Balance Board

Description:

Balance board helps improve gross motor and vestibular skills, and includes activities for rocking side-to-side, spinning 360.0 degrees on a smooth surface, or walking like a duck. Also great to use under the desk while a child is seated, to help focus while the child moves and bounces their legs on the balance board.

Beanbag Chair

Description:

The Original Big Joe is not only BIG, it's fun, comfy and just plain sweet. The Original Big Joe is whatever you want it to be. Lay it flat and it makes a great crash pad, perfect for a lazy Sunday. Throw it on its side and it transforms into a two person love seat. Prop it up on its end and you're sitting atop a bean bag throne. Whatever you decide, The Original Big Joe will totally rule. When you're done, it slips easily under a bed or behind a sofa for storage. The Original Big Joe will most certainly be a favorite.

Body Sock

Description:

The ultimate body stocking that has loads of fun potential in every stretch. Allows children and young adults to jump, crawl, and pretend while improving sensory integration. Made from a comfortable 'resistive' material, the body sock provides calming deep pressure, heavy work and proprioceptive input. This fun suit helps children develop spatial and body awareness, muscle strength, motor planning and creativity. Head can be placed outside or inside.

Book: *The Out-Of-Sync Child*

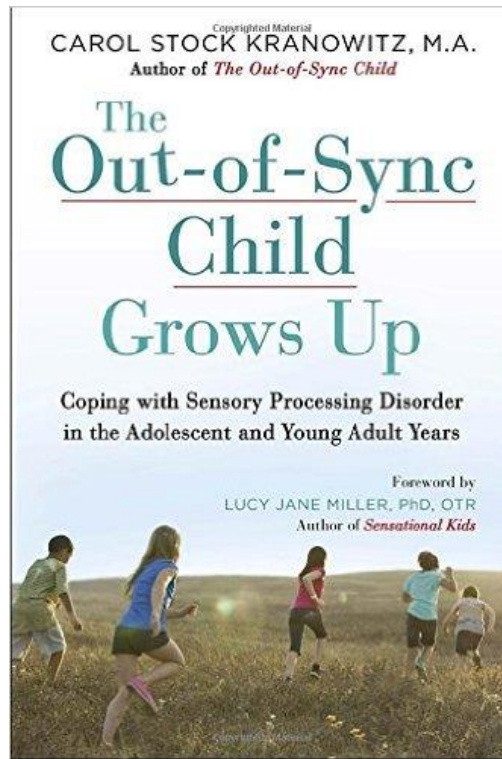

Description:

Carol Stock Kranowitz, M.A., is the author of several books in the "Sync" series. Among them are *The Out-of-Sync Child Grows Up*, *The Out-of-Sync-Child*, *The Out-of-Sync Child Has Fun*, and a children's book, *The Goodenoughs Get In Sync: 5 Family Members Overcome their Special Sensory Issues*. With Joye Newman, M.A., she is the co-author of *Growing an In-Sync Child* and *In-Sync Activity Cards*. She was a preschool teacher for 25 years and helped to develop an innovative program to screen young children for Sensory Processing Disorder. She speaks regularly about the subject in the United States and abroad. In her writings and presentations, she offers a fun and functional approach that integrates sensory-motor activities into everyday life at home and school. A graduate of Barnard College, she has an M.A. in Education and Human Development from The George Washington University. She is "Granny Kranny" to five sensational grandchildren, one of whom has written a book in his own right, *Absolutely No Dogs Allowed*, an alphabet book about a boy whose many pets have sensory issues at the park.

Plasma Ball

Description:

Fascinating and fun. USB Plasma Ball is fascinating to watch and even more fun to play with -- Placing a finger tip on the glass creates an attractive spot for the energy to flow, because the conductive human body is more easily polarized than the dielectric material around the electrode providing an alternative discharge path having less resistance. The Plasma Ball is great for kids of all ages. Whether you are a fun loving work professional or a parent who wants their kids to learn about static electricity without the need to google Tesla's high voltage plasma globe.
