CABLE RAIL INFILL OPTIONS

We offer two cable rail infill systems - Feeney and Ultra-Tec - the industry leaders. Between them they have a wide range of cable sizes and fittings for practically every application.

Both Feeney and Ultra-Tec offer high quality 316 stainless steel cable that is affordable and low maintenance. Both work with either wood or metal post applications. The installation and fittings required for these systems do vary so take the time to understand each one. Choosing the correct system will be beneficial to the client and yourself.

feeney® CABLE·RAIL®

- Visible fittings and end caps allow for a more industrial appearance
- Versatile CableRail Kits for quick and easy installation
- Works well with square, round and flat posts
- Needs end caps
- Beveled washers required for stair runs

ULTRA-TEC® CABLE RAILING

- Availability of concealed fittings for a sleeker look
- Cable assembly packages with option for bulk cable and swaged fittings
- Generally used for square and round posts
- End caps not required
- Beveled washers not required for most applications

Cable blackening
available upon request.

CABLE RAIL FAQs

What is the spacing between lines of cable?

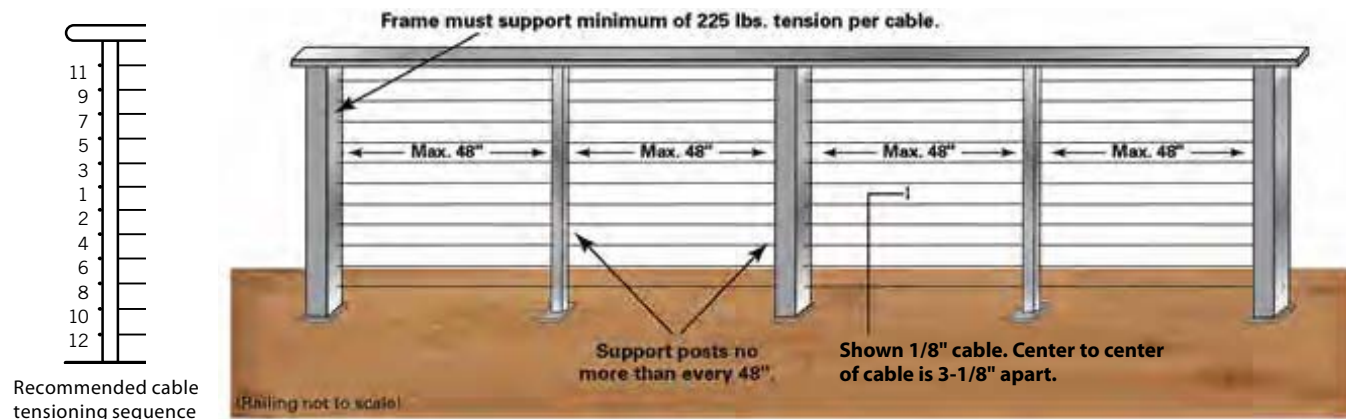

The recommended cable spacing should be no more than 3-inches apart. As the cable is not rigid, the flex in the cable must be accounted for, and not exceed the 4-inch sphere limit as set by the International Building Code.

What is the maximum spacing between intermediate posts?

Posts and intermediate posts and pickets should be spaced no more than 48-inches apart to minimize any deflection that may occur if the cables are forced apart.

What is the recommended tension on each cable run?

Properly installed cables typically have a tension in excess of 225 lbs per cable. Be sure that your railing frame is designed and built strong enough to support these loads. Tensioning tools are available (pages 242 and 256) to assist with this portion of the installation.

What are the recommended hole sizes to drill?

Drill holes in the posts depend on the cable size and type of fitting. See tables:

feeney CABLE·RAIL

ULTRA-TEC
CABLE RAILING

| METAL POSTS | | | | WOOD POSTS | | | |
|-------------|---------------------|--------------------|--------------------|------------|---------------------|--------------------|--------------------|
| Cable Size | Threaded Term. Post | Intermediate Posts | Quick-Connect Post | Cable Size | Threaded Term. Post | Intermediate Posts | Quick-Connect Post |
| 1/8" | 5/16" | 1/4" | 3/8" | 1/8" | 5/16" | 1/4" | 3/8" |
| 3/16" | 3/8" | 1/4" | 9/16" | 3/16" | 3/8" | 1/4" | 9/16" |
| 1/4" | 7/16" | 5/16" | 9/16" | | | | |

If desired, Quick-Connect™ SS posts may be through drilled at 5/16" and then counter-bored with the recommended Quick-Connect™ SS drill to countersink the fitting.

If desired, Quick-Connect™ SS posts may be through drilled at 1/4" and then counter-bored with the recommended Quick-Connect™ SS drill to countersink the fitting.

Invisiware® Radius Ferrule
part number RF-4
Cable Dia.: 1/8"
*see note if using grommets

Invisiware® Radius Ferrule
part number RF-6
Cable Dia.: 3/16"
*see note if using grommets

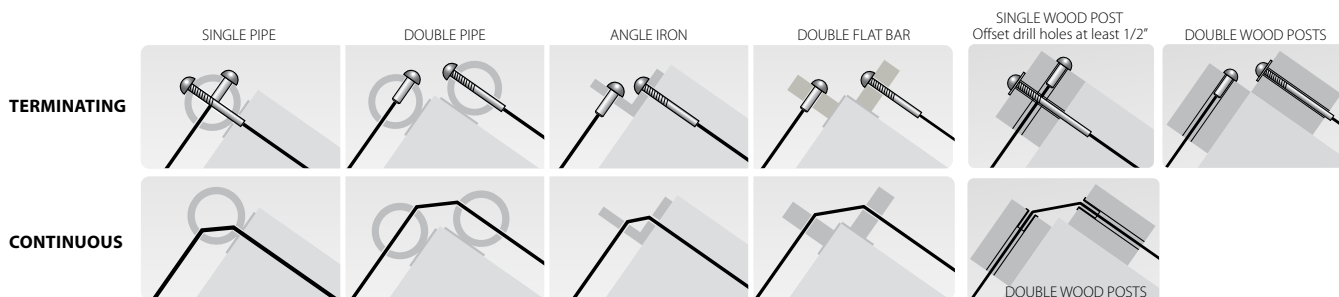

*Note: If grommets are being used, hole through which cable passes should be drilled as follows: RF-4 and RF-6 = 1/4" (.25")

What is the maximum length of a single run of cable?

Straight runs of cable (no turns/stairs) should not exceed 70 feet. Runs with corner bends (2 bends at most) should not exceed 40 feet. Depending on the number of turns the cable run has, you may consider a tensioning fitting on both ends.

How do I handle the transition at the corners?

In general, we recommend using two posts at every corner. This helps minimize the tension on the cables and also allows for all the lines of the cable to be on the same vertical spacing. A single post is possible but then you have to offset the cable lines by at least 1/2". Below are some illustrations on how to handle the corners.

What tools do I need to install cable rail?

You don't need any special tools for installation, however we offer a few installation accessories on page 242 for Feeney and page 256 for Ultra-tec.

What wall thickness for posts?

Metal and wood railing frames need to be designed and built strong enough to support the tension of properly installed cables, which is a load in excess of 225 lbs per cable.

Metal Posts:

Minimum size for all corner and end posts: Flat Bar (2" wide x 1" thick), Angle Iron (2" wide x 1/2" thick), Extra Strong Pipe (1-1/2" ID, 1-7/8" OD), Square Tube (2" wide x 1/4" wall thickness), all other posts should be sized as required for cap rail support strength or to meet local building code.

Wood Posts:

Minimum size for all corner and end posts: 3-1/2" wide x 5-1/2" thick (4x6 wood), all other posts should be sized as required for cap rail support strength or to meet local building code.

How do I maintain cable rail?

Cables are made from high quality 316-grade (marine grade) stainless steel for superior weather durability, high strength, and low maintenance. Outdoor cable installations are subject to airborne contaminants, humidity, coastal exposure (salt, sand), and periodic maintenance is recommended. Periodic cleaning of the cables will ensure many years of service. It is also important to periodically inspect the cables for proper cable tension, and re-tension as necessary.

Properly maintained stainless steel provides excellent luster, strength, and durability. Stainless steel cable is not rust or stain proof. When stainless comes in contact with chloride salts, sulfides, or other rusting metals, it can discolor or even rust and corrode. Never leave stainless in contact with iron, steel, or other metals.

Cables can be cleaned with soap and warm water using a non-abrasive pad or rag to keep them clean and free of salt and other contaminants. Specialized stainless steel cleaners and polishers can be found on page 308.

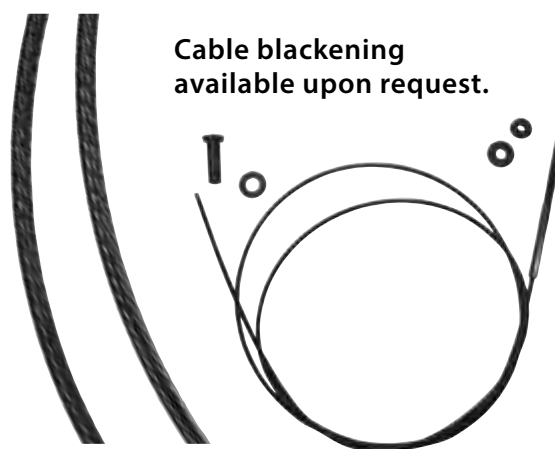

Please note that since building codes vary by State, County, and City, our recommendations may not comply with code requirements in all areas. Always consult with your local building department before starting your cable rail project.

CableRail Kits for Metal and Wood Applications

Each kit includes the selected length of type 316 stainless steel cable with a Threaded Terminal fitting pre-attached to one end, one stainless steel Quick-Connect SS fitting, two nylon flat washers, and one stainless steel Snug-Grip washer-nut.

Select a preferred end cap style to cover, protect, and finish each end. End caps sold separately; see accessories section.

Cable blackening available upon request.

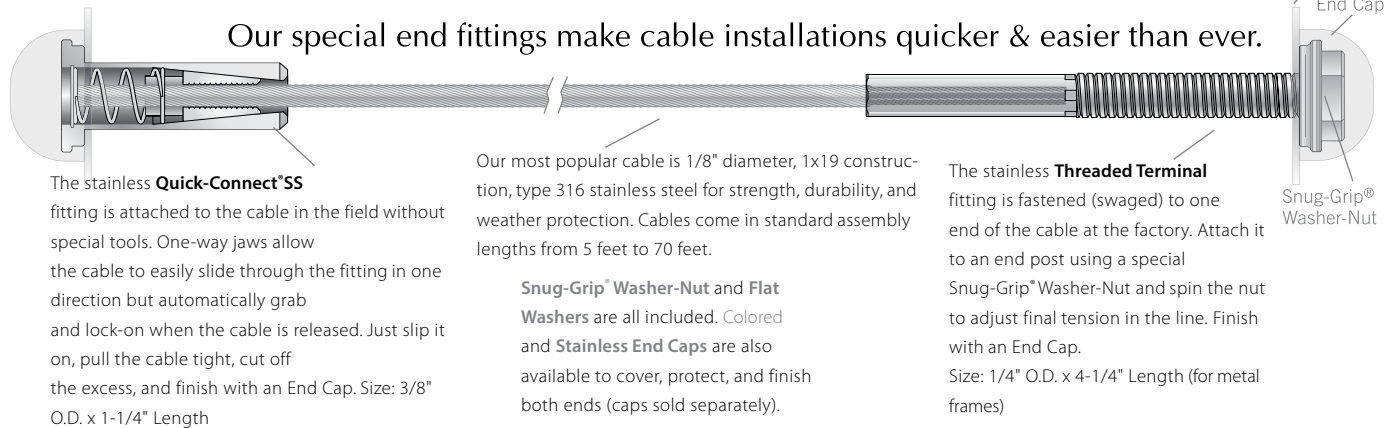

Assembly shown is for metal applications.

Attractive ■ Versatile ■ Durable

Easy-to-install, prefabricated CableRail Kits are an attractive, budget-friendly, and low-maintenance alternative to commonly used metal and wood picket infill. The Kits use high-strength, weather-tough type 316 stainless steel cable and come in a wide range of standard lengths that can be quickly trimmed to size in the field. Each kit includes special, easy-to-use Threaded Terminal and Quick-Connect®SS end fittings that remain concealed in your end posts. The result: an extremely durable, virtually invisible railing infill that leaves the view open and unimpaired.

CHECK THE CABLE-RAIL ADVANTAGES

- ☐ Attractive, affordable, and very low maintenance.
- ☐ Invisible appearance will not impair views.
- ☐ Made from strong and weather-tough type 316 stainless steel cable.
- ☐ Can be used on new or existing wood or metal railing frames.
- ☐ Simple, fast, do-it-yourself installation using prefabricated assemblies.
- ☐ Special easy-to-use fittings are hidden in the end posts.
- ☐ Made from over 70% recycled materials.
- ☐ Versatile uses: railings, trellises, fences, exterior, interior, residential, commercial.

10 YEAR WARRANTY

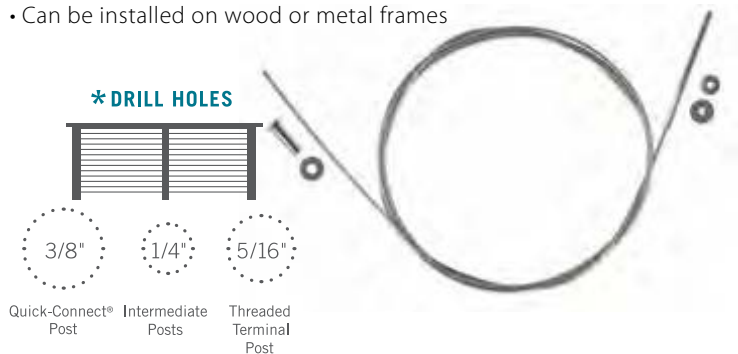

Feeney, Inc. warrants that all CableRail stainless steel cable and connectors shall be free from defects in material and workmanship under normal use, conditions, installation, and maintenance in accordance with product specifications for ten years from date of purchase. The complete text of this warranty is available upon request.

ALL DIMENSIONS ARE APPROXIMATE.

Cable accessories for metal and wood applications

STAINLESS PROTECTOR SLEEVES (wood posts only)

For protecting corner and stairway transition posts from cable abrasion. Sold 10 per package
3210-pkg 1/4"OD x 7/8"long,
(fits 1/4" diameter drill holes)

STAINLESS BEVELED WASHERS

For providing a flat bearing surface when attaching fittings at angled stair terminations.

For 1/8" Cable

Sold 4 per package.

3799-pkg For 1/8" Threaded Terminal (3/4"OD x 9/32"ID)

3792-pkg For 1/8" Quick-Connect®SS (3/4"OD x 3/8"ID)

For 3/16" Cable

Sold 4 per package.

3799-pkg For 3/16" Threaded Terminal (3/4"OD x 9/32"ID)

Sold Individually

3798 For 3/16" Quick-Connect®SS (3/4" OD x 9/16" ID)

For 1/4" Cable

Sold 4 per package.

3792-pkg For 1/4" Threaded Terminal (3/4"OD x 3/8"ID)

Sold Individually

3798 For 1/4" Quick-Connect®SS (3/4" OD x 9/16" ID)

RUBBER GROMMET FOR 1/8" CABLE

An optional accessory that will add a finished detail to holes in tubular metal intermediate posts.

- For use with 1/8" dia. cable only
- Fits 1/4" diameter drill holes

For 1/8" Cable

3213 1/4" OD x 3/16" groove, 7/16" flange

ISOLATION BUSHINGS

For eliminating direct contact of dissimilar metals to minimize electrolysis when attaching cables and fittings to metal posts in areas with salt air or similar harsh elements.

STAINLESS END CAPS

Decorative option for covering and finishing QuickConnect®SS fittings and Snug-Grip® Washer Nuts. Sold 4 per package.

3372-pkg Dome Style, 3/4"OD x 3/8"H

3373-pkg Crown Style, 3/4"OD x 3/8"H

3374-pkg Chamfer Style, 3/4"OD x 3/8"H

COLORED END CAPS (POLYETHYLENE) Decorative option for covering and finishing Quick-Connect®SS fittings and Snug-Grip® Washer Nuts.

Sold 10 per package.

7071-pkg Black, 3/4"OD x 3/8"H

7072-pkg White, 3/4"OD x 3/8"H

7073-pkg Brown, 3/4"OD x 3/8"H

7074-pkg Gray, 3/4"OD x 3/8"H

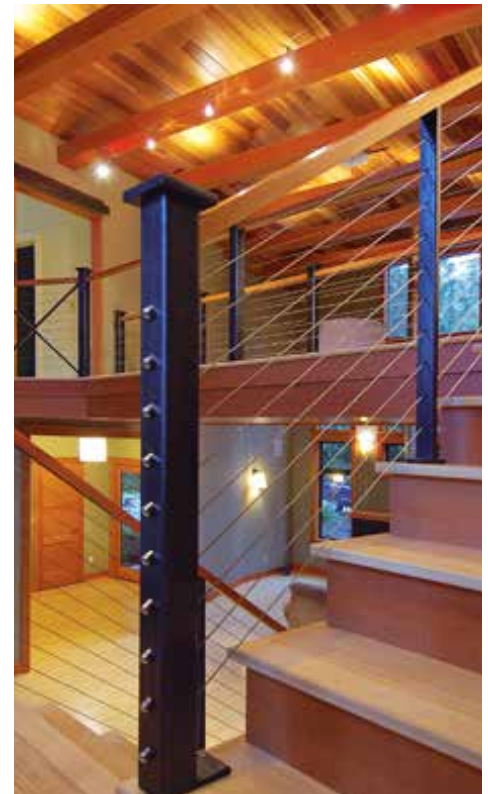

QUICK-CONNECT® RELEASE TOOL

For temporarily releasing the jaws of the Quick-Connect®SS fitting to remove or adjust the position. Reusable.

Sold 1 per package.

3128-pkg For 1/8" Quick-Connect®

3158-pkg For 3/16" Quick-Connect®

ALL DIMENSIONS ARE APPROXIMATE.

CABLERAIL CUSTOM ASSEMBLIES

Projects with special installation conditions or design considerations may require certain styles of cable and fittings not addressed by our CableRail Standard Cable Assemblies. To fulfill those specific design and function needs, we offer an assortment of cables, turnbuckles, terminals, adjusters, and fixed ends for custom assemblies.

CABLE FITTINGS-There are two types of cable fittings

① TENSION ADJUSTMENT FITTINGS

- Includes Threaded Terminals, Turnbuckles, and Adjusters that are used to tighten the cable lines
- Tension is adjusted by tightening the nut on the Threaded Terminals, spinning the tubular body on the Turnbuckles, or rotating the bolt on the Adjusters
- Tension Adjustment fittings can be paired with either a Fixed End or another Tension Adjustment Fitting

② FIXED ENDS

- Non-adjustable end termination fittings, sometimes referred to as "dead ends"
- Have no tensioning capabilities
- Each Fixed End must be paired with at least one Tension Adjustment Fitting

Every cable assembly must have at least one Tension Adjustment Fitting.

Quick-Connect® Tension Adjustment Fittings

QUICK-CONNECT® THREADED TERMINAL

Inserts through a drill hole in the post and is secured and adjusted with a washer nut.

9904 For 1/8" Cable

9804 For 3/16" Cable

QUICK-CONNECT® SURFACE MOUNT TURNBUCKLE

Attaches to the face of a wall or post using screws or bolts.

9902 For 1/8" Cable

QUICK-CONNECT® LAG SWIVEL TURNBUCKLE

Screws into the face of a wood post using a hanger bolt with lag thread (included). Tension adjusted by spinning the special swiveling turnbuckle body.

9910DL For 1/8" Cable

9810 For 3/16" Cable

QUICK-CONNECT® PIVOT SWIVEL TURNBUCKLE

Screws into the face of a wood post or wall using a hanger bolt with lag thread (included). Tension adjusted by spinning the special swiveling turnbuckle body. 180° pivoting allows for angled stair terminations.

9916DL For 1/8" Cable

9816 For 3/16" Cable

Quick-Connect® Fixed End Fittings

THE ORIGINAL QUICK-CONNECT®SS

Fits into a hole drilled in end post, and the lip rests against the outside post face.

3146 For 1/8" Cable

3147 For 3/16" Cable

3148 For 1/4" Cable

QUICK-CONNECT® FIXED SURFACE MOUNT

Attaches to the face of a wall or post using screws or bolts.

9903 For 1/8" Cable

9803 For 3/16" Cable

QUICK-CONNECT® LAG

Combines a lag thread hanger bolt with a Quick-Connect® Body. Screws into the face of a wood post. Can be paired with any Tension Adjustment Fitting.

9905DL For 1/8" Cable

9805 For 3/16" Cable

QUICK-CONNECT® PIVOT

Screws into the face of a wood post or wall using a hanger bolt with lag thread (included). 180° pivoting allows for angled stair terminations.

9915DL For 1/8" Cable

9815 For 3/16" Cable

1x19 CONSTRUCTION CABLES

19 individual wires twisted into a single, semi-flexible strand. Excellent for railings, fences, and trellises with straight runs or slight bends.

| 1/8" CABLE | PART NO. | 3/16" CABLE | PART NO. |
|------------|------------|-------------|------------|

Cable accessories for metal and wood applications

CABLERAIL TENSIONING TOOL

Tensioning Tool includes the 1/8-in. diameter cable adapter head. Sold 1 per package 6005-pkg

TENSIONING TOOL ADAPTER

5071 For 3/16" and 1/4" cable

TENSION GAUGE

Designed for use on applications using 1/8, 3/16, and 1/4 inch sized cables with 1x19 construction. Sold 1 per package 6004-pkg

CABLE LACING NEEDLE

For quickly lacing cable ends through posts without snagging. 4-1/2" long. Reusable. Sold 1 per package. 3221-pkg For 1/8" cable 3222-pkg For 3/16" cable 3223-pkg For 1/4" cable

CABLE CUTTERS

For shearing excess cable. Sold 1 per package.

2972-pkg For cable up to 1/8", 8" long, coated handles, hardened jaws

2971 For cable up to 1/4", 13" long, coated handles, hardened jaws

FEENEY STEELRENEWAL™ + STEELPROTECT™ COMBO

Stainless Steel Cleaner and Protectant Combination Pack.

Sold 1 kit per package

Kit contains:

- 1 Bottle Feeney SteelRenewal™ cleaner (100 ml.)
- 1 Bottle Feeney SteelProtect™ protectant (100 ml.)
- Applicator brush for cleaner
- Applicator sponge for protectant
- Protection gloves

5064-pkg

QUICK-CONNECT® RELEASE TOOL

For temporarily releasing the jaws of the Quick-Connect®SS fitting to remove or adjust the position. Reusable.

Sold 1 per package.

3128-pkg For 1/8" Quick-Connect®

3158-pkg For 3/16" Quick-Connect®

ALUMINUM INTERMEDIATE PICKETS-WOOD FRAMES ONLY

These pickets are a time-saving vertical spacer option for CableRail installations with wood frames.

They are low-maintenance and maintain correct cable spacing.

- Pre-drilled for 1/8" cables at 3" spacing
- Slotted holes in stair pickets accommodate 20-45 degree slope
- Field trimmed to fit railings up to 42" high
- Includes base plates and screws.

Sold 1 per package.

7648-SLV-PKG Level rail picket, 3/4" sq., 44" long, Silver

7649-SLV-PKG Stair rail picket, 3/4" sq., 46" long, Silver

Shows intermediate picket 7648-SLV-PKG

Cable Railing Infill for Metal and Wood Posts

Ultra-Tec, the ultimate cable railing infill, offers concealed hardware which allows for unobstructive views and easy installation. Ultra-Tec is available in pre-cut cable lengths or spools of cable for larger jobs.

Cable blackening
available upon
request.

OPTION 1: CABLE ON A SPOOL, SWAGE-ON FITTINGS, SWAGER RENTAL KIT

For larger cable installations consider spooled bulk cable, swage-on fittings and a swager rental kit. Choose your cable size and feet required, fixed end and tensioning end fittings.

Step 1: Choose cable size and feet required

Ultra-Tec® recommends using 1x19 Type 316 stainless steel L/H lay strand (or cable) for railing infill because of its strength, for its diameter, its resistance to corrosion, and its compatibility with stainless steel hardware. Choose from 1/8" and 3/16" diameters.

1/4", 5/16" and 3/8" cable is also available.

| 1/8" CABLE | PART NO. |
|------------|------------|
| PER FOOT* | 4AS2 |
| 100FT | 4AS2-100FT |
| 500FT | 4AS2-500FT |

| 3/16" CABLE | PART NO. |
|-------------|------------|
| PER FOOT* | 6AS2 |
| 100FT | 6AS2-100FT |
| 500FT | 6AS2-500FT |

**spooling fee will apply*

Step 2: Choose Swaged Tensioning Fitting

See page 246 for Metal

See page 250 for Wood

Step 3: Choose Swaged Non-Tensioning Fitting

See page 247 for Metal

See page 251 for Wood

Step 4: Choose a Swager Rental Kit

See page 256

Step 5: Choose Accessories

See page 254-256

Scan the QR Code to view a video which demonstrates swaging studs onto cable and installing Invisiware® Receivers in metal posts.

OPTION 2: CUT-TO-LENGTH CABLES WITH ONE FACTORY-SWAGED FITTING AND ONE SWAGELESS END READY FOR A NON-TENSIONING FITTING

Step 1: Choose a cable assembly

Each cable length is provided with an Invisiware® Stud and a washer. Choose a receiver to hold the Invisiware® Stud and a non-tensioning fitting for the opposite end of the cable run, that fits your tubing size and you will be ready to install.

For metal and wood posts. Available in 1/8" and 3/16"

with Invisiware® Stud**

**Adjust-A-Body®
with Threaded Bolt**

**Adjust-A-Jaw®
with Threaded Tab**

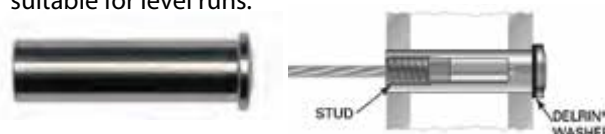

**Adjust-A-Body®
with Threaded Eye
and Threaded Tab**

The **Invisiware® Stud** is swaged onto the end of the cable and used with the Invisiware® Receiver.

| CABLE DIA. | ITEM NO. | THREAD | "L" | "D" DIAMETER AFTER SWAGED |
|------------|----------|---------|--------|---------------------------|
| 1/8" | S-4 | 5/16-24 | 1.180" | .250" |
| 3/16" | S-6 | 5/16-24 | 1.140" | .250" |

The **Invisiware® Receiver** is to be used with the Invisiware® Stud. This combination is a concealed, swaged, tensioning, through-the-post-mounted fitting that is suitable for level runs.

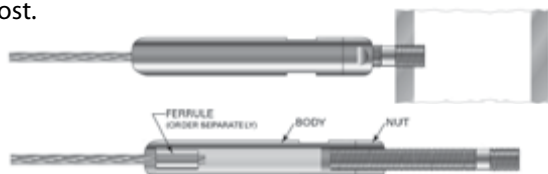

FRAMING OPTIONS FOR INVISIWARE® RECEIVER

| CABLE DIA. FRAME OPTIONS | 1/8" CABLE ITEM NO. | 3/16" CABLE ITEM NO. | LENGTH |
|-----------------------------|------------------------|-------------------------|---------|
| 1-1/2" Tube* or 1-1/4" Pipe | R-6-12 | R-6-12 | 1.56" |

| 2" Pipe | R-6-42 | R-6-42 | 2.30" |
| 2-3/8" Tube* | R-6-72 | R-6-72 | 2.405" |
| 2-1/2" Tube* | R-6-82 | R-6-82 | 2.53" |
| 3" Tube* | R-6-52 | R-6-52 | 3.03" |
| 3-1/2" Tube* | R-6-62 | R-6-62 | 3.5625" |

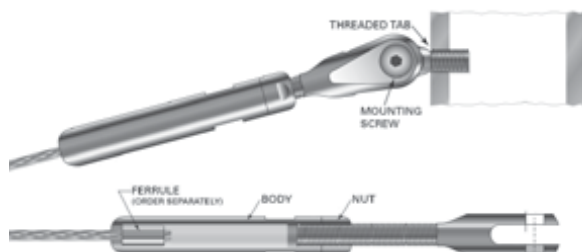

*ROUND OR SQUARE TUBE

Adjust-A-Body® w/Threaded Bolt can be used with any fitting on the opposite end of the run. The short thread of the threaded bolt portion of the fitting is secured into a pre-drilled and tapped hole in the end post.

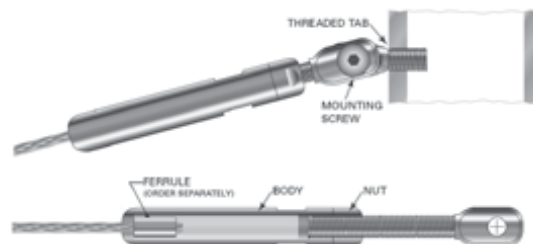

| CABLE DIA. | ITEM NO. | USE WITH FERRULE |
|------------|----------|------------------|
| 1/8" | A-JTB6 | F-4 |
| 3/16" | A-JTB6 | F-6 |

Adjust-A-Jaw® and Threaded Tab fitting attaches to the end post by installing a Threaded Tab into a pre-drilled and tapped hole in the end post and attaching the threaded jaw portion of the fitting to the threaded tab with a button head screw.

| CABLE DIA. | ITEM NO. | USE WITH FERRULE | USE WITH SCREW | USE WITH TAB |
|------------|----------|------------------|----------------|--------------|
| 1/8" | A-J62 | F-4 | SC-6 | TT-6B |
| 3/16" | A-J62 | F-6 | SC-6 | TT-6B |

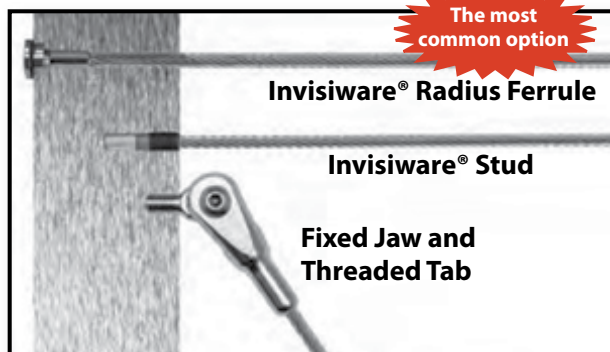

Adjust-A-Body® w/Threaded Eye and Threaded Tab fitting attaches to the end post by installing a Threaded Tab into a pre-drilled and tapped hole in the end post and attaching the threaded eye portion of the fitting to the threaded tab with a button head screw.

| CABLE DIA. | ITEM NO. | USE WITH FERRULE | USE WITH SCREW | USE WITH TAB |
|------------|----------|------------------|----------------|--------------|
| 1/8" | A-JTE6 | F-4 | SC-6 | TT-6B |
| 3/16" | A-JTE6 | F-6 | SC-6 | TT-6B |

Some fittings also available for 1/4", 5/16" and 3/8" dia. cable.

SWAGED NON-TENSIONING FITTINGS FOR METAL POSTS

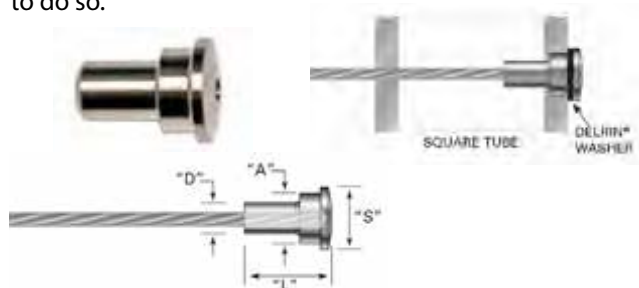

The **Invisiware® Stud** can be used as a non-tensioning end in level or pitched applications. It is swaged onto one end of the cable and threaded into a drilled and tapped hole in the face of the post. This fitting would typically be paired with an Invisiware® Receiver and Stud tensioning fitting on the opposite end. This method of using an Invisiware® Stud as a non-tensioning end is restricted to interior applications.

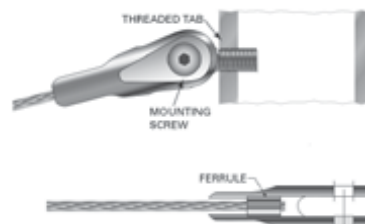

| CABLE DIA. | ITEM NO. | THREAD | "L" | "D" DIAMETER AFTER SWAGED |
|------------|------------|---------|--------|---------------------------|
| 1/8" | S-4 | 5/16-24 | 1.180" | .250" |
| 3/16" | S-6 | 5/16-24 | 1.140" | .250" |

The **Invisiware® Radius Ferrule** fitting has a head shaped to appear like the Invisiware® Receiver from the outside of the post (like the Invisiware® Receiver, the Invisiware® Radius Ferrule is concealed within the post). For these two reasons it is recommended to use the Invisiware® Radius Ferrule on one end of your cable run and an Invisiware® Receiver and Stud on the opposite end whenever practical to do so.

Fixed Jaw and Threaded Tab fitting attaches to the metal end post by installing a Threaded Tab into a pre-drilled and tapped hole in the end post and attaching the Fixed Jaw to the threaded tab with a button head screw. The cable is retained within the Fixed Jaw fitting by a ferrule swaged onto the end of the cable.

| CABLE DIA. | ITEM NO. | "D" DIA. AFTER SWAGED | "L" LENGTH AFTER SWAGED | "S" HEAD DIA. | "A" SHOULDER DIA. |

Scan the QR Code to view a video which demonstrates swaging Ferrules onto Cable.

Some fittings also available for 1/4", 5/16" and 3/8" dia. cable.

SWAGELESS TENSIONING FITTINGS FOR METAL POSTS

Push-Lock® Tensioner w/Threaded Bolt fitting consists of two separate pieces: the threaded bolt and Push-Lock® tensioning body. The threaded bolt is installed into a pre-drilled and tapped hole in the end post. The cable attaches to the fitting via the Push-Lock® locking wedge system. The body threads onto the other end of the bolt, connecting the two pieces.

| CABLE DIA. | ITEM NO. |
|------------|--------------------|
| 1/8" | PL-SFC-MS-4 |
| 3/16" | PL-SFC-MS-6 |

| CABLE DIA. | ITEM NO. |
|------------|--------------------|
| 1/8" | PL-SFC-MP-4 |
| 3/16" | PL-SFC-MP-6 |

Push-Lock® Tensioner w/ Threaded Clevis fitting consists of two separate pieces: the articulating threaded bolt and Push-Lock® tensioning body. The threaded bolt is installed into a pre-drilled and tapped hole in the end post. The cable attaches to the body via the Push-Lock® locking wedge system. The machine thread of the articulating bolt threads into the body, connecting the two pieces.

Invisiware® Receiver with Push-Lock® Stud fitting requires that a minimum of 2-1/2" of clearance exists on the back side of the end post to install the Receiver into the post. The Receiver is furnished with a Delrin® washer that is installed between the shoulder of the fitting and the end post to protect the surface of the finish of the end post as tension is applied.

Push-Lock® Stud attaches manually with no special tools required. The cable attaches to the fitting via the Push-Lock® locking wedge system.

| CABLE DIA. | SWAGELESS, PUSH-LOCK STUD |
|------------|---------------------------|
| 1/8" | PLST-4 |
| 3/16" | PLST-6 |

Choose an **Invisiware® Receiver** to be used with the Push-Lock® Stud.

| 2" Pipe | R-6-42 | R-6-42 | 2.30" |
| 2-3/8" Tube* | R-6-72 | R-6-72 | 2.405" |
| 2-1/2" Tube* | R-6-82 | R-6-82 | 2.53" |
| 3" Tube* | R-6-52 | R-6-52 | 3.03" |
| 3-1/2" Tube* | R-6-62 | R-6-62 | 3.5625" |

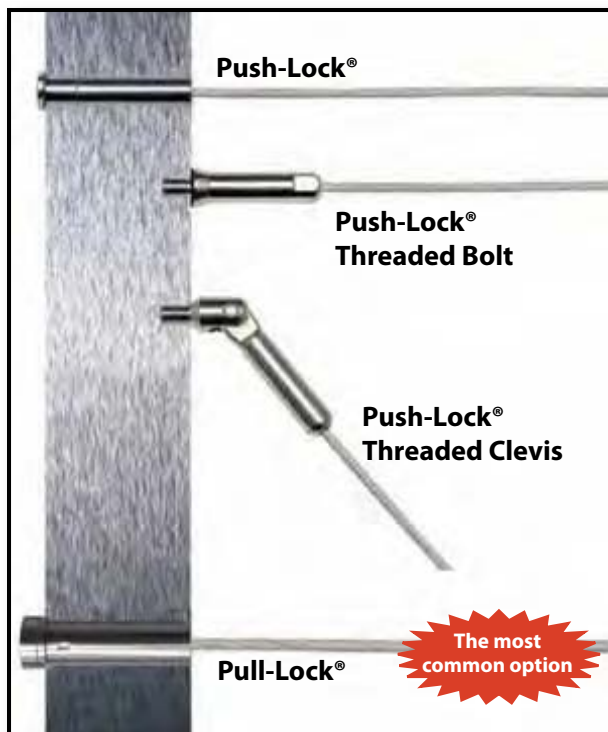

*ROUND OR SQUARE TUBE

Push-Lock® Turnbuckle w/Threaded Bolt fitting consists of four separate pieces: the threaded bolt, the body, the lock nut, and the Push-Lock® Stud. The short thread of the threaded bolt is secured into a pre-drilled and tapped hole in the face of the end post. The lock nut is installed all the way onto the exposed machine thread of the threaded bolt first, followed by the body. The Push-Lock® Stud threads into the body, and the cable attaches to the stud fitting via the Push-Lock® locking wedge system.

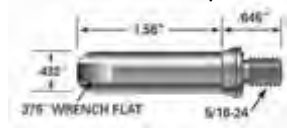

| CABLE DIA. | ITEM NO. |
|------------|-------------------|
| 1/8" | PL-TB-TB-4 |
| 3/16" | PL-TB-TB-6 |

SWAGELESS NON-TENSIONING FITTINGS FOR METAL POSTS

The Push-Lock® Threaded Bolt fitting is installed into a pre-drilled and tapped hole. This fitting is furnished with a Delrin® washer that is installed between the shoulder of the fitting and the end post to protect the surface of the end post.

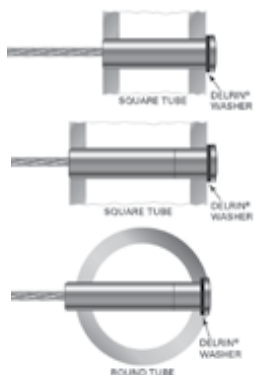

| CABLE DIA. | ITEM NO. |
|------------|------------|
| 1/8" | PL-FM-MS-4 |
| 3/16" | PL-FM-MS-6 |

The Push-Lock® Threaded Clevis fitting is installed into a pre-drilled and tapped hole in the end post. The cable attaches to the body via the Push-Lock® locking wedge system.

| CABLE DIA. | ITEM NO. |
|------------|-------------------|
| 1/8" | PL-CL-RP-4 |
| 3/16" | PL-CL-RP-6 |

The Push-Lock® fitting is installed into a pre-drilled hole in the end post. Using the Push-Lock® fitting requires enough clearance on the back side of the end post. The amount of clearance depends on the length of the Push-Lock® fitting chosen.

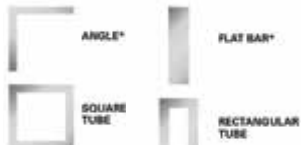

METAL FRAMING OPTIONS FOR PUSH-LOCK® FITTINGS

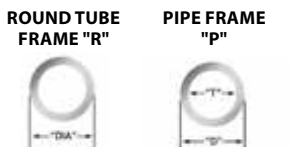

| FRAME "F" | FRAME "R" | FRAME "P" | 1/8" CABLE ITEM NO. | 3/16" CABLE ITEM NO. | "L" LENGTH |
|--------------|--------------|--------------|------------------------|-------------------------|---------------|
| 1-1/2" | 1-1/2" | 1-1/4" | PL-4-12 | PL-6-12 | 1.562" |
| 2" | 2" | 1-1/2" | PL-4-2.030 | PL-6-2.030 | 2.030" |
| 3" | 3" | N/A | PL-4-3.030 | PL-6-3.030 | 3.030" |

† will protrude from cable side of post +/- 1/8"

POST PARAMETERS FOR PUSH-LOCK® & PULL-LOCK® FLAT SIDED FRAME "F"

** Push-Locks® & Pull-Locks® cannot be used with angle shapes or flat bar in pitch applications unless the post hole is drilled at the angle of the stair rake and a beveled washer is used.*

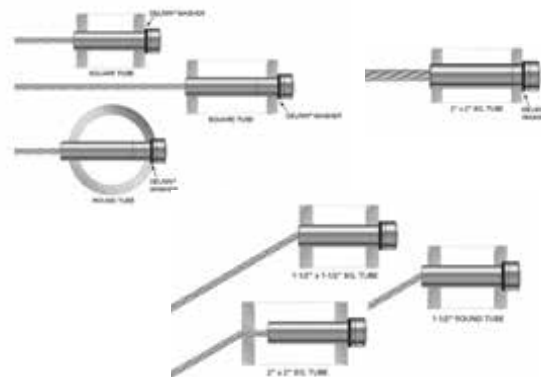

*T = Theor. I.D. (Pipe Size)

D = Outside diameter

| SIZE | "T" | "D" |
|--------|-------|--------|
| 1-1/4" | 1.25" | 1.66" |
| 1-1/2" | 1.5 | 1.91" |
| 2" | 2.00" | 2.375" |

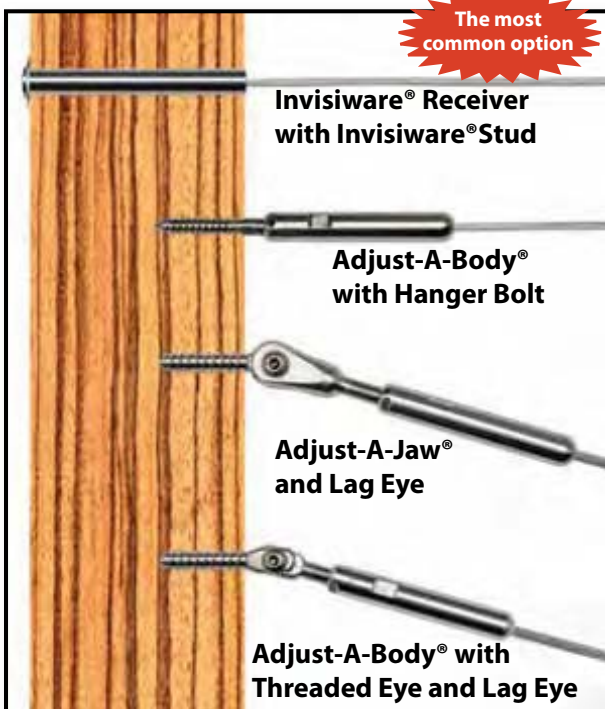

The Pull-Lock® fitting is installed into a pre-drilled hole in the end post. Using the Pull-Lock® fitting on level or pitched runs requires enough clearance on the back side of the end post to install the fitting through the back side of the post. That amount of clearance depends on the length of Pull-Lock® chosen.

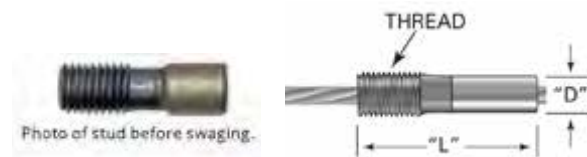

METAL FRAMING OPTIONS FOR PULL-LOCK® FITTINGS

| 3-1/2" | 3-1/2" | 3" | PUL-4-3.030 | PUL-6-3.030 | 3.030" |

SWAGED TENSIONING FITTINGS FOR WOOD POSTS

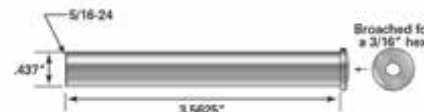

The **Invisiware® Stud** is swaged onto the end of the cable and used with the Invisiware® Receiver.

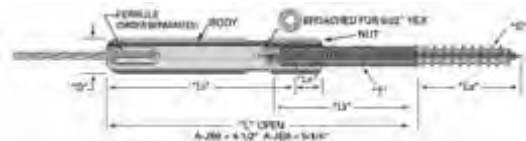

| CABLE DIA. | ITEM NO. | THREAD | "L" | "D" DIAMETER AFTER SWAGED |
|------------|------------|---------|--------|---------------------------|
| 1/8" | S-4 | 5/16-24 | 1.180" | .250" |
| 3/16" | S-6 | 5/16-24 | 1.140" | .250" |

The **Invisiware® Receiver w/Invisiware® Stud** fitting is placed and concealed within a pre-drilled hole in the wood end post (a minimum of 3" of clearance must exist on the back side of the post). It is recommended that a stainless steel flat washer be placed between the fitting shoulder and the mating surface of the wood post. The stud is swaged onto one end of the cable and is inserted and threaded into the Receiver installed in the end post.

| CABLE DIA. | ITEM NO. |
|------------|---------------|
| 1/8" | R-6-62 |
| 3/16" | R-6-62 |

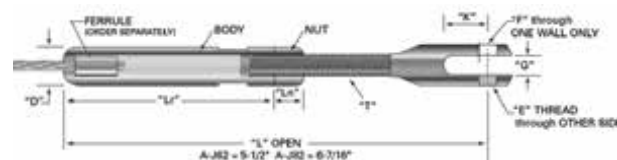

Adjust-A-Body® w/Hanger Bolt. The lag thread of the hanger bolt portion of the fitting is driven into a pre-drilled hole in the wood end post. The cable is retained within the body portion of the fitting by a ferrule swaged onto the end of the cable. The lock nut is installed all the way onto the hanger bolt first, followed by the body, which is secured onto the hanger bolt, creating tension on the cable. Once sufficient tension is achieved, the lock nut is secured against the end of the body to prevent the fitting from loosening.

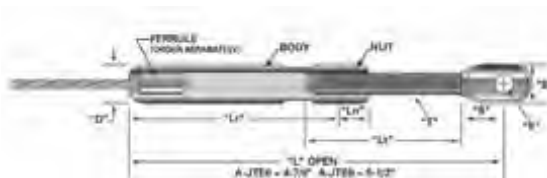

| CABLE DIA. | ITEM NO. | USE WITH FERRULE |
|------------|--------------|------------------|
| 1/8" | A-JB6 | F-4 |
| 3/16" | A-JB6 | F-6 |

Adjust-A-Jaw® and Lag Eye fitting attaches to the end post by installing a Threaded Tab into a pre-drilled and tapped hole in the end post and attaching the threaded jaw portion of the fitting to the threaded tab with a button head screw.

| CABLE DIA. | ITEM NO. | USE WITH FERRULE | USE WITH SCREW | USE WITH LAG EYE |
|------------|--------------|------------------|----------------|------------------|
| 1/8" | A-J62 | F-4 | SC-6 | LE-6 |
| 3/16" | A-J62 | F-6 | SC-6 | LE-6 |

Adjust-A-Body® w/Threaded Eye and Lag Eye fitting attaches to the wood end post by installing a Lag Eye into a pre-drilled hole in the end post and attaching the threaded eye portion of the fitting to the lag eye with a button head screw.

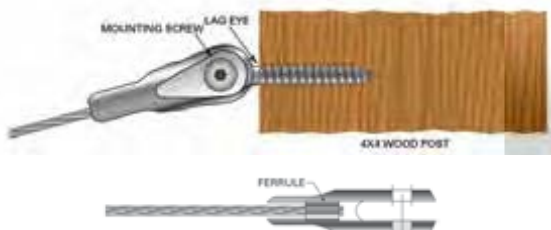

| CABLE DIA. | ITEM NO. | USE WITH FERRULE | USE WITH SCREW | USE WITH LAG EYE |
|------------|---------------|------------------|----------------|------------------|
| 1/8" | A-JTE6 | F-4 | SC-6 | LE-6 |
| 3/16" | A-JTE6 | F-6 | SC-6 | LE-6 |

Some fittings also available for 1/4", 5/16" and 3/8" dia. cable.

SWAGED NON-TENSIONING FITTINGS FOR WOOD POSTS

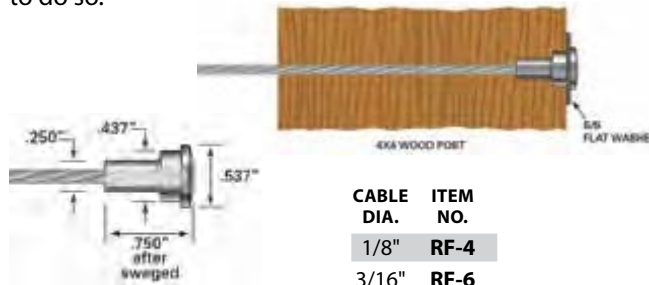

Fixed Jaw w/Lag Eye fitting attaches to the wood end post by installing a Lag Eye into a pre-drilled hole in the end post and attaching the Fixed Jaw to the lag eye with a button head screw. The cable is retained within the Fixed Jaw by a ferrule swaged onto the end of the cable.

| CABLE DIA. | ITEM NO. | USE WITH FERRULE | USE WITH SCREW | USE WITH LAG EYE |
|------------|--------------|------------------|----------------|------------------|
| 1/8" | F-J62 | F-4 | SC-6 | LE-6 |
| 3/16" | F-J62 | F-6 | SC-6 | LE-6 |

The **Invisiware® Radius Ferrule** fitting has a head shaped to appear like the Invisiware® Receiver from the outside of the post (like the Invisiware® Receiver, the Invisiware® Radius Ferrule is concealed within the post). For these two reasons it is recommended to use the Invisiware® Radius Ferrule on one end of your cable run and an Invisiware® Receiver and Stud on the opposite end whenever practical to do so.

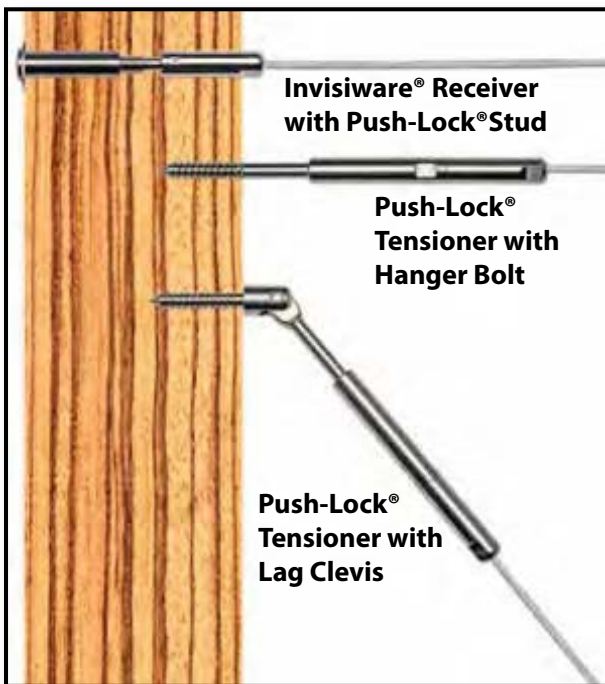

You can use this fitting on a pitched application by installing a post protector tube into the face of the post where the cable exits at an angle. The post protector tube protects the face of the post from abrasion and furrowing as the cable is tensioned. The post protector tube is sold separately.

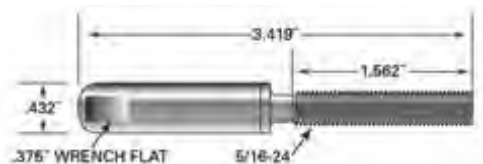

CS-TUBE
For 1/8" & 3/16"
Cable

SWAGELESS TENSIONING FITTINGS FOR WOOD POSTS

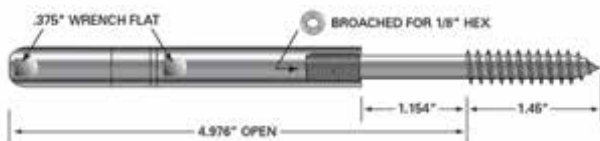

Push-Lock® Stud attaches manually with no special tools required. The cable attaches to the fitting via the Push-Lock® locking wedge system.

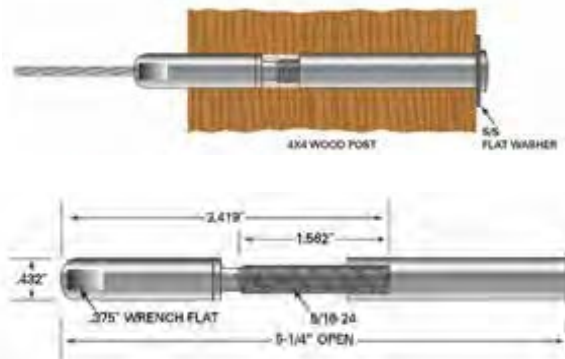

| CABLE DIA. | ITEM NO. |
|------------|----------|
| 1/8" | PLST-4 |
| 3/16" | PLST-6 |

Push-Lock® Tensioner w/Hanger Bolt fitting consists of two separate pieces: the hanger bolt and Push-Lock® tensioning body. The hanger bolt is driven into a pre-drilled hole in face of the wood end post. The cable attaches to the body via the Push-Lock® locking wedge system. The machine thread of the hanger bolt threads into the body, connecting the two pieces.

| CABLE DIA. | ITEM NO. |

| 1/8" | PL-SFC-WS-4 |
| 3/16" | PL-SFC-WS-6 |

Invisiware® Receiver with Push-Lock® Stud fitting requires that a minimum of 2-1/2" of clearance exists on the back side of the end post to install the Receiver into the post. It is recommended that a stainless steel flat washer between the fitting shoulder and the mating surface of your wood post. The cable attaches to the Push-Lock® Stud fitting via the Push-Lock® locking wedge system.

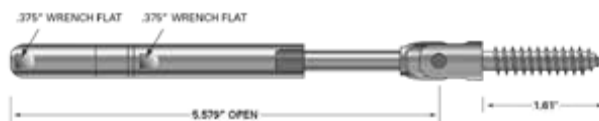

Choose an **Invisiware® Receiver** to be used with the Push-Lock® Stud.

POST SIZE OPTIONS FOR INVISIWARE® RECEIVER

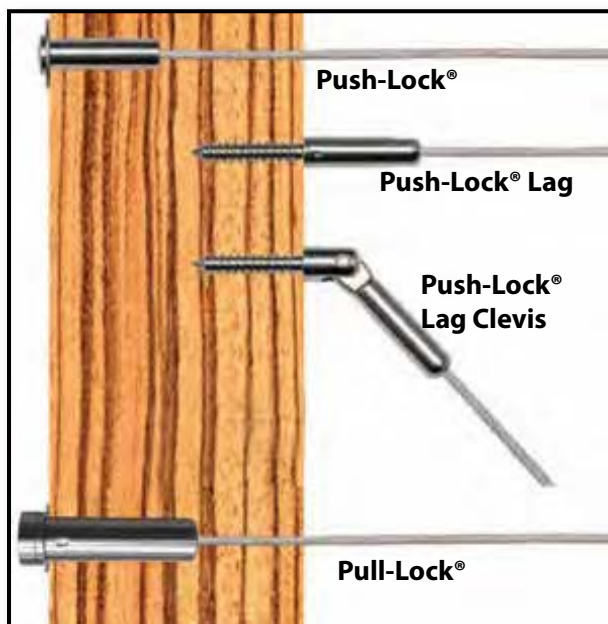

| POST SIZE | ITEM NO. | LENGTH |
|--------------------|----------|--------|
| 4" x 4" | R-6-42 | 2.30" |
| 4" x 6" or 6" x 6" | R-6-62 | 3.56" |

Push-Lock® Tensioner w/Lag Clevis fitting consists of two separate pieces: the articulating lag and the Push-Lock® tensioning body. The lag is driven into a pre-drilled hole in the wood end post. The cable attaches to the body via the Push-Lock® locking wedge system. The machine thread of the articulating lag threads into the body, connecting the two pieces.

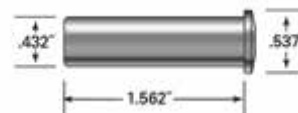

| CABLE DIA. | ITEM NO. |
|------------|---------------|
| 1/8" | PL-SFC-WP-4-1 |
| 3/16" | PL-SFC-WP-6-1 |

SWAGELESS NON-TENSIONING FITTINGS FOR WOOD POSTS

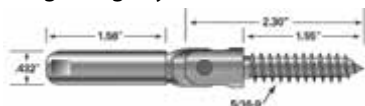

Push-Lock® fitting is installed into a pre-drilled hole in the end post. Using the Push-Lock® fitting on level runs requires that a minimum of 1-1/2" of clearance exists on the back side of the end post. It is also recommended that a stainless steel flat washer be installed between the shoulder of the fitting and the mating surface of the wood post. The cable attaches to the fitting via the Push-Lock® locking wedge system.

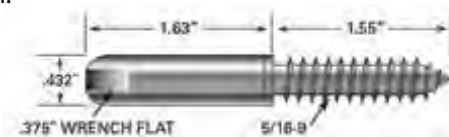

| CABLE DIA. | ITEM NO. |
|------------|----------|
| 1/8" | PL-4-12 |
| 3/16" | PL-6-12 |

Push-Lock® w/Lag Clevis fitting is installed into a pre-drilled hole in the wood end post. Drive the lag thread into the hole until the fitting shoulders on the post face. The cable attaches to the body via the Push-Lock® locking wedge system.

| CABLE DIA. | ITEM NO. |
|------------|-----------------|
| 1/8" | PL-LAG-CL-TE4-1 |
| 3/16" | PL-LAG-CL-TE6-1 |

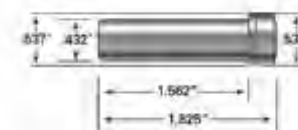

Push-Lock® Lag fitting is installed into a pre-drilled hole in the wood end post by rotating the fitting to drive the lag thread into the hole until the fitting shoulders on the post face. Because the wrench flat is at the back of the fitting, it can be used with sleeved posts as well. The cable attaches to the fitting via the Push-Lock® locking wedge system.

| CABLE DIA. | ITEM NO. |

| BW38-6 | 1/8" / 3/16" | 37°-39° |

Isolation Bushing

ITEM: **B-687-562-437**

These bushings are placed over a fitting, such as the Receiver or Pull-Lock, before inserting into the post. By doing so the risk of bimetallic corrosion is reduced.

Stainless Steel Cleaner and Protectant

ITEM: **E-Z-CLEAN**

Dissolves minor corrosion, then leaves a protective coating that lasts for months. Includes an 8 oz. spray-on rust and stain remover and a 4 oz. bottle of protectant.

Stainless Steel Cable Brace

ITEM: **CB-34.5-SS-10**

1/4" x 1" x 36" high rails. Holes pre-drilled at 3-1/8" on center, 10 holes. For use between structural posts to keep cables code compliant on level runs. Weld to metal frames; use cable brace floor plates for attaching to wood. Type 316 Stainless Steel.

Stainless Steel Cable Brace Floor Plates

ITEM: **FLP-CBS**

For mounting cable braces to top or bottom rail or deck. 2-1/4" x 1-1/4" x 1/4" Type 316 Stainless Steel

Install with 1/4" flathead screw, purchased separately.

Cable Grommets

Sold in packages of 100

OPTIONAL ACCESSORIES

Swager Rentals

This Swager Rental Kit will be needed if you are wanting to cut and swage cables yourself in the field, we rent swager kits that come complete with the swager head, hydraulic pump, cable cutters, cable gripping pliers, and other tools to help ensure you have what you need to successfully complete your cable installation. The 650 kit comes with an electric pump; the 610 comes with a pump that requires a compressor. For the 610, you need to supply an air compressor to power the pump and the swager. Requirements are minimum 5.8 CFM at 90 psi and a minimum 20 gallon tank. Air pressure should be regulated to a minimum of 120 psi, not to exceed 140 psi.

ITEM: **610 Swager**
for 1/8" and 3/16"
cable only

ITEM: **650 Swager**
for all cable sizes

Cable Release

ITEM: **PL-KEY**

Releases cable from Push-Lock® and Pull-Lock® type fittings before cables are ensioned. For 1/8" cable only.

Cable Tension Gauge

ITEM: **PT-CR**

Check the tension on your cables with this easy to use gauge.

Cable Gripping Pliers

ITEM: **PLIERS**

Locking pliers with machined jaws to grip the cable as you are tensioning the cable. Keeps the cable from turning and prevents damage to the cable when cable is being tensioned.

Cable Cutters

For burr-free cutting of cable.

ITEM: **C-7**

To cut 1/8" cable

ITEM: **C-9**

To cut 3/16" or 1/4" cable

Cut-off Tool

ITEM: **CUT-OFF-KIT**

This tool is used to cut cable flush with the end of the Pull-Lock® fittings and to cut excess threads off stud-type tensioners. Includes mandrel and two cut-off wheels.

Pretensioner Tool

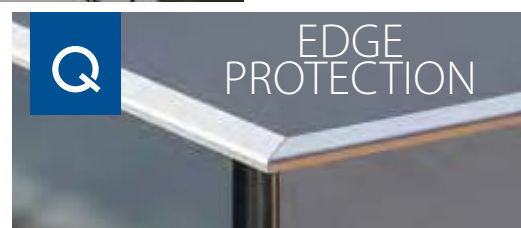

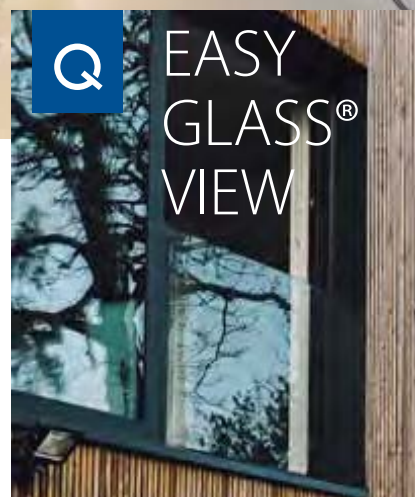

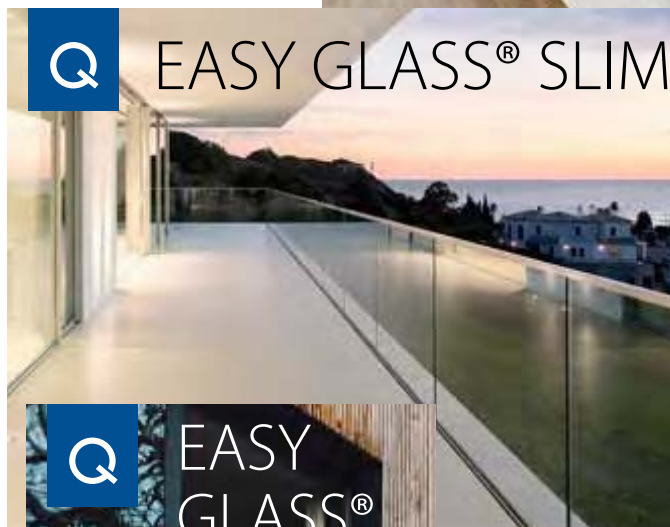

ITEM: **PRETENSIONER01**

Commercial Pre-Tensioner is recommended to be used when installing cable with lengths longer than 70' and threading through multiple posts. This tool allows you to pretension the cable at an intermediate post location. Use the gauge to guide the cable tension.

GLASS RAILING SYSTEMS

These modular railing systems offer ease of installation, customizable components and top and fascia mount options. In addition, they will provide an open and airy appeal to any office, residence, hotel or architectural space where a glass railing is required.

EASY GLASS® SMART

Incorporates the adjustable Q-disc System, a groundbreaking approach for aligning and securing glass.

Ease of installation for glass thicknesses of 1/2" – 1 1/16"

With the adjustable Q-disc® System for glass mounting and alignment, Smart lets you complete glass fixing, alignment or removal quickly and intuitively. In fact, these jobs can be finished faster than ever before. What an easy way to save time and money!

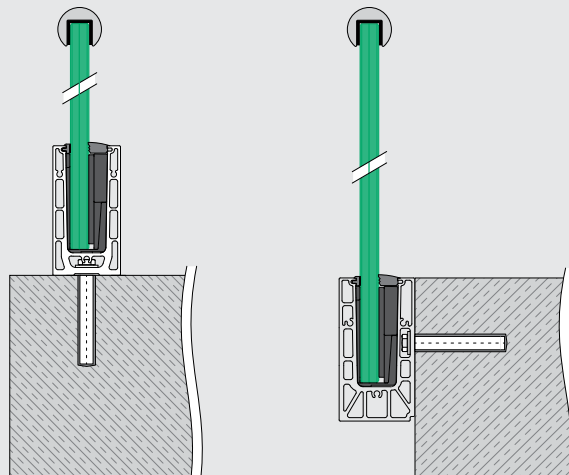

- Light and medium use for indoor or outdoor railings
- Symmetrical top-mount base shoe
- Minimal use of anchors
- Choice of fixing methods
- Optional aluminum shoe shims available for leveling uneven surfaces
- Can be combined with all Q-railing glass-mounted handrails, cap rails, U-profiles and edge protection

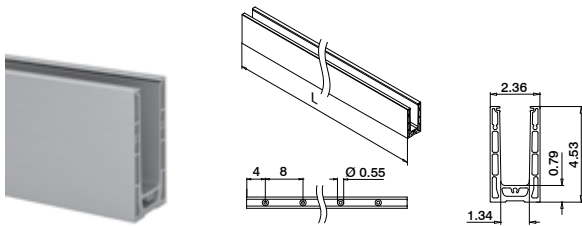

EASY GLASS® SMART VARIANTS

Smart Top mount

- Also for in-floor mounting (protective layer needs to be applied)
- Optional base shoe cladding

Also available for fascia mount.

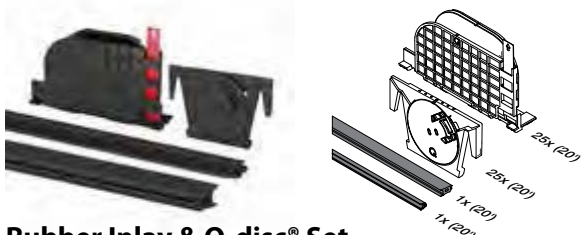

Aluminum Base Shoe, Top Mount

(connection pins included)

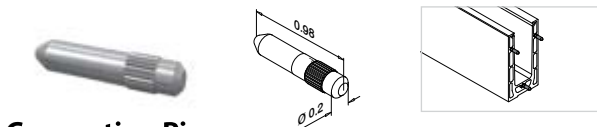

| ITEM # | FINISH | LENGTH |

Drainage Profile

| ITEM # | FINISH |
|----------------|-------------------|
| 16.6948.030.18 | Brushed, anodized |

Prevents water from collecting in the base shoe. These profiles can be spaced 3"-4" apart, but it is recommended they be spaced 1" apart for best water removal.

Q-INFO MOD 6948

EASY GLASS® SLIM

This minimalist base shoe is just 1.77" wide, which makes it light and easy to maneuver.

A true classic yet never out of style, Easy Glass® Slim is suitable for homes, offices or commercial areas. Thanks to its slender base shoe, this system provides an extremely elegant appearance.

This lightweight railing is also very cost-effective and ideal to work with on site!

- Light and medium use, including stairs
- Enjoy quick and easy glass fixing with the Safety Wedge System (wedges and rubber set)
- Can be combined with all Q-railing glass-mounted handrails, cap rails, U-profiles and edge protection

PanelGRIP[®] 2

PANELGRIP

The **Wagner PanelGrip System** utilizes a unique locking mechanism of high-strength Aluminum and PVC *isolators* combined with a specially designed Aluminum *Base Shoe Moulding*.

When assembled with tempered or laminated tempered glass of the appropriate size, **PanelGrip** enables the installer to fabricate a structural **Glass Railing System** with significant reductions in labor and freight costs over standard wet glaze options.

- **Reduce Labor Costs Up To 80% over Wet Glaze**

No sealing of *Base Shoe Moulding*, no *Setting Blocks*, no plumbing of glass, no multiple pours of cement, no waiting for cement to cure; no messy clean-up.

- **Reduce Freight Costs Up To 30%**

PanelGrip shoe is almost 30% lighter than standard *Base Shoe Moulding* yet meets structural load requirements for railings.

- **Broadest Grip Range In One Base Of Any Dry Glaze Option**

For Monolithic and Laminated Tempered Glass. Options available to work with any panel between 1/2" and 7/8" (12.7mm and 21.5mm).

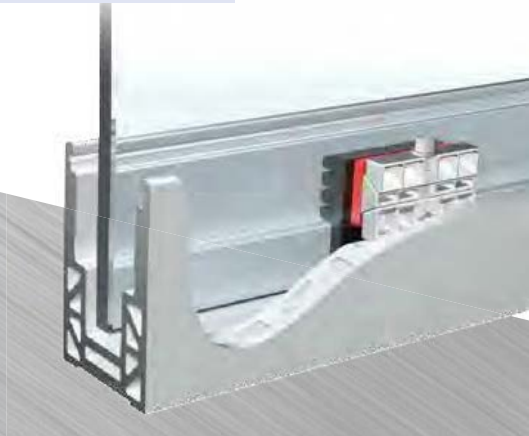

- **No Special Tools Required**

All you need is an Allen wrench for installation or removal.

- **No Mess**

No mixing and pouring of expansion cement.
No running of cement on incline.

The **PanelGrip System** was tested per ASTM E935, Standard Test Methods for Performance of Permanent Railing Systems and Rails for Buildings. This test report may be downloaded at panelgrip.com.

WAGNER

*The New Standard
in Glass Railing*

**Clearly the smart choice for
your next glass railing system**

PANELGRIP 2 GLASS RAILING SYSTEM

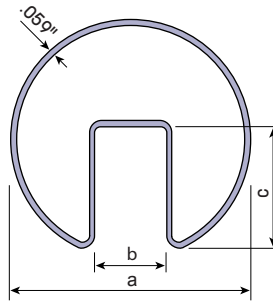

Roll Formed Top Rail

18' Lengths.

Type 316.

Mill, Satin or Bright Polished Finish.

These Stainless Steel sections have no visible seam and are suitable for bending.

| Satin Anodized | GR2190.4AN | GR2190EM.AN | GR2190S | GR2190MK.4AN |

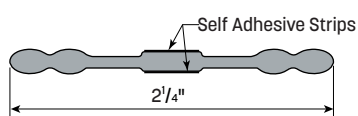

Placing metal **Top Rail** in direct contact with a glass edge is not recommended. Use **Silicone** or a **Protective Insert** as a buffer between the **Top Rail** selected and **Tempered Glass**.

Protective Insert

This new universal protective insert will work with a broad range of glass sizes and **Top Rail**. Attach to top of glass with adhesive strip provided then expose top adhesive strip prior to placing Slotted **Top Rail** over Insert which will fold sides into place. A silicone bead may be needed depending on glass/Top Rail dimensions.

| Length | PVC |
|--------|------------|
| 20' | GR9397-20 |
| 40' | GR9397-40 |
| 100' | GR9397-100 |
| 250' | GR9397 |

Sold flat in 20, 40, 100 or 250 foot coils. Folds into shape once Slotted Top Rail is put into place. Spray glass cleaner is suggested to simplify insertion.

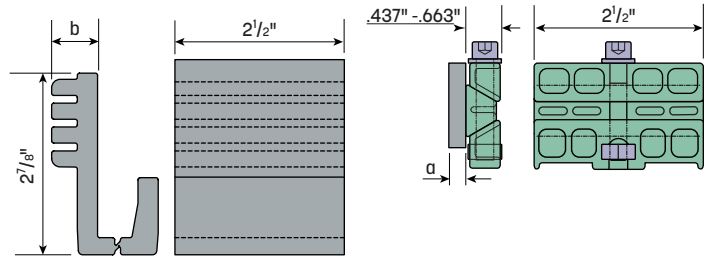

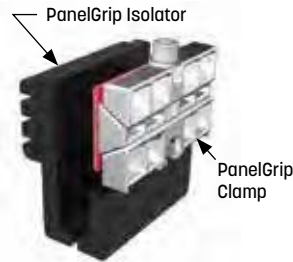

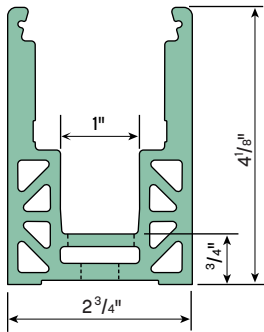

PANELGRIP 2 GLASS RAILING SYSTEM

Shoe Mechanism Kits

| Gasket 100' | GR9302-100 |
| Gasket 500' | GR9302 |

Gasket - Black, for PanelGrip

For use without **Cladding**.

| | |
|-------------|-------------------|
| Gasket 20' | GR9355-20 |
| Gasket 40' | GR9355-40 |
| Gasket 100' | GR9355-100 |
| Gasket 250' | GR9355 |

Cladding for Base Shoe Moulding - 10' Lengths

Recommended Attachment Options
Take care to properly align **Cladding** before pressing into place.

1. Apply two rows of **Tape** to the vertical face of the **Cladding** and apply a **Silicone** bead between the rows.
2. Apply two rows of **Tape** to the vertical face of the **Cladding**.
3. Apply **Silicone** to the vertical face of the **Cladding**. Use clamps to hold the **Cladding** in place until the **Silicone** cures.

| a | h | Thick. | SATIN ANODIZED ALUMINUM | SATIN STAINLESS TYPE 304 | SATIN STAINLESS TYPE 316 | POLISHED STAINLESS TYPE 304 |
|------|--------|--------|-------------------------|--------------------------|--------------------------|-----------------------------|
| 7/8" | 4 1/8" | 1/16" | GR2802.4AN | GR3802.4 | GR3806.4 | GR3802.7 |

Base Shoe Moulding End Caps - Formed from Sheet

PANELGRIP 2 GLASS RAILING SYSTEM

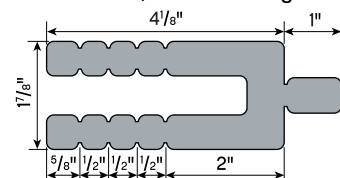

PanelGrip Torque Wrench
 $\frac{3}{8}$ " Torque Wrench, $\frac{3}{8}$ " Drive,
 20-200 in-lbf. For setting PanelGrip
 mechanism into **PanelGrip Base**
Shoe Moulding.

PGTWRENCH

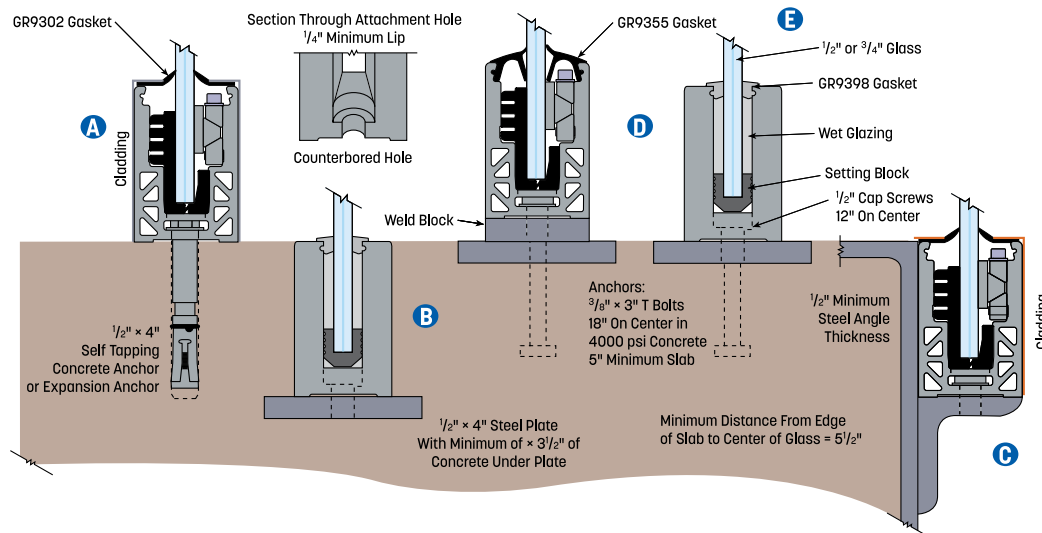

Stackable Shims - $\frac{5}{8}$ " Overall. $\frac{5}{8}$ " Slot Hole. 1,008/case

May be stacked as necessary.
 Supplied by the case - 63 stacks of 16 shims, stacked 1" high.

| Thickness | Stacks per Case | Shims per Stack | PLASTIC |
|------------------|-----------------|-----------------|---------------|
| $\frac{1}{16}$ " | 63 | 16 | GRGL16 |

SHOE MOULDING ATTACHMENT

Attachment of the **Aluminum Base Shoe Moulding** is critical to the success of any **Glass Railing** installation. These details depict six typical attachment methods. Other methods of attachment are possible but their integrity would need to be determined by the installer in cooperation with your own engineer. If you choose to mount to wood, consult with an engineer for proper reinforcement of the substrate.

PANELGRIP INSTALLATION

1. Plumbing PanelGrip Base Shoe Moulding

Before completing attachment of PanelGrip Base Shoe Moulding to substrate - take all necessary steps to assure that the mounted Shoe is adjusted such that the inside channel of the Shoe is plumb to $\pm \frac{1}{8}$ " at an extended height of 42". Spend the time required to plumb the Shoe to this tolerance since the glass will only be as plumb as the Shoe.

2. Clear the PanelGrip Base of All Debris.

3. Place Isolators

Place the PanelGrip Plastic Isolators into the Base Shoe Moulding. On inclines, a dab of silicone may be used to keep them in place while placing glass. Space Plastic Isolators a maximum of 14" on center with a maximum of 4" in from the left and right edges of each panel - 4 isolators per 4 foot panel.

4. Place Glass

Place the glass atop the Plastic Isolators in the Base Shoe Moulding.

Warning: With multi-panel Railings, do not line up the edge of a panel with the end of the Base Shoe Moulding - place the panels so that they span PanelGrip Base Shoe Moulding butt joints to assist in alignment.

5. Insert PanelGrip

Have someone hold the panel in place while you insert the Aluminum PanelGrip mechanism into place on the opposite side of the glass in alignment with the Plastic Isolators. Make sure that the plastic pad on the PanelGrip is facing the glass.

6. Tighten PanelGrip

Using a $\frac{3}{16}$ " hex head wrench or the PanelGrip Torque Wrench, tighten the Cap Screw on the PanelGrip mechanism. While tightening, the plastic pad will break away from the Aluminum as the unit expands.

7. Confirm Alignment and Tighten

Confirm alignment and make adjustments prior to final tightening which will compress and lock the panel into place.

Remember, PanelGrip is self-centering and self-plumbing. Make sure you have properly plumbed the Shoe as noted in Step 1.

Once you have confirmed position, use a $\frac{3}{16}$ " hex head wrench or our PGTWRENCH to make the PanelGrip Cap Screw snug-tight, then continue tightening to 10 ft-lbf (120 in-lbf) of torque. Repeat on all other PanelGrip mechanisms to secure the panel in position. DO NOT OVERTIGHTEN.

8. Insert Spacing Pads

Repeat with other lites of glass. Insert $\frac{1}{4}$ " Spacing Pads between glass panels to prevent glass-to-glass contact. Trim as required.

9. Seal top of shoe

Once glass is properly positioned, seal gap at the top of the PanelGrip Base Shoe Moulding using one of the two Gasket styles shown on page 108. Spray glass cleaner onto glass to facilitate insertion of gaskets.

- GR9302 is taped to the underside of the top lip of the Cladding.

- GR9355 is used without Cladding

Weep holes should be provided with exterior applications.

10. Removal of Glass

Should you need to remove a panel, this can be done simply by loosening the PanelGrip Cap Screw.

EASY ALU

Easy Alu offers you all the benefits of a high-grade aluminum railing with Q-railing quality built in, plus great looks. Its stylish modern design is stripped down, yet more than strong enough to create safe railings for balconies, terraces and atriums.

What sets this system apart?

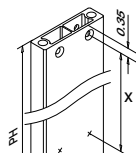

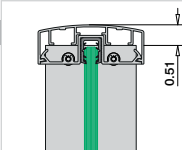

Its attractive pricing, its great customization and prefabrication options and the fact that you can preassemble the components to complete railing sections in your own workshop.

- Light and medium use railings for indoor and outdoor settings
- Suitable for top and fascia mounting
- Speed up your railing job and order prefabricated components
- Available with brushed anodized, mill finish or powder-coating
- Leveling blocks for uneven floors - no need for additional shimming
- Glass Wing rubber for an easy and fast glass installation

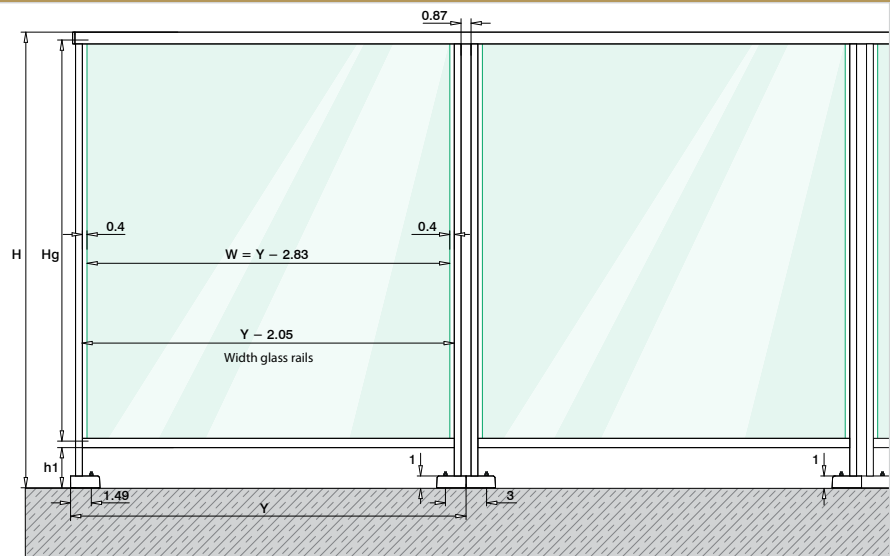

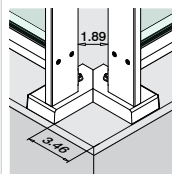

GLASS CALCULATION

Q-INFO

$$X = H_g - 0.87$$

Calculation baluster post

Railing height (H) - 1.38" = baluster post height (Hp)

| Railing height (H) | Baluster post height (Hp) |
|--------------------|---------------------------|
| 39-3/8" | 38" |
| 43-5/16" | 42" (41-15/16") |

Glass calculation

Glass width (W) = Y - 2.83"
Glass height (Hg) = railing height (H) - h1 - 0.47"

Distance drill holes in baluster post (X)

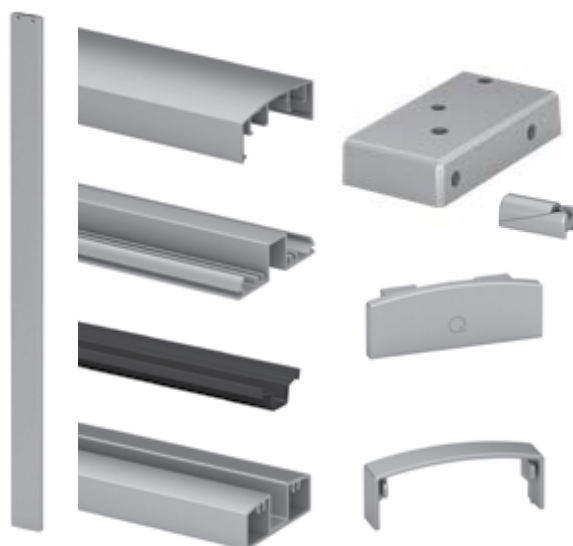

$$X = \text{glass height (Hg)} - 0.87"$$

Glass Wing rubbers

There is no glass rubber like Glass Wing. It is easy to place in the glass profile, where it stays 'open'. Allowing you to insert the glass quickly and with hardly any pressure. As soon as you insert the glass, the rubber hugs it tightly.

STANDARD SINGLE COMPONENTS

WE:

Send you the standard components.

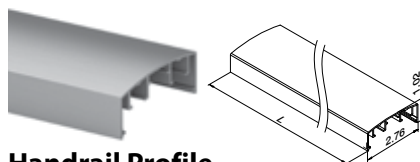

YOU:

Do the cutting, drilling and – if you wish – powder-coating.

Preassemble modules from the components.

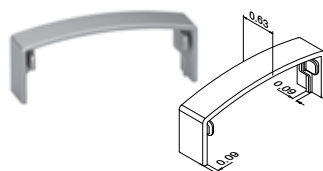

Position the modules on site and anchor them to the floor.

Click the handrail on top.

EASY GLASS® VIEW

Easy Glass® View is an ultra-flexible Juliet balcony system that provides unrestricted views. Thanks to the vertical glass profiles, there's absolutely nothing that disrupts the view.

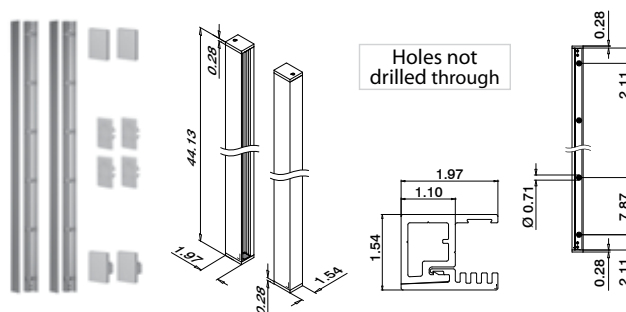

- Mounted with anchors or screws (depending on the substrate)
- Mounting in the reveal can be done from the inside
- Profiles and end caps can be powder coated
- Can be combined with all Q-railing glass-mounted cap rails, U-profiles and edge protection

Please refer to the respective certificates for specifications such as mounting details, glass dimensions and glass type (laminated glass / monolithic glass).

STAINLESS STEEL RAILING SYSTEMS

This modular system allows for flexibility of part selection and ease of installation vs. comparable welded systems.

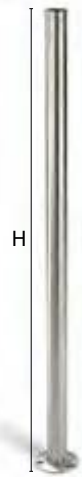

Available in 304 and 316 grade for interior or exterior applications in a satin finish.

Three infill options available: solid stainless rods, CableRail or glass.

AISI 303/304: Use for interior applications | **AISI316:** Use for exterior applications | *All items in Satin stainless #4 finish*

| E600/D | Aluminum | Drill-gauge for wooden handrails |

ALL DIMENSIONS ARE APPROXIMATE.

STAINLESS STEEL RAILING LED SYSTEM

Now you can illuminate a stairway or a walkway without having to light up an entire area.

Increase security without increasing your costs thanks to the latest generation of high energy saving LED lights.

The POST LED SYSTEM integrates a low voltage LED to any railing within this guide.

For indoor and outdoor use.

IAM_{DESIGN} LED SYSTEM FOR STAINLESS STEEL RAILING

AISI 303/304: Use for interior applications | **AISI316:** Use for exterior applications | *All items in Satin stainless #4 finish*

CONNECTORS

ITEM #
ELED0002

To connect the LED strip to the feeder

ITEM #
ELED0003

To join two LED strips linearly

ITEM #
ELED0004

To join two LED strips by a 5-7/8" flexible cable

ITEM #
ELED0009

To join two LED strips with a 90° elbow

ITEM #
ELED0005

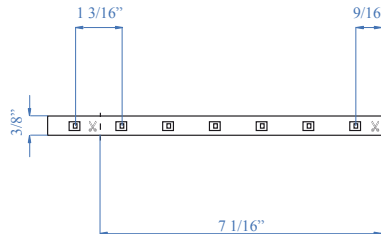

To be used at each installation. Protects the end of the strip not connected

FEEDERS

| ITEM # | DIMENSION | INPUT | OUTPUT | POWER |
|----------|------------------------------|-----------------------------|---------------|---------------------------|
| ELED0100 | 7-15/32" X 2-1/32" X 1-7/16" | 100-240VAC 2.2 A 50/60HZ | +24V 4.2 A | 100W - Runs up to 88-1/2' |
| ELED0110 | 6-3/8" X 1-21/32" X 1-1/4" | 100-240VAC 1.2 A 50/60HZ | +24V 2.5 A | 60W - Runs up to 52-1/2' |

| ELED0130 | 7-1/2" X 1-3/16" X 25/32" | 200-240VAC 0.3 A 50/60HZ | +24V .75 A | 18W - Runs up to 13' |

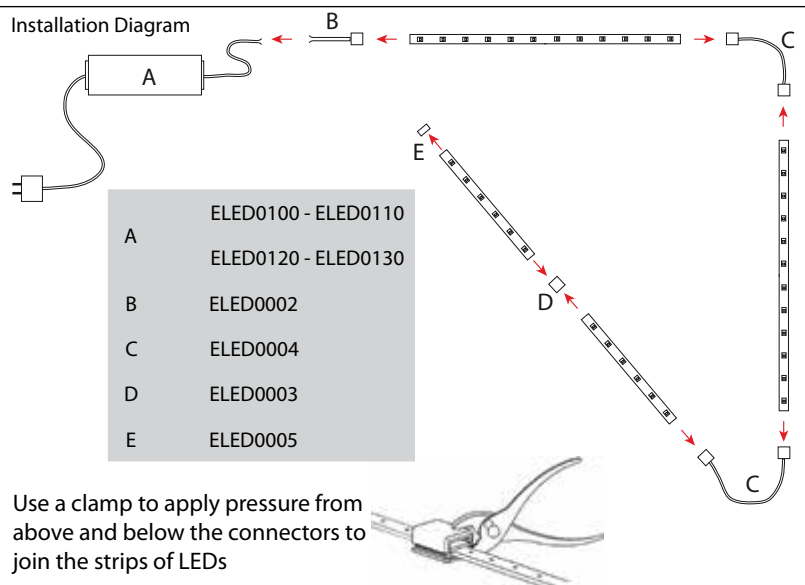

LED STRIP

ITEM #
ELED0020

Revolutionary LED Strip:

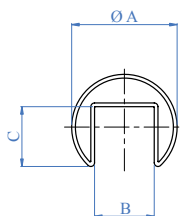

- Totally waterproof underwater
- Ultra-bright (180 lumens)
- Ultra-thin, flexible, easy to install and cut, virtually indestructible
- Every 7-1/16" you'll find marks where you can cut the ribbon.
- Sold by the foot. Maximum length 65'

ALL DIMENSIONS ARE APPROXIMATE.

AISI 303/304: Use for interior applications | **AISI316:** Use for exterior applications | *All items in Satin stainless #4 finish*

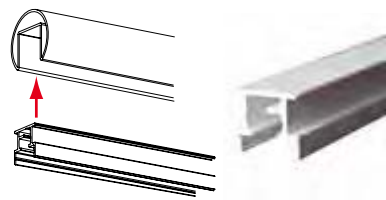

HANDRAIL

| ITEM # | AISI | TUBE A | B | C |
|----------|------|-------------|--------|--------|
| E1000424 | 304 | 1-2/3" dia. | 15/16" | 15/16" |
| E1100424 | 316 | 1-2/3" dia. | 15/16" | 15/16" |

Steel handrail specifically designed for the LED Railing System.
Sold in 19'8" lengths.

SUPPORTING LED SYSTEM COMPONENTS

ITEM #
ELED0014

Profile to be applied to the slotted tube for the sliding of the LED strips.
78-3/4" long. Supplied white.

ITEM #
ELED0012

Transparent PVC gasket for the LED covering. To be applied to item ELED0014. 6'6-3/4" long.

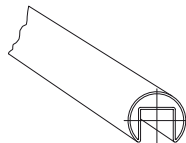

ITEM #
E1999892

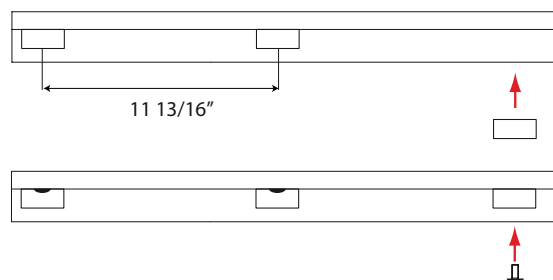

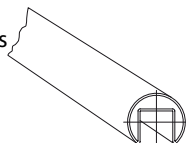

Double sided adhesive tape.
Coil length: 108' 3" long
Dimension: 19/32" - 1/16"

INSTALLATION INSTRUCTIONS

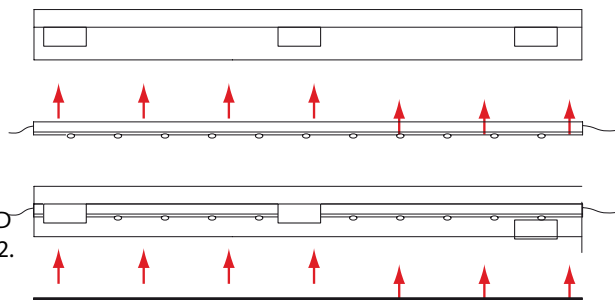

- 1a** Apply the item ELED0014 inside the slotted tube using item E1999892, double sided tape. Place the locking brackets at a maximum distance of 11-13/16".

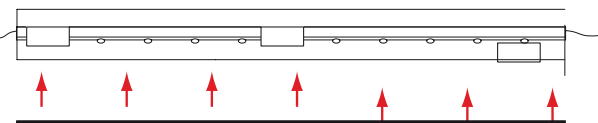

- 1b** For a more secure fixing you can use the M3 screws directly anchored to the slotted handrail. It is recommended that a pre-drilled hole be made before using the M3 screw.

- 2** Apply the LED lights to the bracket with slight pressure.

- 3** Close the profile with the LED transparent gasket ELED0012.

ALL DIMENSIONS ARE APPROXIMATE.

STAINLESS STEEL MAINTENANCE ACCESSORIES

PRIMER AND ADHESIVE

LB-00211 Loctite Metal Primer, .88 oz

Loctite Primer is recommended for a faster cure time when bonding stainless steel components.

19.1331.000.00 Q-glue®

Stainless steel high strength fixative. Consumption per bonding ca. 0.034 fl. oz.

LB-00201 Loctite Metal Adhesive, 1.10 oz

A strong structural adhesive for joining metal components. Originally designed to work specifically with brass components, this adhesive provides a cohesive bond within minutes. When working with stainless steel, expect a longer cure-time, anywhere from a few hours to overnight. If a faster cure-time is desired, use the Loctite 7649 Primer to bond stainless steel components in minutes. Loctite Metal Adhesive will simplify your project assembly while achieving a professional look.

CLEANERS AND POLISHES

19.0601.000.00 Q-cleaner

Stainless steel anti-static cleaning spray, concentrated, without propellant

19.0610.000.00 Q-ultra-clean

Chemical stainless steel cleaner to remove heavy dirt and rust stains. Q-ultra-clean rebuilds/strengthens the passive layer of the stainless steel.

LB-00202 Lavi Metal Polish

For use with mirror-finished surfaces. Developed especially for high-shine or polished finishes.

Lavi Metal Polish instantly removes years of residue, rust, tarnish and oxidation from all polished-finish metals. Lavi Metal Polish applies a superstrong anti-tarnish corrosion inhibitor and imparts a long-lasting protective shine to all your metal surfaces. While it works on all metals, it is best-suited for a high-shine or polished finish. This polish is designed to remove scratches and may alter the appearance of a satin-finished or brushed metal product.

- Use on polished brass and polished stainless steel
- Easy, just wipe-on & wipe-off
- Cleans, polishes and protects
- Anti-tarnish protection
- Fresh lavender scent

PROTECTORS AND SEALERS

19.0602.000.00 Q-protector

Protection spray for stainless steel and aluminum.

Ever Clear is a clear, air drying two part urethane coating designed to provide the best and strongest protection for most surfaces and finishes. See page 338 for more information.

Clear Guard is a clear, durable, air drying lacquer that results in a hard, fast drying, and tarnish resistant film. See page 337 for more information.

SSB Presto Black for Stainless Steel

This patina can be used to blacken/darken stainless steel handrail, fittings and cable rail infill. See page 332 for more information.
