

Williamson Insurance's Keys to Spring

SPRING PLANT DATES

- For RP/YP policies, **replant coverage** attaches for each crop planted for the first time on or after the dates listed in the maps below. Standard replant claims will be paid at:

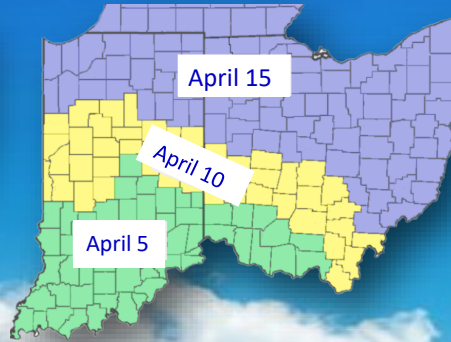

CORN

\$47.28/acre

SOYBEANS

\$41.28/acre

NOTE: You must replant the lesser of 20% of the unit or 20 acres before replant coverage kicks in. It is imperative that you submit a "Notice of Loss" **PRIOR** to replanting.

- Late reporting of replant notices **WILL** result in the claim being denied.

FAILED WHEAT

Attention!

- If you are planning to destroy your insured wheat, it must be **appraised** by an adjuster **prior to termination**. Contact your agent or our office **immediately** to submit a claim if your wheat crop is in question.
- Your agent can review your options when planting a **second crop** following failed wheat.

COVER CROPS

- A **cover crop** must be terminated within **5 days after planting or before crop emergence** (whichever is first) for the Spring crop to be insured.

2022 Production

- If you have not submitted your 2022 corn and soybean production, it is due to our office no later than **April 29th, 2023**.
