

Name
Address

Dear :

I wanted to thank you for participating in the White House Round Table on climate change July 24. I thought the session was very productive -- a useful and interesting start to the public education effort the President spoke of in his speech to the United Nations in June. I hope that you found it worthwhile as well.

A basic understanding of what science tells us about climate change -- of what is and isn't clear and of why what we understand warrants responsible action now -- is absolutely crucial to the building of support in the public, among opinion leaders and in Congress. So your ongoing efforts to explain what the science teaches us are enormously important and can make a real contribution.

Please feel free to get in touch with me at any and I hope you won't mind if we call on you from time to time for assistance. Thanks again. I enjoyed meeting you.

Very truly yours,

Todd Stern
Assistant to the President
and Staff Secretary
