FINS

Acoustic Wall and Ceiling System

Create radical sound-absorbing feature walls with Fins, a modular slab-and-fin system made from 12mm thick recycled PET panels. Crafted by iconic designer Michael DiTullo to tune out the noise and turn up the funky design, Fins deliver a tactile wall experience ideal for spaces in need of low profile, high absorption acoustic design.

Color variation between dye lots is a natural characteristic of recycled PET felt due to the manufacturing process. Slight differences between samples and finished product may occur.

Installation

When mounting, use standard construction adhesives (e.g. Liquid Nails/Titebond - NOT PVA glue). Clean and prepare surface per adhesive guidelines. Spread adhesive evenly on panel back. Adhere to wall surface, providing bracing to hold material against surface per adhesive open time/instructions. For more information, see the [Fins Installation Guide](#).
