

The SENIORS COALITION

Protecting the Future You Have Earned

VIA FACSIMILE

'97 OCT 8 PM 1:56

Todd Stern
Assistant to the President and Staff Secretary
The White House
1600 Pennsylvania Avenue NW
Washington D.C. 20500

Dear Todd;

I'm writing to you as a follow-up to the meeting that I and a few other members of the Global Climate Information Project had with you on September 9th concerning the Global Climate Treaty. As I mentioned at that meeting The Seniors Coalition is a non-partisan, non-profit advocacy organization representing over 2.4 million older adults and their families, and we are deeply concerned about the effect this treaty will have on older Americans. Given that concern, I and the others requested an invitation to the October 6 educational event concerning the Global Climate Treaty. The Seniors Coalition has not received that invitation and we are concerned that there has either been an oversight or the President is not concerned with the impact this treaty will have on older Americans. I trust the latter is not the case and urge you to contact me at your earliest convenience to discuss our invitation. We need to work together on this matter and excluding us from the discussion is counter productive. Our magazine, which is read by over 1 million senior Americans, will go out the end of this month with the lead article dealing with the Global Climate Treaty. I want to be able to report to our members and all older Americans that you are working with us to resolve this issue. It is imperative that the dialogue be open and inclusive especially given the decision by CNN to pull our informational ads which further limits the national debate that President Clinton called for concerning this issue.

For your information I have enclosed a photocopy of a *Roll Call* article citing us as one of the most effective advocacy organizations in Washington.

Again, please contact me at your earliest convenience. I look forward to attending the conference.

Sincerely,

Thair R. Phillips
Chief Executive Officer

The 104th's Lobbyist 'In Crowd': a New Pecking Order in Special-Interest Washington

By Alice A. Love

The best that many right-leaning special interest groups could hope for in past Congresses was a sympathetic smile and shrug from the Republican ranking members and minority leaders who dwelled with them in political exile.

But today, with the GOP in the majority, representatives of the major conservative and business lobbies are at conference tables with the Speaker of the House, drafting legislation that often is delivered directly to the floor.

In a sign of this new influence, House GOP Conference Chairman John Boehner (Ohio) and the Senate GOP's "Coalitions Whip," Paul Coverdell (R-Ga), have aides designated specifically to work with special-interest groups sympathetic to Republican causes.

Lobbyists for these groups meet weekly in Boehner's and Coverdell's offices to build and mobilize private-sector coalitions — such as Project Relief on regulatory reform and the Coalition for America's Future on tax cuts — that help the GOP leadership with everything from media relations to whipping Members on key votes.

What follows is a listing — based on informal polling of Washington lobbyists, Members of Congress, and Hill staffers — of the new pecking order in special-interest Washington: the ten groups that have gained the most in the 104th Congress.

National Federation of Independent Business

Christian Coalition

National Association of Wholesaler-Distributors

Citizens for a Sound Economy

US Chamber of Commerce

National Rifle Association

Americans for Tax Reform

Independent Insurance Agents of America

Alliance for Competitive Communication

Seniors Coalition

Major Issues: Leads a coalition on Medicare reform for Republican leadership; capital gains tax reductions; Social Security balanced budget amendment; health care reform; upcoming Federal Drug Administration reform proposals.

Top Lobbyists: Paul Bramell, CEO; Jack Hansen, vice president, government affairs and former executive director of the American Conservative Union; Kern Smith, assistant Commerce Secretary for the Kennedy and Johnson Administrations; Jay Hopkins, editor "The Senior Class" newspaper; former Rep. Stan Parris (R-Va).

Key Member Contacts: Sens. Paul Simon (D-Ill), Orrin Hatch (R-Utah), Larry Craig (R-Idaho); GOP leadership, freshman class; conservative Democrats.

PAC Giving: None.

Speaker Gingrich first announced his intention to reform Medicare at a Seniors Coalition event in April. Since then, the group has used some rather creative lobbying techniques in anticipation of the Medicare battle this fall.

Before Congress recessed for its August break, for instance, the Seniors Coalition offered Members the chance to videotape and get still photos taken of a pledge to favor Medicare reform. The coalition then provided copies of the film so that Members could send the clips to local media outlets. More than 100 House Members and dozens of Senators showed up.

Though it's often referred to as the conservative counterpart of the American Association of Retired Persons, Hansen begs to differ.

"We are not a benefits-driven organization, but a pure advocacy group," he said, which guarantees that the membership of the Seniors Coalition are a politically curious and active lot — in other words, regular voters.

And to keep those voters informed, the coalition has a 40-page bimonthly newspaper, "The Senior Class," which provides "training" about how to get involved in political campaigns and the public policy debate.

Mr. Todd D. Stern
Assistant to the President
and Staff Secretary
The White House
1600 Pennsylvania Avenue, N.W.
Washington, DC 20500

Dear Mr. Stern,

I understand that the President will host a meeting at the White House in early October 1997 to gather input from industry and others on potential U.S. government positions at the upcoming Conference of the Parties to the United Nations Framework Convention on Climate Change. The U.S. cement industry would like to participate in this meeting.

These negotiations are of keen interest to the cement industry, as the cement manufacturing process is highly energy intensive. Large amounts of coal and other fuels are combusted to produce cement, and, as a consequence, the cement industry currently accounts for approximately 1.5% of the country's aggregate emissions of carbon dioxide. Substantial near-term increases in energy costs, directed at reducing these emissions, could have negative consequences for the U.S. industry. However, other longer-range approaches could be more acceptable to the industry.

Since the mid 1970s, the cement industry has become much more energy efficient and has reduced its carbon dioxide emissions. Additional reductions are possible, provided they are orchestrated in a manner that allows the industry to scale back emissions while remaining economically viable. Indeed, through APCA, individual cement companies responsible for over half of U.S. production have joined EPA and DOE's *Climate Wise* voluntary greenhouse gas emission reduction program.

The cement industry is in a unique position to provide the Clinton Administration with constructive insight on the climate change negotiations. APCA would, therefore, very much appreciate an invitation to the upcoming meeting so that one of our members can participate. I also sent an invitation request to Linda Moore in the White House Office of Political Affairs.

Please call me at 202-408-9494 to discuss this further. Thank you for your help.

Sincerely,

A handwritten signature in dark ink that reads "Andrew T. O'Hare". The signature is written in a cursive, flowing style.

Andrew T. O'Hare, P.G.
Vice President, Environmental Affairs

COMMITTEE FOR A CONSTRUCTIVE TOMORROW

'97 SEP 4 AM 11:24

August 29, 1997

Mr. Todd Stern
Assistant to the President and Staff Secretary
The White House
1600 Pennsylvania Avenue, N.W.
Washington, D.C. 20500

Dear Mr. Stern,

We understand that the White House will be conducting a conference on the issue of global climate change on October 6, 1997. Our non-profit educational organization, the Committee For A Constructive Tomorrow (CFACT), has been following this issue with quite a bit of interest for a number of years. I would therefore like to submit my name for your consideration as an attendee to the event.

Our organization is supported by an advisory board of more than 40 top scientists and experts from around the world, and has in excess of 30,000 citizen supporters from coast to coast. We believe the issue of climate change is an especially important one with a great potential impact to our nation, and therefore believe CFACT should have the opportunity to make its voice heard in the Clinton Administration's decision-making process on this issue.

We appreciate your prompt attention to this request and look forward to hearing back from you soon in order that I might make arrangements to attend the meeting.

Sincerely,

David Rothbard
President

Mr. Todd D. Stern
Assistant to the President and Staff Secretary
The White House
1600 Pennsylvania Avenue N.W.
Washington, DC 20500

Dear Mr. Stern:

As you know, Curtis H. Barnette, Chairman and CEO of the Bethlehem Steel Corporation, participated in the global climate meeting with President Clinton on August 4, 1997. During that meeting, discussions indicated that there would be future meetings with the White House to further discuss the global climate issue.

We understand that you are planning a global climate conference on October 6, 1997 that can be attended by invitation only. The purpose of this letter is to request an invitation for Bethlehem Steel. The global climate issue is extremely important to the company as well as the steel industry. We believe that the conference should have an adequate level of participation by the steel industry because of the potentially high impact of this public policy issue on energy intensive industries such as steel.

An invitation for Bethlehem Steel can be sent to me. Your favorable consideration of this request is very much appreciated.

Sincerely,

A handwritten signature in dark ink, appearing to read "ME Carino", written over a horizontal line.

The White House
1600 Pennsylvania Avenue N.W.
Washington, DC 20500

'97 AUG 29 PM 12:18

Dear Mr. Stern:

We understand that the Clinton Administration will be holding an invitation-only global climate conference in Washington on October 6, 1997. On behalf of the American Iron and Steel Institute (AISI), I would like to request that the following be invited to this conference to represent AISI.

Mr. Bruce A. Steiner
Vice President, Environment and Energy
American Iron and Steel Institute
1101 17th Street N.W. - Suite 1300
Washington, DC 20036
Fax No. 202-463-6573

The policies and actions of the Administration on the global climate issue are of great interest to AISI, whose members account for about 70% of the steelmaking capacity in North America. As you know, the industry was one of six energy-intensive industries included in the recently released DOE-sponsored study on the effect of higher energy prices associated with global climate policies. We believe it is important that we have the opportunity to be part of the U.S. decision-making process in this matter.

Sincerely,

Andrew G. Sharkey, III

Business**
SURVIVAL
Committee

September 3, 1997

Mr. Todd Stern
Assistant to the President and Staff Secretary
The White House
1600 Pennsylvania Avenue, NW
Washington, DC 20500

Dear Mr. Stern:

I have become aware that Clinton Administration is holding an invitation-only Climate Change Conference in Washington, D.C. on October 6, 1997. As I hope you are all aware, America's small business sector has a tremendous stake in the outcome of the proposed Global Climate Treaty. Therefore, I hereby submit my name for immediate consideration as an attendee to represent the interests of small businesses at this event.

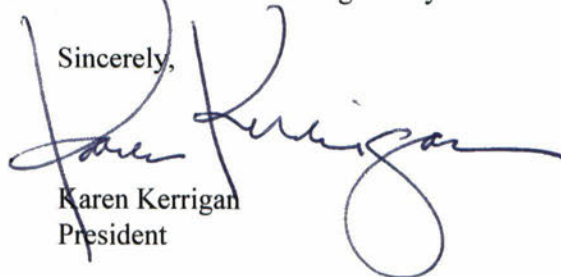

I understand alliances of big businesses, such as the Business Council for a Sustainable Environment (BCSE), will likely be held forth by the White House both during and after this event as "responsible" industry participants. We understand such praise is earned on the basis they support ratification of a treaty including binding requirements upon the United States to, effectively, reduce manufacturing and other industrial and commercial processes, irrespective of whether it includes similar requirements for other major trading partners such as China, South Korea, Brazil, India, and Mexico.

Unlike the general public to date, we are aware of the common benefits curiously to be reaped by these window, refrigerator, air condition and temperature control manufacturers, and natural gas companies among others. The appearance of big business successfully petitioning the government to enter into a treaty requiring a nation's own populace to expend their limited hard earned resources on replacing appliances, etc., would be a sordid story indeed. Avoidance of the shame unavoidable from such an appearance is one reason broad participation in the White House's efforts is so essential.

Therefore, given this posture of certain big businesses, their transparent shared goal, and the motives of business leaders invited to similar events to date (among which there is significant overlap), I therefore respectfully request inclusion in the October Climate Change Conference. I believe it would be a travesty of the democratic process to use entities, seeking to petition the government for a requirement that citizens spend limited resources on their products, as props in achieving a policy-driven, not science-based, international agreement with serious domestic consequences.

Achieving the most honest, inclusive discussion available on the topic is critical to the job-creating sector of the economy, as it is to all Americans. I look forward to hearing from you.

Sincerely,

Karen Kerrigan
President

White House
1600 Pennsylvania Avenue
Washington, D.C. 20500

Dear President Clinton:

This postcard is from UAW Local 1250 at the Brook Park, Ohio Ford plant. They held a press conference yesterday asking you to please tell them the effect of the U.N. Climate Change Treaty prior to signing it. Specifically, they would like to know the economic impact on Ohio.

I offered to send it to you (I was at the press conference) so that I could include this note. Willie Hubbard, the union President, is extremely concerned about this issue and I think you should invite him to the conference you are holding in November to discuss this treaty. From one democrat to another, it would be a really smart move.

His address is:

Mr. Willie Hubbard, President
U.A.W. Local 1250
17250 Hummel Street
Brookpark, OH 44142

I have enclosed information about the press conference and some of the coverage it received.

Thanks,

Becki Bean

MEMORANDUM FOR HONORABLE TODD D. STERN
Assistant to the President and Staff Secretary

SUBJECT WHITE HOUSE CONFERENCE ON CLIMATE CHANGE

It has come to our attention that, in addition to those individuals who otherwise will be invited by the White House to attend the October 6 White House Conference on Climate Change, it is possible for others to request the opportunity to attend.

As you may recall from the discussion you had on July 10 with officials of three of the major member companies of The Climate Council and me, our organization has been deeply involved with the issue of potential global climate change since mid-1989. The forthcoming White House Conference will be a significant event, and we very much would appreciate the opportunity to listen and learn from the views of others on a first-hand basis and to participate as appropriate.

Therefore, we request the privilege of one or more representatives of The Climate Council being allowed to attend the White House Conference.

If these arrangements can be made, please advise me of how many persons could be included, so that I, in turn, could inform you of their names on a timely basis.

Your favorable consideration of this request will be appreciated.

Sincerely yours,

Donald H. Pearlman
Executive Director

MEMORANDUM

TO: MR. TODD STERN
FROM: KELLY SIMS *KMS*
SUBJECT: POSSIBLE INVITEES TO WHITE HOUSE CONFERENCE
DATE: AUGUST 25, 1997

I understand that you may find it useful to have a list of potential invitees for the White House Conference on Climate Change. We would encourage you to invite a very diverse group of people with varying interests and regional breadth. This preliminary list is probably not complete, nor in any particular order. Since you have the list from the previous science event, I've endeavored to only add really good scientists at the end who did not participate in that event. I have not included the environmental NGOs here in town because I assume you know who we are. Obviously, Ozone Action would be pleased to participate. Please feel free to contact me if you have questions about any of these people.

Name	Background	Phone/Fax
Mr. Jessie Marsh	Former Waterman on the Chesapeake Bay. Has joined the Chesapeake Bay Foundation as an educator because his island (Smith Island) is disappearing due to sea-level rise. He is a powerful speaker and directly affected by sea-level rise. Has developed a slide show.	410-397-8173/8903
Mr. Craig Helsing	Vice President of BMW (US) Holding Corp. Is articulate on climate change and on BMW's vision for zero emission vehicles and alternative fuel technologies.	202-872-3822/3826

Ozone Action
1636 Connecticut Avenue, NW Third Floor Washington, DC 20009

MEMORANDUM

TO: Ms. Linda Moore
Special Assistant to the President
Office of Political Affairs

FROM: Peggy Hudson and Andy O'Hare

RE: UPCOMING WHITE HOUSE CLIMATE CHANGE MEETING

We understand that the President plans to host a meeting at the White House in early October 1997 addressing the issue of climate change. The U.S. cement industry would be very interested in participating in this meeting.

We have been told that the meeting is being coordinated to seek input from industries and other interest groups on the U.S. government's perspectives/positions being advocated before the United Nations Framework Convention on Climate Change. Members of this Convention will be meeting in Kyoto, Japan in December, where it is anticipated that some long range objectives for addressing climate change will be negotiated.

These negotiations are of keen interest to the cement industry, as the cement manufacturing process is very energy intensive. Large amounts of coal and other fuels are combusted to produce cement, and as a consequence, the cement industry currently accounts for approximately 1.5% of the country's aggregate emissions of carbon dioxide. Significant, near-term increases in energy costs directed at reducing these emissions, could have very negative consequences for the U.S. industry. However, other longer-range approaches could be more acceptable to the industry.

Since the mid 1970s, the industry has become much more energy efficient and has reduced its carbon dioxide emissions. Additional reductions are possible, provided they are orchestrated in a manner that allows the industry to reduce emissions while remaining economically viable. Indeed, APCA has arranged a unique participation scheme in EPA and DOE's *Climate Wise* Program. *Climate Wise* is a voluntary energy efficiency program. The cement industry is the first in the U.S. to join the Program through its trade association.

We believe that the cement industry is in a unique position to provide the Clinton Administration with constructive insight on the climate change negotiations. APCA would, therefore, very much appreciate an invitation to the upcoming meeting so that one of our members may participate.

Please do not hesitate to contact either of us to discuss this further. We may be reached at (202) 408-9494. Thanks for your help!

The Honorable Todd Stern
Climate Change Task Force

BY FAX, Page One of Two
Attn: Jonathon

Dear Todd:

As the White House continues its preparations for the Climate Change Conference scheduled for October 6, 1997, I wanted to offer a list of invitees from the natural gas, renewable energy and energy efficiency communities that we would consider to be important players.

Bob Catell	Chairman	Brooklyn Union/LILCO
Ken Lay	Chairman	Enron
Bill Wood	Chairman	Pacific Enterprises/So. Cal. Gas
Michael Marvin	Exec. Dir.	BCSE
Bob Stempel	Chairman	Energy Conversion Devices
John Bryson	Chairman	Edison International
Dave Parker	President	Amer. Gas Assn.
Glen Hiner	Chairman	Owens-Corning
Charles L. Henry	Chairman	Johns-Manville
Jan Schori	Gen. Manager	Sacramento Municipal Util. Dist.

Several business leaders (not at the CEO level) continue to be instrumental in helping the BCSE chart its course on climate change policy:

Terry Thorn	Senior VP	Enron
Jim Wolf	Vice Pres.	American Standard/Trane
Ken Mentzer	President	N. Amer. Insulation Manuf. Assn.
Scott Sklar	Exec. Dir.	Solar Energy Industries Assn.
David Nemtsov	President	Alliance to Save Energy
Mark Stanga	Vice Pres.	York International
Jared Blum	President	Polyisocyanurate Insulation Manuf. Assn.
Ken Karas	President	Enron Wind Energy Corp. (formerly Zond Systems)

In addition to these names, I would like an opportunity to make a presentation to the Conference, focusing on clean energy technologies and the role they can play in climate change mitigation.

Finally, the Council is in the planning stages of an event that will complement your Conference, and is focusing on a reception and dinner (or dinner only) at a hotel near the White House. Vice President Gore and Secretary Pena will be the invited guests from the Administration. I hope to work with you, Dirk and Judy to ensure that this event strengthens the message of the conference that many businesses are ready to support a reasonable, responsive treaty on climate change.

Thank in advance for your consideration. Please contact me if you have any questions or would like additional information on these or others within the clean energy community who could play an important role in the White House Conference.

With best wishes,

A handwritten signature in black ink, appearing to read "Michael", written in a cursive style.

Washington, D.C. 20500

Dear Mr. Stern:

I have been advised that the Clinton Administration Climate Change Conference on October 6, 1997 is by invitation only. I would like to be given consideration as an attendee. As you know, in addition to my API position, I also chair the Global Climate Coalition.

The decision made by the Administration on its position and negotiating strategy on this important issue has huge ramifications for this country and for my organization and its members. I believe that I can continue to make a contribution during the decision-making process. Please respond to me at the address listed above so that I can make arrangements to attend.

Sincerely,

WH Invites

Washington, D.C. 20500

'97 SEP 8 PM 1:53

Dear Mr. Stern:

I understand the White House is holding a conference on climate change in Washington, D.C. on October 6, 1997. I would like to attend.

As a member of the Environmental Protection Agency's Acid Rain Advisory Committee, I participated in a very successful interchange between government, industry, and non-government organizations. The resulting acid rain program has been heralded as an example of how markets should be used to achieve environmental objectives.

Clearly, the coal industry has many concerns about the potential impacts of any climate change treaty. However, it is critically important that all stakeholders understand the full range of concerns involved, particularly with an issue as far reaching as climate change. I would like the opportunity to participate in the White House global climate change conference.

If you or your staff need to call me, I can be reached at 804-788-1872. I look forward to hearing from you.

Sincerely,

Jerry M. Eyster
Vice President — Corporate Development

September 2, 1997

Mr. Todd D. Stern
Assistant to the President and Staff Secretary
The White House
1600 Pennsylvania Avenue N.W.
Washington, DC 20500

Dear Mr. Stern:

As you know, Curtis H. Barnette, Chairman and CEO of the Bethlehem Steel Corporation, participated in the global climate meeting with President Clinton on August 4, 1997. During that meeting, discussions indicated that there would be future meetings with the White House to further discuss the global climate issue.

We understand that you are planning a global climate conference on October 6, 1997 that can be attended by invitation only. The purpose of this letter is to request an invitation for Bethlehem Steel. The global climate issue is extremely important to the company as well as the steel industry. We believe that the conference should have an adequate level of participation by the steel industry because of the potentially high impact of this public policy issue on energy intensive industries such as steel.

An invitation for Bethlehem Steel can be sent to me. Your favorable consideration of this request is very much appreciated.

Sincerely,

Mid-Continent Oil & Gas Association

Washington, DC 20500

Dear Mr. Stern:

I understand that the Clinton Administration is holding, by invitation only, a Climate Change Conference in Washington, DC on October 6, 1997. I would like to submit my name, Albert Modiano, Vice President, Mid-Continent Oil & Gas Association, for immediate consideration as an attendee.

The Mid-Continent Oil & Gas Association represents thousands of individuals covering the full spectrum of the domestic petroleum industry. The Association represents producers of all sizes from major oil and gas companies to small family-run businesses.

The decision made by the Administration on its position and negotiating strategy on this important issue has huge ramifications for this country and for me, and I believe that I should have the opportunity for input in the decision-making process. Please respond to me at the address listed below so that I can make arrangements to attend.

Thank you for your consideration.

Sincerely,

Albert L. Modiano

The President
The White House
Washington, DC 20502

Dear Mr. President:

The members of the National Petroleum Refiners Association (NPRA) have a keen interest in the international negotiations taking place pursuant to the U.N. Framework Convention on Climate Change. Our member companies include virtually all of the petroleum refining and petrochemical manufacturing interests, large and small, in the United States. These industries will, of course, be directly affected by any policy adopted to reduce emissions of greenhouse gases.

We are especially interested in contributing to the dialogue that will take place at the White House Conference on Climate Change on October 6th. The Chairman of NPRA is Mr. Roger Hemminghaus, Chairman and CEO of Ultramar Diamond Shamrock Corporation, one of the most progressive independent petroleum refining companies in the country. I would like to suggest to you that Mr. Hemminghaus be among those invited to participate in the Conference.

Should there be any questions regarding this request, please have your staff call me at any time. We look forward to being a part of this important proceeding.

Sincerely,

Sent via FAX: (202) 456-2215

Dear Mr. Stern:

I write as follow-up to a series of inquiries I have fielded from White House Climate Action Task Force staff, as well as a response to the interest of our partner companies in the sustainable energy industry. I understand that you are chairing the organizing committee for the October 6 White House Conference on Climate Change, and I would like to express my interest in participating as a representative of the sustainable energy industry, and as an expert on developing country climate action.

Briefly, my participation is important from two perspectives:

- As President of the International Institute for Energy Conservation, I lead IIEC's efforts to build new markets for energy efficiency technology, to assist developing countries in implementing market-based policies for climate action that spur environmentally-sustainable economic development, to communicate within the Framework Convention process the demonstrated viability of such approaches, and to build awareness of climate-friendly actions with economic benefit in the business community.
- As Chairman of the Export Council for Energy Efficiency, I coordinate the only trade group assisting the energy efficiency industry to capitalize on the global market opportunity. ECEE serves as the industry-driven implementing arm of the U.S. government's Committee on Energy Efficiency Commerce and Trade.

The development of global markets for sustainable energy is central to IIEC's mission. In recognition of this, we have worked directly with over 900 U.S. energy efficiency companies over the past ten years to capitalize on the development of this \$84 billion market while building an environmentally-sustainable global economy. I look forward to continuing to work with the Administration in helping U.S. industry play a key role in this immediate global market, and in adapting to the opportunities of the emerging market of tomorrow.

Dear Mr. Stern:

It has come to my attention that the Clinton Administration is holding an invitation-only Climate Change Conference in Washington, DC on October 6, 1997. I would like to submit my name, Dr. Aston A. Hinds, Vice President of Dresser Industries, Inc., for immediate consideration as an attendee.

The decision made by the Administration on its position and negotiating strategy on this important issue has huge ramifications for this country and for me and I believe that I should have the

THE WHITE HOUSE
WASHINGTON

September 18, 1997

Mr. John Sweeney
President
AFL-CIO
815 16th Street, N.W.
Washington, D.C. 20006

Dear John:

It is my great pleasure to invite you to join me at the White House Conference on Climate Change: *The Challenge of Global Warming*, to be held October 6 at Georgetown University.

Climate change is one of the most important issues facing this and future generations. The science is real -- we know enough to recognize the need to begin taking serious actions to limit our greenhouse gas emissions. Just as important, we must react sensibly. Any response we choose must be consistent with sustained economic growth and must ensure that all nations of the world participate in a meaningful, equitable way.

This conference will bring together a range of national leaders to explore the scientific, economic, and international aspects of climate change. Throughout the day, you will hear from panels of experts in these areas and have the opportunity to speak with senior members of my Administration.

The goals of this conference are twofold: first, to help improve the understanding of climate change among all aspects of American society; and second, to inform U.S. policy as we work to develop an appropriate response. This effort is particularly timely, as we prepare for an international climate change conference in December, at which we hope to sign an agreement limiting emissions of greenhouse gases.

I hope you will be able to attend the conference, and I am enclosing a fact sheet with more detailed information and R.S.V.P. instructions. I look forward to meeting with you on October 6 and to hearing your views.

Sincerely,

Bill Clinton

COMPETITIVE ENTERPRISE INSTITUTE

WH Invites
'97 SEP 29 AM 9:17

September 26, 1997

President William J. Clinton
The White House
Washington, DC 20500

Dear Mr. President:

I want to commend you for your decision to host a White House conference on global climate change, in Washington, on October 6. This event has the potential significantly to improve public understanding of the scientific, economic, and political issues connected with the ongoing negotiations over the Kyoto Protocol.

Such potential can be realized, however, only if participation in your conference is open to the full spectrum of informed opinion and recognized expertise on these complex subjects. Unfortunately, it appears that invitations are now being extended predominantly, if not exclusively, to those who advocate increased government control over U.S. and world energy markets. The public interest would be poorly served by such an exercise in "preaching to the choir." It goes without saying that the associated taxpayer expenditures would be unjustified.

In the interest of assisting you and your staff in making this event a White House conference truly worthy of the name, I urge you to include, in numbers equal to the Climate Treaty's proponents, distinguished individuals drawn from the ranks of the scientific, business, public interest, and national security communities, who have expressed skepticism about the science of global warming and/or the mandatory energy-use restrictions the Treaty would entail.

For example, a strong case can be made that the best way to prepare for the possible consequences of climate change is not to restrict wealth creation or lock mankind into politically-correct paths of economic and technological development but to improve the overall resilience and adaptability of human societies by making the world freer and, hence, wealthier. That viewpoint, however, has been all but ignored by most commentators and policy makers. The White House Conference would be an ideal occasion to give this neglected alternative a fair hearing. I have taken the liberty of attaching an illustrative list of prominent individuals who could help provide balance to the proceedings.

We at the Competitive Enterprise Institute hope that you share our desire for a genuine and informed debate on climate change prior to the completion of the Kyoto Protocol and decisions about whether the United States will be subject to its constraints. If so, we look forward to working with you to ensure the success of the upcoming conference.

Sincerely,

Fred L. Smith, Jr.

The President
The White House
1600 Pennsylvania Avenue
Washington, D. C. 20500

Dear Mr. President:

I was delighted to learn that you will be holding a special White House conference in the near future exploring the problem of global climate change. As a past President of the National Academy of Sciences, I have always encouraged an interaction between scientific specialists and political leaders and have been encouraged by your interest in bringing technical experts on global change to the White House for consultation and guidance on the critical issue of global warming.

The extent of human impact on climate remains a highly complex scientific matter and so I would assume that your conference will include as participants a range of technical specialists. As was made clear in the most recent report for the UN's Intergovernmental Panel on Climate Change, there are great uncertainties in understanding the impact of human actions, such as fossil fuel burning, on global climate. I would therefore urge you to invite the following individuals to this conference. Each is highly respected in fields related to climate change and their absence from the White House conference will fundamentally undermine its credibility.

Dr. Roy Spencer

Washington, DC 20500

Dear Mr. Stern:

I recommend that a representative of the National Center for Atmospheric Research (NCAR), located in Colorado, be appointed to the panel for the October 6 White House Conference on Climate Change. As I understand it, the panel has not yet been finalized.

NCAR is home to many esteemed and accomplished scientists. In addition to their work at the Center, NCAR staff serve in several noteworthy capacities, including the Intergovernmental Panel on Climate Change, the International Scientific Steering Group for the World Climate Research Programme's Climate Variability and Predictability Programme, the Atmospheric Observations Panel for Climate of the Global Climate Observing System and the Scientific Advisory Committee for NSF's Climate Modeling and Analysis Program.

Clearly, NCAR employs internationally renowned authorities on modeling the earth's climate system. Therefore, I encourage you to give every consideration to having NCAR represented at the October 6 conference.

Thank you for your time and your consideration of this request.

Sincerely,

Ben Nighthorse Campbell
U.S. Senator

'97 SEP 29 AM 9:16

Dear Mr. Stern:

I understand that representatives from the University Corporation for Atmospheric Research have contacted you to express their interest in NCAR scientists participating in the White House Conference on Global Change on October 6. My office frequently relies on the work of NCAR scientists, and I've consistently found their work to be thorough, insightful and timely. A Conference on Global Change would be sorely lacking without a representative from the National Center for Atmospheric Research. I encourage you to invite an NCAR scientist to take part.

Dr. Kevin Trenberth, although not known to me personally, has a reputation among his peers as an articulate, politically savvy scientist who could be particularly effective at the Conference. Dr. Trenberth heads NCAR's Climate Change Analysis Section and has played a key role in IPCC scientific assessment activities. I believe Dr. Trenberth, or any of the other NCAR scientists that were mentioned in correspondence to Bill Antholis at the State Department, would be great additions to the Conference.

Thank you for your consideration. Please call my assistant Kelly Nelson if I can provide further information.

Sincerely yours,

David E. Skaggs

MEMORANDUM

September 29, 1997

TO: Todd Stern

FROM: Jon Haber

RE: White House conference

Carl Wagner (828-9140) highly recommends inviting the following individual to the October 6 White House Conference on Climate Change:

Mr. Gerhard Neumeir
Founder, Chair and CEO
Ecology and the Environment
716-684-8060

This is a \$100 million environmental engineering company specializing in toxic waste clean-up and fuel conversion, with substantial experience overseas.

It is important to call Neumeir today, as he will be traveling later this week.

Carl may have additional names for you.

Dear Mr. Stern:

On behalf of the 250,000 members of Citizens for a Sound Economy (CSE), I am writing to request that a representative of our organization be invited to the President's global climate change conference on October 6, 1997.

CSE is a non-partisan grassroots citizen advocacy group that promotes market-based solutions to public policy problems. Our policy analysts have been working extensively on all aspects of the global warming debate, and our membership is concerned about the enormous implications from the consumer's point of view of the treaty currently being negotiated. We would, therefore, welcome the opportunity to participate in the conference discussions.

Thank you for your consideration of this request. I look forward to hearing from you at your earliest convenience.

Sincerely,

Paul A. Beckner
President

Washington, D.C. 20500

Dear Mr. Stern:

It has come to my attention that the Clinton Administration is holding an invitation only Climate Change Conference in Washington, DC on October 6, 1997. I would like to submit my name, C. M. Van Eman, President of the Davis Mountains Trans-Pecos Heritage Association, for immediate consideration as an attendee.

The decision made by the Administration on its position and negotiating strategy on this important issue has huge ramifications for this country and for me and I believe that I should have the opportunity for input in the decision making process. Please respond to me at the address listed below so that I can make arrangements to attend.

Sincerely,

C. M. Van Eman

Todd Stern
White House Task Force on Climate Change
Jackson Place, N.W.
Washington, D.C. 20503

Dear Mr. Stern:

On behalf of the more than 40 national business, environmental, consumer, and energy policy organizations that comprise the Sustainable Energy Coalition, I am writing to offer the following names for consideration for participation in the October 6 White House Conference on Climate Change.

Each of these individuals is well qualified to discuss how renewable energy and energy efficient technologies can play a major role in meeting the Administration's climate change goals while simultaneously creating domestic jobs, reducing energy imports, improving U.S. competitiveness in international markets, and addressing other environmental concerns.

We offer these names, in part, because we are concerned that the industries that are best positioned to provide cost-effective solutions to the challenge of reducing greenhouse gas emissions are presently under-represented among those being considered for invitations to the Conference.

They are:

- 1.) Ken Karas, CEO, Enron Wind Corporation; Tehachapi, CA (805-823-6700)
- 2.) Mason Willrich, Chairman of the Board, Energy Works; MD
- 3.) Brian O'Sullivan, CEO, Cannon Wind Energy Company; Tehachapi, CA (805-822-7524)
- 4.) Bob Kelly, Director of Board, Enron Renewable Energy Corp.; Houston, TX (713-853-7494)
- 5.) Michael Bergey, Bergey Wind Power; Norman, OK (405-364-4212)
- 6.) Peter Beebe, Pres. BP Solar, Inc.; Fairfield, CA (707-428-7800)
- 7.) Blake McBurney, Pres., McBurney Corporation
- 8.) Scott Weiner, Pres., Ballard Power Generating Systems; NJ
- 9.) Jonathan Weisgall, Vice Pres., Callenergy Company; Washington, DC (202-828-1378)
- 10.) Robert Suttmiller, Pres., International Fuel Cells; South Windsor, CT (860-727-2220)

11.) Tsvi Meidav, Pres., Trans-Pacific Geothermal Corp.; Oakland, CA (510-763-7812)

12.) Mike Jackson, Esq., Quincy Library Group (biofuels); Quincy, CA

In addition to industry leaders, we would like to recommend some local government leaders who are engaged in the promotion of sustainable energy technologies for their communities.

1.) Frank Fairbanks, City Manager - Tucson, AZ (602-262-7958; fax: 602-261-8327)

2.) Joseph Patrick Reilly, Jr., Mayor - Charleston, SC (803-577-4922)

3.) Valerie Lemmie, City Manager - Dayton, OH (937-443-3600; fax: 937-443-4298)

4.) Wellington Webb, Mayor - Denver, CO (303-575-2721; fax: 303-575-2329)

5.) Randy Johnson, Chair - Hennepin County Commission; President - National Association of Counties (612-348-3088; fax: 612-348-5295)

6.) Tom Buckley, Chittenden County Commissioner - Westford, VT (802-865-7339; fax: 802-865-7400)

7.) Harvey Ruvlin, Clerk of Courts - Dade County, FL (305-375-3333; fax: 305-375-2485)

We would be happy to provide additional information for each of these nominees.

We look forward to hearing from you further.

Sincerely,

Ken Bossong,

September 4, 1997

Dear Vice President Al Gore,

This is a follow up on my fax to your office August 18, 1997, attention Mike Orfini, concerning the publication and distribution of our book:

PEOPLE REALLY DO KNOW THE CLIMATE IS CHANGING
15-Year Climate Stabilization Program
for
The United Nations

The message, as noted in the August 18 fax, was:

"Our book, laying out targets for each country on forest and energy programs, will, in its way, be the key international document ending this century."

The book will be 100 pages or less. The main subject is the set of charts providing figures for each country, based on the history of their forests and carbon dioxide emissions. This will be the first time that a focus is given, by country, for a 15-year intense program bringing the atmospheric carbon dioxide level back to the 1900 level. This is the extent of the problem to stabilize climate and stop the accelerating extremes of floods, storms, heat spells, freezing, and general rural and urban destruction.

I was able to give you a copy of our 1992 book Whose World to Lose? and other papers when you were here three or four years ago in Oakland for a fund raiser for Rep. Ron Dellums -- at the time you shook hands on becoming an Honorary Member of the Earth Regeneration Society. Back in 1992 Leon Panetta looked through this book with me and termed it the "essential document in the U.S. at the right time."

Now, we are putting forth this set of targets, for a new book. It has been five years since Rio, and the Climate Treaty. Many resource and human conditions have deteriorated for the five years since 1992. Internationally, we may now be at a time of a major turn-around. The new ERS book, with targets by country, can be the fulcrum for climate stabilization -- our motto "soil, forest and energy work."

Therefore, can you arrange for me to be a participant at the October 6 Conference on Climate Change that President Clinton is calling? I am faxing to you pages 14, and 21-23 from the draft of a preliminary portion of the book, which provide some background on our work for climate stabilization.

The purpose of this fax to you is (1) to make our best effort to get our book out by mid-September, (2) get the mailing list of those who will attend the October 6 meeting so that we can send them advance copies of our book, and (3) arrange for me to be in attendance October 6.

Further: Efforts are underway now to organize final demonstrations and manufacture of the new "electronic stack scrubber" which, according to early tests, will allow burning of coal and oil with no carbon dioxide going into the atmosphere. This is key information for the coal and oil industries, the U.S. economy as a whole, and the public at large.

Sincerely yours,

A handwritten signature in cursive script that reads "Alden Bryant". The signature is fluid and extends to the right with a long horizontal stroke.

Alden Bryant
President, Earth Regeneration Society

AB/hs

1..759

Origin of the "Rio" United Nations Summit of June 1992

Malta's Ambassador to the United Nations, Alexander Borg-Olivier, placed two resolutions in the U.N. General Assembly in 1989 which were the basis for the Rio Summit. He took this action after the all-day session in the U.N., Dag Hammarskjöld Auditorium, December 9, 1988, on the full climate change and climate stabilization.

This meeting was sponsored by the Ambassador, the Earth Regeneration Society (ERS), and with sponsorship, support and organizational assistance from Dr. Harry H. Lerner, President, Communications Coordination Committee for the United Nations (CCC/UN).

In June of 1988 ERS had sent a package of climate material to every member of the U.N. Malta, also concerned with climate change, placed a resolution in the General Assembly, September, 1988, putting forward that livable climate conditions were a human right and a human goal. This was passed unanimously by the General Assembly on December 5, 1988, four days before our joint session.

I was responsible for choosing the main speakers for December 9, and gave the closing presentation (ERS Special Paper Number 698). Portions of that paper are provided below to round out the introduction to this book.

ABOUT THE AUTHOR AND THE ERS STORY

My main work in life has been as President and part of the Earth Regeneration Society (ERS). ERS actions and results, mentioned herein, were the result of organizing, research, and publications since 1979. Part of this effort took place through the International Society for the Systems Sciences, its Climate section and publications placed annually in its Proceedings. Other material was issued through newspapers, special articles, books, and information handouts for public meetings, conferences, organizational special sessions.

The Earth Regeneration Society, Inc., (ERS) is a nonprofit public benefit corporation, established in California on April 22, 1983. The ERS is organized to educate and inform the general public about environmental issues that effect social, economic, and political systems; and to develop, support and promote scientific methods and research to address these environmental concerns for the preservation and betterment of all living things. Our primary responsibility is now to contribute to understanding and implementing climate stabilization before it is too late to achieve by human efforts.

ERS came primarily from the International Society for the Systems Sciences (ISSS), formerly the Society for General Systems Research (SGSR). Some of the ISSS members had been associated in meetings and programs of the society since the early and mid 1950's. Questions of climate change were brought up in SGSR annual meetings starting in 1982. A permanent Climate Change Special Interest Group (SIG) was established in 1985, and has been active since then. During the preparation for the U.N. Summit, in Brazil (June, 1992), the ISSS, meeting in Sweden in June, 1991, sent a statement to appropriate offices of the U.N. discussing their approach to climate change and climate stabilization. See the next section for this statement from Sweden. The section title is: "ISSS, ERS and CLIMATE STABILIZATION." The Bibliography includes climate-related publications by ISSS members.

My academic background includes B.S Mechanical Engineering (heat transfer) and M.A. Economics (economic development and industrial organization), both from the University of California, Berkeley. Industry experience has been in gas utility, heavy construction (electric power plants), and manufacturing. Other work includes research economist, input-output studies, budget analyst for a private manufacturing company, and later for semi-public and public agencies. During the later years I have been an Instructor in economics in Community Colleges. Publications are in engineering, economics and alternative energy -- U.S., U.S.S.R., and Africa.

My non-profit responsibilities are with ERS and its program. My profit-making involvement is through Alden Bryant & Associates.

and a number of companies producing or starting production of environmentally important products.

United States Representative Ronald V. Dellums, 8th Congressional District (San Francisco Bay, East side area), California, introduced me in 1992 to a public audience as the "number one ecologist in the U.S." He was referring to my background in energy and environmental efforts, which include:

1. In the mid-1970s: Board of Directors of both the Northern California Solar Energy Association, and the California Solar Energy Industries Association -- at a time when there were early actions to build solar thermal electric power plants, as well as thousands of solar units on buildings.

2. Strategic Leadership Forum (SLF), formerly The Planning Forum, and earlier Planning Executives Institute -- in which I was designated by the National Board as an Emeritus Life Associate, admitted in 1985. The full name of the organization is The International Society for Strategic Management and Planning. It has over 6,000 members, U.S. Canada, Mexico, and other countries.

My membership started in 1958, as a corporate budget officer. In the mid-1970's I chaired an AdHoc Committee on Energy in the San Francisco Chapter. Out of this group came the key participants in the first proposal for developing a 100 MW solar thermal electric power plant -- to be built for the California Water Resources Department, on their land, to pump water in this State. This project was blocked at that time by competing technology companies, but eight plants of somewhat similar design were built with private investment in Southern California by the Luz Corporation in the 1980s, for the Southern Cal Edison utility.

1992: I was one of the two delegates from the San Francisco Chapter (as a member of the Board of Directors) to a national planning conference of the SLF, in Ohio, where I provided input on environmental priorities and needed business response.

3. As a member of the Peralta Federation of Teachers (local economics instructor) I authored and helped lobby through a resolution from the Local, the Alameda County Central Labor Council, and to the National Convention of the AFL-CIO, stressing climate, food and jobs. It was included in their 1987 National Platform. This resolution had the support of Bill Sweeney (then President of the SEIU, Service Employees International Union), Richard L. Trumpka (then President of the UMW, United Mine Workers of America) and other national and California union leaders. The environmental section of the platform was passed without dissent by the Convention. Brothers Sweeney (President) and Trumpka (Secretary-Treasurer) are now national officers of the AFL-CIO.

4. 1992: I was the main author of the first bill in any Government putting forth a comprehensive soil, forest and energy program to reduce atmospheric carbon dioxide and work to stabilize the climate extremes facing us. Representative Dellums placed the bill in Congress on February 4, 1992: "Emergency Climate Stabilization and Earth Regeneration Act of 1992" H.R. 4154. It went to nine committees, and did not get acted on at that time. The situation now may be sufficiently different to get action on this or a similar bill.

5. 1988 to 1992: United Nations Summit in Rio de Janeiro, Brazil, June 1992 -- out of which we got the Climate Treaty and the Species Diversity Treaty. The 1988 actions leading up to the Summit are described in the earlier section "Origin of the 'Rio' United Nations Summit of June 1992."

The Summit +5 meetings, held recently in New York, are mentioned above in the newspaper clippings under "What the Local Press Has Been Saying."

Our work achieving "Rio" was a turning point, and so was the U.N. Summit +5 meeting in June, 1997, according to some of the press. The purpose of this book is to provide the next turning point.

The CHART, as explained in this book, is a parallel to the package mailed by ERS to every member of the U.N. in June, 1988. That package then led, with the help of Malta's, Ambassador Alexander Borg-Olivier, to our joint meeting on December 8, 1988, then finally to his two resolutions to the U.N., in early 1989, and later to the June, 1992, Summit in Rio.

The turning point, in this book, means U.N. circulation, initial review, and the beginning of regional and national CO₂ budgets, responsive to the suggested figures in this CHART. Such work can provide a basis for actions in Kyoto, Japan, at the end of this year.

Washington, DC

Sent via FAX: (202) 456-2215

Dear Mr. Stern:

I write as follow-up to a series of inquiries I have fielded from White House Climate Action Task Force staff, as well as a response to the interest of our partner companies in the sustainable energy industry. I understand that you are chairing the organizing committee for the October 6 White House Conference on Climate Change, and I would like to express my interest in participating as a representative of the sustainable energy industry, and as an expert on developing country climate action.

Briefly, my participation is important from two perspectives:

- As President of the International Institute for Energy Conservation, I lead IIEC's efforts to build new markets for energy efficiency technology, to assist developing countries in implementing market-based policies for climate action that spur environmentally-sustainable economic development, to communicate within the Framework Convention process the demonstrated viability of such approaches, and to build awareness of climate-friendly actions with economic benefit in the business community.
- As Chairman of the Export Council for Energy Efficiency, I coordinate the only trade group assisting the energy efficiency industry to capitalize on the global market opportunity. ECEE serves as the industry-driven implementing arm of the U.S. government's Committee on Energy Efficiency Commerce and Trade.

The development of global markets for sustainable energy is central to IIEC's mission. In recognition of this, we have worked directly with over 900 U.S. energy efficiency companies over the past ten years to capitalize on the development of this \$84 billion market while building an environmentally-sustainable global economy. I look forward to continuing to work with the Administration in helping U.S. industry play a key role in this immediate global market, and in adapting to the opportunities of the emerging market of tomorrow.

SURVIVAL
Committee**

September 10, 1997

Mr. Todd Stern
Assistant to the President and Staff Secretary
The White House
1600 Pennsylvania Avenue, NW
Washington, D.C. 20500

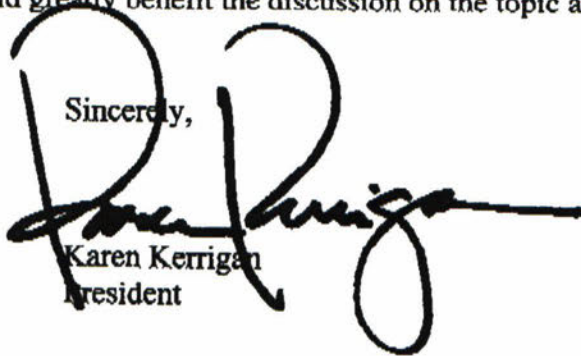

Dear Mr. Stern:

Thank you for taking the time out of your schedule to meet with me and other members of the Global Climate Information Project. The Small Business Survival Committee (SBSC) and the broad-based coalition represented at the meeting believe that the proposed treaty is the wrong way to address the global warming problem -- perceived or not.

From SBSC's perspective, we are deeply concerned about the proposed treaty's impact on the job-creating sector of the United States' economy. We thank you for allowing us an opportunity to briefly express our concerns.

Lastly, I want to again propose that the Small Business Survival Committee be invited to attend the Climate Change Conference in Washington, D.C. on October 6, 1997. Our inclusion and participation in the conference would greatly benefit the discussion on the topic and is critical to small business.

Sincerely,

Karen Kerrigan
President

September 5, 1997

Mr. Todd Stern
Assistant to the President
And Staff Secretary
1600 Pennsylvania Avenue, N.W.
Washington, D.C. 20500

Dear Mr. Stern:

On behalf of the National Mining Association I would like to nominate the following to participate in the White House Conference on Climate Change scheduled on October 6, 1997:

Mr. Douglas C. Yearley
Chairman
National Mining Association
Chairman, President & CEO
Phelps Dodge Corporation
Phone (602) 234-8146, Fax (602) 234-8151

Mr. Steven F. Leer
Vice Chairman
National Mining Association
President & CEO
Arch Mineral Corporation
Phone (314) 994-2700, Fax (314) 994-2919

Mr. Richard L. Lawson
President and CEO
National Mining Association
Phone (202) 463-2647, Fax (202) 833-1965

The National Mining Association represents coal producers, producers of the nation's metals and minerals and the organizations which support the mining industry. We look forward to the opportunity to participate in this important meeting and to exchange views on climate programs which might be the most successful.

Sincerely,

Richard L. Lawson

Dear Mr. Stern,

I have learned that the Administration is planning to hold a conference on climate change on 6th October in Washington. I respectfully request to be invited to attend your conference.

The Frontiers of Freedom Institute has become deeply involved in global climate change issues. From 19th to 21st August, the Institute co-hosted with the Australian APEC Study Centre a major international conference in Canberra, Australia titled Countdown to Kyoto: The Consequences of Mandatory Global Carbon Dioxide Emission Reductions. The conference was co-chaired by the chairman of the Frontiers of Freedom Institute, Malcolm Wallop. Speakers included the Hon. Tim Fischer, Deputy Prime Minister of Australia; the Hon. Chuck Hagel, U. S. Senator; the Hon. John Dingell, U. S. Representative; the Hon. Robert Hill, Australia's Minister for the Environment; the Hon. Duncan Kerr, Australia's Opposition Shadow Minister for the Environment; Dr. John Zillman, Director General of the Australian Bureau of Meteorology and member of the IPCC; Prof. Yohji Uchiyama of the Specialists' Committee for the Atomic Energy Commission in Japan; Prof. John Christy of the University of Alabama; Dr. Martin Manning, Project Director of the New Zealand Institute of Water and Atmospheric Research; and Dr. Tongroj Onchan, Vice President of the Thailand Environment Institute.

As policy director of the Frontiers of Freedom Institute, I was intimately involved in planning the conference, and I plan to be deeply involved in the global climate issue in the months and years ahead.

You may respond to my request to be invited at our new address: FOFI, 1100 Wilson Blvd., Suite 1700, Arlington, VA 22209, or via fax at 703 527 8388. Thank you for your attention to my request.

Yours sincerely,

Myron Ebell
National Policy Director

Todd Stern
"Climate Czar"
1600 Pennsylvania Ave
Washington, DC 20500

Dear Mr Stern,

I understand that the president will be hosting a town hall on global warming in October. As a state legislator, clergy member and concerned citizen I would like to attend this event.

This past legislative session here in Oregon, I served as the vice-chair of the House Committee on Environment and Energy. At times, mine was the only voice in favor of protecting Oregon's progressive land use laws, which have helped cut down on air pollution by containing our urban areas and limiting development in farm and forest regions. I was also part of an exciting new cooperative effort between industry, government and the environmental community which will grant Green Permits to companies to protect the environment from their own waste products.

As a pastor, I have seen too many of my parishoners fight, and lose, the battle with cancer. I find myself wondering if some of those who died would still be here if our world were less polluted. My faith tells me that we are stewards of the earth, not owners. I do not see us behaving like caretakers.

I will be calling in a few days to speak with you further. Thank you for your time and consideration.

Sincerely,

Frank Shields
State Representative

September 3, 1997

Mr. Todd Stern
Assistant to the President and Staff Secretary
The White House
1600 Pennsylvania Avenue, NW
Washington, DC 20500

Dear Mr. Stern:

I have become aware that Clinton Administration is holding an invitation-only Climate Change Conference in Washington, D.C. on October 6, 1997. As I hope you are all aware, America's small business sector has a tremendous stake in the outcome of the proposed Global Climate Treaty. Therefore, I hereby submit my name for immediate consideration as an attendee to represent the interests of small businesses at this event.

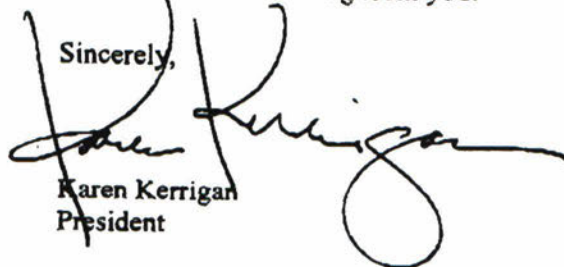

I understand alliances of big businesses, such as the Business Council for a Sustainable Environment (BCSE), will likely be held forth by the White House both during and after this event as "responsible" industry participants. We understand such praise is earned on the basis they support ratification of a treaty including binding requirements upon the United States to, effectively, reduce manufacturing and other industrial and commercial processes, irrespective of whether it includes similar requirements for other major trading partners such as China, South Korea, Brazil, India, and Mexico.

Unlike the general public to date, we are aware of the common benefits curiously to be reaped by these window, refrigerator, air condition and temperature control manufacturers, and natural gas companies among others. The appearance of big business successfully petitioning the government to enter into a treaty requiring a nation's own populace to expend their limited hard earned resources on replacing appliances, etc., would be a sordid story indeed. Avoidance of the shame unavoidable from such an appearance is one reason broad participation in the White House's efforts is so essential.

Therefore, given this posture of certain big businesses, their transparent shared goal, and the motives of business leaders invited to similar events to date (among which there is significant overlap), I therefore respectfully request inclusion in the October Climate Change Conference. I believe it would be a travesty of the democratic process to use entities, seeking to petition the government for a requirement that citizens spend limited resources on their products, as props in achieving a policy-driven, not science-based, international agreement with serious domestic consequences.

Achieving the most honest, inclusive discussion available on the topic is critical to the job-creating sector of the economy, as it is to all Americans. I look forward to hearing from you.

Sincerely,

Karen Kerrigan

Dear Mr. Stern:

It is my understanding that the White House is holding a one-day conference in Washington on October 6, to build consensus on global climate policy. I am writing to request an invitation to attend this conference.

Coalitions for America is a well-respected public policy organization that brings together on a weekly basis more than 60 public interest groups, Members of Congress and members of the press. Our coalition has a grass-roots base interested in global climate policy. On all these counts, we believe we would be a legitimate participant in any attempt to forge a national consensus on this issue, and we would greatly appreciate an invitation.

I look forward to hearing from you soon.

Sincerely,

Dear Mr. President:

As a member of the National Petroleum Refiners Association ("NPRA"), Giant has a special interest in the current international negotiations taking place to the U.N. Framework Convention on Climate Change.

Giant is an independent refiner and marketer of petroleum products with facilities in the dynamic Southwest. Our industry believes that we will be directly impacted by any policy changes to reduce emissions of greenhouses gases.

We, therefore, recommend that the Chairman of NPRA, Mr. Roger Hemminghouse, Chairman and CEO of Ultramar Diamond Shamrock Corporation, be invited to participate in the upcoming **"White House Conference on Climate Change"** scheduled for October 6th.

Thank you for your consideration of our request. If you have any questions regarding this matter, please have your staff call me. Giant and our industry will look forward to being a part of this important meeting.

Sincerely,

George Seitts
Manager, Corporate Government and Public Affairs

'97 SEP 17 PM3:36

Dear Mr. DeVol:

At the suggestion of Rafe Pomerance, Deputy Assistant Secretary for the Environment and Development at the State Department, and Dirk Forrister, Director of the White House Task Force on Climate Change Communications, I am writing to encourage you to include the National Association of Regulatory Utility Commissioners (NARUC) in the White House Presidential Conference on Climate Change scheduled for October 6, 1997. Both Messrs. Pomerance and Forrister have indicated their belief that NARUC, which represents the economic regulators of the utility industry in all 50 states and U.S. territories, would add a vital element to these most important discussions.

NARUC has been a duly registered NGO participating in United Nations FCCC deliberations for the past four years. We have worked closely with the State Department, the Department of Energy and the White House to maintain open lines of communication, to share strategy and information, and, through seminars and other fora, to keep our constituents informed of developments and United Nations negotiations. NARUC believes it important to maintain this close working relationship between the states and the federal government on this critical issue and believes it would be important for Commissioner David W. Johnson, the NARUC Delegate to the UNFCCC, Commissioner Ron Eachus, Chairman of the International Relations Committee, and Commissioner Jolynn Barry Butler, the incoming President of NARUC, who will be attending COP-3 in Kyoto, Japan, to attend the Presidential Conference on October 6.

Commissioners Johnson, Eachus and Butler would welcome the opportunity to participate in this most important conference. We look forward to hearing from you soon.

Very truly yours,

David W. Johnson

Todd Stern
Assistant to the President
The White House
1600 Pennsylvania Avenue, N.W.
Washington, D.C. 20500

Dear Mr. Stern,

I understand that the White House will be hosting a conference on October 6, 1997, to discuss global climate policies. Consumer Alert would be interested in participating in the meeting and ask that we be invited to attend.

As a national consumer group with individual members in all 50 states, Consumer Alert evaluates policy issues and educates consumers on their impact in people's everyday lives.

Earlier this year, we became concerned that information about proposals to reduce greenhouse gas emissions with binding targets and timetables and the effects of these proposals on consumers wasn't being discussed. Few particulars about what the U.S. plans to offer or agree to in Kyoto, Japan, this December have been revealed. More importantly, no information about the economic effects on consumers of substantial reductions in energy use has been forthcoming.

Under the auspices of the National Consumer Coalition — an on-going coalition coordinated by Consumer Alert, whose member groups represent 3 million consumers — we formed in May 1997 a group of 16 public policy organizations to focus on the consumer impact of global climate proposals that have been discussed.

Our conclusions: Global climate policies will have a real, substantial and painful effect on American consumers. A drastic reduction in energy use will not just affect consumers' lifestyles — it will substantially lower their standard of living.

U.S. consumers and taxpayers deserve public discussion, analysis, and debate on all aspects of the global climate treaty negotiations. They are the ones who will bear the brunt of energy restrictions, higher costs for energy, and rationing of energy through emissions trading schemes. The risks of global warming are speculative; the risks of global warming policies are all too real.

I hope that our request to participate in the October 6 meeting will be considered so that the consumer voice will be represented.

Sincerely,

Frances B. Smith

Dear Mr. Stern:

The purpose of this letter is to request an invitation to the White House Conference on Climate Change on October 6, 1997. (My address appears above; my fax number is 914-253-7895.)

I serve as Head of Delegation of the International Chamber of Commerce (ICC) to the Framework Convention on Climate Change (FCCC), as well as Chairman of the United States Council for International Business (USCIB) Climate Change Working Group. I would bring an important international business perspective to the Conference.

Thank you for consideration of this request.

Very truly yours,

CBM:vr

*Designing Business Opportunities and Mitigation Solutions
in Energy and Environment*

September 18, 1997

The Honorable Kathleen A. McGinty
Chair, Council on Environmental Quality
Old Executive Office Building #358
Washington, DC 20501

Dear Katie:

It's exciting to see interest pick up around the climate change issue as we approach Kyoto. A couple of our clients are launching reviews of their options and opportunities that are much more ambitious than they have done up to this point. I visited a new utility client on Monday, a utility that has decided that it can't sit around on the sidelines any further. We will be working with them to convince their management that this is an issue to take seriously and help them develop a coherent strategy.

It is in this context of heightening interest among CO₂ emitters that I'm writing you about the White House Conference on October 6th. Although I attended the last White House Conference on Climate Change, I understand that this meeting is being organized quite differently. In particular, I understand that a much smaller group of people is being convened.

I would respectfully request that you include both myself and Rick Adcock of EIC on the participants' list. As you know, we both represent small businesses that have played uniquely active roles in the climate change arena, both at the policy and practical levels. We have worked hard to play a leadership role in encouraging other companies to become more engaged in the climate change issue, ranging from small companies like Stonyfield Farm to huge companies like PacifiCorp. We have also played leadership roles in promoting important U.S. policy initiatives including joint implementation and emissions trading. On this basis, I believe that Rick and I would be a significant asset to the President's conference. Participating in the conference would also assist us in effectively representing the conference to our own client and contact networks and in generating crucial corporate followup to the conference itself.

Thanks in advance for your consideration, and I look forward to seeing you again soon. We will all be out in mid-January, and you'll be amazed at how the kids have grown.

Sincerely,

Dr. Mark C. Trexler
President

September 24, 1997

Mr. Todd Stern
Assistant to the President & Staff Secretary
The White House
1600 Pennsylvania Avenue, N. W.
Washington, D.C. 20050

TRANSMITTED BY FAX TO 202-456-2215

Dear Mr. Stern:

I'm very much interested in attending the White House Conference on Climate Policy on October 6, 1997, and would appreciate receiving an invitation if this is possible. As a matter of interest, I am the Chief Executive Officer of an active independent exploration company. During 1992 and 1993 I served as Chairman of the Independent Petroleum Association of America, the national trade association which represents the interests of independent oil and gas producers at the federal level. Currently I serve as a member of the Management Committee of the American Petroleum Institute.

I'm taking the liberty to enclose my vitae as further introduction to me. Your records might reflect that I have attended several meetings at The White House representing independent producers during the Clinton Administration, including at least one meeting where President Clinton was in attendance.

Thank you very much for your consideration of this request.

Very truly yours,

Eugene L. Ames, Jr.
Chairman & Chief Executive Officer

EUGENE L. AMES, JR.

Chairman & Chief Executive Officer

Mr. Eugene L. Ames, Jr., 64, is a geologist and independent oil and gas producer. He is Chairman and Chief Executive Officer of Venus Exploration, Inc. Ames received a B.S. degree in geology from the University of Texas at Austin in 1955.

Hundreds of wells have been drilled under Ames' management during his 42 year career, most of which has been devoted to general management of Venus Exploration, Inc. and its predecessor companies. He has been credited with the development and implementation of strategic exploration plans that led to the discovery and exploitation of a relatively substantial quantity of oil and gas reserves.

He also serves as Chief Executive Officer of Venus Oil Company and Managing Partner of the Ames Company, both privately-held, family-owned royalty and mineral companies. He served from 1991-93 as Chairman of the Independent Petroleum Association of America, the national trade association representing independent oil and natural gas producers in Washington, D.C. and he currently serves as a member of the management committee of the American Petroleum Institute (API).

Other memberships include: Board of Directors, Southwest Research Institute, San Antonio, Texas; American Association of Petroleum Geologists (AAPG); Society of Independent Professional Earth Scientists (SIPES); South Texas Geological Society (STGS); the Texas Mid-Continent Oil and Gas Association; and the All-American Wildcatters. In 1993 he received the Distinguished Service Award from the Texas Mid-Continent Oil and Gas Association, which was awarded in recognition for his service to the oil and gas industry. In November 1995 he was awarded the honor of being selected as Lone Star Steel's "Chief Roughneck of 1995", one of the most prestigious awards of the domestic oil and gas industry.

AMERICAN COUNCIL FOR CAPITAL FORMATION CENTER FOR POLICY RESEARCH

September 25, 1997

Mr. Todd D. Stern
 Assistant to the President and
 Staff Secretary
 The White House
 1600 Pennsylvania Avenue, NW
 Washington, D.C. 20500

Dear Mr. Stern:

As an economist studying the impact of climate mitigation policies on the U.S. economy and on environmental quality, I would like very much to attend the White House Conference on Climate Change Policy on October 6.

For over two decades, the American Council for Capital Formation Center for Policy Research has brought together academics, policymakers, business executives, and the media to discuss new research on tax, trade, regulatory, and environmental policy issues and to explore the public policy ramifications of these subjects. The Center's thorough, credible economic analysis combined with a keen understanding of the economic policymaking process has made it the nation's preeminent economic policy think tank on capital formation issues.

Enclosed is a copy of our annual report and a recent special report on climate change policy.

Please give me a call at 202-293-5811 at your earliest convenience.

Sincerely,

Margo Thorning

AMERICAN COUNCIL FOR CAPITAL FORMATION
CENTER FOR POLICY RESEARCH

SPECIAL REPORT

May 1997

Climate Change Policy: What Action Should We Take?

by Margo Thorning*

Over the past decade and a half, the ACCF Center for Policy Research has sponsored groundbreaking research on tax and environmental policies to encourage capital formation and enhance environmental quality. As the United States stands poised to agree in Kyoto, Japan in December of 1997 to limit future carbon emissions, the Center offers this Special Report to help focus the climate debate.

Under the Framework Convention on Climate Change signed in Rio de Janeiro in 1992, the United States has agreed to negotiate an international treaty on future greenhouse gas emissions without, according to many experts, careful evaluation of this many-sided issue. The experts believe that the agreement that the United States is poised to sign in Japan has potentially serious consequences for all Americans, and these consequences have not been fully analyzed and understood.

The release earlier this year of a letter signed by 2,300 members of the 20,000-member American Economic Association in support of carbon taxes or the auctioning of emission permits to reduce U.S. carbon dioxide (CO₂) emissions could lead some policymakers, as well as the average citizen, to believe that all the environmental and economic questions about climate change policies have been settled. This is not the case. Significant doubts remain in the academic and think-tank community about the wisdom of the United States signing a binding agreement to stabilize or reduce future CO₂ emissions.

ECONOMIC IMPACT OF BINDING EMISSION LIMITS

Research conducted over the past decade by top climate change scholars such as Professor Richard Schmalensee of the Massachusetts Institute of Technology, Professor Alan S. Manne of Stanford University, Dr. Richard Richels of the Electric Power Research Institute, Dr. W. David Montgomery of Charles River Associates, and Dr. Lawrence M. Horwitz of Primark Decision Economics, concludes that the cost of stabilizing CO₂ emissions would impose a heavy burden on U.S. households and industry. For example, Dr. Horwitz's analysis

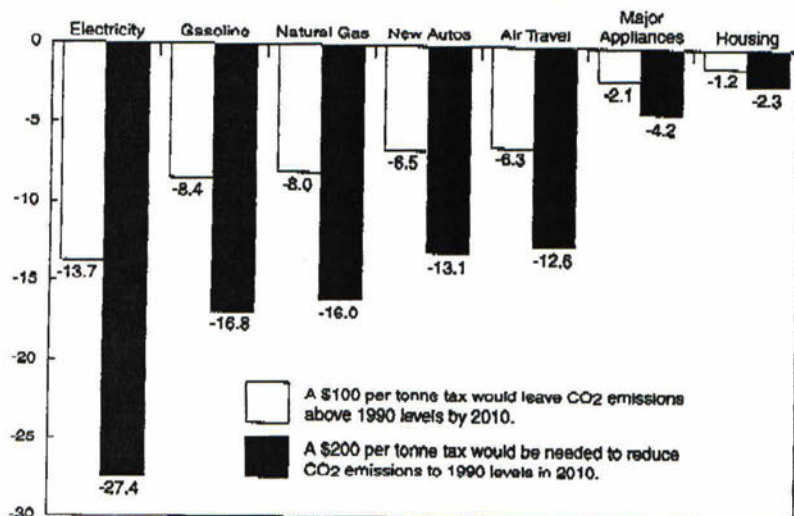

shows that reducing emissions to 1990 levels by 2010 or 2015 would require a tax in the range of \$200 or more per tonne of carbon emitted. Horwitz argues that these taxes would reduce U.S. GDP growth by more than 4.0 percent annually or over \$350 billion per year. Economic growth would slow as emissions are reduced due to lost output as prices rise for carbon-using goods—goods that must be produced using less carbon and/or more expensive processes. Output would also fall because of slower net capital accumulation, reflecting the premature obsolescence of capital equipment due to sharp energy price increases. In addition, Horwitz predicts that household disposable income would fall by 1.2 percent, and wages would also drop. At the same time, electricity prices could more than double from the current \$0.07 per kWh to as much as \$0.15–0.16 per kWh, according to a study by Montgomery. And as a result of the tax-induced price increases, household electricity consumption could fall by more than 30 percent, requiring a significant change in the daily life of practically every American citizen. Expenditures on items such as autos and housing would also decline, even if all the tax revenues were "recycled" back to consumers (see Figure 1).

ENVIRONMENTAL IMPACT OF EMISSION LIMITS

Scholars such as Professors Manne and Schmalensee and Drs. Jae Edmonds, James Dooley, and Marshall Wise of Pacific Northwest National Laboratory (PNNL) warn that there will be almost no environmental benefits were the United States and other industrialized countries to stabilize CO₂ emissions by 2010 or 2015 because most of the new emissions would come from China, India, the former Soviet Union, Latin America, and other emerging economies. In

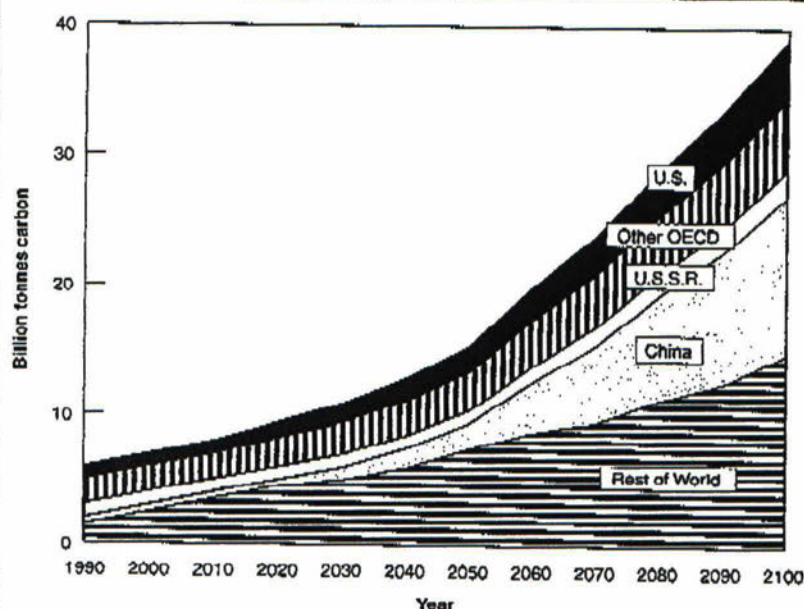

*Dr. Margo Thorning is Senior Vice President and Director of Research of the ACCF Center for Policy Research. The Center is the education and research affiliate of the American Council for Capital Formation. Its mandate is to enhance the public's understanding of the need to promote economic growth through sound tax, regulatory, and environmental policies. For further information please contact the ACCF, 1750 K Street, N.W., Suite 400, Washington, D.C. 20006-2302. Telephone: 202/293-5811; fax 202/785-8165; Web site: <http://www.accf.org>; e-mail: info@accf.org.

Figure 1 Negative Impacts by 2010 on U.S. Household Consumption Due to Alternative CO₂ Emissions Reduction Proposals (% change from baseline)

Source: Lawrence M. Horwitz, "The Impact of Carbon Dioxide Emission Reductions on Living Standards and Lifestyles," in *An Economic Perspective on Climate Change Policies* (Washington, D.C.: American Council for Capital Formation Center for Policy Research, October 1995 Special Report)

Figure 2 Relative Carbon Contributions of Different Regions to Global Carbon Emissions

Source: Based on A.S. Manne and R.G. Richels, *Buying Greenhouse Gas Insurance: The Economic Costs of CO₂ Emission Limits*. (Cambridge, Mass.: MIT Press, 1992), p. 91.

fact, developing nations, which would not be required to cut CO₂ emissions under the proposed international treaty, already produce about 50 percent of all emissions—and by 2050 are expected to produce 75 percent of all greenhouse gases, according to Montgomery (see Figure 2).

COST-EFFECTIVE CO₂ STABILIZATION POLICIES AND U.S. ECONOMIC GROWTH

Reducing global CO₂ emissions should be a gradual, three-stage process, according to PNNL's Edmonds, Dooley, and Wise. During the next 25 years (Stage I), we should commit resources to the development and spread of new energy technologies such as hydrogen transformation from natural gas, advanced liquefied hydrogen fuel cells, biomass, solar photovoltaic, and nanotechnology (the design and building of structures atom-by-atom). These experts believe that although such technologies are now in their early stages, their development could revolutionize energy production while sharply reducing the cost of stabilizing atmospheric concentrations of greenhouse gases. Stage II, from 2020–2050, would see the enforcement of an emissions cap; Stage III could see the gradual phasing out of all free-venting of carbon into the atmosphere if the science indicates the need for such a policy.

CONCLUSIONS

The consensus of these noted scholars is clear. Given the need to increase U.S. economic growth to address challenges such as the looming retirement of the baby boom generation, policymakers should weigh carefully the likely negative economic impact of precipitous near-term reductions in U.S. CO₂ emissions and energy use. Adopting a thoughtfully timed climate change policy would both enhance U.S. and global economic growth and lead to long-term stabilization of carbon concentrations in the atmosphere. ♦

ATTN: TODD STERN

'97 SEP 17 PM2:38

305 294-1620
TODAY

Mr. Dirk Forrister
Climate Change Task Force
Washington, DC

Dear Mr. Forrister,

I must bring to your attention, and the President's, an effort developing in the Florida Keys. We call it the "Green Model". In a nutshell the goal of the "Green Model" is to create a working community model of environmental responsibility (both urban and rural). It could be called a system wide experiment using proven technologies to build a human system that better functions in unison with the natural system. There are components of this model that reduce the release of some gases harmful to the atmosphere.

One major component of this "Green Model" is the use of alternative biofuels that lessen our impact on the environment. The enormous advantage of using this fuel is the great reduction of impact on the atmosphere. Another advantage, the carbon dioxide released in the burning of vegetable based fuels fits the ability of the planet to use this more "natural carbon". Underlying this model idea is the knowledge that a "sustainable system must be a profitable one". Sad but true!

I began working with this environmental modeling idea more than a decade ago in my home state of Arkansas. The enclosed material should give you some idea of my personal commitment to the environment and how the idea has developed.

This past January, to help accomplish this model goal, I became a founding member of the new Florida Keys Environmental Congress. This congress of environmentally active and concerned people was formed in Monroe County in response to the Federal Government's expansion of the Sanctuary Program.

The people of the county voted against more government. We said that we needed no more government regulation. We met as a group and wrote our own environmental plan. Our plan included many "best technology" solutions-solutions not incorporated in the government's plan.

I quote the term "best technology" because that came from a 1976 Presidential Directive. That directive concerned the compliance to environmental statutes-many still not obeyed or enforced 21 years later. We feel strongly that the compliance by our government to existing environmental statutes will do a lot toward bringing the world into the needed compliance by setting a good example.

SEAGUARD CALL TO ACTION, Att: R. COCHRAN
Suite 675, 819 Peacock Plaza, Key West, FL 33041,
~~1-805-296-8441~~

Seaguard is a non-profit tax exempt Environmental organization

We would like to participate in the coming Global Warming Conference and present our case and the data to support our claims.

The following is a list of our group from the Keys wanting to attend the conference:

* Gary Burris, President Survival of the Sea Society, originally founded in Hot Springs Arkansas in 1981, and the Seaguard founded in 1987.

* Ralf Bookes Attorney. Mr. Brooks is an public interest environmental attorney who also represents the county in other matters.

* Russell Teall, Director of Legislative and Regulatory Affairs for Nopec. Nopec is a corporation dedicated to refining clean fuel from waste cooking oil and waste stream vegetable oil.

We feel, as an island already losing ground to the affects of global warming, that our input can be beneficial to the President's quest.

My organization, Seaguard, will be sailing/motoring our historic ship The Dirk Seaguard to demonstrate the reality of an alternative to fossil fuel. The voyage will be fueled by this very clean diesel fuel made from the discarded waste oil of our nation. We will also use our sails, but unfortunately the wind is not as clean as this fuel.

We will be "walking what we talk", by making a winter journey north to the North Atlantic. Our trusting the "new technology" by heading north into all kinds of weather should stand for something.

Our ship will be in the Chesapeake region during the month of October and will be stopping in Washington D.C. to demonstrate an example of practical environmentalism. Our ship can not be up the Potomac to Washington by the beginning of the conference. But, we extend an invitation to your project people to join us at any port we stop in and join us for part of the voyage. We will make an all out effort to depart Key West as early as possible.

An extraordinary benefit derived from development of this fuel to its highest potential is the fact that it give us a way out of our addiction to harmful planet damaging fossil fuels. Sort of a light at the end of a smoky tunnel. There is enough waste vegetable oils available for recycling in America to power the basic services needed to keep our system moving in the event that crude oil becomes scarce. And if we planted the ground between the Interstate road systems of our country with some oilseed plant we could harvest many millions of gallons of clean usable fuel oil.

Sincerely,

Capt. Gary Burris
Captain Gary Burris

Capt. Gary Burris
Survival of Sea Society
395 Hillsdale Rd.
West Kingston, RI 02892

Dear Gary,

Amid the daily reminders of the great problems we face in bringing a common sense approach to managing the Earth's resources, I am, still like you, optimistic.

The overwhelming majority of our daily mail in Margaritaville comes from citizens' groups as well as major magazines, newspapers, TV stations and ordinary people who are looking for help or are reporting progress in our most noble cause. We are no longer small voices speaking to an empty house. The seats are filling rapidly.

I admire your enthusiasm and "never say die" attitude, and if Bob Graham ever becomes President I'm going to recommend that he hire you as Secretary of the Interior. Don't laugh, anything is possible in the fabulous 1990's. We will continue to support your efforts when we can.

Your friend,

Jimmy Buffett
