

SAP Digital Supply Chain for Intelligent Asset Management **Desires, Delivered in the Experience Economy**

Glenn Sawyer, Global Product Champion, Intelligent Asset Management
Ryan Jones, Solution Advisor, Intelligent Asset Management

SAP and SAP Partner Use Only

THE BEST RUN 

Strong Momentum for Intelligent Asset Management

Digital readiness surveys show that companies clearly see the need to leverage the digital capabilities to optimize their asset management:

76%

of organizations consider it important to **predict potential failures** by leveraging data models

21%

Only 21% of organizations employ **predictive and preventive maintenance** effectively

83%

of organizations consider it important to have asset management processes and related metrics standardized across facilities and regularly tracked

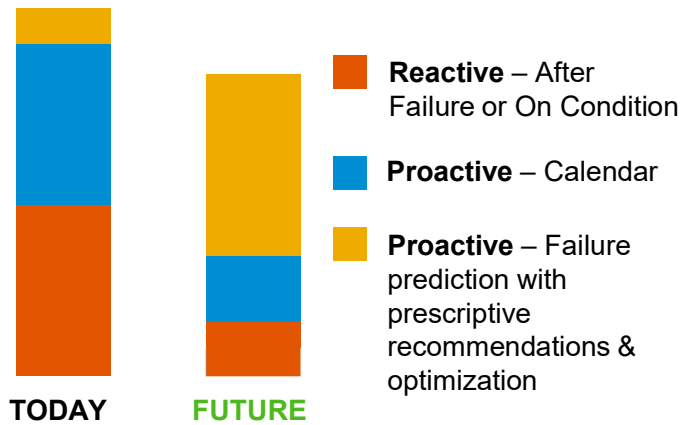

13%

Only 13% of organizations are able to drive asset performance based on analysis of real-time sensor data, along with historical maintenance data

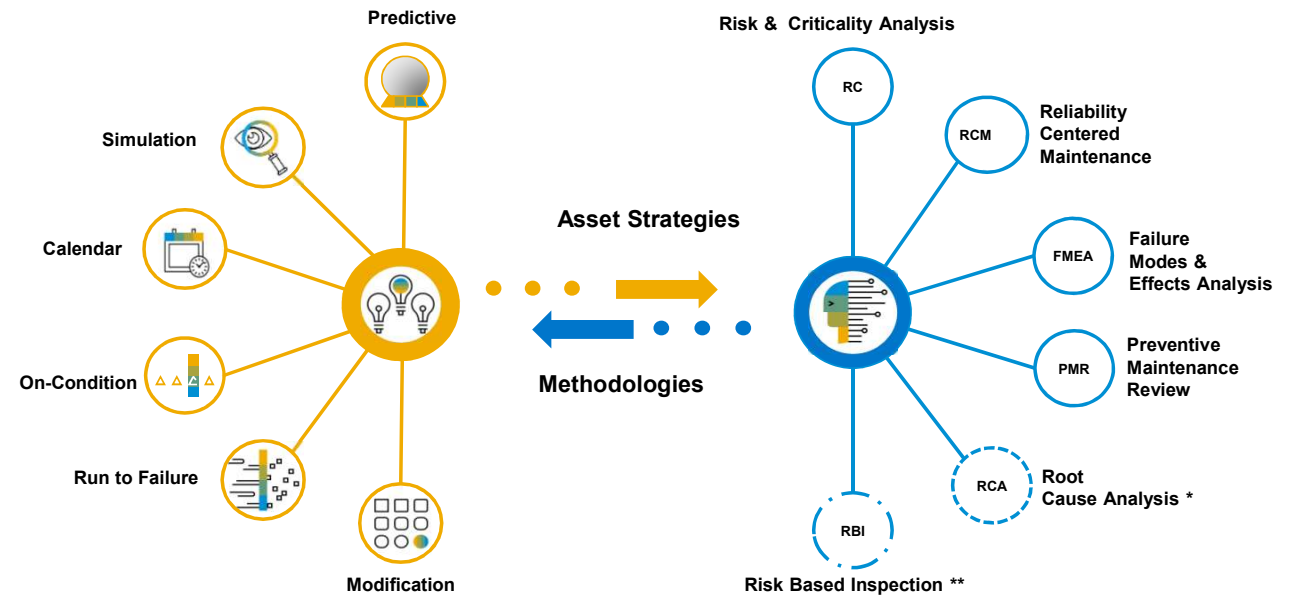

Evolve from reactive to reliability-centered & prescriptive maintenance

Calendar based maintenance results in **over-maintaining** assets at higher costs / less availability

Reactive based maintenance is too late for efficient planning and optimization

Intelligent Asset Management supports **data driven proactive** strategies with execution and optimization based on reliability & other goals. This achieves the delicate balancing of **profitability, asset health** and **availability**

Customer value examples from SAP Intelligent Asset Management

30%

Shorter lead time for investment decisions

- Wien Energie faces new market conditions and regulation
- To help align investment with corporate strategy, Wien implemented SAP Portfolio and Project Management for all types of investments
- Over 600 users managing more than 200 complex programs, spanning financials, controlling, and resource management
- Increased forecast accuracy with more efficient budget control

“With Galileo IoT platform based on SAP, we bring our customers’ logistics equipment up to date with the latest ...technology.”
Stephan Riemensperger, Head of Sales Tools,
GEBHARDT Fördertechnik GmbH

- Developed a platform to revolutionize intralogistics for GEBHARDT customers offering content, design and maintenance services
- Implemented SAP Asset Intelligence Network as the collaboration platform
- Connected equipment for sensor based condition monitoring and predictive maintenance

40%

Decrease in work order processing time

- Synchronized field work with deployment of SAP Mobile Asset Management integrated with Esri Geographical Information
- Improved data quality, reduced duplication and simplified data access and analysis in the field
- Implementation in 6 months

8%–10%

Reduction in maintenance costs

- Implemented SAP Predictive Maintenance and Service solution for real-time monitoring of trains
- Used algorithmic predictions and indicators for dynamic planning
- Improved asset reliability and service, thanks to predictions and error forecasting
- Reduced maintenance costs

How We Enable **Intelligent Asset Management**

SAP Intelligent Asset Management Portfolio – Business Capabilities

Innovative & collaborative business processes

Enable best practices for asset performance management.
Transform with shared services for asset intelligence.
Collaborate with partners throughout the asset lifecycle

Real-time insights and Connected Assets

End-to-end visibility on strategic, tactical and operational level, with real time information from IoT

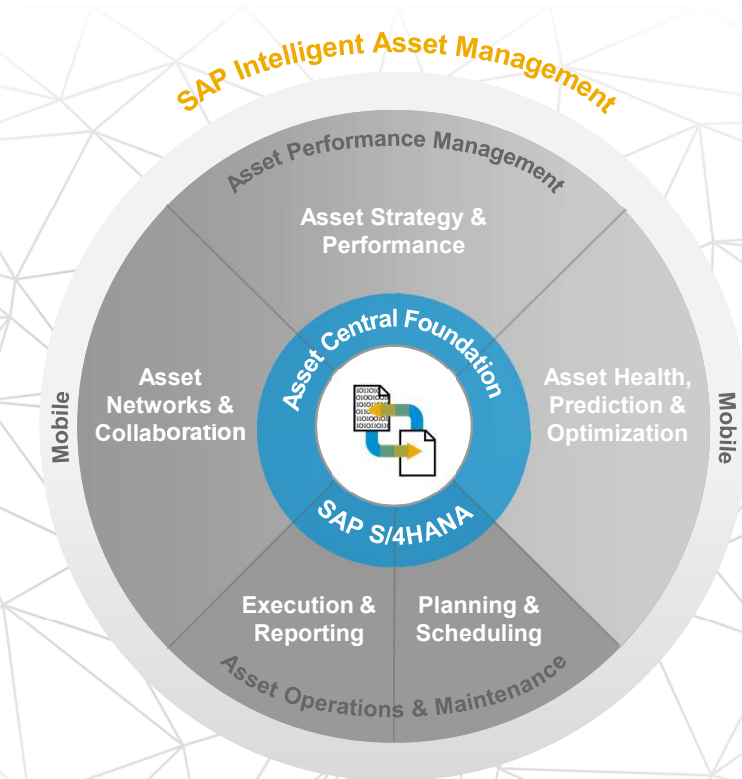

Predict, optimize, simulate, prescribe

Drive smarter decisions, improve reliability, enable prescriptive maintenance and automate processes with IoT, advanced analytics, machine learning and simulation

Integrated asset lifecycle processes

Integrate maintenance strategy, planning and execution; and across enterprise silos with all users sharing the same data via easy analytical user experience and mobile

SAP S/4HANA Asset Management

Execution and Reporting

Execute planned and unplanned maintenance tasks to help ensure optimal operations

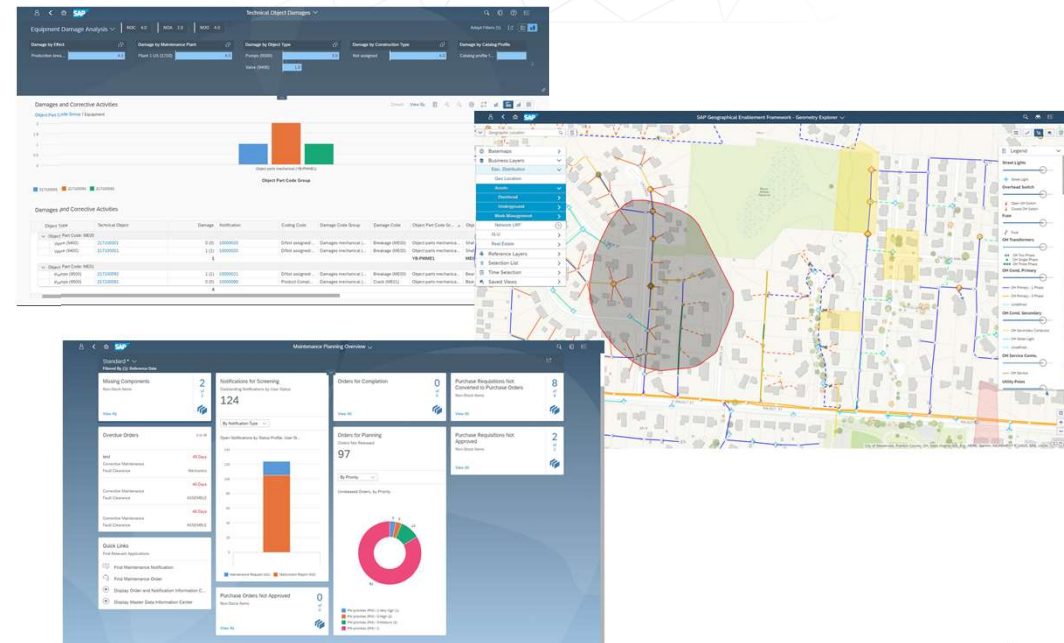

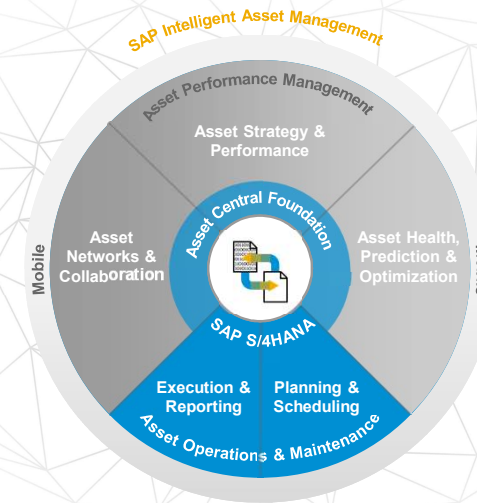

Manage preventive and condition-based maintenance proactively

Increase equipment reliability and improve asset usage as well as safer maintenance processes

Manage asset information for work orders, maintenance, measurements, inspections, metering, and inventory

SAP Intelligent Asset Management

Asset Network and Collaboration

Enable secure asset information collaboration across your business network

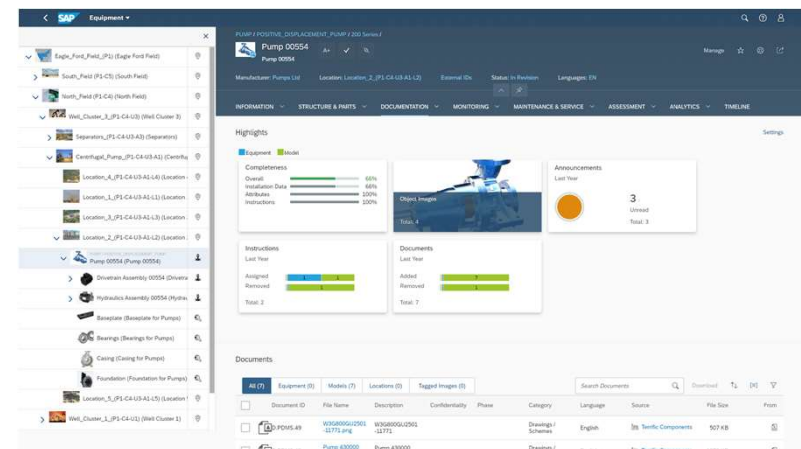

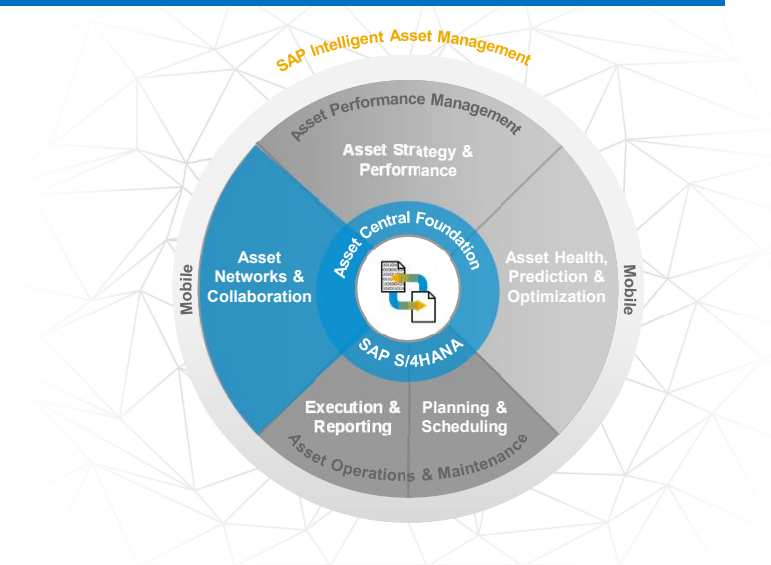

Collaborate with manufacturers, operators, service suppliers, across the network on asset information

Provide one network channel for electronic handover of technical asset and maintenance data to OEMs, service providers, and procurement vendors

Improve data reliability, reduce master data maintenance, and maintain higher asset availability

SAP Intelligent Asset Management

Asset Strategy and Performance

Segment assets based on risk, criticality, impact, and environmental factors to determine best maintenance strategies at lowest cost and risk

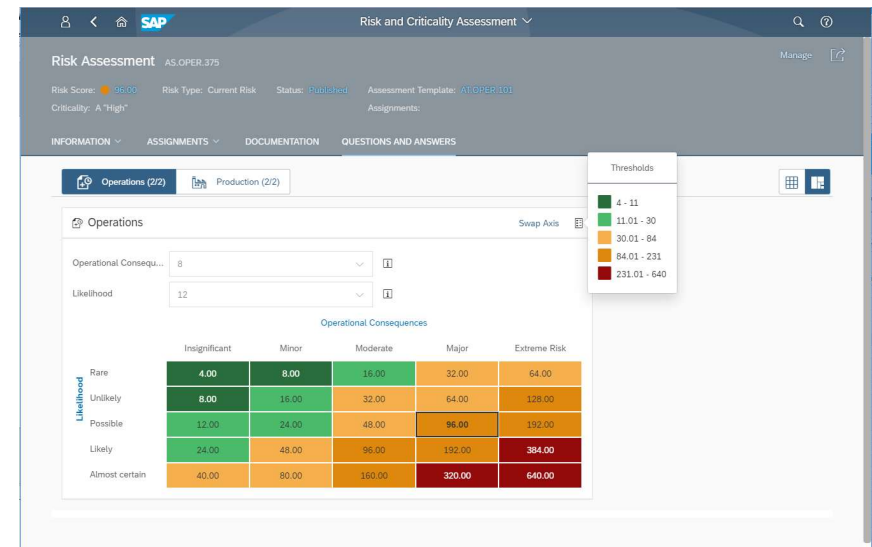

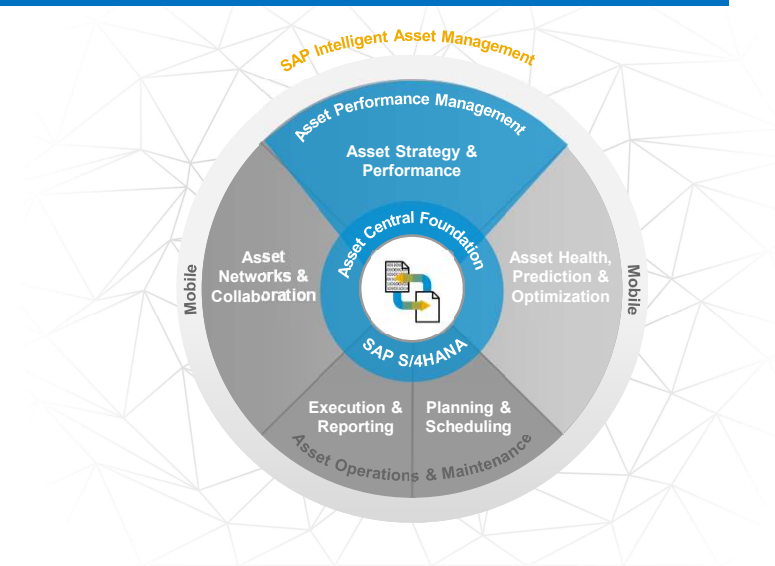

Adopt Reliability Centered Maintenance processes, considering failure modes, effect and root causes

Manage performance to optimize return on assets across lifecycles. Monitor, review, and improve maintenance plans and budgets

Reduce bottlenecks, improve decision making, and prevent incidents using a holistic view of asset types and maintenance strategies

SAP Intelligent Asset Management

Asset Health Prediction and Optimization

Optimize the availability of your assets by using predictive maintenance and service capabilities and the Internet of Things to take corrective actions early

Collect and analyze sensor data from physical assets to predict operational failure

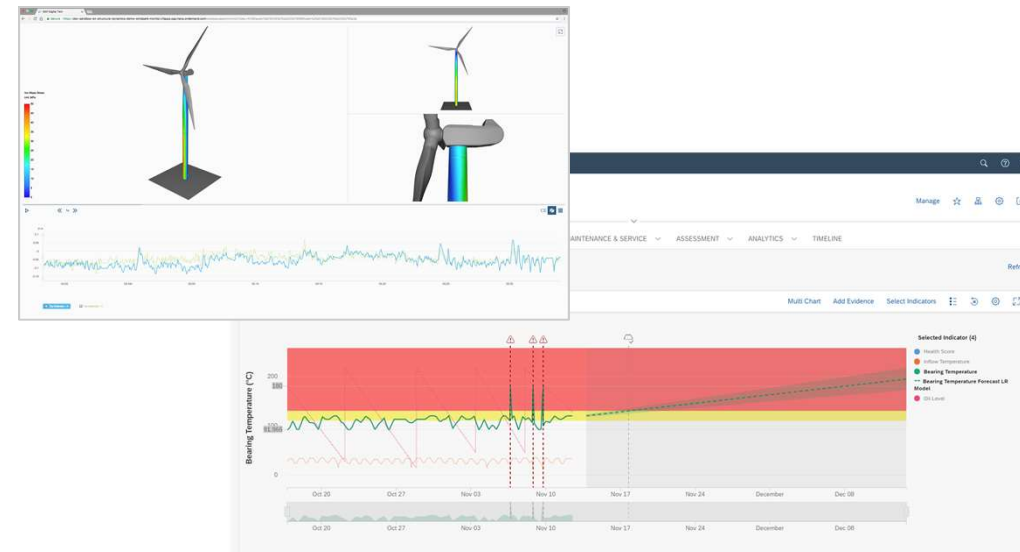

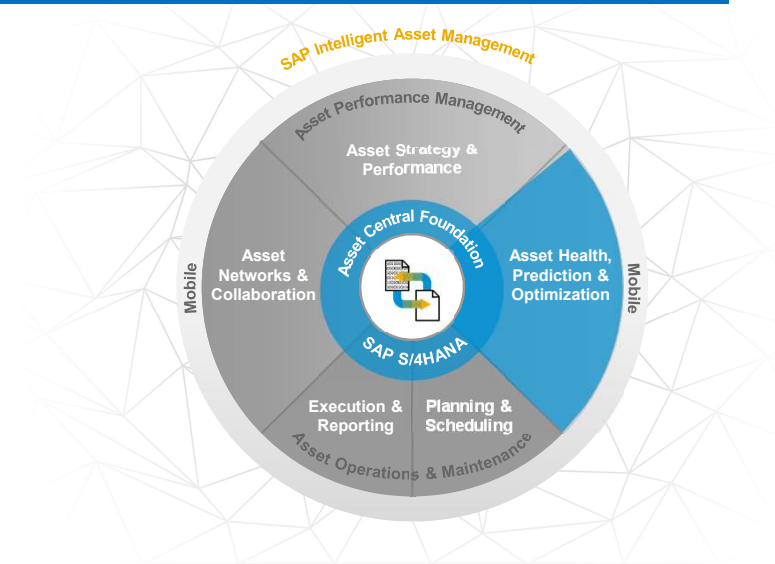

Initiate preventive countermeasures that trigger service or maintenance orders

Optimize asset performance with a closed-loop maintenance and service process

Create physics-based digital twins of industrial assets based on a real-time and predictive engineering analysis

SAP Intelligent Asset Management

Mobile Asset Management

Eliminate paperwork while reducing downtime and maintenance backlog

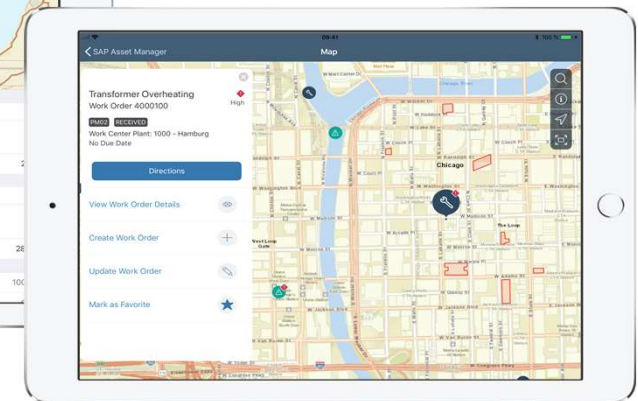

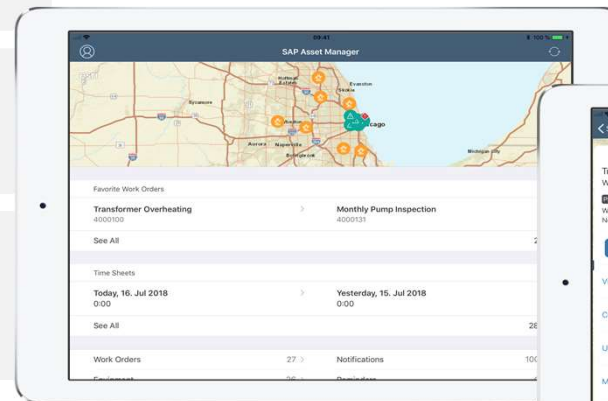

Extend and improve asset life and reliability by shortening work cycles

Turn capital spending into operational investments using cloud deployment

Manage existing work and asset data whether you're online, offline, or occasionally connected

SAP Digital Supply Chain for Intelligent Asset Management

Desires, Delivered in the Experience Economy

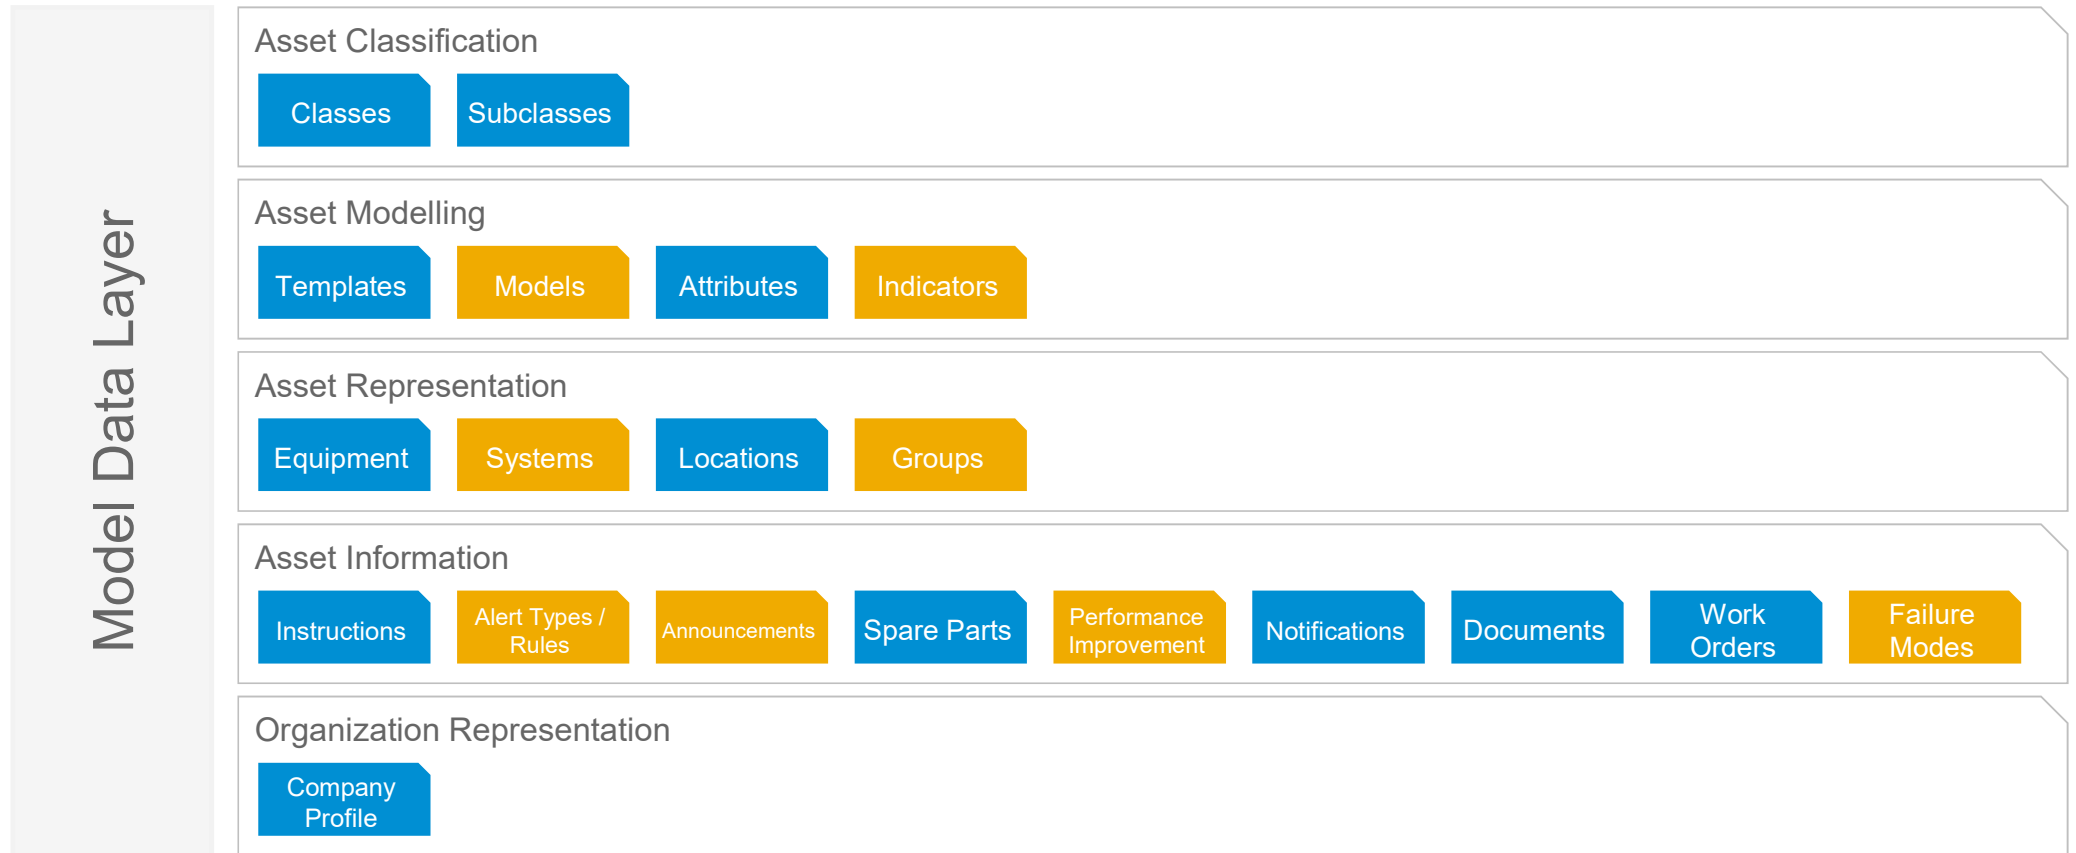

Intelligent Asset Management

Suppliers

- Adopt new **Collaborative** processes.
- Connect assets with **Industry4.0** for real time insights, predictive and prescriptive maintenance.
- Integrate **Strategy, Planning and Execution** to optimize asset life, service, OEE and costs
- **Connect** Maintenance operations across the enterprise, removing **silos**

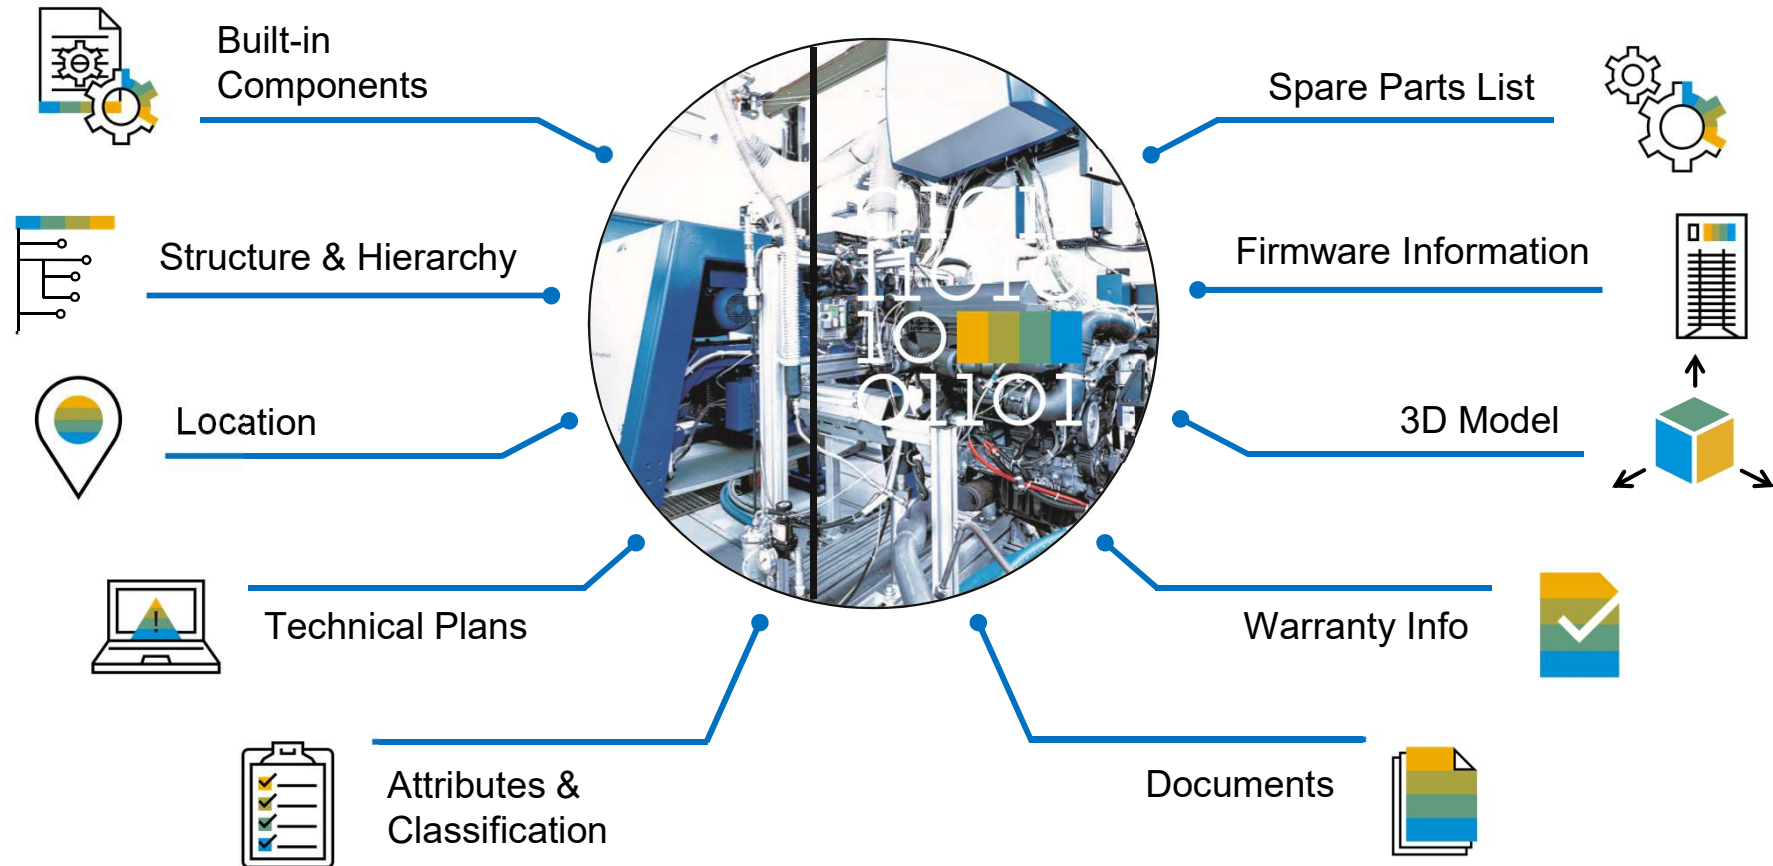

SAP Asset Central - Next-Generation Data Model

New Innovations to improve Asset Master Data

Collaborate in a Common Asset Taxonomy

ASSET DATA INTEGRITY

Up to Date | Accurate | Comprehensive | Process-enabled

Customer Story – Kaesser Kompressoren

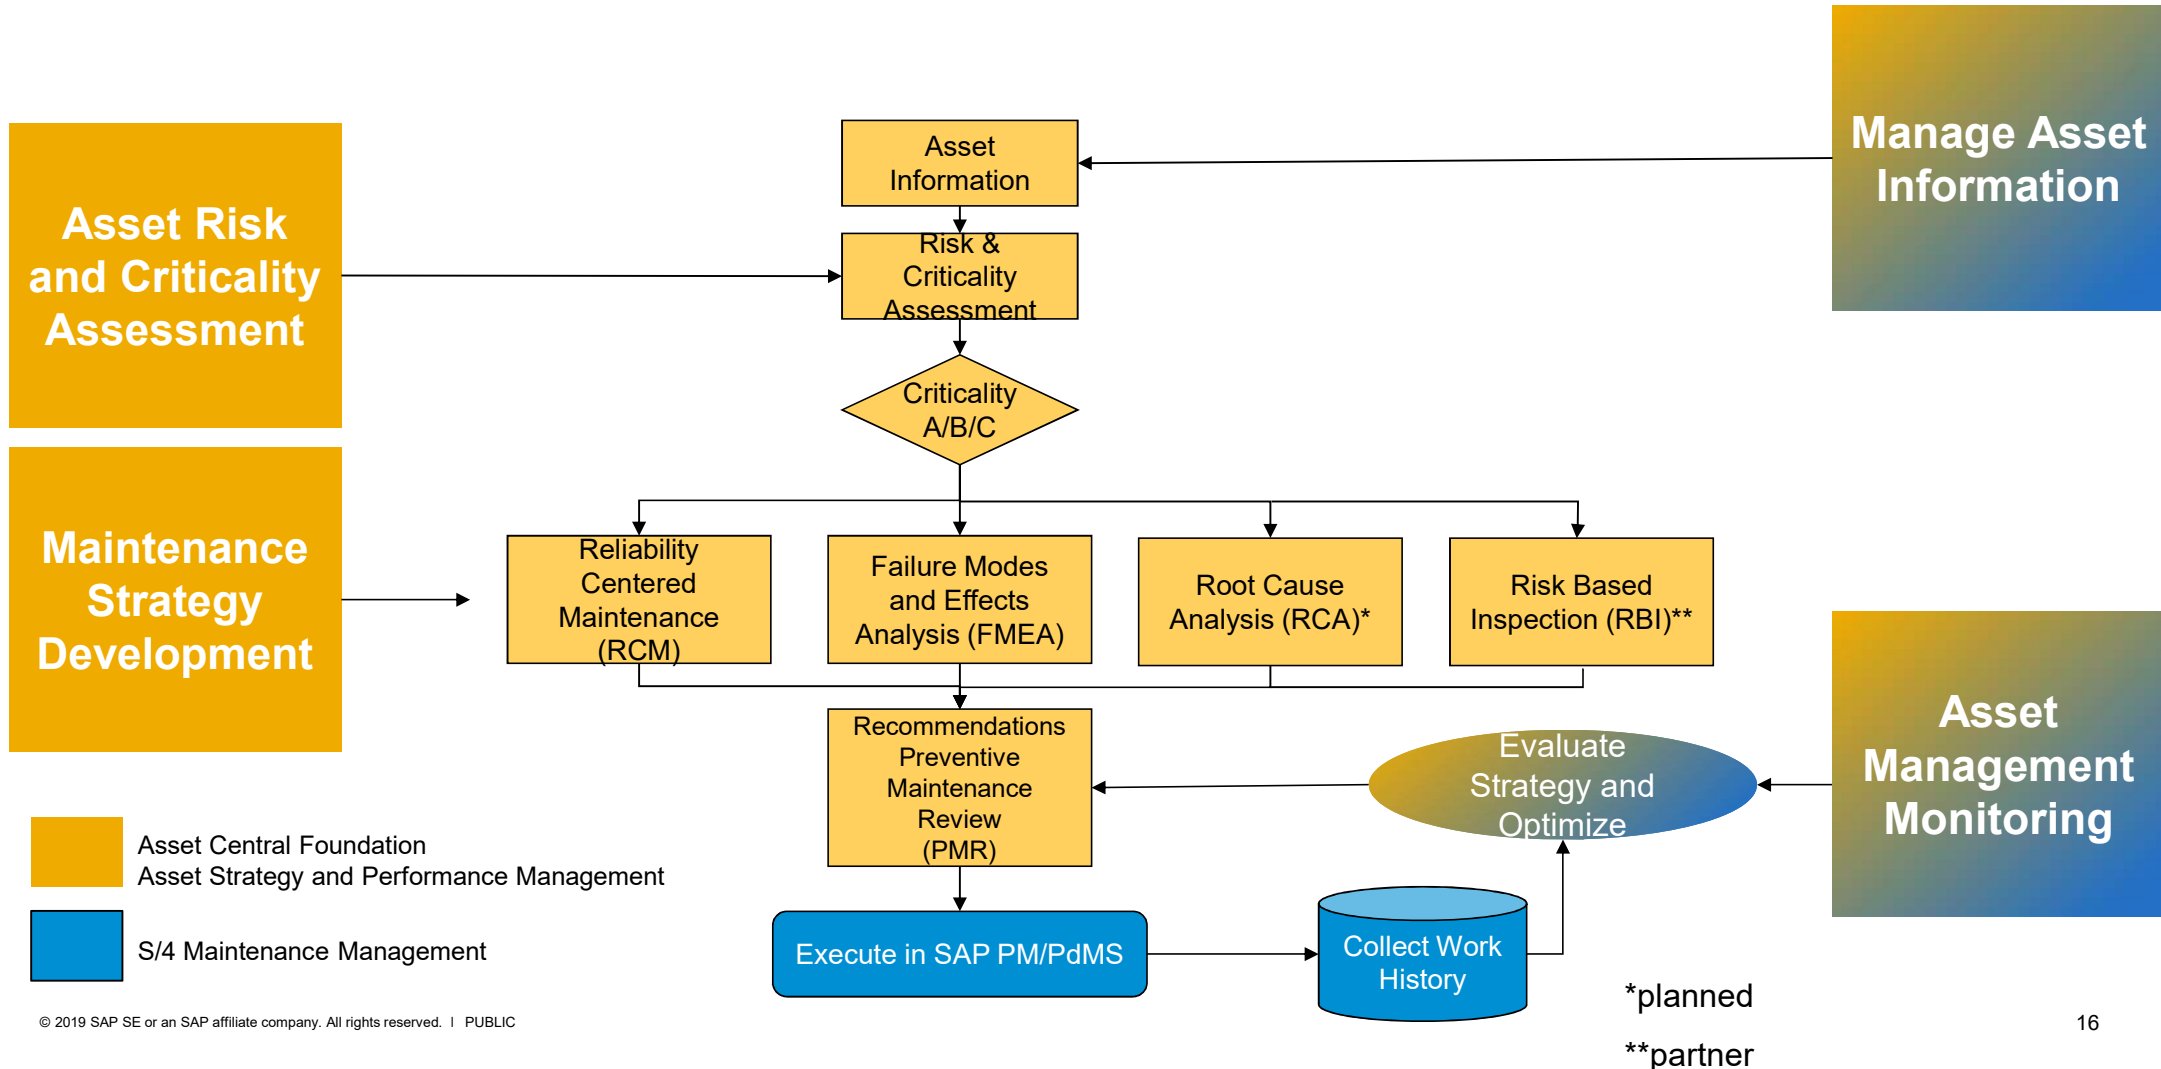

Process Innovation

Benefits

- AIN and PdMS as an enabler for the new business model
- Improved availability of compressor stations
- Move from unplanned to planned maintenance

Continuously Improve Maintenance Processes with ASPM

SAP Predictive Maintenance and Service

Core Capabilities

Decision Support for Asset Management & Reliability Professionals

A 360 Degree View of Assets

A comprehensive view across asset model, master, transactional and performance data in a single solution

Advanced Analytics for Decision Support

Advanced analytics to support maintenance execution and strategy decisions

Intuitive and Scalable Machine Learning

Machine learning for maintenance professionals...
"machine learning for the masses"

E2E Process Integration

Part of a comprehensive asset management portfolio

Customer Example

Train Operator

40% of maintenance is currently **reactive**

Company

Owens and operates a fleet of around **2,000 electro-trains, 2,000 locomotives and 30,000 coaches and wagons**

*The maintenance strategy proportions are for illustration purposes only and not reflective of actual customer percentages

Customer Example

Train Operator

Run to Failure

Preventative

Predictive

Solution

- Improve effectiveness of maintenance programs
- Data fusion between IT and OT data
- Remote train diagnostics
- Engineering rules and predictive models
- Dynamic planning of maintenance schedules

Improved Program Effectiveness
Starting with Improvements to Preventative Maintenance Plans

BRAKES

Energy Dissipation versus Mileage

DOORS

Open/Closure Cycles & Times versus Mileage

Benefits

- Higher asset availability & passenger satisfaction
- Projecting **100M Euro savings** per year in maintenance operations costs when fully implemented

SAP Intelligent Asset Management

Mobile Asset Management

Eliminate paperwork while reducing downtime and maintenance backlog

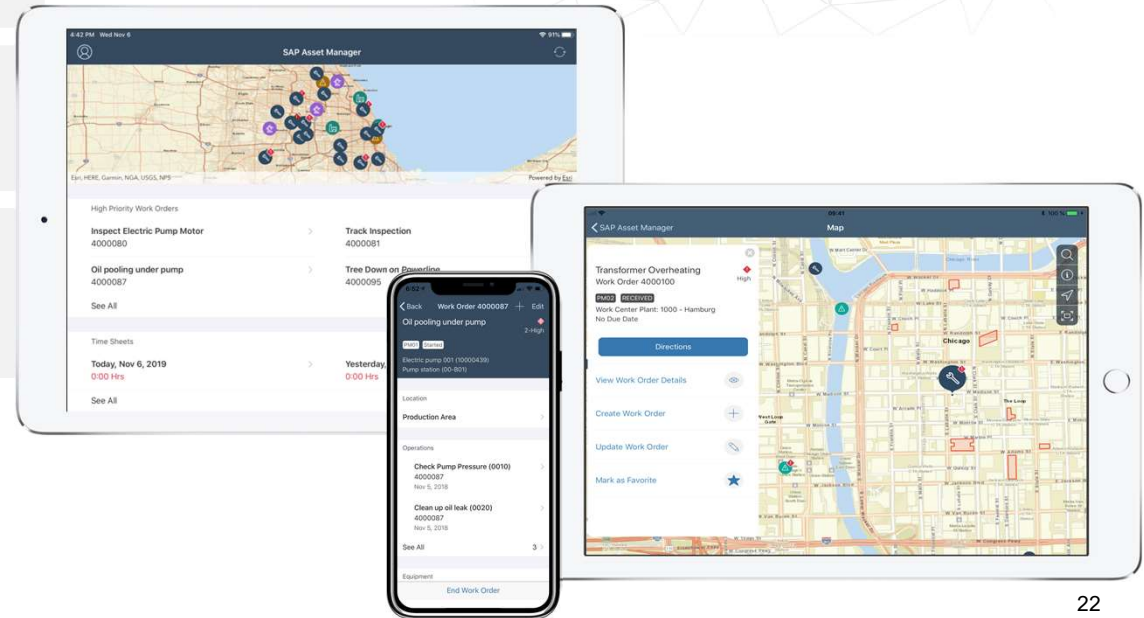

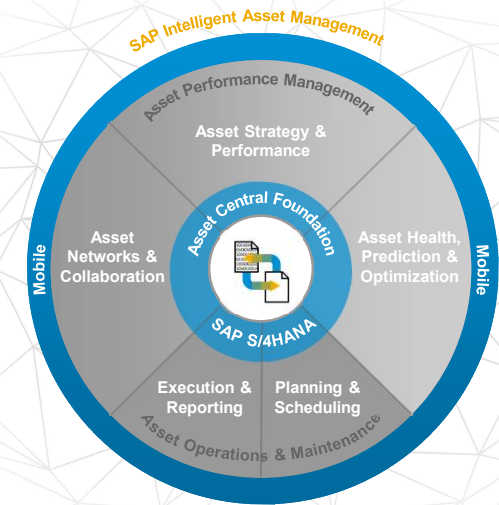

Extend and improve asset life and reliability by shortening work cycles

Turn capital spending into operational investments using cloud deployment

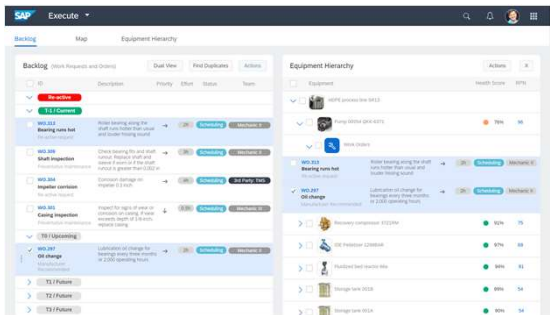

Manage existing work and asset data whether you're online, offline, or occasionally connected

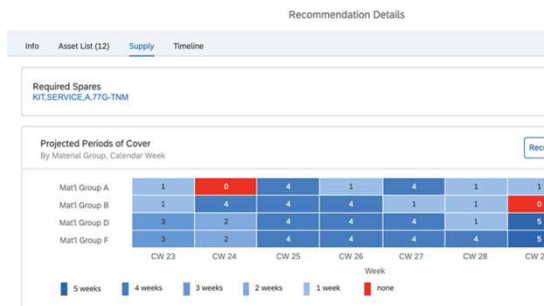

Investment Priorities for Intelligent Asset Management

Collaborative and IoT enabled Work Order*

Integrated processes with manufacturing; supply chain; service and procurement using one common 'asset central' foundation
