

# Fiberglass Luggage Boxes

Need more storage for field trips, sporting events, or other travel? The retrofit fiberglass luggage box can be added to one or both sides. Installations have been done on both the Saf-T-Liner C2 and HDX, conventional and transit units.

The fiberglass luggage box forms around a steel cage and secures to the cross members of the body during installation. With stainless steel hinges and locking latches available this product is made to last. The interior of the box is approximately 26 cubic feet. Total length of the box is 100 inches.

Also available in a 50 inch box. Perfect for lift or other shorter buses where there is not room for the 100 inch box.
