*Color variation between dye lots is a natural characteristic of recycled PET felt due to the manufacturing process. Slight differences between samples and finished product may occur.*

# Installation

When mounting, use standard construction adhesives (e.g. Liquid Nails/Titebond - NOT PVA glue). Clean and prepare surface per adhesive guidelines. Spread adhesive evenly on the back of the tile, leaving room at the edges for glue to spread. After applying adhesive, mount tiles per layout and maintain even pressure per adhesive manufacturer instructions. Clean any excess adhesive. When a continuous pattern is desired from tile to tile, ensure tiles are abutted in the same direction as only one side will allow perfect peak pattern alignment. For more information, see the [Texture Tiles Installation Guide](#).
