

# Achieving 360° Process Visibility for Enterprise Automation

A How-To for Realizing True Process Intelligence

Gilles Boivin  
Solution Engineer

## Key Outcomes and Objectives

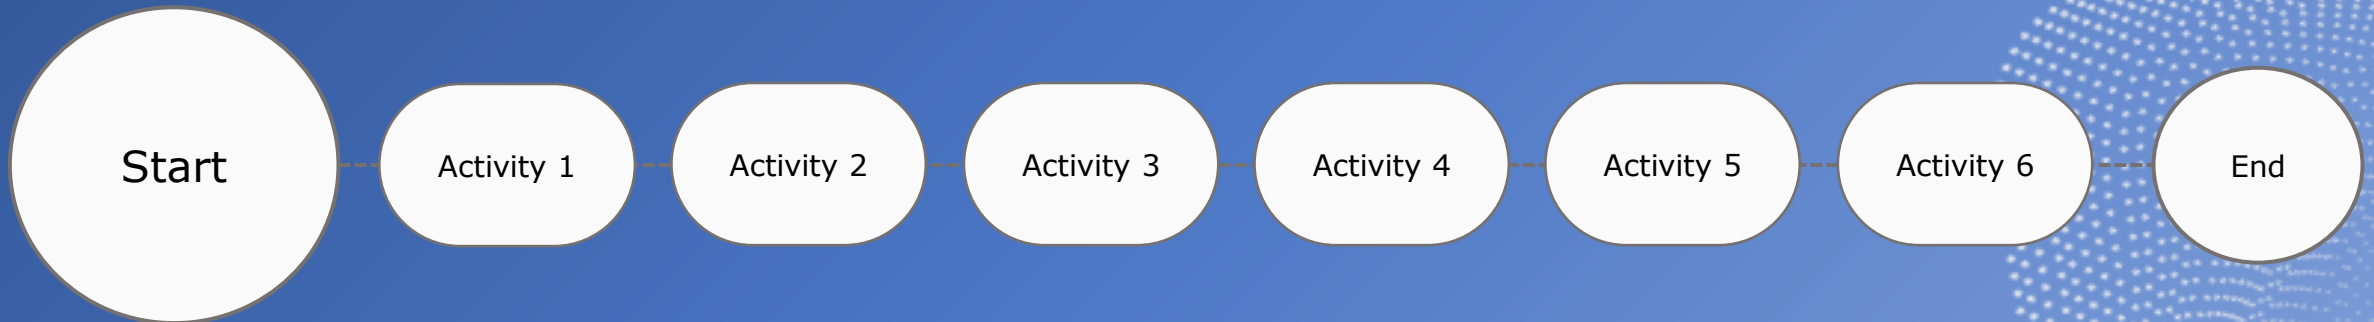

- Apply advanced analytics to match activities from different sources to show realized and potential automation and optimization benefits
- Expose real business value that can be mapped to the organizational and departmental level
- Understand your end-to-end business processes holistically as well as granularly
- Expedite the creation of useful process assets to automate enterprise applications and beyond

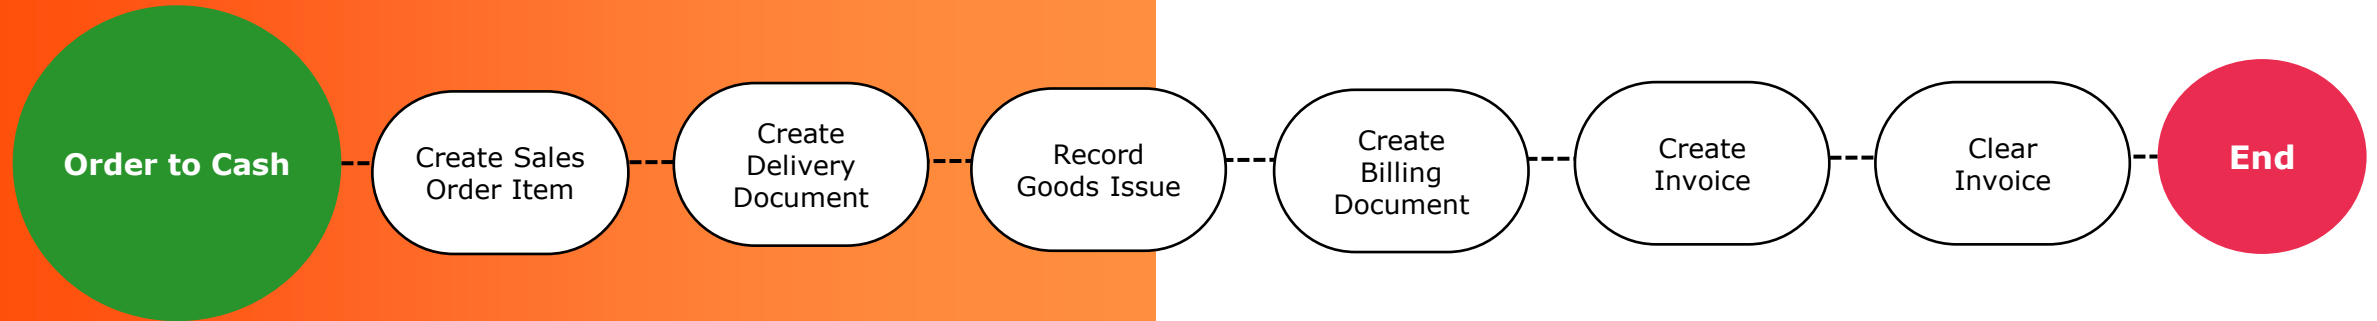

What is Process Intelligence?

# Business Process Blueprint
