the industry off the hook for the hundreds of thousands of deaths they've caused.

Call 1-888-38-STAND-UP.

Here's your chance to make a **FREE** call and remind President Clinton why we put him in office.

1-888-38-STAND-UP

When President Clinton took office he promised to put people first. But since then, we've had six years of pandering to special interests and embracing right-wing issues. As of this moment, President Clinton's enduring legacy is all too familiar—sacrificing women and children to welfare cuts while ballooning tax cuts for the wealthy. ♦ But there's still hope. Given enough pressure, President Clinton has stood up for what is right. He stood up to gun lobbyists and maintained the ban on semi-automatic assault rifles. He stood up to the religious right and maintained a woman's right to choose. But he needs to hear from more people of

good conscience. ♦ That's where we come in. We're Working Assets Long Distance and we help people make their voice heard. All without having to pay for a night in the Lincoln Bedroom. We're offering you a free and easy way to help

Bill Clinton be the kind of President we hope he wants to be. Even if you're not a Working Assets customer. ♦ Just pick up the phone and call 1-888-38-STAND-UP. Select an issue and learn more about it. We'll then connect you directly to the White House. But please act today. Because if you don't help realign the President, we know of some lobbyists who will be glad to do it for you.

1. President Clinton launched his initiative on race, called "One America in the 21st Century," to help build a stronger, more just, and more united American community, offering opportunity and fairness for all Americans. The President's initiative is a combination of constructive dialogue, study, and action. It is examining the current state of race relations and our common future, looking at the laws and policies that can help to ensure we remain One America, and enlist individuals, communities, businesses and government at all levels in an effort to understand our differences as we appreciate the values that unite us.

2. The President has announced that he will propose meaningful and realistic actions to address the problem of global climate change, including setting limits on U.S. emissions of the gases that cause global warming. The President has also said that any response to this problem must maintain economic growth and that it must include all nations, developed and developing, as part of the solution.

1. Approve	179	64.4%
2. Disapprove	69	24.8%
3. Unfamiliar	16	5.8%
4. Undecided	13	4.7%

3. Do you support the renewal of the President's traditional authority to negotiate trade agreements and break down unfair foreign barriers to American products -- currently referred to as "fast track"? The trading authority -- which Congress has granted every President since 1974 -- gives the President the power he needs to negotiate tough and fair trade agreements by ensuring Congress will vote on those deals without amending them.
