMMUNITY SERVICE OBJECTIVES

OBJECTIVE STATEMENT

To provide transfer recycling technology from existing rural and urban projects resulting in a recycling program starting which would employ 25 disabled workers from local institutions.

COMPONENTS OF OBJECTIVE STATEMENT

1) What work will be done? what service will your members engage in?

visit other institutions which have implemented similar projects.

Make contacts with local institutions.

Work with local leaders to find markets for recycled products.

Carry out education and promotion campaign.

2) What is the hoped for result of the activities described above?

Employment of 25 disabled adults to sort materials.

Reduction of materials filling local landfills.

3) How will you measure the quality of these activities?

2/28/95

USDA AMERICORPS PROJECT INFORMATION AND OBJECTIVES

Page: 537

RECORD #: 263

Quality of product will allow resale.

Sorted materials will be randomly checked.

Residents of institution will be interviewed on job satisfaction

4) By what standard will you gauge success?

Employment satisfaction of at least 50%- of the employed institution residents. Increase local recycling rate by 10*.

5) How many individuals will receive the benefit of the work you members perform?
25 mentally disabled adults.

Community Serv. Obj. #1: 250 Program brochures will be disseminated throughout targeted areas around Yazoo County by March 1995. Yazoo Community Action will also write a press release to inform the general public.

This will result in having interested persons call or come by for more information.

Our success will be determined by number of possible participants for the business development series classes.

Will gauge success based on actual number of persons tat will begin te classes.

By the end of April, YCA hopes to have 15 participants in classes and attending one-on-one sessions with Business Development Specialist.

Community Serv. Obj. #2:

The program will measure success based on employment of self and others, good recordkeeping, advertising, cash flow, sales and profit.

We will measure the impact of our services based on meeting our deadlines for participants and having at least five microbusinesses up and running by the end of 1995.

RECORD #: 264

Success will be determined by participant enrollment, number of microbusinesses startups and overall progress of the program.

By the end of 1995, The Microbusiness Program should have five startup microbusinesses going and forty participants continuing the process of gaining self sufficiency.

Community Serv. Obj. #3:

CORPORATION FOR NATIONAL SERVICE

COMMUNITY SERVICE OBJECTIVES

OBJECTIVE STATEMENT

To provide assistance to rural communities interested in implementing community forestry programs resulting in improved living conditions and opportunities for neighborhood service.

COMPONENTS OF OBJECTIVE STATEMENT

1) What work will be done? What service will your members engage in?

Develop a plan and identify suitable planting sites for urban forestry projects.

Secure funding for purchase of materials.

Recruit and organize volunteers to plant trees.

2) What is the hoped for result of the activities described above?

Establishment of native tree species in residential and business areas in small communities.

Involvement of local civic and volunteer groups.

RECORD #: 265

3) How will you measure the quality of these activities?

Survival rate of 60% of planted trees.

Participation by 3 local groups.

4) By what standard will you gauge success?

Improvement of overall aesthetic quality of area.

Increase in real estate values.

5) How many individuals will receive the benefit of the work you members perform? All residents of the 8-10 communities involved.

Community Serv. Obj. #2: Grantee Department of Agriculture Site Rural Development, KY, MS, SC & AR
Objective Code 25

CORPORATION FOR NATIONAL SERVICE
COMMUNITY BUILDING OBJECTIVES

OBJECTIVE STATEMENT

To seek sustainable economic development opportunities to diversify local economies, resulting in local people obtaining job training and higher paying employment while maintaining the quality of the rural environment.

COMPONENTS OF OBJECTIVE STATEMENT

1) What activities will you be engaged in?

members will work directly with local business leaders to inventory existing resources, identify sustainable economic development opportunities, conduct feasibility studies, and assist in writing (3.5) business plans.

Issues of environmental concern will be analyzed with any related new business venture.

2) What is the hoped for result of the activities described above?

increasing local employment and income.

Local individuals will be trained for employment.

Business plans will be developed and funding sought.

RECORD #: 265

3) How will you measure the quality of these activities?

Professionals will review all environmental impact analysis.

Local business leaders will be interviewed following completion of project.

Loans and other funding will be obtained for 25% of the business plans developed.

4) By what standard will you gauge success?

Establishment of a sustainable, natural resource based business employing 5 locally trained people.

Community Serv. Obj. #3: Grantee Department of Agriculture Site Rural Development, SC & MS

Ethnicity (Solo sites):

Community Serv. Obj. #1: Grantee Department of Agriculture Site Rural Development, NC
Objective Code 21

CORPORATION FOR NATIONAL SERVICE

COMMUNITY SERVICE OBJECTIVES

OBJECTIVE STATEMENT

To develop a comprehensive plan to improve 4 local parks resulting in fully accessible recreation opportunities for disabled persons.

COMPONENTS OF OBJECTIVE STATEMENT

1) What work will be done? What service will your members engage in?

Formulate a comprehensive plan to beautify, and make accessible 4 recreational sites.

Recruit volunteer groups to assist in cleaning, planting, and constructing handicap accessible ramps, and removing barriers.

2) What is the hoped for result of the activities described above?

Recreational parks will accommodate all persons.

Community spirit and pride will be promoted.

2/28/95

USDA AMERICORPS PROJECT INFORMATION AND OBJECTIVES

Page: 551

RECORD #: 270

3) How will you measure the quality of these activities?

Parks and recreation sites will comply with ADA (Americans with Disabilities Act) specifications.

4) By what standard will you gauge success?

Local community members will maintain park and recreation facilities.

5) How many individuals will receive the benefit of the work you m @ are perform?

20 volunteers involved in park beautification.

All disabled persons wishing to utilize existing park facilities.

Community Serv. Obj. #1: Low income families will be counseled about FmHA loan and grant programs for housing, and recommendations for financing will be made. Partnerships will be formed with planning districts to package housing loans and grants. Outreach efforts will be focused on farm loans, with special emphasis on youth loans.

Low income and very low income families will improve their living conditions, the number of farm program loans will be increased.

Increases in loan and grant activity in the counties of Henderson and Polk.

Success will be measured by the number of housing applications received and funded, the number of farm loans received and approved, and the new partnerships developed with planning districts and local governments.

2/28/95

USDA AMERICORPS PROJECT INFORMATION AND OBJECTIVES

Page: 555

RECORD #: 272

In the short term, a limited number of people will benefit from loans and grants received (under 20). Through the new partnerships developed, numerous people will be served over the long term.

Community Serv. Obj. #1: An organizational framework will be established for a family resource center to serve the Madison County area. The center will provide community residents with information concerning social assistance agencies and access to quality and affordable human services such as child and adult day care.

The result will be that community residents have access to affordable goods and services such as child care, essential services, adult day care and equal economic opportunities.

Quality of the service will be measured by client satisfaction, determined by questionnaires.

The number of clients served and client satisfaction.

Unknown at this time, but high potential due to the lack of an existing mechanism to provide human services coordination at the community level.

Description of Service: Flood recovery

Ethnicity (Solo sites):

Community Serv. Obj. #1: CORPORATION FOR NATIONAL SERVICE
COMMUNITY SERVICE OBJECTIVE

GRANTEE: USDA Soil Conservation Service SITE: Valley City, North Dakota

COMPONENTS OF OBJECTIVE STATEMENTS: Collect and compile basic resource data, provide information, education and guidance to landowners, agricultural producers and community members within the watershed.

1. What work will be done? What service activities will your participants engage in? AmeriCorps members will complete wetland scope and effect determinations on targeted tracts within the flood prone areas.

Will coordinate public informational meetings/demonstrations in an effort to educate land owners and operators about the potential for ground water contamination from unsealed abandoned wells and proper well sealing techniques.

Will coordinate public awareness meetings which will concentrate on the wetland certification process and the steps each land owner/operator will need to complete to stay in compliance with federal farm programs.

Will conduct watershed inventories within flood prone areas in order to document current watershed conditions and identify areas needing treatment. This data may also be utilized by agency personnel to develop work plans and where feasible, develop grant proposals for future watershed treatment programs.

2. What is the hoped for result of the work/activities described above?

33-27

RECORD #: 281

Complete wetland scope and effect on a total of 200 tracts.

Coordinate a minimum of 50 public informational meetings emphasizing the topic of sealing abandoned wells.

Coordinate a minimum of 50 public informational meetings centering on the wetland certification process.

3. How will you measure the quality of your product or impact of your service?

Supervisor and other professionals' review of data and reports. All work meets Soil Conservation Service Field Office Technical Guide (FOTG) and National Food Security Act Manual (NFSAM) standards and guidelines.

4. By what standard will you gauge success?

Will develop periodic progress reports (at least quarterly). Progress toward established goals (as outlined in # 2 above) will be reviewed by supervisory personnel.

5. How many individuals will receive the benefit of the work your participants perform?

The owners and operators of the 200 tracts of farmland on which the members will be performing the wetland scope and effect will directly benefit from the efforts of the members. In addition, many more rural landowners, operators and urban residents within the ten county area will benefit from the accomplishments of the AmeriCorps members through increased knowledge of the natural resources and enhanced watershed stability.

Community Serv. Obj. #2: CORPORATION FOR NATIONAL SERVICE
COMMUNITY BUILDING OBJECTIVE

33-28

GRANTEE: USDA Soil Conservation Service SITE: Valley City, North Dakota

COMPONENTS OF OBJECTIVE STATEMENTS: To provide assistance to rural communities and local

units of government in the identification and assessment of significant environmental and natural resources for economic, human, and environmental well-being. Conduct field investigations, gather resource data, and compile reports to monitor the status of soil, water, air, plant, animal and human related resources in the area and to promote proper watershed management.

1. What work will be done? What service activities will your participants engage in?

Help local communities and units of government support water quality protection, complete resource inventories and to promote proper watershed management.

2. What is the hoped for result of the work/activities described above?

Resource inventories completed that support water quality activities and promote proper watershed management.

3. How will you measure the quality of your product or impact of your service?

Successfully establish new linkages within the communities to address significant environmental and natural resource concerns.

4. By what standard will you gauge success?

COMMUNITY SERVICE OBJECTIVE

GRANTEE: USDA Soil Conservation Service SITE: Norfolk, Nebraska

34-20

COMPONENTS OF OBJECTIVE STATEMENTS: To provide environmental information and education to

rural communities in northeast Nebraska. Conduct field investigations, gather resource data, and compile reports to monitor the status of land, plant, and animal resources. Work with local communities to provide education and training to individuals and groups impacted by the devastating floods of 1993.

1. What work will be done? What service activities will your participants engage in? Environmental outreach program to promote resource management and local conservation programs will be developed and implemented in the area.

2. What is the hoped for result of the work/activities described above? Identify "target areas" on base maps for resource treatment of soil erosion and sedimentation, riparian area protection, and water quality protection in the area.

3. How will you measure the quality of your product or impact of your service? review of data elements by State Resources Inventory Specialists and visual accuracy of developed maps.

4. By what standard will you gauge success? Established quality standards to ensure that at least 85% of the data collected adheres to SCS policies and procedures for quality control.

5. How many individuals will receive the benefit of the work your participants perform? Urban and rural communities in several counties, as well as recreational users and land managers.

Description of Service: Flood recovery

Ethnicity (Solo sites):

Community Serv. Obj. #1: CORPORATION FOR NATIONAL SERVICE
COMMUNITY BUILDING OBJECTIVE

GRANTEE: USDA Soil Conservation Service SITE: Omaha, Nebraska

COMPONENTS OF OBJECTIVE STATEMENTS:

1. What work will be done? What service activities will your participants engage in?
Help local communities support water quality protection, complete resource inventories, and to promote proper flood plain management.
2. What is the hoped for result of the work/activities described above?
Provide natural resource protection information in eight local communities that would otherwise not be accomplished.
3. How will you measure the quality of your product or impact of your service?
Successfully establish new linkages in the communities to address resource problems within the established time frames identified in the work plan.
4. By what standard will you gauge success?
Increased awareness and local activity to work toward solving environmental problems and resource protection.

Community Serv. Obj. #2: CORPORATION FOR NATIONAL SERVICE

CORPORATION FOR NATIONAL SERVICE
COMMUNITY SERVICE OBJECTIVE

GRANTEE: USDA Soil Conservation Service SITE: Tecumseh, Nebraska

33-23

COMPONENTS OF OBJECTIVE STATEMENTS: To assist and solicit community involvement in the rehabilitation and restoration of flood control structures, recreational areas and other developed sites damaged as a result of the 1993 floods. Conduct field investigations, gather resource data, and compile reports to monitor the status of land, plant, and animal resources in the area and to promote proper flood plain management.

1. What work will be done? What service activities will your participants engage in?
Conduct field investigations, gather resource data, and compile reports to monitor the status of land, plant, and animal resources in the area and to promote proper flood plain management.
2. What is the hoped for result of the work/activities described above?
Prepare natural resource inventory reports for the Nemaha watershed area that was impacted by the floods of 1993.
3. How will you measure the quality of your product or impact of your service?
Ability to document and depict trends on the health of the natural resources within the watersheds.
4. By what standard will you gauge success?
Established quality standards for the collection of biological data used by resource agencies of the federal government will be utilized in the project.
5. How many individuals will receive the benefit of the work your participants perform?
Urban and rural communities in several counties, as well as recreational users and land managers.

RECORD #: 286

COMPONENTS OF OBJECTIVE STATEMENTS: To assist and solicit community involvement in the rehabilitation and restoration of flood control structures, recreational areas and other developed sites damaged as a result of the 1993 floods. Conduct field investigations, gather resource data, and compile reports to monitor the status of land, plant, and animal resources in the area and to promote proper flood plain management.

1. What work will be done? What service activities will your participants engage in?
Present information on resource conservation and flood plain management. Conduct field investigations, gather resource data, and compile reports to monitor the status of land, plant, and animal resources in the area and to promote proper flood plain management.
2. What is the hoped for result of the work/activities described above?
Present resource conservation and floodplain management information to eight local community groups in the area that was impacted by the floods of 1993.
3. How will you measure the quality of your product or impact of your service?
Will have initiated conservation activities in at least 50 percent of the target communities to better manage the natural resources in the area.
4. By what standard will you gauge success?
Established quality standards for the collection of biological data used by resource agencies of the federal government will be utilized in the project.
5. How many individuals will receive the benefit of the work your participants perform?
Primary recipients will be 800 residents in urban and rural communities, as well as recreational users and land managers.

Description of Service: Forest conservation work

Ethnicity (Solo sites):

Community Serv. Obj. #1: White Mountain National Forest #1

OBJECTIVE STATEMENT:

To perform work on public lands to conserve, restore, and sustain natural habitats within various ecosystems. To maintain, improve, and construct recreation facilities including camp sites, trails, access points, etc. to benefit users of the National Forest System. To perform work that will improve habitat for Threatened, Endangered, and Sensitive species and improve forest health through thinning and restoration. To assist in restoring natural beauty in the national forests and assist in disaster recovery efforts when requested.

COMPONENTS OF OBJECTIVE STATEMENT

1) What work will be done? What service will your members engage in?

Complete recreation facility construction, reconstruction and maintenance as determined by project specialist by November, 1995.

Enhance and/or monitor the ecosystems for threatened and endangered sensitive species throughout the forest. This will include 10 wildlife monitoring sites, 15 acres of habitat improvement and 200 acres of headwater streams stocked with juvenile Atlantic salmon following guidelines set forth by the project specialist, and completing projects in a time frame that would be sensitive to the needs of individual species, but no later than October 1, 1995.

Utilize the "Forest as a Classroom" to provide environmental education to local elementary schools, providing regionally approved environmental education to at least 300 students, by June 10, 1995.

Enhance hiking trail system to regional standards and guidelines, build small bridges and

RECORD #: 287

replace

trail signs, and complete 50 miles of trail maintenance by November 1, 1995.

Provide full participation in New Hampshire's Trail Day totaling 180 person-hours.

Provide twice-weekly interpretive programs in designated campgrounds and at cooperator visitor centers between June 30 and Labor Day, 1995.

25 Enhance wilderness management by providing wilderness education to 1,000 visitors, maintaining miles of trails to Wilderness standards, restoring 10 dispersed user sites and removing 6 non-conforming structures by November 1995.

White Provide information, education and interpretation in the backcountry and alpine areas of the Mountains. This will include low-impact camping, mountain safety, protecting the alpine zone and wilderness ethics information to 6,000 visitors.

specialists Members will participate in 5 community service days as determined by members, project and local communities related to environmental education, natural resource protection or trail maintenance/construction by November 1995.

2) What is the hoped for result of the activities described above?

That the projects will be completed in a timely and quality manner and that the recreation facilities will be used extensively by the general public and forest users. That Threatened, Endangered, and Sensitive plant and animal species habitat will be maintained or improved to the point that someday they can be delisted. That youth in New Hampshire will become more environmentally aware and sensitive as a result of the environmental education programs.

3) How will you measure the quality of these activities?

The majority of these activities will be measured against established and approved standards within Forest Service Land and Resource Management Plans, handbooks, operation, maintenance and construction guidelines, and project workplans. Line Officers will be responsible for accepting the quality of work accomplishments and will hold Members and 3rd parties accountable as part of their performance expectations. We'll work with the schools to conduct and evaluate pre/post tests to determine and measure the success of the environmental education programs.

4) By what standard will you gauge success?

By completion of all the work in a timely manner per established standards for quality.

5) How many individuals will receive the benefit of the work your members perform?

Six to ten thousand forest users, 10-12 local communities, and approximately 300 school children.

RECORD #: 287

Community Serv. Obj. #2: White Mountain National Forest #2
