## CURTAIN PANELS

### 3D-formed Acoustic Panels

Curtain is a 9-foot-tall acoustic wall panel with a formed surface that creates a continuous, wave-like pattern across the wall. Designed by Woven Image and distributed by Kirei, its sculpted profile creates air space behind the panel for added acoustic absorption, bringing texture, depth, and acoustic control to interior environments.

Color variation between dye lots is a natural characteristic of recycled PET felt due to fiber mix and manufacturing variation. Slight differences between samples and finished products may occur, and exact color matching between dye lots/batches cannot be guaranteed.

## Installation

Curtain installs directly to the wall using standard construction adhesives. Optional panel joiners and edge trims are available to finish seams and exposed edges, providing flexibility across a range of installation conditions.
