Mr. Todd Stern
Assistant to the President and Staff Secretary
The White House
1600 Pennsylvania Avenue, NW
Washington, DC 20500

Dear Mr. Stern:

I would like to attend the White House Conference on Climate Change scheduled for October 6, 1997. In our climate business, we are advising many clients about the status and the potential impacts of climate change. We feel that it would be helpful to learn the latest and to report on what our clients perceive about the issue. Our address is above and a fax number is 217/244-0220.

Sincerely,

MEMORANDUM FOR TODD STERN

FROM: KATHY WALLMAN

SUBJECT: NARUC's Request on Climate Change

Here is NARUC's letter asking to participate in the Global Climate Change conference. These are the state commissioners who regulate energy companies. We have been working closely with them on electricity restructuring. I think it would be beneficial to get them involved and to include them in the conference.

You will see that NARUC is asking for three slots. If there isn't room for all three, please don't regard their request as all or nothing. We can work it out with them.

Thanks.

National Association of Regulatory Utility Commissioners
Incorporated

BRUCE B. ELLSWORTH, *President*
New Hampshire Public Utilities Commission

Executive Director

GAILE ARGIRO
Treasurer

September 17, 1997

Fred DeVol
Deputy Assistant to the President
Intragovernmental Affairs
The White House
1600 Pennsylvania Avenue
Washington, DC

Dear Mr. DeVol:

At the suggestion of Rafe Pomerance, Deputy Assistant Secretary for the Environment and Development at the State Department, and Dirk Forrister, Director of the White House Task Force on Climate Change Communications, I am writing to encourage you to include the National Association of Regulatory Utility Commissioners (NARUC) in the White House Presidential Conference on Climate Change scheduled for October 6, 1997. Both Mssrs. Pomerance and Forrister have indicated their belief that NARUC, which represents the economic regulators of the utility industry in all 50 states and U.S. territories, would add a vital element to these most important discussions.

NARUC has been a duly registered NGO participating in United Nations FCCC deliberations for the past four years. We have worked closely with the State Department, the Department of Energy and the White House to maintain open lines of communication, to share strategy and information, and, through seminars and other fora, to keep our constituents informed of developments and United Nations negotiations. NARUC believes it important to maintain this close working relationship between the states and the federal government on this critical issue and believes it would be important for Commissioner David W. Johnson, the NARUC Delegate to the UNFCCC, Commissioner Ron Eachus, Chairman of the International Relations Committee, and Commissioner Jolynn Barry Butler, the incoming President of NARUC, who will be attending COP-3 in Kyoto, Japan, to attend the Presidential Conference on October 6.

Commissioners Johnson, Eachus and Butler would welcome the opportunity to participate in this most important conference. We look forward to hearing from you soon.

Very truly yours,

David W. Johnson
Delegate to the UNFCCC
Commisioner, Ohio PUC

MEMORANDUM FOR FRED DUVAL

cc: **Todd Stern, Staff Secretary**
Cheryl Carter, OPL
Shelley Fidler, CEQ

From: **Dirk Forrister**

Re: **State & Local Invites -- Additional Suggestions**

At Todd's request, Shelley and I were to coordinate some state/local cabinet-level officials as additional suggestions for the October 6th Conference. I'm starting the ball rolling with this memo. The short list below includes some state officials who are active leaders on climate, and I think their perspective would add to the conference. As I understand it, we would move to this level of invite depending on where your governors/mayors/assembly-people/council-people end up on RSVP's.

What do you think? Are we at this stage? Give me a call at 343-1060 to discuss.

1. **Ron Eachus, Commissioner, Oregon Public Utility Commission.** Also Chair, International Relations Committee of the National Association of Regualtory Utility Commissioners (NARUC). This committee is following the issue for NARUC, who nominated him to attend.

2. **David Johnson, Commissioner, Ohio Public Utility Commission.** NARUC's delegate to the UN Framework Convention on Climate Change. Very vigilant on climate and strongly supportive of our approach on JI/emissions trading. The Ohio PUC recently became the first utility commission to approve a utility's JI project expenditure into the rate base. Also a former state legislator. Also nominated by NARUC.

   [**Alternate: Jolynn Barry Butler, Commissioner, Ohio PUC.** Incoming President of NARUC. She's informed, but not as deeply involved as the two above. It might be weird to do two OH commissioners, so I suggest her as an alternate to Johnson, unless you have strong feelings otherwise. Also NARUC nominee.]

3. **Bill Nelson, Florida Commissioner of Insurance.** Former astronaut, former Member of Congress. Well versed in climate change and weather concerns as they effect property insurance. Has appeared on national television to discuss concerns about storm related damages and potential links to climate change -- and he's worried about rate increases of dramatic proportions in FL in recent years assocated with increased storm damage.

4. **Bob Shinn, New Jersey Commissioner of Environment.** Chair of the Climate Change Subcommittee of the National Association of Environmental Commissioners. Recently, his division completed a coastal management report that included a chapter of concerns regarding climate & sea level rise and beach problems.

I know Shelley Fidler & Beth Viola wanted input into this kind of list -- and I'm sending it along to CEQ as a first cut -- they may want to add or delete.

Thanks.

September 25, 1997

Mr. Todd D. Stern
Assistant to the President and
Staff Secretary
The White House
1600 Pennsylvania Avenue, NW
Washington, D.C. 20500

Dear Mr. Stern:

As an economist studying the impact of climate mitigation policies on the U.S. economy and on environmental quality, I would like very much to attend the White House Conference on Climate Change Policy on October 6.

For over two decades, the American Council for Capital Formation Center for Policy Research has brought together academics, policymakers, business executives, and the media to discuss new research on tax, trade, regulatory, and environmental policy issues and to explore the public policy ramifications of these subjects. The Center's thorough, credible economic analysis combined with a keen understanding of the economic policymaking process has made it the nation's preeminent economic policy think tank on capital formation issues.

Enclosed is a copy of our annual report and a recent special report on climate change policy.

Please give me a call at 202-293-5811 at your earliest convenience.

Sincerely,

Margo Thorning

Mr. Todd D. Stern
Assistant to the President
and Staff Secretary
The White House
1600 Pennsylvania Avenue, N.W.
Washington, DC 20500

Dear Mr. Stern,

I understand that the President will host a meeting at the White House in early October 1997 to gather input from industry and others on potential U.S. government positions at the upcoming Conference of the Parties to the United Nations Framework Convention on Climate Change. The U.S. cement industry would like to participate in this meeting.

These negotiations are of keen interest to the cement industry, as the cement manufacturing process is highly energy intensive. Large amounts of coal and other fuels are combusted to produce cement, and, as a consequence, the cement industry currently accounts for approximately 1.5% of the country's aggregate emissions of carbon dioxide. Substantial near-term increases in energy costs, directed at reducing these emissions, could have negative consequences for the U.S. industry. However, other longer-range approaches could be more acceptable to the industry.

Since the mid 1970s, the cement industry has become much more energy efficient and has reduced its carbon dioxide emissions. Additional reductions are possible, provided they are orchestrated in a manner that allows the industry to scale back emissions while remaining economically viable. Indeed, through APCA, individual cement companies responsible for over half of U.S. production have joined EPA and DOE's *Climate Wise* voluntary greenhouse gas emission reduction program.

The cement industry is in a unique position to provide the Clinton Administration with constructive insight on the climate change negotiations. APCA would, therefore, very much appreciate an invitation to the upcoming meeting so that one of our members can participate. I also sent an invitation request to Linda Moore in the White House Office of Political Affairs.

Please call me at 202-408-9494 to discuss this further. Thank you for your help.

Sincerely,

Andrew T. O'Hare

POTENTIAL SPEAKERS FOR CONFERENCE

TECHNOLOGY

Macro Technology Specialist:

John Holdren, Professor, Harvard
John Welsh, CEO, General Electric (don't know how closely he follows climate)

Alternative Energy Corporation:

Ken Lay, CEO, Enron (can speak to gas and renewables; owns Zond Windpower, the largest U.S. wind turbine manufacturer/developer; has joint venture w/ Amoco on solar energy.)

Riley Bechtel, President, Bechtel (coming to see Katie soon, and we'll check out; they have joint venture with Pacific Gas & Electric called "Energy Works" that is dedicated to deploying renewables worldwide.))

Fossil fuel company experimenting w/ more efficient approaches:

Fred Buckman, CEO, PacifiCorp (participates in only state program requiring CO_2 offsets)

Richard Abdoo, CEO, WEPCO (Wisconsin Electric -- pioneer in a couple of JI projects -- including upgrade & fuel switch at Czech municipal boiler and forestry sequestration project in Central America.)

Charles Bayliss, CEO, Tuscon Electric(active in JI biomass, wind and other international offsets)

Roger Sant, Chairman, AES Corp. (Major international IPP. Also chairs board of World Wildlife Fund. AES pioneered forest sequestration projects in late 80s, but do less of that now.)

Efficiency technology specialist:

Johnson Controls (active worldwide in selling efficiency controls; concerns about what major customers think on climate, esp. Auto mfgrs.)

George David, CEO, United Technologies (holdings include Carrier -- a major air conditioning equipment manufacturere -- and International Fuel Cells, a major fuel cell vendor. Understand he is out of country, so they are interested in supplying another high level speaker)

Thomas Casten, CEO, Trigen (small company supplying waste heat recovery systems to utilities & industrial steam users; great message on building partnerships between utilities and heavy industries to combine heat/power efforts, shut down old boilers, cut pollution and save money.)

Bud Cherry, President, Oxbow Power Corp. (International IPP developer big into renewables -- especially geothermal and biomass. Good on JI.)

COMPETITIVENESS

Todd Stern
White House Task Force on Climate Change
c/o The White House
Washington, D.C. 20502

Dear Mr. Stern:

On behalf of the more than 40 national business, environmental, consumer, and energy policy organizations that comprise the Sustainable Energy Coalition, I am writing to offer the following names for consideration for participation in the October 6 White House Conference on Climate Change.

Each of these individuals is well qualified to discuss how renewable energy and energy efficient technologies can play a major role in meeting the Administration's climate change goals while simultaneously creating domestic jobs, reducing energy imports, improving U.S. competitiveness in international markets, and addressing other environmental concerns.

We offer these names, in part, because we are concerned that the industries that are best positioned to provide cost-effective solutions to the challenge of reducing greenhouse gas emissions are presently under-represented among those being considered for invitations to the Conference.

They are:

1.) Ken Karas, CEO, Enron Wind Corporation; Tehachapi, CA (805-823-6700)

2.) Mason Willrich, Chairman of the Board, Energy Works; MD

3.) Brian O'Sullivan, CEO, Cannon Wind Energy Company; Tehachapi, CA (805-822-7524)

4.) Bob Kelly, Director of Board, Enron Renewable Energy Corp.; Houston, TX (713-853-7494)

5.) Michael Bergey, Bergey Wind Power; Norman, OK (405-364-4212)

6.) Peter Beebe, Pres. BP Solar, Inc.; Fairfield, CA (707-428-7800)

7.) Blake McBurney, Pres., McBurney Corporation

8.) Scott Weiner, Pres., Ballard Power Generating Systems; NJ

9.) Jonathan Weisgall, Vice Pres., CalEnergy Company; Washington, DC (202-828-1378)

10.) Robert Sutmiller, Pres., International Fuel Cells; South Windsor, CT (860-727-2220)

11.) Tsvi Meidav, Pres., Trans-Pacific Geothermal Corp.; Oakland, CA (510-763-7812)

12.) Mike Jackson, Esq., Quincy Library Group (biofuels); Quincy, CA

In addition to industry leaders, we would like to recommend some local government leaders who are engaged in the promotion of sustainable energy technologies for their communities.

1.) Frank Fairbanks, City Manager - Tucson, AZ (602-262-7958; fax: 602-261-8327)

2.) Joseph Patrick Reilly, Jr., Mayor - Charleston, SC (803-577-4922)

3.) Valerie Lemmie, City Manager - Dayton, OH (937-443-3600; fax: 937-443-4298)

4.) Wellington Webb, Mayor - Denver, CO (303-575-2721; fax: 303-575-2329)

5.) Randy Johnson, Chair - Hennepin County Commission; President - National Association of Counties (612-348-3088; fax: 612-348-5295)

6.) Tom Buckley, Chittenden County Commissioner - Westford, VT (802-865-7339; fax: 802-865-7400)

7.) Harvey Ruvin, Clerk of Courts - Dade County, FL (305-375-3333; fax: 305-375-2485)

We would be happy to provide additional information for each of these nominees.

We look forward to hearing from you further.

Sincerely,

Ken Bossong,
for the members of the
Sustainable Energy Coalition

Small Business SURVIVAL Committee

September 10, 1997

Mr. Todd Stern
Assistant to the President and Staff Secretary
The White House
1600 Pennsylvania Avenue, NW
Washington, D.C. 20500

Dear Mr. Stern:

Thank you for taking the time out of your schedule to meet with me and other members of the Global Climate Information Project. The Small Business Survival Committee (SBSC) and the broad-based coalition represented at the meeting believe that the proposed treaty is the wrong way to address the global warming problem -- perceived or not.

From SBSC's perspective, we are deeply concerned about the proposed treaty's impact on the job-creating sector of the United States' economy. We thank you for allowing us an opportunity to briefly express our concerns.

Lastly, I want to again propose that the Small Business Survival Committee be invited to attend the Climate Change Conference in Washington, D.C. on October 6, 1997. Our inclusion and participation in the conference would greatly benefit the discussion on the topic and is critical to small business.

Sincerely,

Karen Kerrigan
President

Mr. Todd Stern
Staff Secretary to the President
The White House
1600 Pennsylvania Avenue
Washington, DC 20500

Dear Mr. Stern:

I am writing to urge that you include Mr. James Cannon as a panelist in the upcoming White House conference on global climate change, scheduled for Oct. 6. Mr. Cannon , the senior energy fellow at INFORM, is an expert on alternative fuel technologies.

Mr. Cannon is the author of several influential reports: Harnessing Hydrogen: The Key to Sustainable Transportation, Paving the Way to Natural Gas Vehicles, and Drive for Clean Air. Mr. Cannon's participation would be especially useful because he can talk in detail about how existing technologies can help us significantly limit greenhouse gas emissions. As you know, that is an essential point to drive home, as opponents of action make it sound as if it is impossible to address climate change without provoking economic Armageddon.

Mr. Cannon is a respected and articulate advocate for the use of alternative fuels, and I'm sure his participation will add to the success of the conference. I have worked with INFORM, the New York-based environmental think tank, and I have always been impressed by the thorough, thoughtful nature of their work. I hope you will be able to include Mr. Cannon in the conference.

Sincerely,

Sherwood Boehlert
Member of Congress

I am writing to request that an invitation to the White House Climate Change Conference, scheduled for October 6, 1997, in Washington, D.C., be sent to representatives of Catalytica Combustion Systems, Inc. (CCSI), a client of Fleishman-Hillard International Communications. CCSI manufactures the XONON Combustion System for new and existing gas turbines used in the generation of electricity, with ultra low nitrous oxide and other emissions. The XONON system could be a key component in meeting greenhouse gas reduction goals in the United States and around the world.

Dennis A. Orwig, President, Catalytica Combustion Systems, and Charles Solt, Director of Regulatory Affairs, CCSI, at 430 Ferguson Drive, Mountain View, California 94043, would be the appropriate individuals to receive invitations.

I can be reached at 202/828-8875, should you have any questions or need further information. Thank you for your consideration of this request.

Subject: Climate Change Conference Invitees

Date: September 16, 1997
Pages: 1, including this cover sheet.

COMMENTS:

We would like to invite the following to the climate change conference:

William Nordhaus
Richard Schmalensee
Richard Richels
Dale Jorgenson
Robert Repetto
Jae Edmonds
Don Fullerton
Larry Goulder
Allan Manne

We may have some additions from the business community. If so, we will send them along soon.

MEMORANDUM TO: TODD STERN

FROM: JONATHAN ADASHEK

SUBJECT: WHITE HOUSE INVITES

Todd, the following are notes from the last two meetings about the invite list for the White House conference.

- ☑ IGA names from Fred DuVal (Jonathan/Todd)
- ☑ Leg Affairs names from Lucia (Cheri)
- ☐ Retired CEOs that serve on boards (Dirk)
- ☐ Board members from enviro groups (Dirk)
- ☑ Info on Bud Talbott (Dirk)
- ☑ VP concerns on FedEx and UPS (Beth)
- ☐ CSX call (Beth)
- ☑ Investment firms (Shelly)
- ☑ Farmers names (Shelly)
- ☑ Youth leaders names (Beth)
- ☑ Weather people (Shelly)
- ☐ Dynamic people from HUD list (Dirk)
- ☐ Rosina's input on scientists (Jonathan)
- ☐ Todd call Rosina about James McCarthy

Mr. Todd Stern
Assistant to the President and Staff Secretary
The White House
1600 Pennsylvania Avenue N.W.
Washington, D.C. 20500

Dear Mr. Stern:

It has come to my attention that the Clinton Administration is holding an invitation-only Climate Change Conference in Washington, D.C. on October 6, 1997. I would like to submit my name (Met Johnson), Executive Director of The Western States Coalition, for immediate consideration as an attendee. I appreciate your time in responding to this request.

The decision made by the Administration on its position and negotiating strategy on this important issue has huge ramifications for this country and for me and I believe that I should have the opportunity for input in the decision-making process. Please respond to me at the address listed below so that I can make arrangements to attend. Thank you.

Sincerely,

MET

Assistant to the President and Staff Secretary
The White House
1600 Pennsylvania Avenue N.W.
Washington, DC 20500

'97 SEP 16 AM9:16

Dear Mr. Stern:

As you know, Curtis H. Barnette, Chairman and CEO of the Bethlehem Steel Corporation, participated in the global climate meeting with President Clinton on August 4, 1997. During that meeting, discussions indicated that there would be future meetings with the White House to further discuss the global climate issue.

We understand that you are planning a global climate conference on October 6, 1997 that can be attended by invitation only. The purpose of this letter is to request an invitation for Bethlehem Steel. The global climate issue is extremely important to the company as well as the steel industry. We believe that the conference should have an adequate level of participation by the steel industry because of the potentially high impact of this public policy issue on energy intensive industries such as steel.

An invitation for Bethlehem Steel can be sent to me. Your favorable consideration of this request is very much appreciated.

Sincerely,

M E. Carino

September 10, 1997

Mr. Todd Stern
Assistant to the President and Staff Secretary
The White House
1600 Pennsylvania Avenue, NW
Washington, D.C. 20500

Dear Mr. Stern:

Thank you for taking the time out of your schedule to meet with me and other members of the Global Climate Information Project. The Small Business Survival Committee (SBSC) and the broad-based coalition represented at the meeting believe that the proposed treaty is the wrong way to address the global warming problem -- perceived or not.

From SBSC's perspective, we are deeply concerned about the proposed treaty's impact on the job-creating sector of the United States' economy. We thank you for allowing us an opportunity to briefly express our concerns.

Lastly, I want to again propose that the Small Business Survival Committee be invited to attend the Climate Change Conference in Washington, D.C. on October 6, 1997. Our inclusion and participation in the conference would greatly benefit the discussion on the topic and is critical to small business.

Sincerely,

Karen Kerrigan

'97 SEP 18 PM12:59

Dear Mr. President and Mrs. Clinton

I recently read of your Millennium Project , and the Global Warming Conference, and I knew it was time to write and inform you of something special developing in the Florida Keys. We call it the "Green Model". In a nutshell the goal of the "Green Model" is to create a working community model of environmental responsibility (both urban and rural). It could be called a system wide experiment using proven technologies to build a human system that better functions in unison with the natural system. There are components of this model that reduce the release of some gases harmful to the atmosphere.

This "Green Model" idea had its genesis in our home state of Arkansas. Ironically, among the men who sat and listened to me speak of ideas to defend the downstream oceans and the environment were men who had a lot to do with your early political encouragement- Alphonso Logan and Arthur Wimmell. We must have gotten a lot of the same advice. Their advice to me was "go see Bill". We never connected back home for I was either at sea commercial fishing or on the environmental discovery path, or you were busy building a better state.

Today as I think back to the beginning of my commitment to a better world. I do know that even in the beginning I spent little time wringing my hands with worry for the planet. I approached negative environmental reality, (after I got over the shock of realizing how bad it could get), with pragmatic thoughts for recovery. As I see it, the damage we have inflicted on the Earth has a rip pattern kind of like a tear in a shrimping net. To fix the environment or a net we must sew in reverse. We must turn around and retrace the steps to decimation. That is the dream of a Green Model--to build a pragmatic and profitable return road to recovery.

I ask you to consider including the ideas and example of our "Green Model" into the plans for the Millennium Project. Especially include our home port of Key West as a Millennium Festival Site.

This is the perfect place to construct a Millennium exhibit to show the technology in action that will change or lessen our negative impact on our life support system.

We'd like to attend the Global Warming Conference. We feel that coming, as we do, from an island already losing ground to the effects of global warming, our input can be beneficial to your environmental recovery quest.

SEAGUARD CALL TO ACTION, Att: ~~R. COCHRAN~~
Suite 675, 819 Peacock Plaza , Key West, FL 33041,
~~1-305-296-3141~~
Seaguard is a non-profit tax exempt Environmental organization

Our "Green Model" has several components. One major component of this "Green Model" is the use of **alternative biofuels** that lessen our impact on the environment. The enormous advantage of using these fuels is the great reduction of impact on the atmosphere. Another advantage is that the carbon dioxide released in the burning of vegetable based fuels fits the ability of the planet to use this more "natural carbon". Underlying this model idea is the knowledge that a "sustainable system must be a profitable one". Sad but true!

An extraordinary benefit derived from development of this fuel to its highest potential is the fact that it gives us a way out of our addiction to harmful planet-damaging fossil fuels- sort of a light at the end of a smoky tunnel. There is enough waste vegetable oil available for recycling in North America to power the basic services needed to keep our system moving in the event that crude oil becomes scarce. And if we planted the ground between the Interstate road systems of our country with some oilseed plant we could harvest many millions of gallons of clean usable fuel oil.

Our ship, an historic North Sea fishing vessel, Dirk Seaguard, will be in the Chesapeake region during the month of October and we will be stopping in Washington D.C. to demonstrate an example of practical environmentalism. The Dirk Seaguard cannot be in Washington by the beginning of the conference. But we extend an invitation to you to join us and see and smell the difference.

I have told many that your administration would do something significant for the environment if not special-interested to death. The ideas we have to share seem to me, after looking wide eyed for many years, to be the most logical attempt available. I have also said many times that I should have at least one opportunity to share these solutions with my hometown President. I am glad you have this opportunity to positively effect our way of dealing with the Earth.

Sincerely,

Capt. Gary Burris

TO WHOM IT MAY CONCERN:

After hearing GARY BURRIS, a representative of the Survival of the Seas, speak to members of the Workshop for Informed Democrats at our regular monthly meeting June 5, the members voted unanimously to support the SOS Project Seapeace.

We feel with Mr. Burris, that the quality of the water and the air in Arkansas and throughout the United States is the responsibility of all of us, the users.

We are convinced we can not wait for the federal government to provide the protection which our people and our country must have if our seas are to survive as a food source in the decades to come.

We believe the continued and increased pollution of the rivers and the seas will destroy this important food source for the entire United States.

The Workshop for Informed Democrats was organized in early 1973 and we have, through the years, been concerned with important public issues and problems, political and otherwise. We feel Project Seapeace is worthy of our fullest support.

Respectfully yours,

Dear Gary,

Amid the daily reminders of the great problems we face in bringing a common sense approach to managing the Earth's resources, I am, still like you, optimistic.

The overwhelming majority of our daily mail in Margaritaville comes from citizens' groups as well as major magazines, newspapers, TV stations and ordinary people who are looking for help or are reporting progress in our most noble cause. We are no longer small voices speaking to an empty house. The seats are filling rapidly.

I admire your enthusiasm and "never say die" attitude, and if Bob Graham ever becomes President i'm going to recommend that he hire you as Secretary of the Interior. Don't laugh, anything is possible in the fabulous 1990's. We will continue to support your efforts when we can.

Dear Captain Burris:

The science faculty and students of Lakeside High School want to thank you for presenting the two-day program on "Ocean Awareness." It was of great interest and benefit to all who attended.

The videotape "Seashore Crisis" shown the first day illustrated very vividly many of the problems on our coastlines. This has created a great interest among many of the students to do what they can to help the environment.

The lecture and question and answer session the second day helped to clarify many of the students' questions. Many of the local problems were also brought to their attention. This made them realize that pollution is everyone's problem and not just the government's or big business' problem.

Again, may we express our appreciation for the donation of your time to present the program. You are always welcome to come again.

Sincerely,

Jim H. Tarkington
Principal

TIMES
Arkansas Times Magazine
519 East Capitol, Suite 300
P.O. Box 34010
Little Rock, Arkansas 72203

May 25, 1984

To Whom It May Concern:

Arkansas has always been blessed with an abundance of water. We drink it, play in it, grow rice and catfish in it. Clean water is the basis of the quality of life we appreciate in this state.

However, in recent years we have also seen the degradation that can occur when those life-sustaining waters are contaminated.

While we at the Arkansas Times like to celebrate the many great things that make life in this state so satisfying, we are not blind to those aspects of life here that need correcting. The gradual contamination of our waters--and hence, the waters of the world--through chemical build up is such a problem. Fortunately, it is one that can be corrected.

If enough Arkansawyers become aware of the threat to our waters and active in the effort to protect them, the respect shown here for clean water could eventually serve as an example to other communities, states and even nations. As the encouragement of this kind of awareness is one of the purposes behind the festival being planned by Gary Burris to be held in War Memorial Stadium in August, we at the Arkansas Times Magazine support the event wholeheartedly and have donated a half page ad in the August issue to help publicize it.

Dear Mr. DeVol:

At the suggestion of Rafe Pomerance, Deputy Assistant Secretary for the Environment and Development at the State Department, and Dirk Forrister, Director of the White House Task Force on Climate Change Communications, I am writing to encourage you to include the National Association of Regulatory Utility Commissioners (NARUC) in the White House Presidential Conference on Climate Change scheduled for October 6, 1997. Both Mssrs. Pomerance and Forrister have indicated their belief that NARUC, which represents the economic regulators of the utility industry in all 50 states and U.S. territories, would add a vital element to these most important discussions.

NARUC has been a duly registered NGO participating in United Nations FCCC deliberations for the past four years. We have worked closely with the State Department, the Department of Energy and the White House to maintain open lines of communication, to share strategy and information, and, through seminars and other fora, to keep our constituents informed of developments and United Nations negotiations. NARUC believes it important to maintain this close working relationship between the states and the federal government on this critical issue and believes it would be important for Commissioner David W. Johnson, the NARUC Delegate to the UNFCCC, Commissioner Ron Eachus, Chairman of the International Relations Committee, and Commissioner Jolynn Barry Butler, the incoming President of NARUC, who will be attending COP-3 in Kyoto, Japan, to attend the Presidential Conference on October 6.

Commissioners Johnson, Eachus and Butler would welcome the opportunity to participate in this most important conference. We look forward to hearing from you soon.

Very truly yours,

David W. Johnson
Delegate to the UNFCCC

EIC

September 18, 1997

Mr. Todd D. Stern
Assistant to the President and Staff Secretary
The White House
Washington, DC 20500
By facsimile: 202.456.2215

Dear Mr. Stern:

I am writing to express my strong interest in participating in the upcoming White House Conference on Climate Change. After several years handling climate change issues on former Senator Gore's staff, I co-founded Econergy International Corporation (EIC). EIC is a small business engaged in a growing international portfolio of project development and consulting activities directly related to carbon-offset projects and analysis, and joint implementation (JI). EIC has offices in Washington, DC, Boulder, Colorado, and Mexico City.

EIC was involved in the first U.S. Initiative on Joint Implementation (USIJI)-approved project in Mexico. We have subsequently received approval for a second JI project in Mexico, and a proposal to USIJI regarding our renewable energy-fueled cogeneration project in the Philippines is under review for the current round. We also have ongoing projects in India, Brazil, Central America, and Eastern Europe.

In addition to our own project development work, EIC provides consulting services support to several utilities, multinational corporations, multilateral agencies, and other corporations and institutions on a range of carbon-offset analyses, emissions trading, and other issues related to climate change. Our clients have included the World Bank, the Inter-American Development Bank, the Commission on Environmental Cooperation, Salt River Project, Ontario Hydro, Lockheed Martin Corporation, TransAlta Utilities Corporation, the International Finance Corporation, and Bechtel Corporation.

I have enclosed a brochure which gives more details about our activities in this field. EIC is well known to many senior officials in the Administration, and has maintained close touch with the Administration's climate change policy initiatives. EIC's own track record of developing privately financed carbon-offset projects demonstrates that there are economically viable, private-sector-based solutions to addressing the issue. I hope that my participation at the upcoming White House conference might help to deliver this positive message.

With best regards,

J. Patrick Adcock
President

WASHINGTON, D.C.

I am writing to request that an invitation to the White House Climate Change Conference, scheduled for October 6, 1997, in Washington, D.C., be sent to representatives of Catalytica Combustion Systems, Inc. (CCSI), a client of Fleishman-Hillard International Communications. CCSI manufactures the XONON Combustion System for new and existing gas turbines used in the generation of electricity, with ultra low nitrous oxide and other emissions. The XONON system could be a key component in meeting greenhouse gas reduction goals in the United States and around the world.

Dennis A. Orwig, President, Catalytica Combustion Systems, and Charles Solt, Director of Regulatory Affairs, CCSI, at 430 Ferguson Drive, Mountain View, California 94043, would be the appropriate individuals to receive invitations.

I can be reached at 202/828-8875, should you have any questions or need further information. Thank you for your consideration of this request.

Sincerely,

Sandy McLean

September 17, 1997

Todd Stern
Assistant to the President
The White House
1600 Pennsylvania Avenue, N.W.
Washington, D.C. 20500

Dear Mr. Stern,

I understand that the White House will be hosting a conference on October 6, 1997, to discuss global climate policies. Consumer Alert would be interested in participating in the meeting and ask that we be invited to attend.

As a national consumer group with individual members in all 50 states, Consumer Alert evaluates policy issues and educates consumers on their impact in people's everyday lives.

Earlier this year, we became concerned that information about proposals to reduce greenhouse gas emissions with binding targets and timetables and the effects of these proposals on consumers wasn't being discussed. Few particulars about what the U.S. plans to offer or agree to in Kyoto, Japan, this December have been revealed. More importantly, no information about the economic effects on consumers of substantial reductions in energy use has been forthcoming.

Under the auspices of the National Consumer Coalition — an on-going coalition coordinated by Consumer Alert, whose member groups represent 3 million consumers — we formed in May 1997 a group of 16 public policy organizations to focus on the consumer impact of global climate proposals that have been discussed.

Our conclusions: Global climate policies will have a real, substantial and painful effect on American consumers. A drastic reduction in energy use will not just affect consumers' lifestyles — it will substantially lower their standard of living.

U.S. consumers and taxpayers deserve public discussion, analysis, and debate on all aspects of the global climate treaty negotiations. They are the ones who will bear the brunt of energy restrictions, higher costs for energy, and rationing of energy through emissions trading schemes. The risks of global warming are speculative; the risks of global warming policies are all too real.

I hope that our request to participate in the October 6 meeting will be considered so that the consumer voice will be represented.

Sincerely,

Frances B. Smith, Executive Director

TODAY

Mr. Dirk Forrister
Climate Change Task Force
Washington, DC

Dear Mr. Forrister,

I must bring to your attention, and the President's, an effort developing in the Florida Keys. We call it the "Green Model". In a nutshell the goal of the "Green Model" is to create a working community model of environmental responsibility (both urban and rural). It could be called a system wide experiment using proven technologies to build a human system that better functions in unison with the natural system. There are components of this model that reduce the release of some gases harmful to the atmosphere.

One major component of this "Green Model" is the use of alternative biofuels that lessen our impact on the environment. The enormous advantage of using this fuel is the great reduction of impact on the atmosphere. Another advantage, the carbon dioxide released in the burning of vegetable based fuels fits the ability of the planet to use this more "natural carbon". Underlying this model idea is the knowledge that a "sustainable system must be a profitable one". Sad but true!

I began working with this environmental modeling idea more than a decade ago in my home state of Arkansas. The enclosed material should give you some idea of my personal commitment to the environment and how the idea has developed.

This past January, to help accomplish this model goal, I became a founding member of the new Florida Keys Environmental Congress. This congress of environmentally active and concerned people was formed in Monroe County in response to the Federal Government's expansion of the Sanctuary Program.

The people of the county voted against more government. We said that we needed no more government regulation. We met as a group and wrote our own environmental plan . Our plan included many" best technology" solutions-solutions not incorporated in the government's plan.

I quote the term "best technology" because that came from a 1976 Presidential Directive. That directive concerned the compliance to environmental statutes-many still not obeyed or enforced 21 years later. We feel strongly that the compliance by our government to existing environmental statutes will do a lot toward bringing the world into the needed compliance by setting a good example.

SEAGUARD CALL TO ACTION, Att: R. COCHRAN
Suite 675, 819 Peacock Plaza , Key West, FL 33041,
~~1-305-296-9441~~
Seaguard is a non-profit tax exempt Environmental organization

We would like to participate in the coming Global Warming Conference and present our case and the data to support our claims.

The following is a list of our group from the Keys wanting to attend the conference:

* Gary Burris, President Survival of the Sea Society, originally founded in Hot Springs Arkansas in 1981, and the Seaguard founded in 1987.

* Ralf Brookes Attorney. Mr. Brooks is an public interest environmental attorney who also represents the county in other matters.

* Russell Teall, Director of Legislative and Regulatory Affairs for Nopec. Nopec is a corporation dedicated to refining clean fuel from waste cooking oil and waste stream vegetable oil.

We feel, as an island already losing ground to the affects of global warming, that our input can be beneficial to the President's quest.

My organization, Seaguard, will be sailing/motoring our historic ship The Dirk Seaguard to demonstrate the reality of an alternative to fossil fuel. The voyage will be fueled by this very clean diesel fuel made from the discarded waste oil of our nation. We will also use our sails, but unfortunately the wind is not as clean as this fuel.

We will be"walking what we talk", by making a winter journey north to the North Atlantic Our trusting the "new technology" by heading north into all kinds of weather should stand for something.

Our ship will be in the Chesapeake region during the month of October and will be stopping in Washington D.C. to demonstrate an example of practical environmentalism. Our ship can not be up the Potomac to Washington by the beginning of the conference. But, we extend an invitation to your project people to join us at any port we stop in and join us for part of the voyage. We will make an all out effort to depart Key West as early as possible.

An extraordinary benefit derived from development of this fuel to its highest potential is the fact that it give us a way out of our addiction to harmful planet damaging fossil fuels- Sort of a light at the end of a smoky tunnel. There is enough waste vegetable oils available for recycling in America to power the basic services needed to keep our system moving in the event that crude oil becomes scarce. And if we planted the ground between the Interstate road systems of our country with some oilseed plant we could harvest many millions of gallons of clean usable fuel oil.

Sincerely,
Capt. Gary Burris

Capt. Gary Burris
Survival of Sea Society
395 Hillsdale Rd.
West Kingston, RI 02892

Dear Gary,

Amid the daily reminders of the great problems we face in bringing a common sense approach to managing the Earth's resources, I am, still like you, optimistic.

The overwhelming majority of our daily mail in Margaritaville comes from citizens' groups as well as major magazines, newspapers, TV stations and ordinary people who are looking for help or are reporting progress in our most noble cause. We are no longer small voices speaking to an empty house. The seats are filling rapidly.

I admire your enthusiasm and "never say die" attitude, and if Bob Graham ever becomes President i'm going to recommend that he hire you as Secretary of the Interior. Don't laugh, anything is possible in the fabulous 1990's. We will continue to support your efforts when we can.

Your friend,

Jimmy Buffett

NATURAL RESOURCES DEFENSE COUNCIL

NRDC

A non-profit organization with more than 350,000 members nationwide, NRDC's mission is to preserve the environment, protect the public health, and ensure the conservation of wilderness and natural resources. With the help of a committed Board of Trustees, NRDC's staff in four offices across the country pursues these goals through research, advocacy, litigation and public education.

Mission

The Natural Resources Defense Council's purpose is to safeguard the Earth: its people, its plants and animals, and the natural systems on which all life depends.

We work to restore the integrity of the elements that sustain life -- air, land, and water -- and to defend endangered natural places.

We seek to establish sustainability and good stewardship of the Earth as central ethical imperatives of human society. NRDC affirms the integral place of human beings in the environment.

We strive to protect nature in ways that advance the long-term welfare of present and future generations.

We work to foster the fundamental right of all people to have a voice in decisions that affect their environment. We seek to break down the pattern of disproportionate environmental burdens borne by people of color and others who face social or economic inequities. Ultimately, NRDC strives to help create a new way of life for humankind, one that can be sustained indefinitely without fouling or depleting the resources that support all life on Earth.

Administrator, United Nations Development Programme; founder and former President, World Resources Institute; former Chairman, U.S. Council on Environmental Quality

Mostafa K. Tolba
President, International Centre for Environment and Development, Cairo; former Executive Director, United Nations Environment Programme

Alvaro Umaña Quesada
President, Center for Environmental Study; former Minister of Natural Resources, Energy and Mines, Costa Rica

Victor L. Urquidi
Research Professor Emeritus, El Colegio de México, A.C.; former Economic Advisor to the Minister of Finance, Mexico; Member, Mexican Academy of Science

Pieter Winsemius
Director, McKinsey & Company; former Dutch Minister of Housing, Physical Planning, and Environment

An interest's reputation stems from the group's beginning and history. Much like that of a Presidential candidate, past altercations and problems can plague the campaign. UCS has had clear sailing from the beginning. Formed in 1969 by a group of professors and students at the Massachusetts Institute of Technology, the Union's purpose is to protect the earth and its inhabitants from the advancement of dangerous technology. At UCS's outset, founder Henry W. Kendall noted that most people are against hazardous technology, yet many people only see the possible benefits and do not weigh the consequences. He further stated that the "[m]isuse of scientific and technical knowledge presents a major threat to the existence of mankind...[therefore, we] feel that it is no longer possible to remain uninvolved." This ideology, along with Kendall's persistence to get other scientists involved, gave rise UCS's formation. Experiencing modest beginnings, UCS has grown and held to their promise of giving "scientists a voice in important decisions having to do with the impact of advanced technology on society."

"For over 20 years, the Union of Concerned Scientists has been working on security and on energy issues." They have continually added to their membership and have enhanced their cause throughout the world by recognizing the "global nature of the issues." Due to the world-wide threat of nuclear proliferation, energy depletion, and other environmental problems, UCS has forged international coalitions and developed worldwide projects.

Recently, in the 1991 annual report, Henry W. Kendall, Chairman of the Board and Founder, reaffirmed UCS's commitment to the earth. He noted that "[a]s scientists, we can have a great impact on the global debates that must occur. We at UCS will therefore continue our efforts on arms control and energy policy and will expand our reach to the most important global environmental issues. It is urgent that enough people and groups like UCS speak up and preserve, so that we can leave a safe and healthy planet for the next generation."

Group Leadership

UCS has been committed to protecting the planet from harmful technological advances since its founding. Although it began as a small group of scientists, the Union has blossomed into an international group of influence. Currently, UCS employees between 30 and 40 full-time staffers, which is fewer than other environmental interest groups. However, these employees seem strong willed and enthusiastic toward their work, therefore making up the lack of numbers. This staff has enabled UCS to establish a strong membership, wide ranging list of contributors, and offices in Cambridge, Massachusetts, Washington, D.C., and Berkeley, California. UCS's founding members have supported this growth and have been a central strength of the organization. Continually working, researching, and aiding UCS goals, founding members have attracted the respect of legislators and have added to membership and leadership.

The core of UCS is perhaps the most distinguishing factor of their influence. The Board of Directors is comprised of individuals who have connections in government, academics, and business. This part of UCS has given the interest group their respectability and legitimacy. Due to the knowledge and experience of the UCS Board, legislators and citizens have found credibility in their work.

Currently, the UCS Directors are comprised of:

- Henry W. Kendall (Chairman), Stratton Professor of Physics, MIT. Founding member and Chairman of the UCS board since 1973. Professor Kendall conducts research in high-energy physics. In 1990, he was awarded the Nobel Prize in Physics for the discovery of quarks.
- Howard Ris, Jr. (Executive Director). Appointed Executive Director in 1984, Mr. Ris has been with UCS since 1981. His background is in mathematics, environmental planning, and public policy development.

- Alvin Duskin, President of Pacific Turbine Systems, a hydro-electric power developer in California. A former senior aide for energy legislation in the U.S. Senate, Mr. Duskin served as the executive vice president of U.S. Windpower, Inc., from 1978 to 1982.
- James Fay, Professor of Mechanical Engineering, MIT. Professor Fay is a former chairman of the Massachusetts Port Authority and is a fellow of the American Academy of Arts and Sciences.
- Daniel Fisher, Professor of Physics, Harvard University. Professor Fisher taught previously at Princeton University and has served on the technical staff and Advisory Council on Research at the AT&T Bell Labs.
- Kurt Gottfried, Professor of Physics, Cornell University. Professor Gottfried has served on the senior staff of the European Center for Nuclear Research, in Geneva, and on the High Energy Physics Advisory Panel, a joint committee of the U.S. Department of Energy and National Science Foundation.
- Leonard Meeker, Former Legal Advisor to the State Department and U.S. Ambassador to Romania. A recipient of the Rockkefeller Public Service Award, Mr. Meeker served most recently as International Project Director of the Center for Law and Social Policy. From 1951 to 1973 he served in the U.S. Department of State.
- Claudine Schneider, Former Member of Congress (R-RI). Prior to her ten years service in the House of Representatives, Congresswoman Schneider served as Federal Coordinator of the Rhode Island Coastal Zone Management Program, and was founder of the Conservation Law Foundation.
- Adele Simmons, President, John D. and Catherine T. MacArthur Foundation. Dr. Simmons has been a dean and professor at Princeton University and Tufts University and served as President of Hampshire College from 1977 to 1989. She has been chairman of the boards of the Carnegie Foundation for the Advancement of Teaching and the American Association of Higher Education.
- Ellen Weiss, Environmental attorney, Foley, Hoag, & Eliot. Former general counsel to UCS, Ms. Weiss served as Assistant Attorney General for Environmental Protection for the Commonwealth of Massachusetts.
- Victor Weisskopf, Institute Professor of Physics Emeritus, MIT. Professor Weisskopf is a former group leader at the Los Alamos National Laboratory and the former Director of the European Center for Nuclear Research, in Geneva. Mr. Weisskopf is a recipient of the Fermi Award for his contributions to physics.

As can be seen through their credentials, the UCS Directors have expertise in nuclear proliferation, military armaments, and energy policies. Their leadership allows the staff to coordinate policy programs on a large scale level and members to conduct programs in local communities. One can easily see why legislators would respect the opinion and information of a UCS Director; with a Nobel Prize winning physicist, numerous faculty members from renowned universities, staff members of federal and international committees, legal advisors, and corporate executives, the UCS Board has the experience and knowledge to make valued judgements and give detailed and accurate information.

Group Membership

Strong group membership is another essential factor in determining a group's credibility. The Union of Concerned Scientists is an independent, non-profit organization of scientists, engineers, and other citizens concerned with the impact of advanced technology on society. UCS holds nearly 100,000 members, including many who actively speak out and lobby on local and national policy issues. The Union represents both scientists and citizens.

Although UCS does represent citizens, its membership is mostly comprised of physicists and other scientists. Therefore, "[s]ome critics accuse the UCS of misrepresenting the group to the public." These critics suggest that UCS's name implies an interest group comprised of only scientists. Critics also note that most of UCS's "members are not scientists and that many scientists disagree with its politics." One novelist, James Hogan,

COMPETITIVE ENTERPRISE INSTITUTE

'97 SEP 29 AM9:17

September 26, 1997

President William J. Clinton
The White House
Washington, DC 20500

Dear Mr. President:

I want to commend you for your decision to host a White House conference on global climate change, in Washington, on October 6. This event has the potential significantly to improve public understanding of the scientific, economic, and political issues connected with the ongoing negotiations over the Kyoto Protocol.

Such potential can be realized, however, only if participation in your conference is open to the full spectrum of informed opinion and recognized expertise on these complex subjects. Unfortunately, it appears that invitations are now being extended predominantly, if not exclusively, to those who advocate increased government control over U.S. and world energy markets. The public interest would be poorly served by such an exercise in "preaching to the choir." It goes without saying that the associated taxpayer expenditures would be unjustified.

In the interest of assisting you and your staff in making this event a White House conference truly worthy of the name, I urge you to include, in numbers equal to the Climate Treaty's proponents, distinguished individuals drawn from the ranks of the scientific, business, public interest, and national security communities, who have expressed skepticism about the science of global warming and/or the mandatory energy-use restrictions the Treaty would entail.

For example, a strong case can be made that the best way to prepare for the possible consequences of climate change is not to restrict wealth creation or lock mankind into politically-correct paths of economic and technological development but to improve the overall resilience and adaptability of human societies by making the world freer and, hence, wealthier. That viewpoint, however, has been all but ignored by most commentators and policy makers. The White House Conference would be an ideal occasion to give this neglected alternative a fair hearing. I have taken the liberty of attaching an illustrative list of prominent individuals who could help provide balance to the proceedings.

We at the Competitive Enterprise Institute hope that you share our desire for a genuine and informed debate on climate change prior to the completion of the Kyoto Protocol and decisions about whether the United States will be subject to its constraints. If so, we look forward to working with you to ensure the success of the upcoming conference.

Sincerely,

Fred L. Smith, Jr.

TO: Todd Stern

FROM: David Smith

SUBJECT: October 6 Climate Change Conference

Due to the importance of the climate change issue among our affiliated unions and the seriousness with which they are discussing it, we'd suggest that additional invitations be extended to the October 6 meeting. Here is a list of eight additional interested union leaders who should receive an invitation:

Officer	**Phone/fax**
Don Wightman, President Utility Workers Union of America 815 16th Street, NW WDC 20006	347-8105 347-4872
Ron Carey, President International Brotherhood of Teamsters 25 Louisiana Avenue, NW WDC 20001	624-6800 624-8102
Boyd Young, President United Paperworkers International Union PO Box 1475 Nashville, TN 37202	615-834-8590 615-834-7741
Andy Stern, President Service Employees International Union 1313 L Street, NW WDC 20005	898-3300 898-3402
Gerald McEntee, President AFSCME 1625 L Street WDC 20036	429-1000 429-1102

Frank Hanley International Union of Operating Engineers 1125 17th Street, NW WDC 20036	429-9100 778-2619
Ed Wytkind, Executive Director Transportation Trades Department 400 North Capitol Street, NW WDC 20001	628-9262 628-0391
Pete diCicco, President Industrial Union Department 815 16th Street, NW Room 301 WDC 20006	842-7800 842-7838

We'd appreciate confirmation of additional invitations extended so that we may make encouraging calls to our colleagues. Thanks for your attention to this matter.

COMMENT:

Jonathan,

I would like to represent ASME at the Global Climate Change Conference on October 6. The American Society of Mechanical Engineers (ASME International) is a 125,000 member worldwide engineering society focused on technical, educational, and research issues. It conducts one of the world's largest technical publishing programs, holds some 30 technical conferences and 200 professional development courses each year, and sets many industrial and manufacturing standards.

ASME is one of the organizations defined by the Fastener Quality Act as a "consensus standards organization". ASME International has developed codes and standards since 1884 and currently publishes 600 codes and standards and administers thirteen conformity assessment programs. ASME standards are used in over 80 countries and the organization accredits manufacturers in 55 countries.

I am the Government Relations Representative who provides technical support on issues. I cover energy and environment issues, in particular research and development programs, and technology policy. I believe our membership and their activities in contributing to federal policy in these areas would be enhanced by having a representative at this conference.

If I can provide you with any further information, please let me know.

Stacy

Subject: October 6 Global Climate Policy Briefing
Date: October 1, 1997
Pages: 1 page

'97 OCT 1 PM1:50

I am writing to request an invitation to the October 6 briefing on global climate change. I currently serve as the Director of The Environment Project at Catonsville Community College and previously served for 5 years as the Assistant Director of the Center for Global Change at the University of Maryland at College Park.

Education and training have a critical role to play in reducing U.S. greenhouse gases. Many technologies which can both reduce carbon emissions and save money are currently commercially available. Information dissemination and education and training programs about these technologies, must be critical components to U.S. strategies to reduce carbon emissions.

Over the past 15 years, I have taught thousands of individuals about scientific, technological and policy issues associated with global climate change. I know how difficult it is for both educated professionals and the general public to understand the nuances of global climate change and to integrate carbon reducing strategies into every day decision making.

The warnings of "severe impacts on America's workers and economy" in recent Wall Street Journal and Washington Post editorials and the current industry financed public ad campaign against U.S. participation in a global greenhouse treaty are clearly misinformed or worse, deliberate, fear mongering campaigns. Thousands of American businesses, institutions, organizations and homes have reduced energy use, carbon emissions and cost. The drive towards energy efficiency, which has already created thousands of U.S. jobs, would be catalyzed by U.S. participation in a global greenhouse agreement. The "severe impacts on America's workers and economy" would be positive ones. Energy use would decrease freeing capital for investment and the U.S. would gain a significant competitive advantage in the development and commercialization of energy efficient technologies to be sold to an energy starved global marketplace.

I appreciate your consideration of my request and I understand that there will be limited availability of space. Should you need additional information, my phone and fax number are listed below. Cheers!

From the desk of...

Chris Fox

Protecting the Future You Have Earned

VIA FACSIMILE

Todd Stern
Assistant to the President and Staff Secretary
The White House
1600 Pennsylvania Avenue NW
Washington D.C. 20500

Dear Todd;

I'm writing to you as a follow-up to the meeting that I and a few other members of the Global Climate Information Project had with you on September 9th concerning the Global Climate Treaty. As I mentioned at that meeting The Seniors Coalition is a non-partisan, non-profit advocacy organization representing over 2.4 million older adults and their families, and we are deeply concerned about the effect this treaty will have on older Americans. Given that concern, I and the others requested an invitation to the October 6 educational event concerning the Global Climate Treaty. The Seniors Coalition has not received that invitation and we are concerned that there has either been an oversight or the President is not concerned with the impact this treaty will have on older Americans. I trust the latter is not the case and urge you to contact me at your earliest convenience to discuss our invitation. We need to work together on this matter and excluding us from the discussion is counter productive. Our magazine, which is read by over 1 million senior Americans, will go out the end of this month with the lead article dealing with the Global Climate Treaty. I want to be able to report to out members and all older Americans that you are working with us to resolve this issue. It is imperative that the dialogue be open and inclusive especially given the decision by CNN to pull our informational ads which further limits the national debate that President Clinton called for concerning this issue.

For your information I have enclosed a photocopy of a *Roll Call* article citing us as one of the most effective advocacy organizations in Washington.

Again, please contact me at your earliest convenience. I look forward to attending the conference.

Sincerely,

Thair R. Phillips
Chief Executive Officer

The 104th's Lobbyist 'In Crowd': a New Pecking Order in Special-Interest Washington

By Alice A. Love

The best that many right-leaning special interest groups could hope for in past Congresses was a sympathetic smile and shrug from the Republican ranking members and minority leaders who dwelled with them in political exile.

But today, with the GOP in the majority, representatives of the major conservative and business lobbies are at conference tables with the Speaker of the House, drafting legislation that often is delivered directly to the floor.

In a sign of this new influence, House GOP Conference Chairman John Boehner (Ohio) and the Senate GOP's "Coalitions Whip," Paul Coverdell (R-Ga), have aides designated specifically to work with special-interest groups sympathetic to Republican causes.

Lobbyists for these groups meet weekly in Boehner's and Coverdell's offices to build and mobilize private-sector coalitions — such as Project Relief on regulatory reform and the Coalition for America's Future on tax cuts — that help the GOP leadership with everything from media relations to whipping Members on key votes.

What follows is a listing — based on informal polling of Washington lobbyists, Members of Congress, and Hill staffers — of the new pecking order in special-interest Washington: the ten groups that have gained the most in the 104th Congress.

National Federation of Independent Business

Christian Coalition

National Association of Wholesaler-Distributors

Citizens for a Sound Economy

US Chamber of Commerce

National Rifle Association

Americans for Tax Reform

Independent Insurance Agents of America

Alliance for Competitive Communication

Seniors Coalition

Major Issues: Leads a coalition o Medicare reform for Republican leaders capital gains tax reductions; Social Secur balanced budget amendment; health care form; upcoming Federal Drug Administrati reform proposals.

Top Lobbyists: Paul Brainell, CEO; Ja Hansen, vice president, government affai and former executive director of the Americ Conservative Union; Kem Smith, assist Commerce Secretary for the Kennedy a Johnson Administrations; Jay Hopkins, edit "The Senior Class" newspaper; former Re Stan Parris (R-Va)

Key Member Contacts: Sens. Paul Simc (D-Ill), Orrin Hatch (R-Utah), Larry Craig (F Idaho); GOP leadership, freshman class; co servative Democrats.

PAC Giving: None.

Speaker Gingrich first announced his inter tion to reform Medicare at a Seniors Coalitic event in April. Since then, the group has use some rather creative lobbying techniques in ar ticipation of the Medicare battle this fall.

Before Congress recessed for its Augus break, for instance, the Seniors Coalition of fered Members the chance to videotape and ge still photos taken of a pledge to favor Medicar reform. The coalition then provided copies o the film so that Members could send the clips to local media outlets. More than 100 House Members and dozens of Senators showed up.

Though it's often referred to as the conserv- ative counterpart of the American Association of Retired Persons, Hansen begs to differ.

"We are not a benefits-driven organization, but a pure advocacy group," he said, which guarantees that the membership of the Seniors Coalition are a politically curious and active lot — in other words, regular voters.

And to keep those voters informed, the coalition has a 40-page bimonthly newspaper, "The Senior Class," which provides "training" about how to get involved in political campaigns and the public policy debate.

MEMORANDUM

September 29, 1997

TO: Todd Stern

FROM: Jon Haber

RE: White House conference

Carl Wagner (828-9140) highly recommends inviting the following individual to the October 6 White House Conference on Climate Change:

Mr. Gerhard Neumeir
Founder, Chair and CEO
Ecology and the Environment
716-684-8060

This is a $100 million environmental engineering company specializing in toxic waste clean-up and fuel conversion, with substantial experience overseas.

It is important to call Neumeir today, as he will be traveling later this week.

Carl may have additional names for you.

MEMORANDUM FOR TODD STERN

FROM: KATHY WALLMAN

SUBJECT: Ellen Roy's Request to Participate in the Global Climate Change Conference

The attached letter is Ellen Roy's request to participate in the White House Global Climate Change Conference. As you can see, Ellen not only works for an energy corporation, but is an active participant in electricity industry groups. We have been working closely with her on electricity restructuring in her capacity as Vice Chair of the Electric Power Supply Association. I think it would be beneficial for Ellen to be involved and to include her in the conference.

Thanks.

Re: White House Summit on Global Climate Change

Dear Ms. Wallman:

I am writing to confirm my strong interest in actively participating in the White House Global Climate Change Conference to be held in Washington on October 6, 1997. As a senior executive in, and co-owner of, one of the first independent power producers in the United States, I am vitally interested in the issues likely to be raised during the Summit as well as the process proposed for addressing such issues.

During the past decade, I have been an industry leader involved in the numerous political and legislative issues concerning the electric and energy industries. In particular, I have been Chair of the non-utility electric generators industry association, The National Independent Energy Producers and am presently a Vice Chair of the successor organization, Electric Power Supply Association (EPSA), as well as the Chair of the EPSA Legislative Committee. In addition, I am a founding member of the Clean Competition Coalition (CCC), whose primary purpose is to unite sound environmental policies with the emerging competitive electric generation markets. At CCC, I have worked closely with leading environmental groups such as the NRDC and the Clean Air Task Force, to formulate joint policies that both the environmental community and our industry can support. Also, I currently serve on the Coal Industry Advisory Board (CIAB) at the International Energy Agency (IEA). The CIAB is a group of the leading global energy and electrical companies which undertake industry research and analyze policy options on issues such as global climate change.

In these roles and as a member of the business community generally, I have been early and ardent supporter of policies intended to be protective of human health and the environment, and which also foster competitive business conditions. My company's commitment to such policies is demonstrated by our business investments. For example, an affiliate of IEC made a more than $200,000,000 investment in a recycled pulp mill facility which uses state-of-the-art, environmentally friendly materials and processes. All of IEC's baseload electric power generation facilities are fueled by natural gas and include highly efficient co-generation activities. Indeed, IEC owns the largest CO_2 recovery system associated with a co-generation facility in the United States.

Given this background, I am confident that my participation in the upcoming White House Global Climate Conference would add perspective and experience from a unique vantage point. Your assistance in assuring that I am considered for participation in the October 6, conference in Washington, would be greatly appreciated. Please do not hesitate to contact me, or Walter Sczudlo in our Washington, D.C. office, if you have any questions. Thank you in advance for your consideration and assistance.

Sincerely,

INTERCONTINENTAL ENERGY CORPORATION

Ellen Roy
Senior Vice President

Mr. Todd Stern
Assistant to the President and Staff Secretary
The White House
1600 Pennsylvania Ave., NW
Washington, D.C. 20500

Dear Mr. Stern:

It has come to my attention that the Clinton Administration is holding an invitation-only Climate Change Conference in Washington, D.C. on October 6, 1997. I would like to submit my name, Evelyn Ebzery, Executive Director, Frontiers - Wyoming, for immediate consideration as an attendee.

The decision made by the Administration on its position and negotiating strategy on this important issue has huge ramification for this country and for me and I believe that I should have the opportunity for input in the decision-making process. Please respond to me at the address listed below so that I can make arrangements to attend.

Sincerely,

Evelyn Ebzery

MEMORANDUM FOR TODD STERN

SUBJECT: White House Climate Change Conference invitation list

Per your request I am sending a list of key individuals I recommend for invitation to the White House Climate Change Conference. They represent the leadership within the Defense Department, as well as defense industry. I think involving the defense industry in the conference could help the President's goals.

NAME	ORGANIZATION	TELEPHONE #	FAX #
	Department of Defense		
Honorable Togo West	Secretary of the Army	703-695-3211	703-697-8036
Honorable John H. Dalton	Secretary of the Navy	703-695-3131	703-614-3477
Honorable Sheila Widnall	Secretary of the Air Force	703-697-7363	703-693-7553
	Defense Industry Leadership		
Mr. Vance D. Coffman	Vice Chairman and CEO, Lockheed Martin Corporation	301-897-6105	301-897-6028
Mr. Don Fuqua	President Aerospace Industries Association	202-371-8400	202-371-8401
Mr. Marshall O. Larsen	President and COO, BF Goodrich Aerospace BF Goodrich Company	330-374-4340	330-374-3298
Mr. John M. Leonis	Chairman and CEO Litton Industries, Inc.	818-598-3314	818-598-2000
Mr. Eugene E. Murphy	President and CEO, GE Aircraft Engines, and Senior Vice President, GE Company	203-373-3089	203-373-2350
Mr. Michael T. Smith	Chairman, Hughes Aircraft Company	703-284-4208	703-358-9679
Mr. Harry C. Stonecipher	President and COO, The Boeing Company	206-544-2700	206-544-1001

Please let me know if you need further information leading up to the October 6 event.

Sherri W. Goodman
Deputy Under Secretary of Defense
(Environmental Security)

EIC

September 18, 1997

Mr. Todd D. Stern
Assistant to the President and Staff Secretary
The White House
Washington, DC 20500
By facsimile: 202.456.2215

Dear Mr. Stern:

I am writing to express my strong interest in participating in the upcoming White House Conference on Climate Change. After several years handling climate change issues on former Senator Gore's staff, I co-founded Econergy International Corporation (EIC). EIC is a small business engaged in a growing international portfolio of project development and consulting activities directly related to carbon-offset projects and analysis, and joint implementation (JI). EIC has offices in Washington, DC, Boulder, Colorado, and Mexico City.

EIC was involved in the first U.S. Initiative on Joint Implementation (USIJI)-approved project in Mexico. We have subsequently received approval for a second JI project in Mexico, and a proposal to USIJI regarding our renewable energy-fueled cogeneration project in the Philippines is under review for the current round. We also have ongoing projects in India, Brazil, Central America, and Eastern Europe.

In addition to our own project development work, EIC provides consulting services support to several utilities, multinational corporations, multilateral agencies, and other corporations and institutions on a range of carbon-offset analyses, emissions trading, and other issues related to climate change. Our clients have included the World Bank, the Inter-American Development Bank, the Commission on Environmental Cooperation, Salt River Project, Ontario Hydro, Lockheed Martin Corporation, TransAlta Utilities Corporation, the International Finance Corporation, and Bechtel Corporation.

I have enclosed a brochure which gives more details about our activities in this field. EIC is well known to many senior officials in the Administration, and has maintained close touch with the Administration's climate change policy initiatives. EIC's own track record of developing privately financed carbon-offset projects demonstrates that there are economically viable, private-sector-based solutions to addressing the issue. I hope that my participation at the upcoming White House conference might help to deliver this positive message.

With best regards,

J. Patrick Adcock
President
