WELCOME! Beloved Sisters and Brothers, seen and unseen,

We are delighted that you have chosen to emerge with us on the beautiful conference grounds of Asilomar. A mighty transformation is taking place, and each of us is an integral part of it!

We are convinced that the Angels led us to Asilomar, and they are intimately involved with our experiences here! (Not ONLY the Angels, of course. No doubt the Reversion Directors had a say in the matter, as well as the many, unseen friends gathered here to enjoy these days of fellowship, frivolity, and the formation of a new way of being.)

When we first discovered Asilomar, the theme EMERGENCE, well... emerged, as we learned that Monarch butterflies gather to overwinter in nearby Pacific Grove. The transformations they undergo are truly miraculous. Those Life Carriers!

From an essay about butterfly metamorphosis by Pamela Chaddock:

“The term ‘imaginal’ has connotations of imagination, the process of creating new ideas and concepts of things that do not yet exist. In biology, the term is applied to ‘imaginal cells.’

“What is truly astonishing is that there is no structural similarity between a caterpillar and a butterfly. After a period of ravenous consumption, a caterpillar finds an appropriate perch and forms a chrysalis. Inside the chrysalis the caterpillar, unable to move, actually dissolves into an organic ‘goop.’ Cells which had been dormant in the caterpillar—and which biologists had the poetic genius to call ‘imaginal cells’—begin the process of creating a new form and structure.

“The imaginal cells form clusters and begin resonating at the same frequency, passing information back and forth until they hit a tipping point. They act not as discrete individual cells but as a multi- cell organism. The butterfly soon emerges as a completely new entity from the original caterpillar.”

We are truly emerging into this new way of being: individually, as a community, and upon the world stage, because of this magnificent Revelation of Love with which we have been entrusted. Evolutionary religions and cultural biases that held our growth captive no longer serve us, and together we are emerging.

Like the graceful butterfly, we begin within the quiet cocoon of the inner life, then emerge into fuller expression through fellowship, service, and shared purpose. Let the Spirit spark our imaginations, and let’s take flight toward Light and Life together!

With gratitude and good cheer,
Trudi and Aprilhelen, Co-Chairs, IC26

“Emergence into Light: Stillness and Inner Guidance”

ANTOINETTE HALL, USA

PLENARY Wednesday, July 15, 9:20AM

During a season of illness and profound uncertainty, my emergence into light unfolded through stillness. Daily meditation and prayer opened my awareness to the nurturing presence of the Divine Minister, our Mother Spirit, while attuning me more clearly to the quiet guidance of the Thought Adjuster. Fear gradually gave way to peace and a steady knowing that I was held in divine care. One day on Edentia land, as the sun broke through clouds, I knew my life's work was not finished. I would live to see Edentia realized in loving service.

“Taking the Kingdom by Spiritual Assault”

BARRY CULLIGAN, *Ireland*

PLENARY Wednesday, July 15, 2:15PM

The theme of Emergence does not indicate the invention of something entirely new but the revelation of something that was unseen, perhaps hidden, but which now starts to reveal itself in new and unexpected ways. Emergence is a form of revelation, the revelation of a plan, a structure, that is unexpected but fundamental to the destiny of what is to unfold. It speaks of mystery, purposeful design, and hidden intelligence. It is breathtaking, exciting, thrilling. It makes one wonder: what is coming next?
