

REMOOTIO 3

Bluetooth and Wi-Fi enabled device for gate automation.

Package includes:

- Remootio 3 device
- Sensor (for detecting if your gate is open or closed)
- Power adapter (5V) (for powering Remootio 3 from a wall socket). Depending on where you order from, you'll receive a type C (EU), type G (UK), type I (AU) or type A (US) socket.
- Power cable for the 5V power adapter
- Double-sided tapes
- Cable for connecting Remootio to your gate or garage door
- Installation manual

Key features:

- Remootio 3 has two output relays which makes it compatible with gate/garage door openers that have separate trigger inputs for opening and closing
- Remootio 3 works with a 5V power supply (standard USB charger)
- Remootio 3 also works from 5-32V DC, 12-24V AC voltages, so it can be powered from the control board of most gate openers making installation very easy
- Remootio 3 has two accessory input terminals (e.g. sensor and doorbell button)

Works with:

- Most electric gates, garage door openers and electric strikes

Connection methods:

- Bluetooth (also works when there is no Wi-Fi / Internet access), Wi-Fi (local network), Internet (via Wi-Fi)

Smart Home Integrations:

- Apple Home, Amazon Alexa, Google Assistant, Samsung SmartThings

Control via:

- iOS and Android Smartphones, Apple Watch, Open API

Technical features:

- 256 bit end-to-end encryption
- Alerts & notifications
- Automatic opening
- Open / Close status sensor
- 20 virtual keys & easy key sharing
- Automations/Scheduling
- Customizable app
- Logging (history)
- Firmware updates

Easy Installation:

- Wiring diagrams available for most electric gate and garage door openers
- Small size - fits almost anywhere
- Wide operating voltage range: 5-32VDC & 12-24VAC
- 2x output relays
