
TABLE OF CONTENTS

Chapter 1: The AI Revolution in Finance	1
The Shift AI Is Creating in Finance	1
My Journey into AI-Powered Finance	2
What This Course Covers and Who It's For	3
Understanding AI, ML, Generative AI, and LLMs	5
The Transformers Architecture	7
Why These Technologies Matter in Finance	8
Why Python Is the Core Skill—and How AI Makes It Accessible	8
The Four Levels of Analytics—Powered by AI	10
The Fast Pace of Change and the Need for Adaptability	13
Chapter 1: Test Your Knowledge	15
Chapter 1: Solutions and Suggested Responses	17
Chapter 2: Prompt Engineering for Finance Professionals	19
What Is a Prompt, Really?	19
How LLMs Read Your Inputs	20
What Are Tokens—and Why Do They Matter?	20
Reasoning Models: How They Think	20
Instruction Following Versus Completion-Based Prompts	21
Core Techniques Every Finance Professional Should Use	22
Applying Prompting to FP&A Workflows	29
Iterating Your Way to Better Results	34
How to Refine a Prompt Based on Errors or Hallucinations	35
When to Clarify, Simplify, or Narrow Scope	36
Resetting the Conversation: When It's Better to Start Fresh	37
Try Three to Five Tabs: The Parallel Prompting Strategy	37
Saving and Reusing High-Performing Prompts	38
Building a Repeatable Prompting System in Finance	38
How to Create a Prompt Library	38
Organizing Prompts by Function	39
Using Prompt Templates as Part of Your Finance Toolkit	40
Best Practices for Documenting, Sharing, and Improving Prompts as a Team	41
Prompting as a New Professional Skill: Not a Trick, but a Capability	42
Chapter 2: Test Your Knowledge	43
Chapter 2: Solutions and Suggested Responses	45
Chapter 3: Teaching AI to Code—Without Being a Programmer	47
Why Python Changed My Finance Career—and Why You Don't Need to Learn It All	47
The Prompting Technique for AI-Generated Python	49
A Final Word: Don't Be Afraid to Tweak	52
What Can Python Actually Do in Finance?	52
Python Is a Swiss Army Knife for Modern Finance	53

Automate Workflows with Python	56
Tools to Run Python Without the IT Headache	57
AI Can Help You Run the Code, Too	61
Chapter 3: Test Your Knowledge	63
Chapter 3: Solutions and Suggested Responses	65
Chapter 4: Descriptive Analytics—Let AI Do the Reporting	67
What Is Descriptive Analytics?	67
Descriptive Analytics Defined: The What, Not the Why	68
Why Descriptive Work Is Still So Time-Consuming	68
How Descriptive Analytics Feeds Strategic Finance	69
AI Makes Descriptive Analytics 10× Faster and 10× Clearer	70
Using AI to Generate Performance Summaries and Commentary	71
Start with the Right Input	71
Prompting for Commentary: A Practical Example	72
Role Prompting: Framing the Voice	72
Asking for Structure: Bullets, Paragraphs, or Slides	73
Common Prompting Patterns for Reporting	73
Improving Accuracy: Grounding the Model with Data	74
When to Edit and When to Regenerate	74
Automating Descriptive Reporting with Python, Excel, and Power BI	75
Start with Python: Automate the Numbers	75
Excel: Familiar, But Now Enhanced	76
Power BI: Dynamic Reporting with AI Support	78
End-to-End Workflow: From Data to Commentary	79
Turning Descriptive Outputs into Storytelling	79
From Data to Message: Why Storytelling Matters	80
Prompting for Storytelling: Structure over Style	80
Tailoring the Story to the Audience	81
Generating Slide-Ready Content with AI	81
Dashboard Narratives: Closing the Loop on Visuals	82
Building Consistency Across Channels	82
Balancing Automation and Judgment	83
Final Thoughts	83
Chapter 4: Test Your Knowledge	85
Chapter 4: Solutions and Suggested Responses	87
Chapter 5: From “What Happened?” to “Why Did It Happen?”	89
Why Diagnostic Analytics Matters	89
The Role of AI in Diagnostic Thinking	90
How to Prompt AI to Generate Diagnostic Python Code	90
Diagnostic Thinking as a Mindset	91
Using AI to Surface Drivers and Ask Smarter Questions	92
From Variance to Cause: Asking Smarter Questions with AI	92
Using Structured Prompts to Explore Drivers	93

From Observation to Hypothesis	93
Combining Text Prompts and Code Generation	94
Correlation, Clustering, and Attribution—With AI-Generated Python	95
Combining These Techniques in Real Workflows	99
Tips for Prompting and Interpreting Diagnostic Models	99
Building Repeatable Diagnostic Workflows	100
Why Repeatability Matters in Diagnostics	100
Using AI Without Losing Ownership	104
Use Diagnostic Analysis Wisely with AI	104
Chapter 5: Test Your Knowledge	107
Chapter 5: Solutions and Suggested Responses	109
Chapter 6: Predictive Analytics	111
Forecasting in the Age of AI: From Intuition to Evidence	111
The Problem with Traditional Forecasting in Finance	112
The Shift: From Manually Built to Prompt-Driven Forecasting	112
Getting Started: Forecasting with Python Using AI	113
Key Python Libraries to Know (and Prompt AI to Use)	114
Bridging Finance Logic and Statistical Models	115
Building Time Series Forecasts with Python and AI	115
What Makes Time Series Forecasting Different?	116
Introducing the Prophet Library (fbprophet)	116
Handling Seasonality and Holidays	117
Using ARIMA with statsmodels for More Control	118
Visualizing the Forecasts	119
Structuring Your Data for Time Series Forecasting	119
Scenario Forecasting, Drivers, and Assumptions—Dynamic Planning with AI	120
From Time Series to Driver-Based Models	121
Prompting AI to Build Driver-Based Forecasts	121
Scenario Forecasting: Best, Base, Worst	122
Using AI to Build Flexible Assumption Inputs	123
Scenario Comparison Charts and Dashboards	123
Scenario Models with User Input (Streamlit or Excel)	124
Forecast Evaluation and Continuous Learning	125
Why Forecast Evaluation Matters	125
The Most Common Forecast Accuracy Metrics	125
Prompting AI to Calculate Forecast Accuracy	126
Creating Forecast Accuracy Dashboards	127
Improving Forecasts with Feedback Loops	127
Automating Forecast Evaluation and Updates	128
Communicating Forecast Confidence	128
Final Thoughts on Forecasting with AI	129
Chapter 6: Test Your Knowledge	131
Chapter 6: Solutions and Suggested Responses	133

Chapter 7: Prescriptive Analytics—From Insight to Action	135
From Forecasting to Decision-Making	135
What Is Prescriptive Analytics?	135
Why Prescriptive Analytics Matters in Finance	135
The Building Blocks of Prescriptive Modeling	136
Prompting AI for Prescriptive Thinking	136
The Shift in Prompting Style	137
Framing Decisions as If-Then Statements	138
From Forecast Outputs to Action Inputs	138
AI as a Decision-Making Assistant	139
Using Optimization Models in Finance with AI and Python	139
What Is an Optimization Problem?	140
Prompting AI to Build an Optimization Model	140
Introducing PuLP: The Linear Programming Library	141
Alternative Library: <code>scipy.optimize</code> for Simpler Problems	142
Interpreting Optimization Outputs	143
Visualization and Communication	143
AI for Simulations and Scenario Recommendations	144
What Is Monte Carlo Simulation?	144
Why Use Simulation in Finance?	145
Prompting AI to Build a Monte Carlo Simulation	145
Using AI to Summarize Simulation Outputs	147
Creating Recommendation Engines Based on Simulations	147
Building Actionable Decision Frameworks with AI	148
Why Decision Frameworks Matter in Finance	149
Prompting AI to Build a Decision Matrix	149
Building Structured Trade-Off Narratives	150
Using AI to Draft Executive Recommendations	150
Building Repeatable Frameworks for Finance Teams	151
Auditable and Transparent Decision Support	151
Telling the Story of the Decision	152
Best Practices for AI-Enabled Decision Frameworks	152
Final Thoughts	153
Chapter 7: Test Your Knowledge	155
Chapter 7: Solutions and Suggested Responses	157
Chapter 8: Automation in FP&A—Doing More with Less	159
The Case for Automation in Finance	159
Manual Work Is the Hidden Bottleneck in Finance	159
What's Changed? AI Has Lowered the Barrier	160
What Tasks Are Ready for Automation?	161
Why Finance Professionals Are Uniquely Positioned to Automate	162
A Simple Framework for Getting Started	162
The Mindset Shift: From Analyst to Builder	163
Using Python to Automate Everyday Finance Tasks	163

Why Python Is So Useful for Automation	164
How to Prompt AI to Write Python Automation Code	164
Automating Reporting Workflows	165
How to Run These Scripts Easily (Google Colab)	166
What to Include in a Good Prompt for Python Automation	167
From Scripts to Automation: Scheduling with Python	167
Documentation and Reusability	167
Power Query + AI—Automating in Excel and Power BI	168
What Is Power Query (and Why Should You Use It)?	169
Why Finance Teams Should Automate with Power Query	169
Using AI to Write or Fix M Code	170
How to Ask AI to Debug Power Query Errors	170
Automating Excel Data Prep with Power Query + AI	171
Power BI: Scaling the Same Logic to Dashboards	171
Best Practices for Prompting AI in Power Query Workflows	172
Low-Code and No-Code Automation Tools: n8n, Zapier, Make	173
What Are Low-Code Automation Tools?	173
Why These Tools Matter for Finance	174
How to Prompt AI to Build Low-Code Automation Workflows	174
Common Finance Workflows to Automate	175
How to Connect Python or Excel into No-Code Flows	176
Best Practices for Building Reliable Workflows	176
Building a Sustainable Automation Culture in Finance	177
Automation Is a Mindset, Not Just a Tool	177
Create a Personal and Team Prompt Library	178
Organize Automations by Finance Function	178
Build Prompt Templates into Your Team's Toolkit	179
Educate and Enable Your Team	179
Watch for Risks and Add Guardrails	180
Embed Automation into Key Workflows	180
Final Thoughts	181
Chapter 8: Test Your Knowledge	183
Chapter 8: Solutions and Suggested Responses	185
Chapter 9: Building Your AI Finance Stack	187
A Rapidly Changing Landscape—How AI Evolves Month by Month	187
The AI Landscape Changes Every Month—Literally	187
Why I'm Not Comparing All the Tools Here	188
A Framework for Evaluating LLMs for Finance	188
You Don't Need to Try Everything—Just One or Two Tools That Fit You	190
How to Stay Informed Without Getting Overwhelmed	190
AI Agents, Autonomous Tools, and Self-Driving Finance	191
What Is an AI Agent?	191
Use Cases for AI Agents in Finance	192
How to Start Experimenting Safely	193

Risks and Limitations of Agents Today	194
Building AI-Native Finance Teams and Capabilities	195
What Does It Mean to Be AI-Native?	196
New Capabilities Your Team Will Need	196
Embedding AI in Hiring and Onboarding	197
Interview for Problem-Solvers, Not Just Technicians	197
Onboard with Automation from Day One	198
Cross-Functional Partnerships Will Matter More	198
Build Feedback Loops into Workflows	198
Traits of High-Functioning AI-Native Teams	199
Leading the Transformation—Your Role in Shaping What Comes Next	200
You Don't Need to Predict the Future—You Need to Build for It	200
From Tool User to System Designer	200
How to Lead AI Transformation from Any Level	201
Bringing Stakeholders Along	202
Create Space for Experimentation	202
Evaluating AI Tools Responsibly	203
Chapter 9: Test Your Knowledge	205
Chapter 9: Solutions and Suggested Responses	207
Chapter 10: Becoming an AI-Enabled Finance Leader	209
From Operator to Strategist—What AI Frees You to Focus On	209
AI Is Not the End of Finance Work—It's the End of the Mundane	209
From Execution to Insight	210
Where You Add the Most Value	211
Redesigning Your Role	212
Communicating Financial Intelligence with AI Support	213
Financial Communication Is a Leadership Skill	213
How AI Can Support Communication in Finance	214
Adapting the Message to the Audience	215
Structuring the Story: Data → Insight → Action	216
Repeatable Prompting for Financial Communication	217
Leading Change—Bringing People with You	218
AI Can Feel Like a Threat—Until It Feels Like a Tool	218
Managing Resistance: What to Watch For	218
Lead with Transparency, Not Hype	219
Coach Your Team to Grow with AI	219
Make AI Learning Part of the Workflow	220
Build a Culture of Curiosity, Not Compliance	220
Model the Mindset You Want to Spread	221
Your Next 90 Days—Putting It All into Practice	222
Final Thoughts: Start Small, Think Long	225
Chapter 10: Test Your Knowledge	227
Chapter 10: Solutions and Suggested Responses	229

Glossary	231
Index	232
Final Exam Copy	235
