Driscoll's: Using Innovative Process Management to Transform Operations and Secure the Supply Chain

Driscoll's Inc. is a California-based seller of fresh, hand-harvested strawberries and other berries. It is a fourth-generation family business that has been in the Reiter and Driscoll families since the late 1800s.

During the COVID-19 pandemic, Driscoll's experienced staff shortages caused by the global lockdowns and quarantine restrictions on workforces. The company wanted to create a new business model to help ensure continuity in meeting customer demand throughout its supply chain. Driscoll's was looking for a strategic management system that would offer a process management framework to address staffing for the critical tasks within the organization's key functions. The company also wanted to have processes in place to help it cope with the constant changes that arose out of the pandemic.

# Which **transformation journey** are you on?

SAP Signavio helps our Customers to achieve SAP vision

Enable every organization and every industry to become a network of intelligent, sustainable enterprises

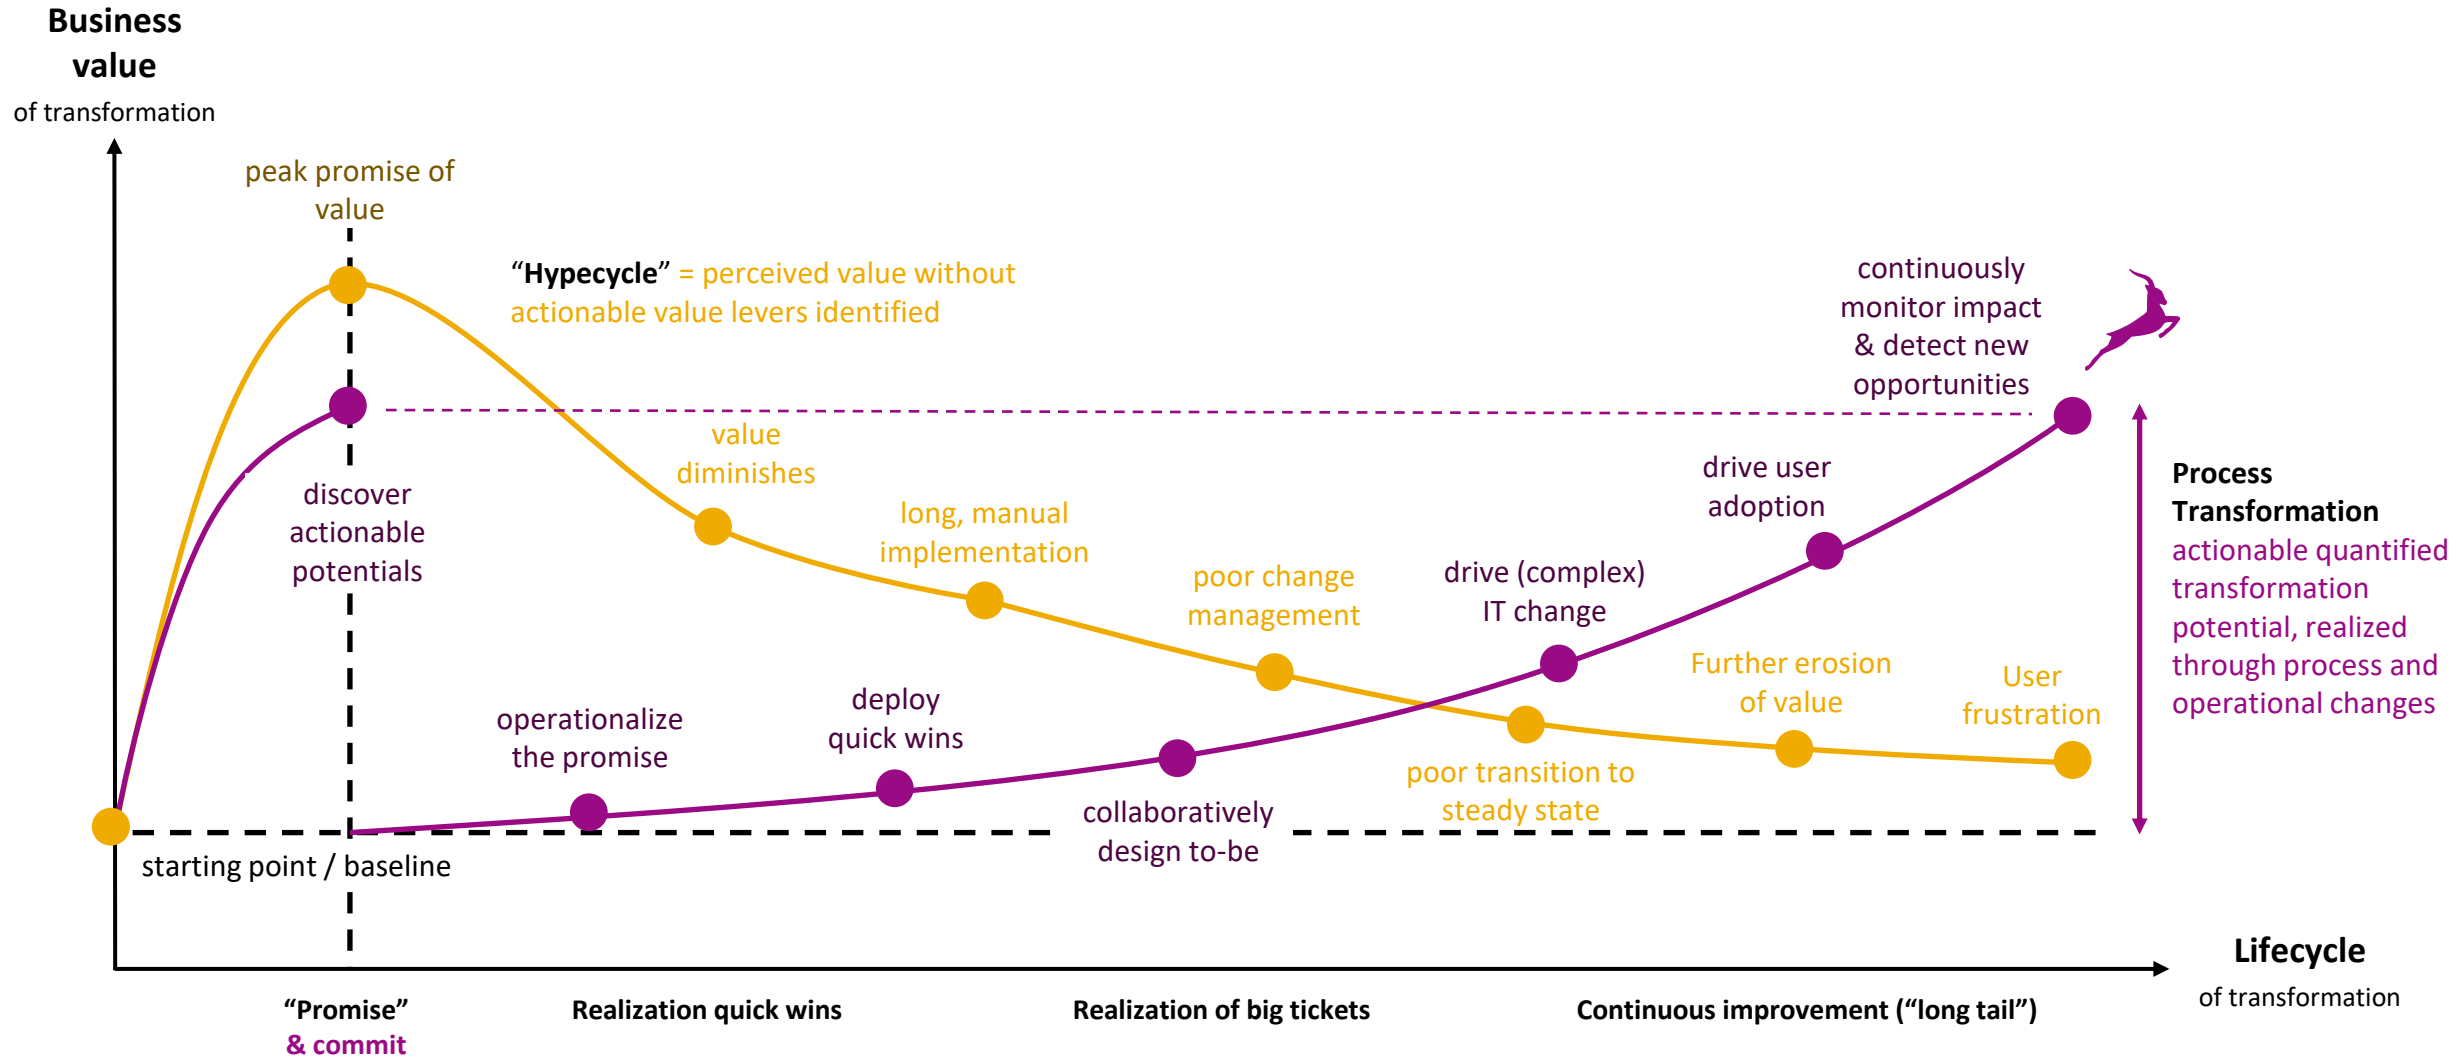

A cloud-based process transformation suite that gives companies the ability to understand, improve and transform all of their (end-to-end) business processes, fast and at scale
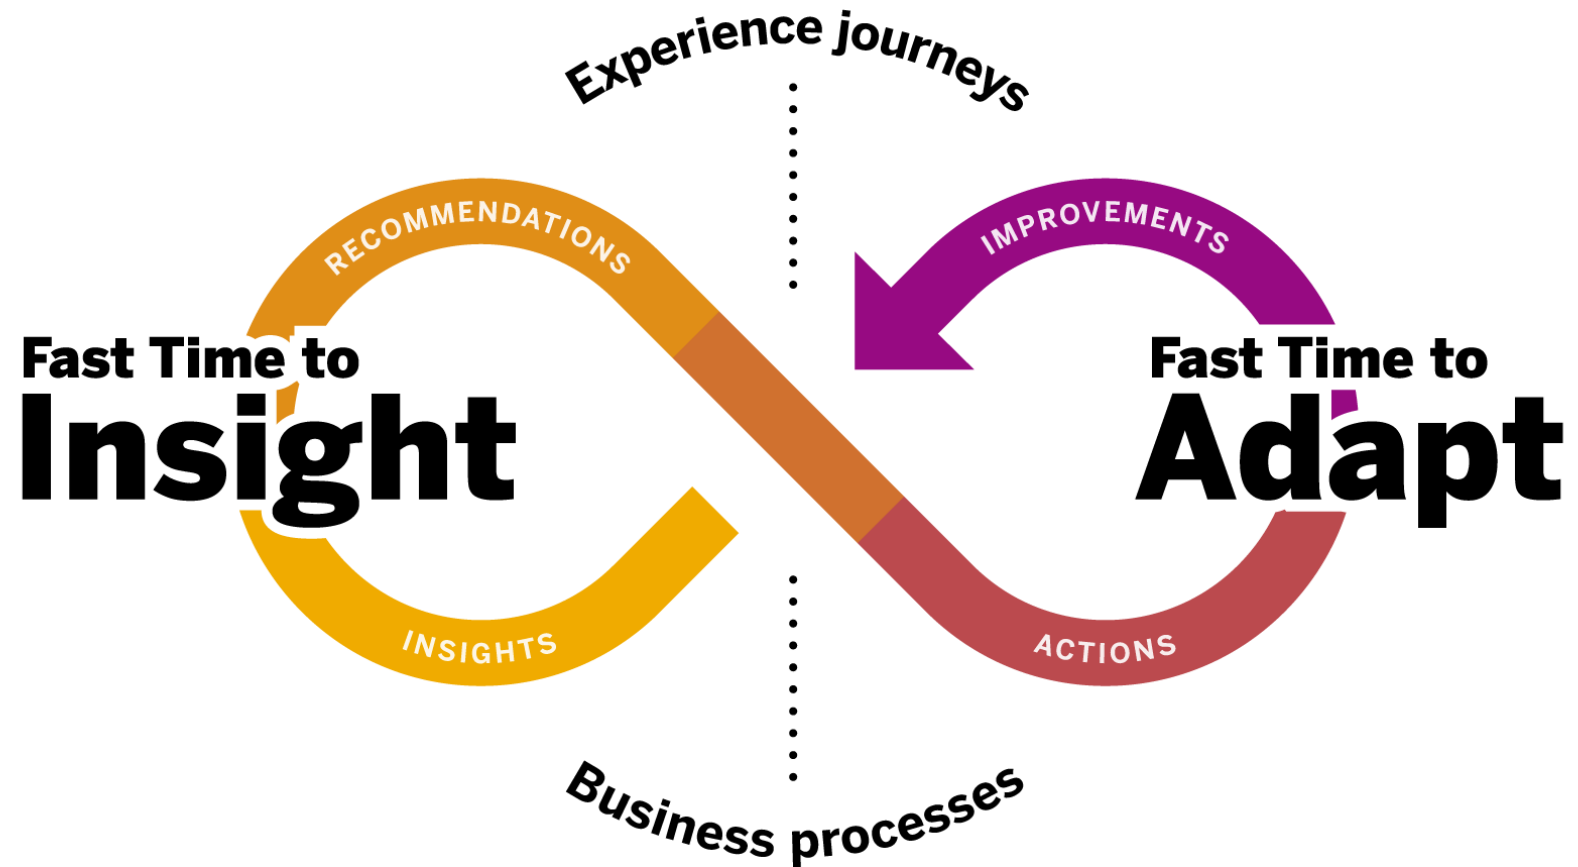

(across SAP and non-SAP solutions)
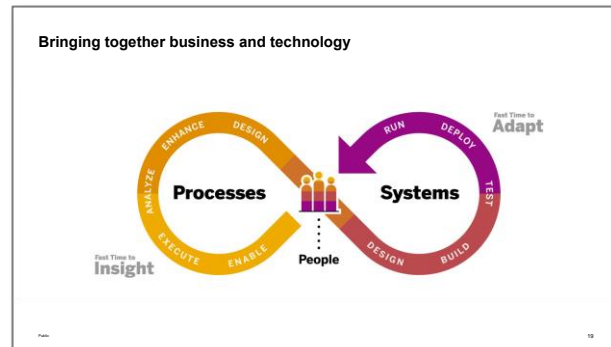

How to make transformation stick

Impact requires business user adoption on top of process/IT change

Business value
of transformation

peak promise of value

"**Hypecycle**" = perceived value without actionable value levers identified

continuously monitor impact & detect new opportunities

discover actionable potentials

value diminishes

long, manual implementation

poor change management

drive user adoption

drive (complex) IT change

Process Transformation
actionable quantified transformation potential, realized through process and operational changes

operationalize the promise

deploy quick wins

collaboratively design to-be

poor transition to steady state

Further erosion of value

User frustration

starting point / baseline

Lifecycle
of transformation

"**Promise**" & commit

Realization quick wins

Realization of big tickets

Continuous improvement ("long tail")

How to move into action with SAP Signavio
