SAP**

**SAP Business Technology
Platform for RISE with SAP**

Accelerate innovation to unlock your business potential

Accelerate
move to cloud

Keep the
core clean

Automate
processes

Decide with
confidence

Accelerate your move to the cloud

Simplify data migration and
archive low value business data
using proven solutions

**Improve decisions with trusted
data** by consolidating and
centrally governing master data

**Ensure business continuity
and reduce risk** through end-to-
end testing

adani

- One master data framework for 11 businesses and nine ERPs
- 1.6M records cleaned and enriched
- Up to 20% increase in productivity

[Read the story](#)

 - One global system for R&D

[Read the story](#)

ALBEMARLE

- One single source of truth for better decision making
- >95% use of standard processes with zero core code modifications
- Enhanced data management and governance procedures

[Read the story](#)

**Keep the
core clean**

Deliver business agility using side-by-side extensions and native integrations with SAP applications

Lower TCO by reusing existing IT experts, reducing maintenance and fast-tracking upgrades

Work faster regardless of skill level with no-code to code-first development tools

- Side-by-side extension standardizes processes quickly, without touching core ERP
- Optical character recognition and ML to automate information capture
- Leverage existing ABAP skills to create innovative applications

[Read the story](#)

- Secure chat bot to provide critical information and order information 24/7
- 20 days to create proof of concept
- Reduced traffic to customer service portal

[Read the story](#)

- Increased efficiency and visibility in expense management processes
- 30% reduction in time from invoice entry to approval
- 25% reduction in customer onboarding and project initiation time

[Read the story](#)

Automate processes

Run a connected enterprise by streamlining integrations using out-of-the-box content

Eliminate inefficiencies with prebuilt automations across all mission-critical processes

Respond quickly to new realities by extending current processes and building new business models

- Bots execute multiple processes, with greater accuracy, in minutes vs. days
- 1,000 docs uploaded in 10 minutes vs. four days
- Automated batch processing turns a day's work into two minutes

[Read the story](#)

- Unification of enterprise processes in one interface that was quickly accepted by users
- 10 weeks to complete implementation
- 13 hours of time saved each month through process automation

[Read the story](#)

- Replaced legacy ERP system to completely change financial processes
- 6x faster refreshing of reports during closing
- 20% faster closing activities, saving time for key finance personnel

[Read the story](#)

Decide with confidence

Plan and forecast across all departments using integrated planning and analytics content

Get real-time, complete views of all your data no matter where it resides without moving it

Anticipate change and trends using artificial intelligence and predictive analytics

- 70% of forecast data entry points automated in SAP Analytics Cloud
- 7% improvement in forecast accuracy
- 2 hours to generate \$4.2 billion financial forecast

[Read the story](#)

- Centralized data sources in one secure and governed solution
- Empowered all employees with self-service modeling and data retrieval
- Enabled quick reporting and better forecasting of future business outcomes

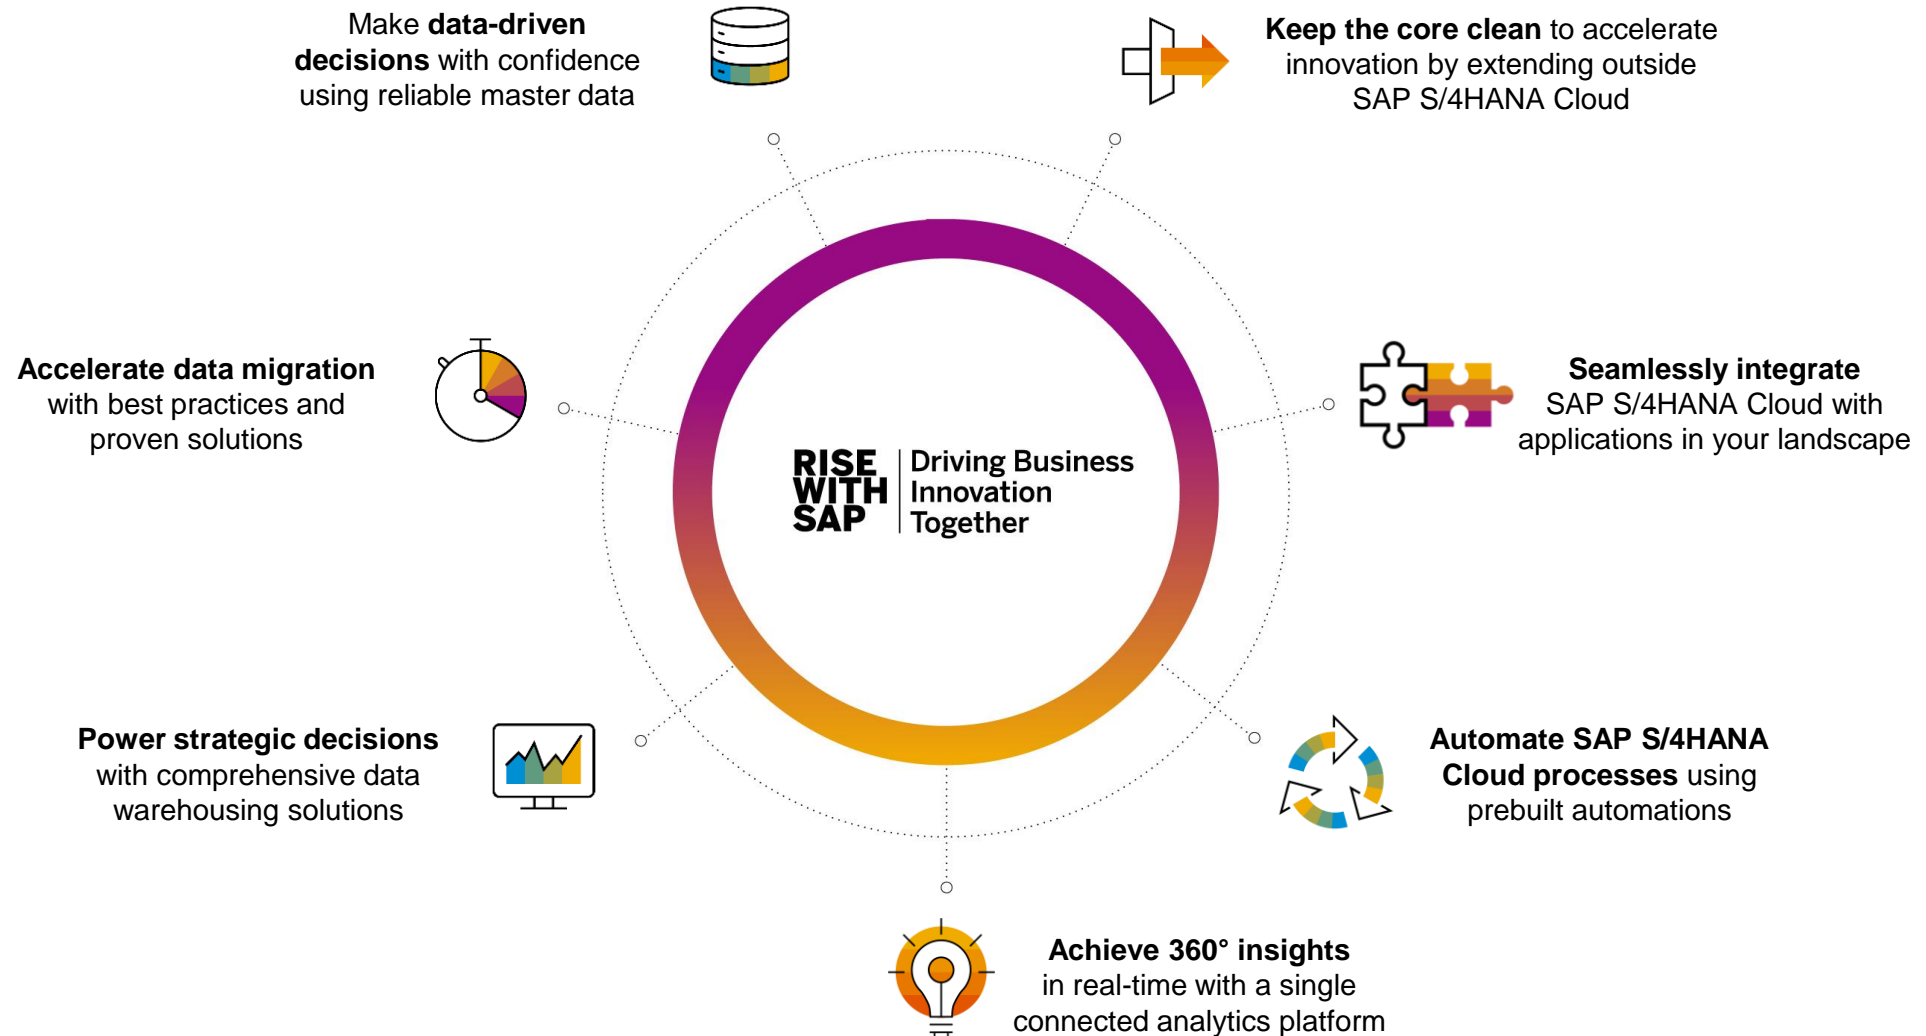

[Read the story](#)

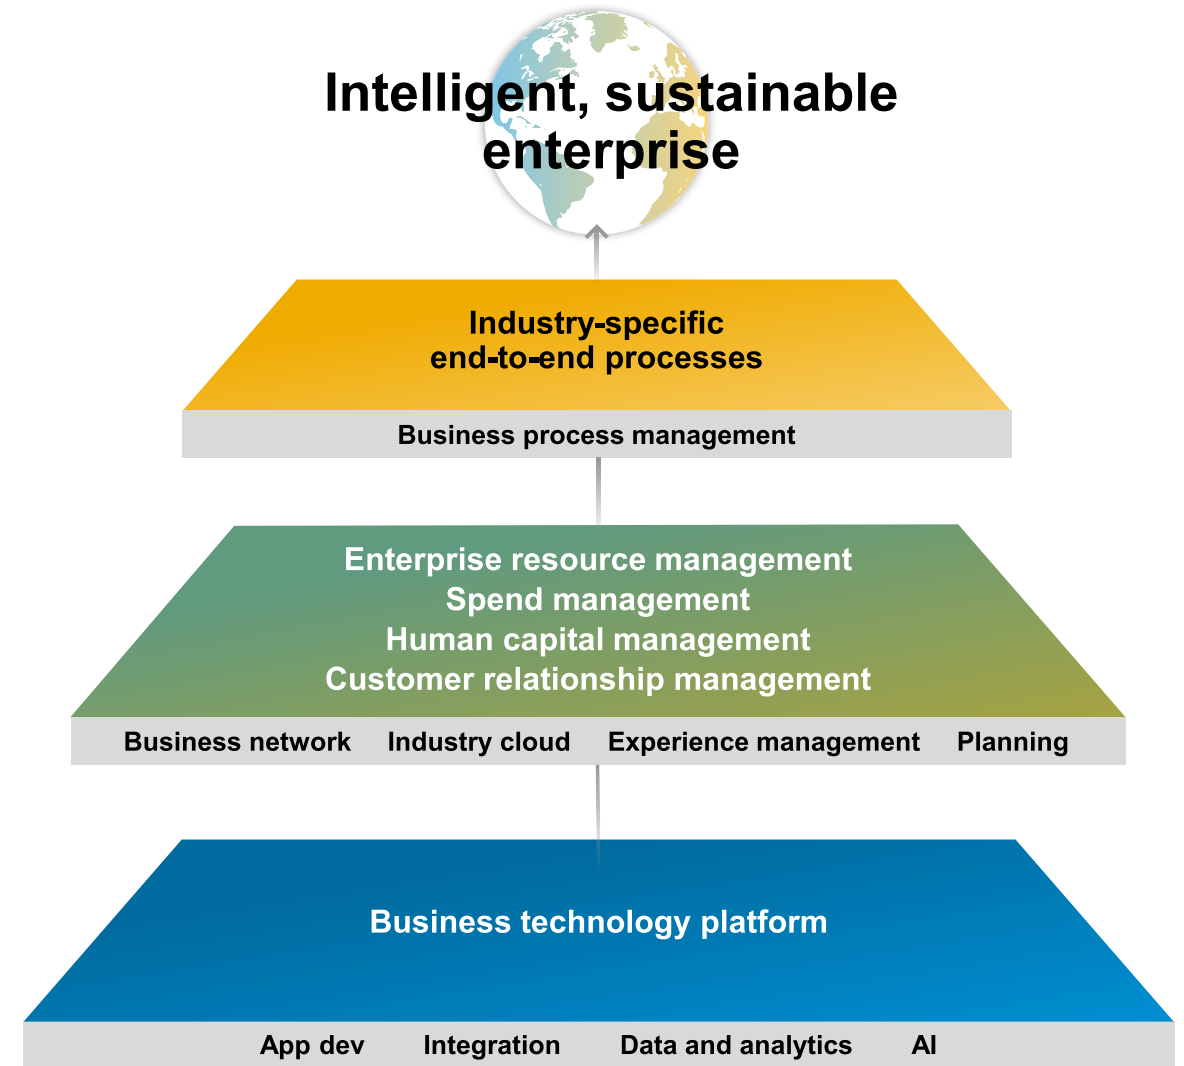

- Integrated automation and intelligence into its end-to-end business processes
- >70% of core business processes automated
- ~85% of core business processes standardized across 24 countries
