The Honorable Todd D. Stern
Assistant to the President and Staff Secretary
The White House
Washington, DC 20500

Dear Mr. Stern:

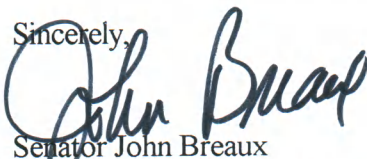

We hope that you and your spouse or guest can join us for an informal evening of fun at the Cystic Fibrosis Celebrity Tennis Gala XIII, Saturday, March 7, 1998, at the McLean Racquet & Health Club. It is an evening you will not want to miss!

The Gala is a casual evening, complete with round-robin doubles tennis and dinner, in a very relaxed environment. You certainly don't need to be a tennis player to enjoy this unique event.

The Gala's continued success is largely due to the support of members of the House, Senate, the Administration and tennis professionals. Former world champion players, Roscoe Tanner and Sherwood Stewart, have already agreed to play. The money raised will enable Cystic Fibrosis Foundation-funded scientists to continue cutting-edge gene therapy and protein replacement research, which may one day lead to a cure for cystic fibrosis.

To accept this complimentary invitation from the Cystic Fibrosis Foundation, please complete and return the enclosed response form. I know that this is an extremely busy time, but if you are looking for a relaxing and enjoyable evening, with the opportunity to support a very worthy cause, it's a natural! We hope to see you there.

Sincerely,

Senator John Breau
Celebrity Tennis Gala XIII Honorary Committee

Join us for an informal evening of round robin tennis, cocktails, dinner, auction and raffle. Guests visit and dine with members of the House, Senate, and the Administration; tennis celebrities; and leading Washington area and national corporate executives.

The Gala raises monies to fund research to cure cystic fibrosis (CF), the number-one genetic killer of children and young adults in the United States. CF is a complex genetic disease which interferes with digestion and creates dangerously thick mucus, leading to chronic and eventually fatal lung infections.

Currently there is no cure; however, scientists are writing a remarkable success story. CF researchers are quickly translating what they learn about the CF gene and CF cells in the laboratory into promising new treatments. Based on their success, landmark gene therapy studies and clinical trials on new drug treatments are now underway.
