ZIGGY CLOUDS

Acoustic Ceiling Solution

Delight in better sound by dampening overhead reflections with the acoustic absorption of Ziggy Clouds. Perfect for those open, high-ceiling spaces where ambient sounds often clash and distract, Ziggy sits above it all with minimalist edge. Ziggy Clouds are easy to install with looped cable and are available in a variety of colors from neutral to vibrant tones. Customization is also available for your unique design concepts.

Available Colors

Color variation between dye lots is a natural characteristic of recycled PET felt due to the manufacturing process. Slight differences between samples and finished product may occur.

Installation

Ziggy is designed for looped 3/64" to 1/16" aircraft cable to be attached to the oval extrusion from 1 to 3 folds from each end (4 cable drops) when using the aluminum tube. This allows for alignment to the best ceiling structure and/or avoidance of overhead intrusions. If using the wooden dowel, four screw in hooks will be provided as hanging points and then can be attached to the ceiling with aircraft cable. For more information, see the [Ziggy Clouds Installation Guide](#).
